

Anja Weidner

Deformation Processes in TRIP/TWIP Steels

In-Situ Characterization Techniques

Contents

1 Motivation	1
References	5
2 Plastic Deformation and Strain Localizations	7
2.1 Plastic Deformation	7
2.2 Dislocation Glide	11
2.3 Deformation Twinning	15
2.4 Critical Resolved Shear Stress	19
2.5 Strain Hardening	21
2.6 Strain Localizations	24
2.6.1 Strain Localizations on Microscopic Scale	27
2.6.2 Strain Localizations on Macroscopic Scale	33
References	41
3 Martensitic Phase Transformation	47
3.1 General Considerations	47
3.2 Thermodynamic Aspects of Martensitic Phase Transformation	50
3.3 Martensite in Ferrous Alloys	52
3.4 Martensitic Phase Transformation in Steels	54
3.4.1 Direct γ to α' Transformation	55
3.4.2 Direct γ to ε Transformation	60
3.4.3 Direct ε to α' Transformation	61
3.4.4 Indirect γ - α' Transformation via ε -Martensite	62
3.5 Influence of Stacking-Fault Energy	63
3.6 Olson-Cohen Model of Martensitic Phase Transformation	66
References	68
