Wood & Fire Safety

Proceedings of the 9th International Conference on Wood & Fire Safety 2020
Contents

Structure and Properties of Wood and Its Changes at High Temperatures

Small Scale Test to Measure the Strength of Adhesives at Elevated Temperatures for Use in Evaluating Adhesives for Cross Laminated Timber (CLT) .................................................. 3
Samuel L. Zelinka, Byrne Miyamoto, Nathan J. Bechle, and Douglas Rammer

Experimental Study of the Combustion of a Single Biomass Particle . . 9
Pahola Acevedo, Angel Martinez, Corine Lacour, and Alexis Coppalle

Study of Selected Fire Characteristics of Beech Wood Depending on Particle Size ............................................................... 16
Richard Kuracina, Zuzana Szabová, and Karol Balog

Characterization of Wood Chemical Changes Caused by Pyrolysis During Flaming Combustion Using X-Ray Photoelectron Spectroscopy .................................................. 22
Laura E. Hasburgh, Donald S. Stone, Samuel L. Zelinka, and Nayomi Z. Plaza

Initiation Parameters of Wood Based Materials ........................................ 28
Peter Rantuch, Jozef Martinka, and Igor Wachter

Odor and FT-IR Analysis of Chemical Species from Wood Materials in Pre-combustion Condition ........................................... 35
Kyoko Kamiya and Osami Sugawa

Effect of Thermal Load on the Heat Release Rate of the Selected Types of Wooden Floorings .............................................. 41
Linda Makovicka Osvaldova and Michaela Horvathova
Contents

Toxic Gas Emissions from Plywood Fires ........................................... 50
Bintu Grema Mustafa, Miss H. Mat Kiah, Gordon E. Andrews,
Herodotos N. Phylaktou, and Hu Li

Ignition of Wood Dust of African Padauk (Pterocarpus Soyauxii) .... 58
Miroslava Vandlůčková and Iveta Marková

Experimental Study on Odor from Combustible Wood Materials
in Their Pre-fire Situation in House ............................................... 66
Osami Sugawa and Kyoko Kamiya

The Impact of Radiant Heat on the Flexural Strength
and Impact Strength in Spruce Wood Bending ............................... 72
Anton Osvald and Jaroslava Štefková

Wood Burning Retardation and Wood-Based Materials

Fire Retardancy and Leaching Resistance of Pine Wood Impregnated
with Melamine Formaldehyde Resin in-Situ with Guanyl-Urea Phosphate/Boric Acid ................................................................. 83
Chia-feng Lin, Olov Karlsson, George I. Mantanis, Dennis Jones,
and Dick Sandberg

Application of a Bio-Based Coating for Wood as a Construction
Material: Fire Retardancy and Impact on Performance.................... 90
Stephanie Rensink, Michael F. Sailer, Roy J. H. Bulthuis,
and Mieke A. R. Oostra

Fire Retardant Treatment of Wood - State of the Art
and Future Perspectives ............................................................... 97
Philipp Sauerbier, Aaron Kilian Mayer, Lukas Emmerich,
and Holger Militz

Fire Behavior of Bamboo, Guadua angustifolia ................................ 103
Laia Haurie, Alina Avellaneda, and Joaquin Monton

The Study of Various Factors Influencing the Fire Retardant
Efficiency of Wood Varnish .......................................................... 109
Tatyana Eremina, Irina Kuznetsova, and Lyubov Rodionova

Flammability and Tribological Properties of Pine Sapwood,
Reinforced with Sodium Metasilicate and Non-food Oil ................. 114
Edita Garskaite, Dalia Brazinskiene, Svajus Asadauskas, Lars Hansson,
and Dick Sandberg

Expandable Graphite Flakes as an Additive for a New Fire Retardant
Coating for Wood and Cellulose Materials – Comparison Analysis .... 120
Batista Anielkis, Grześkowiak Wojciech, and Mazela Bartłomiej
Research of Effectiveness of Wood Fire Protection by Modified Epoxy Polymers .................................................. 125
Oleksandr Hryhorenko, Nataliia Saienko, Volodymyr Lypovyi, and Serhii Harbuz

The Study of the Complex of Properties of Water-Dispersion Fire Retardant Paint for Wooden Structures .................. 129
Tatyana Eremina, Dmitry Korolchenko, and Irina Kuznetsova

Fire Modeling, Fire Testing, Fire Certification, Fire Investigation, Fire Dynamic, Fire Behaviour Modelling, Smoke Control and Combustion Toxicity

Pine Wood Crib Fires: Toxic Gas Emissions Using a 5 m³ Compartment Fire ....................................................... 137
Bintu G. Mustafa, Rosmawati Zahari, Yangfu Zeng, Miss H. Mat Kiah, Gordon E. Andrews, and Herodotos N. Phylaktou

Comparison of Cone Calorimetry and FDS Model of Low-Density Fiberboard Pyrolysis ........................................... 144
Juraj Jancik, Paulina Magdolenová, and Frank Markert

Behaviour of Timber Doors in Fire Conditions .......................... 152
Bartłomiej Sędłak, Paweł Sulik, and Daniel Izydorczyk

Charring of Timber with Fissures in Experimental and Numerical Simulations .................................................... 159
Jaroslav Sandanus, Zuzana Kamenická, Peter Rantuch, Jozef Martinka, and Karol Balog

Nour Elsagan and Yoon Ko

Evaluation of Structural Elements Affected by Fire .................. 173
Jan Bujnak and Abdelhamid Bouchair

Oleksandr Nuianzin, Dmytro Kryshtal, Oleh Zemlianskyi, Artem Nesterenko, and Taras Samchenko

Experimental and Numerical Analysis of Fire Development in Compartment Fires with Immobile Fire Load .................. 185
Sven Brunkhorst and Jochen Zehfuß

Behaviour of Wooden Materials Exposed to Electrical Ignition Sources .......................................................... 191
Miroslava Nejtková
Contents

Feasibility Study of Correlating Mass Quantity Output and Fuel Parameter Input of Different Simulations Using Fire Dynamics Simulator ................................................................. 197
Steffen Oliver Sale

Thermography of Wood-Base Panels During Fire Tests in Laboratory and Field Conditions ................................................................. 203
Denis Kasymov, Mikhail Agafontsev, Pavel Martynov, Vladislav Perminov, Vladimir Reyno, and Egor Golubnichiy

Fire Safety in Wooden Objects

Issues and Solutions for Compartments with Exposed Structural Mass Timber Elements ........................................................................... 213
David Barber, Robert Dixon, Susan Deeny, and Pascal Steenbakkers

Australian Building Code Change - Eight-Storey Timber Buildings ......................................................................................... 219
Paul England and Boris Iskra

A Case Study Comparing the Fire Risk in a Building of Non-combustible Frame and a Timber Frame Building ........................................... 226
Bjorn Karlsson, Iris Gudnadottir, and Bodvar Tomasson

Overview of North American CLT Fire Testing and Code Adoption ......................................................................................... 232
Samuel L. Zelinka, Laura E. Hasburgh, and Keith J. Bourne

From Low-Rise to High-Rise Buildings: Fire Safety of Timber Frame Facades ......................................................................................... 238
Anton Kraler, Clemens Le Levé, Thomas Badergruber, and Michael Flach

Experimental Study on Fire Resistance of One-Way Straight and Through Mortise-Tenon Timber Joints ......................................................................................... 244
Lingzhu Chen, Qingfeng Xu, Chongqing Han, Xi Chen, Xiaofeng Hu, and Zhengchang Wang

Fire Performance of CLT Members: A Detailed Review of Experimental Studies Across Multiple Scales ......................................................... 251
Christos Kontis, Christoforos Tsichlas, Dionysios I. Kolaitis, and Maria A. Founti

Building Envelope Material Solutions for the Timber Structures Intended for Housing and Accommodation in Terms of Fire Safety, Fire Progression, and Consequences of Fire ......................................................................................... 258
Agnes Iringová

Fire Design Model for Timber Frame Assemblies with Rectangular and I-Shaped Members ................................................................. 268
Katrin Nele Máger, Mattia Tiso, and Alar Just
Proposal of Changes in Fire Safety Assessment for Extending the Usability of Wood in Buildings

Petr Kučera, Isabela Bradáčová, Jiří Pokorný, and Tereza Česelská

Behavior of Bamboo Wall Panel at Elevated Temperature

Anu Bala, Ashish Kumar Dash, Supratic Gupta, and Vasant Matsagar

Study of Thermal Exposure of a Seat of Fire Inside a Building with a Façade Fabricated of Timber Materials on the Construction Elements of Adjacent Facilities

Vadym Nizhnyk, Serhii Pozdieiev, Yurii Feshchuk, Olexander Dotsenko, and Volodymyr Borovykov

Stanislav Jochim, Linda Makovicka Osvaldova, and Martin Zachar

Impact of Bolt Pattern on the Fire Performance of Protected and Unprotected Concealed Timber Connections

Aba Owusu, Osama (Sam) Salem, and George Hadjisophocleous

Effect of Thermal Loading on Various Types of Wood Beams

Stanislava Gašpercová and Miroslava Vandličková

A Study of the Fire Performance of Timber-Walled Compartments

Avishek Chanda, Swagata Dutta, and Debes Bhattacharyya

Research of Wooden Bearing Structures Behavior Under Fire Condition with Use Advanced Methods of Fire Resistance Calculation Considering Eurocode 5 Recommendation

Serhii Pozdieiev, Stanislav Sidnei, Olha Nekora, and Svitlana Fedchenko

Forest Fires

Experimental Studies of the Localization of Combustion of Forest Fuel Material Using a Water Barrier Line

Geniy V. Kuznetsov, Ivan S. Voitkov, Roman S. Volkov, Yuliana K. Atroshenko, and Pavel A. Strizhak

Measuring the Impact of Fire Occurrence Risk on the Value of Forest Land at Growing Scots Pine (Pinus sylvestris, L.) and European Beech (Fagus sylvatica, L.) Stands in the Territory of Slovak Paradise

Ján Holécy and Michaela Korená Hillayová

Analysis of the Existence of Geospatial Data Necessary for Fire Modeling in the Republic of Serbia

Marko Marković, Mirjana Laban, Jovana Maksimović, Tatjana Kuzmić, Mehmed Batilović, and Suzana Draganić

Experimental Evaluation of the Effectiveness of the Use of Thermal Imagers in Fires Extinguishing with the Presence of Wooden Combustible Substances
Yuriy Klyuchka, Kostiantyn Afanasenko, and Khalid Hasanov

Poster Abstracts

The Impact of Material Solutions on Fire Safety of Timber Frame Structures
Pawel Sulik and Bartlomiej Szedlak

Properties of Flammable Materials in Passenger Cars Describing Their Fire Behavior
Petra Bursikova, Romana Friedrichova, Libor Sveck, Milan Ruzicka, and Jan Karl

Experimental Study of the Combustion of a Single Biomass Particle
Acevedo Pahola, Angel Martinez, Lacour Corine, and Coppalle Alexis

Research on Electrical Fault Beads Ignition Ability—a Potential Source of Wildland Fires
Huifei Lu, Jun Deng, Lei Bai, Weifeng Wang, and Jingyu Zhao

Heat Flux from Wood Filled Transport Package Impact Limiter Under Fire Conditions
Martin Feldkamp, Marina Erenberg, Marko Nehrig, Claus Bletzer, Andre Musolff, and Frank Wille

Gaseous and Particulate Emissions of a Feed-Pellet Domestic Boiler
Angel Martinez, Corine Lacour, Jerome Yon, and Alexis Coppalle

Study on Design Fire Protection Elements in Wooden Facades
Maria Pilar Giraldo, Ana Maria Lacasta, and Andreu Segura

Evaluation of the Link Between Pre-fire Fuel Estimates and Fire Radiative Energy for Large Fires in Portugal
Celia M. Gouveia, Catarina Alonso, and Patricia Pascoa

Reduction of Flammability of Synthetic and Natural Composite Materials Based on Formaldehyde-Containing Bonding Agents
Anatolii Chernov, Andrey Shmakov, Oleg Korobeinichev, Munko Gonchikzhapov, and Valeriy Tatarenko

Components Decisive for the Failure of Chosen Fireproof Separating Elements
Daniel Izydorczyk, Bartlomiej Szedlak, and Pawel Sulik

Flame-Retardant and Smoke-Suppressed Silicone Foams with La/Mg/Zn/al Layered Double Hydroxide and Zinc Borate
Furu Kang, Jun Deng, and Jingyu Zhao
New Method for Mineralization of Wood for Improved Fire Properties
Andreja Pondelak, Rožle Repič, Tomaž Pazlar, Nataša Knez, Friderik Knez, and Andrijana Sever-Škapin

Fire Properties of Beech Wood Mineralized by a Novel Mineralization Technique
Rožle Repič, Andreja Pondelak, Nataša Knez, Friderik Knez, and Andrijana Sever-Škapin

Flammable Load as a Trigger of Fire After a Road Accident Resulting in Death from Burning
Martin Skripko

Influence of the Convection Coefficient for the Modelisation of a Fire Test on a Nuclear Transport Package
Norma Verbrugghe, Gaël Desroches, Marianne Moutarde, and Florence Gauthier

Establishment of Local-Scale Weather Forcing Conditions to Iberia’s Largest Fires
Inês Vieira, Ana Russo, Ricardo M. Trigo, and Célia M. Gouveia

Preparation and Property of Microcapsules for Fire Prevention
Kai Wang, Yunzhong He, Jun Deng, and Furu Kang

Experimental Study of Flame Height of Double Oil Tank Fires Under Different Lip Heights and Distances
Ruowen Zong

Fire Safety Evaluation on Cultural Relics in Shaanxi, China
Jiajia Song, Jingyu Zhao, Kai Wang, and Jun Deng

Fire Tests of CLT Specimen Protected by Intumescent Paint
Lars Sørensen and Frank Markert

Fire Resistance of Wooden Panels with Retarded Clay Plaster
Radovan Gracovský, L’udmila Tereňová, and Anna Danihelová

New Type Fire-Retardant for Various Wood Products
Jussi Ruponen and Jari Kukkonen
