Contents

- Preface, vii**
About the Companion Website, ix
- 1 Attitudes of Lines and Planes, 1**
Objectives, 1
Definitions, 2
Structural Elements, 4
Structural Grain, 5
- 2 Outcrop Patterns and Structure Contours, 9**
Objectives, 9
Structure Contours, 12
The Three-Point Problem, 13
Drawing a Topographic Profile, 14
Drawing Cross Sections of Structure
Contour Maps, 15
Determining Outcrop Patterns
with Structure Contours, 15
Gently Bent Layers, 17
Determining Exact Attitudes
from Outcrop Patterns, 18
Determining Stratigraphic Thickness
in Flat Terrain, 19
Determining Stratigraphic Thickness
on Slopes, 20
Determining Stratigraphic Thickness by
Orthographic Projection, 20
- 3 Stereographic Projection, 31**
Objective, 31
Plotting a Plane, 33
Plotting a Line, 33
Plotting the Pole to a Plane, 34
Line of Intersection of Two Planes, 35
Angles of Lines within a Plane, 36
Determining True Dip from Strike
and Apparent Dip, 37
- Determining Strike and Dip from
Two Apparent Dips, 38
- 4 Folds and Cross Sections, 43**
Objectives, 43
Glossary of Fold Terms, 43
Classification by Shape, 45
Classification by Orientation, 45
Fold Classification Based on Dip
Isogons, 47
Outcrop Patterns of Folds, 48
Cross or Structure Sections of Folded
Layers, 49
The Arc Method, 50
Down-Plunge Projection, 50
- 5 Stereographic Analysis of Folded Rocks, 67**
Objectives, 67
Beta (β) Diagrams, 67
Pi (π) Diagrams, 68
Pole Plotter, 68
Determining the Orientation of the Axial
Plane Using Fold Trace, 69
Constructing the Profile of a Fold Exposed
in Flat Terrain, 69
Determining the Orientation of the Axial
Plane Without a Fold Trace, 70
Simple Equal-Area Diagrams of Fold
Orientation, 71
Contour Diagrams, 71
Determining the Fold Style and Interlimb
Angle from Contoured Pi Diagrams, 75
- 6 Rotations and Determining Original
Directions in Folded Rocks, 87**
Objectives, 87
Rotation of Lines, 87

- The Two-Tilt Problem, 89
 Cones: The Drill-Hole Problem, 90
 Unfolding Folds, 93
- 7 Foliations, Parasitic Folds, and Superposed Folds, 95**
 Objectives, 95
 Foliations, 95
 Parasitic Folds, 97
 Superposed Folds, 99
- 8 Strain Measurements in Ductile Rocks, 107**
 Objectives, 107
 Longitudinal Strain, 107
 Shear Strain, 108
 The Strain Ellipse, 108
 Strain Fields, 108
 The Coaxial Total Strain Ellipse, 109
 Measuring Strain in Deformed Objects, 110
 Strain in Folds, 111
 Deformed Fossils as Strain Indicators, 111
 Mohr Circle for Sheared Fossils, 112
 Mohr Circle for Boudinage, 113
- 9 Advanced Strain Measurements, 125**
 Objectives, 125
 Fry Method, 126
 R_f/ϕ Method, 127
- 10 Brittle Failure, 131**
 Objective, 131
 Quantifying Two-Dimensional Stress, 131
 The Mohr Diagram, 133
 The Mohr Circle of Stress, 134
 Rules for Going Between Mohr Space and Real Space, 135
 The Failure Envelope, 135
 The Importance of Pore Pressure, 138
- 11 Analysis of Fracture Systems, 147**
 Objectives, 147
 Data Collection, 148
 Rose Diagram, 148
 Length vs Strike Graphs, 149
 Interpreting Joint Strike Diagrams, 150
 Contouring Joint Density, 150
 Accounting for Dip in Joints, 152
- 12 Faults, 157**
 Objectives, 157
 Measuring Slip, 159
 Rotational (Scissor) Faulting, 161
 Map Patterns of Faults, 162
 Timing of Faults, 163
- 13 Dynamic and Kinematic Analysis of Faults, 169**
 Objectives, 169
 Dynamic Analysis, 169
 Kinematic Analysis, 174
- 14 Structural Synthesis, 191**
 Objective, 191
 Structural Synthesis, 191
 Some Suggestions for Writing Style, 193
 Common Errors in Geologic Reports, 193
- 15 Deformation Mechanisms in Mylonites, 197**
 Objectives, 197
 Deformation Mechanisms, 197
 Fault Rocks, 200
 Kinematic Indicators, 202
 S-C Fabrics, 202
 Asymmetric Porphyroclasts, 202
 Oblique Grain Shapes in Recrystallized Quartz Aggregates, 203
 Antithetic Shears, 203
 Strain and Offset in Shear Zones, 204
 Potential Sources of Error, 205
- 16 Construction of Balanced Cross Sections, 213**
 Objectives, 213
 Thrust-Belt “Rules”, 213
 Recognizing Ramps and Flats, 214
 Relations Between Folds and Thrusts, 215
 Requirements of a Balanced Cross Section, 218
 Constructing a Restored Cross Section, 219
 Constructing a Balanced Cross Section, 220
- 17 Introduction to Plate Tectonics, 233**
 Objectives, 233
 Fundamental Principles, 233
 Plate Boundaries, 234
 Triple Junctions, 235
 Focal-Mechanism Solutions (“Beach-Ball” Diagrams), 236
 Earth Magnetism, 240
 Apparent Polar Wander, 242
- 18 Virtual Field Trip, 253**
 Objective, 253
 Newfoundland Folds Field Trip, 254
 Ramapo Fault Field Trip, 255
- References, 257**
Further Reading, 259
Index, 265
