

Advanced Textbook Series

Unconventional Hydrocarbon Resources

Techniques for Reservoir Engineering Analysis

Editors

Reza Barati Ghahfarokhi

Mustafa M. Alhubail

This Work is a co-publication of the American Geophysical Union and John Wiley and Sons, Inc.

Contents

| | |
|--|------|
| Contributors | xiii |
| Preface | xv |
| | |
| 1 Introduction to Unconventional Hydrocarbon Resources | 1 |
| <i>Mustafa M. Alhubail and Reza Barati Ghahfarokhi</i> | |
| 1.1 Background | 1 |
| 1.2 Overview of Shale Revolution | 2 |
| 1.2.1 What Led to the Shale Phenomenon? | 3 |
| 1.2.2 Importance of Recent Unconventional Resource Discoveries | 4 |
| 1.3 Basic Definitions and Classifications | 5 |
| 1.3.1 Conventional and Unconventional Resources | 5 |
| 1.3.2 Unconventional Oil-Bearing Sediments | 6 |
| 1.3.3 Unconventional Natural Gas Resources | 6 |
| 1.4 Global Description of Unconventional Plays | 8 |
| 1.4.1 North America Unconventional Plays | 9 |
| 1.4.2 South America Unconventional Plays | 20 |
| 1.4.3 Europe Unconventional Plays | 24 |
| 1.4.4 Middle East Unconventional Plays | 30 |
| 1.4.5 Africa Unconventional Plays | 31 |
| 1.4.6 Asia Unconventional Plays | 33 |
| 1.4.7 Australia Unconventional Plays | 36 |
| 1.5 Unconventional Resources Interpretation Workflow | 37 |
| 1.5.1 Workflow of Unconventional Reservoirs | 37 |
| 1.6 Future Projection and Challenges | 38 |
| 1.7 General Remarks | 39 |
| 1.8 Problems | 39 |
| Additional Reading | 40 |
| References | 40 |
| | |
| 2 Petrophysical Properties of Unconventional Reservoirs | 45 |
| <i>Negar Nazari, Mustafa M. Alhubail, Sherifa E. Cudjoe, and Reza Barati Ghahfarokhi</i> | |
| 2.1 Background | 45 |
| 2.2 Petrophysics | 45 |
| 2.2.1 Evaluation of Rock Properties | 46 |

| | |
|---|------------|
| 2.2.2 Shale Volume | 46 |
| 2.2.3 Gamma Ray Spectroscopy | 48 |
| 2.3 Lithology Evaluation | 51 |
| 2.3.1 Lithology Measurements Using Cross-Plots | 52 |
| 2.3.2 Lithology Measurements Using a Combination of Logs | 53 |
| 2.3.3 Lithology Measurements Using the Diffuse Reflectance Infrared Fourier Transform Spectroscopy Techniques | 57 |
| 2.4 Porosity | 58 |
| 2.4.1 Porosity Measurement | 60 |
| 2.4.2 NMR Core Porosity for Shales | 71 |
| 2.5 Pore-Size Distribution | 75 |
| 2.5.1 Pore-Size Distribution Using NMR Logging | 75 |
| 2.5.2 Pore-Size Distribution Using Nitrogen Adsorption | 78 |
| 2.6 Permeability | 80 |
| 2.6.1 Unsteady-State Permeability Measurement Methods | 81 |
| 2.6.2 Single Phase Permeability Measurements | 89 |
| 2.6.3 NMR Permeability | 91 |
| 2.6.4 Relative Permeability | 95 |
| 2.6.5 NMR Capillary Pressure | 99 |
| 2.6.6 Relative Permeability from NMR Pseudocapillary Pressure | 99 |
| 2.7 Saturation | 100 |
| 2.7.1 Techniques for Calculating Water Saturation | 100 |
| 2.7.2 Resistivity Logs | 100 |
| 2.7.3 NMR Saturation Estimation | 104 |
| 2.8 Wettability | 105 |
| 2.8.1 Wettability Measurement | 105 |
| 2.9 Hydrocarbon Pore Volume and Reserve Estimation | 110 |
| 2.9.1 Volumetric Analysis Theory | 110 |
| 2.10 Problems | 115 |
| Additional Reading | 117 |
| References | 117 |
| 3 Petroleum Geochemistry in Organic-Rich Shale Reservoirs | 131 |
| <i>Sherifa E. Cudjoe, Mustafa M. Alhubail, and Reza Barati Ghahfarokhi</i> | |
| 3.1 Background | 131 |
| 3.2 Evolution of Organic Matter | 131 |
| 3.2.1 Diagenesis | 132 |
| 3.2.2 Catagenesis | 132 |
| 3.2.3 Metagenesis | 133 |
| 3.3 Total Organic Carbon (TOC) | 133 |
| 3.4 Kerogen, Bitumen, and/or Pyrobitumen | 134 |
| 3.4.1 Classification of Kerogen | 136 |
| 3.5 Vitrinite Reflectance | 138 |
| 3.6 Solid Bitumen Reflectance | 139 |
| 3.7 Organic Porosity | 140 |
| 3.8 Methods of Determining Source Rock Potential | 142 |

| | | |
|----------|---|------------|
| 3.8.1 | Direct Combustion | 143 |
| 3.8.2 | Indirect Method | 143 |
| 3.8.3 | Rock-Eval Pyrolysis Method | 143 |
| 3.8.4 | In-Situ Measurements | 151 |
| 3.9 | Original TOC and Hydrocarbon Yield Determinations | 160 |
| 3.9.1 | Organic Porosity from Rock-Eval Parameters | 163 |
| 3.10 | Thermal Maturity and Source Rock Assessment | 165 |
| 3.10.1 | Biological Markers (Biomarkers) | 165 |
| 3.10.2 | Diamondoids | 168 |
| 3.11 | Raman Spectroscopy Analysis of Thermal Maturity in Kerogen | 170 |
| 3.11.1 | Thermal Maturity Controls of Organic Matter Types in LEF Samples | 171 |
| 3.11.2 | Maturity-Related Changes | 176 |
| 3.12 | Drifts Analysis of Kerogen Maturity | 176 |
| 3.13 | Problems | 179 |
| | Additional Reading | 182 |
| | References | 182 |
| 4 | Application of Imaging Techniques in the Characterization of Organic-Rich Shales | 189 |
| | <i>Sherifa E. Cudjoe and Reza Barati Ghahfarokhi</i> | |
| 4.1 | Background | 189 |
| 4.2 | X-ray Microcomputed Tomography (X-ray Micro-CT) | 190 |
| 4.2.1 | Operation of X-Ray Micro-CT | 192 |
| 4.2.2 | Sample Preparation | 194 |
| 4.2.3 | X-ray Micro-CT Scanning Procedure | 196 |
| 4.2.4 | Image Reconstruction | 198 |
| 4.2.5 | Application of X-ray Micro-CT on Shale Samples | 200 |
| 4.2.6 | Image Visualization and Processing | 203 |
| 4.2.7 | Estimating Porosity from CT number (CTN) of CT Images | 209 |
| 4.2.8 | Permeability Estimation from CT scanner | 212 |
| 4.2.9 | Two-Phase Fluid Saturations | 212 |
| 4.3 | X-Ray Nano-CT | 213 |
| 4.3.1 | Sample Preparation for X-Ray Nano-CT | 214 |
| 4.3.2 | In-Situ Wettability and Spontaneous Imbibition at Nanoscale | 214 |
| 4.4 | Electron Microscopy | 217 |
| 4.4.1 | Scanning Electron Microscopy (SEM) | 217 |
| 4.4.2 | SEM/BSE Images of Various Ultratight, Organic-Rich Formations | 220 |
| 4.4.3 | Energy-Dispersive X-Ray Spectrometry (EDS/EDX) | 228 |
| 4.4.4 | Quantitative Evaluation of Minerals by Scanning Electron Microscopy (QEMSCAN) | 235 |
| 4.4.5 | Focused Ion Beam-Scanning Electron Microscopy (FIB-SEM) | 241 |
| 4.4.6 | Three-Dimensional (3D) Rock Model | 243 |
| 4.4.7 | Pore Network Model (PNM) and Pore Size Distribution (PSD) | 245 |
| 4.4.8 | Permeability Estimation | 249 |
| 4.5 | Broad Ion Beam-Scanning Electron Microscopy (BIB-SEM) | 249 |
| 4.5.1 | Sample Preparation, BIB-SEM Acquisition and Processing | 250 |
| 4.6 | Acknowledgment | 251 |

| | | |
|----------|---|------------|
| 4.7 | Problems on Micro-CT and Nano-CT | 252 |
| 4.8 | Problems on Electron Microscopy | 252 |
| | Additional Reading | 257 |
| | References | 257 |
| 5 | Geomechanical Properties of Unconventional Reservoirs | 265 |
| | <i>Mustafa M. Alhubail, Anil Misra, and Reza Barati Ghahfarokhi</i> | |
| 5.1 | Background | 265 |
| 5.2 | Basic Concepts and Definitions | 265 |
| 5.2.1 | Stress | 265 |
| 5.2.2 | Strain | 266 |
| 5.2.3 | Elastic Constants | 266 |
| 5.2.4 | Poisson's Ratio | 267 |
| 5.3 | Stresses and Pressure Gradients | 269 |
| 5.3.1 | Vertical Stress and Overburden Pressure | 269 |
| 5.3.2 | Effective Vertical Stress | 270 |
| 5.3.3 | Effective Horizontal Stress | 271 |
| 5.3.4 | Biot's Poroelastic Constant | 271 |
| 5.3.5 | Horizontal Stresses and Fracturing Pressure | 272 |
| 5.4 | Well-Logging Measurements to Determine the Elastic Parameters | 277 |
| 5.4.1 | Calculating the Dynamic Moduli | 277 |
| 5.4.2 | Correlations for Static Moduli | 281 |
| 5.5 | Identifying the Geomechanical Sweet Spots | 282 |
| 5.5.1 | Brittleness Index | 283 |
| 5.6 | General Remarks | 290 |
| 5.7 | Problems | 291 |
| | Additional Reading | 294 |
| | References | 294 |
| 6 | Hydraulic Fracturing | 299 |
| | <i>Mustafa M. Alhubail and Reza Barati Ghahfarokhi</i> | |
| 6.1 | Background | 299 |
| 6.2 | Fundamentals of Hydraulic Fracturing | 300 |
| 6.2.1 | Fracture Geometry | 301 |
| 6.2.2 | Fracture Conductivity | 301 |
| 6.2.3 | Folds of Increase | 305 |
| 6.2.4 | Multistage Hydraulic Fracturing | 307 |
| 6.2.5 | Stress Shadow | 310 |
| 6.2.6 | Zipper Fracturing | 311 |
| 6.2.7 | Fracture Hits | 312 |
| 6.2.8 | Surface Pumps | 315 |
| 6.2.9 | Minifrac and DFIT Tests | 316 |
| 6.2.10 | Microseismic Monitoring | 320 |
| 6.2.11 | Stimulated Reservoir Volume | 321 |

| | | |
|-------|---|-----|
| 6.3 | Fracturing Fluids | 323 |
| 6.3.1 | Purpose | 323 |
| 6.3.2 | Fracturing Fluid Types, Properties and Selection Process | 324 |
| 6.3.3 | Rheology of Fracturing Fluids | 326 |
| 6.3.4 | Damage of Fracturing Fluid and Fracture Cleanup | 329 |
| 6.3.5 | Fracturing Fluids Additives | 329 |
| 6.4 | Proppant | 333 |
| 6.4.1 | Purpose | 334 |
| 6.4.2 | Proppant Characteristics and Selection Process | 334 |
| 6.4.3 | Proppant Types | 337 |
| 6.4.4 | Proppant Flowback | 339 |
| 6.4.5 | Proppant Transport | 340 |
| 6.4.6 | Proppant Schedule | 341 |
| 6.5 | Modeling of Hydraulic Fractures | 341 |
| 6.5.1 | Importance of Modeling | 342 |
| 6.5.2 | Governing Processes of the Models | 342 |
| 6.5.3 | Modeling History | 342 |
| 6.6 | Problems | 351 |
| | Additional Reading | 352 |
| | References | 352 |
| 7 | Phase Behavior of Shale Oil and Gas | 359 |
| | <i>Xiaoli Li, Jyun-Syung Tsau, Qinwen Fu, and Reza Barati Ghahfarokhi</i> | |
| 7.1 | Background | 359 |
| 7.2 | Compositional Analyses of Shale Fluids | 359 |
| 7.2.1 | Subsurface Sampling | 360 |
| 7.2.2 | Surface Sampling | 363 |
| 7.3 | Phase Behavior and PVT Experiments | 368 |
| 7.3.1 | Phase Diagrams | 368 |
| 7.3.2 | PVT Experiments and Data Quality Check | 372 |
| 7.4 | Equation of State (EOS) | 379 |
| 7.4.1 | Cubic Equation of State | 379 |
| 7.4.2 | Stability Analysis | 381 |
| 7.4.3 | Confinement/Pore Proximity Effect on Phase Behavior | 382 |
| 7.4.4 | Phase Diagrams of Bakken, Eagle Ford, and Wolfcamp Fluids | 390 |
| 7.4.5 | Diffusion Coefficient | 393 |
| 7.5 | EOS Regression to Experimental Data | 393 |
| 7.6 | Minimum Miscibility Pressure | 395 |
| 7.6.1 | Experimental Methods | 396 |
| 7.6.2 | Analytical Methods | 402 |
| 7.6.3 | Numerical Methods | 403 |
| 7.6.4 | Correlation Methods | 403 |
| 7.7 | Problems | 403 |
| | Additional Reading | 408 |
| | References | 408 |

| | | |
|----------|--|-----|
| 8 | Fluid Flow Through Nanosized Pores | 413 |
| | <i>Mohammad Kazemi, Ali Takbiri-Borujeni, Sherifa E. Cudjoe, and Reza Barati Ghahfarokhi</i> | |
| 8.1 | Background | 413 |
| 8.2 | Pore Size Distribution | 414 |
| 8.3 | Adsorption | 414 |
| 8.4 | Flow Regimes | 418 |
| 8.5 | Modeling Techniques | 421 |
| 8.5.1 | Fluid Transport in Confined Enclosures | 421 |
| 8.5.2 | Apparent Permeability of Shale | 421 |
| 8.5.3 | Transport in Organic Nanopores | 423 |
| 8.5.4 | Molecular Simulations | 424 |
| 8.5.5 | Molecular Structure of Kerogen | 424 |
| 8.5.6 | Multiscale Modeling Techniques | 427 |
| 8.6 | Lattice Boltzmann Model (LBM) | 428 |
| 8.6.1 | LBM Simulation | 431 |
| 8.6.2 | Implementation of LBM Simulation in Organic Nanopores | 432 |
| 8.6.3 | Apparent Permeability | 433 |
| 8.7 | Problems | 434 |
| | Additional Reading | 434 |
| | References | 434 |
| | Appendix | 439 |
| 9 | Decline Curve and Rate Transient Analysis | 445 |
| | <i>Mustafa M. Alhubail, Mojdeh Rasoulzadeh, and Reza Barati Ghahfarokhi</i> | |
| 9.1 | Background | 445 |
| 9.2 | Purpose of Decline Curves | 445 |
| 9.3 | Decline Curve Assumptions and Limitations | 446 |
| 9.4 | Traditional Decline Curve Models | 447 |
| 9.5 | Arps's Models | 447 |
| 9.5.1 | Exponential Decline Model | 448 |
| 9.5.2 | Determination of Exponential Decline Graphically | 448 |
| 9.5.3 | Harmonic Decline Model | 451 |
| 9.5.4 | Determination of Harmonic Decline Graphically | 451 |
| 9.5.5 | Hyperbolic Decline Model | 452 |
| 9.5.6 | Determination of Hyperbolic Decline Parameters | 454 |
| 9.6 | Modern Decline Curve Models | 456 |
| 9.6.1 | Modified Hyperbolic Model | 457 |
| 9.6.2 | Power-Law Exponential Model | 459 |
| 9.6.3 | Stretched Exponential Model | 460 |
| 9.6.4 | Logistic Growth Model | 462 |
| 9.6.5 | Duong Model | 462 |
| 9.7 | Rate Transient Analysis | 464 |
| 9.7.1 | Purpose and Features of RTA | 464 |
| 9.7.2 | RTA Concept | 465 |

| | | |
|-----------|---|------------|
| 9.7.3 | Type Curves | 466 |
| 9.7.4 | Type Curve Methods | 467 |
| 9.7.5 | Square Root Time and Flowing Material Balance Plots | 471 |
| 9.7.6 | Flow Regimes | 472 |
| 9.8 | Problems | 478 |
| | Additional Reading | 494 |
| | References | 494 |
| 10 | Petroleum Economics of Unconventional Shale Reservoirs | 499 |
| | <i>Mustafa M. Alhubail, Hajar Aghababa, and Reza Barati Ghahfarokhi</i> | |
| 10.1 | Background | 499 |
| 10.2 | Effect of Shale Oil/Gas Developments on Economics and Energy Security | 499 |
| 10.3 | Fundamentals of Petroleum Economics | 503 |
| 10.3.1 | Business Expenditures | 503 |
| 10.3.2 | Basic Cash Flow | 504 |
| 10.3.3 | Interest Rate | 508 |
| 10.3.4 | Future Value | 509 |
| 10.3.5 | Present Value | 509 |
| 10.3.6 | Net Present Value (NPV) | 510 |
| 10.3.7 | Rate of Return (ROR) | 511 |
| 10.3.8 | Payout | 512 |
| 10.4 | Fiscal Regimes and Contracts | 513 |
| 10.4.1 | The Concessionary System (Royalty/Tax System) | 513 |
| 10.4.2 | The Production Sharing Contracts (PSCs) | 513 |
| 10.4.3 | Service Contracts | 515 |
| 10.5 | Decision, Uncertainty, and Risk Analysis | 516 |
| 10.6 | Chapter Project | 517 |
| 10.6.1 | Project Data | 518 |
| 10.6.2 | Project Calculations | 518 |
| 10.7 | Problems | 525 |
