Contents

1	Introduction	1
2	State of the art	3
2.1	Directed energy deposition	3
2.2	Computational welding mechanics for additive manufacturing	4
2.3	Model validation	6
2.3.1	Validation with post-process distortion measurements	8
2.3.2	Validation with residual stress measurements	9
2.3.3	Validation with in-situ distortion measurements	10
2.4	Computationally efficient modelling	12
3	Materials and Methods	15
3.1	Materials	15
3.2	Experimental procedure	16
3.2.1	Sample geometries and build-up	16
3.2.2	Temperature measurement	19
3.2.3	Digital image correlation	19
3.2.4	In-situ distortion measurements	21
3.2.5	Post-process distortion measurement	22
3.3	Numerical modelling	24
3.3.1	Model setup	24
3.3.2	Thermal analysis	24
3.3.3	Mechanical analysis	26
3.3.4	Electric-discharge-machining simulation	28
3.4	Computationally efficient modelling	29
3.4.1	Contact-free approach	29
3.4.2	Thermal cycle approach	31
4	Results	33
4.1	Convergence study	33
4.2	Thermal calibration	34
4.2.1	Experimental results	34
4.2.2	Simulation results	36

4.3	Mechanical model validation	38
4.3.1	Experimental results: Wall geometry	38
4.3.2	Experimental results: Turbine geometry	41
4.3.3	Simulation results: Wall geometry	43
4.3.4	Simulation results: Turbine geometry	45
4.4	Computational time in DED modelling	48
4.4.1	Contact-free approach	48
4.4.2	Thermal cycle approach	49
4.5	Industrial demonstrator part	51
4.5.1	Experimental results	51
4.5.2	Simulation results	53
4.5.3	Thermal cycle results	54
5	Discussion	57
5.1	Thermal calibration	57
5.1.1	Single-track calibration	57
5.1.2	Multi-layer calibration	58
5.1.3	Thermal cycle calibration	61
5.2	Wall geometry	62
5.2.1	Experimental results	62
5.2.2	Simulated results	63
5.2.3	Comparison of simulation and experiment	64
5.2.4	Discussion	64
5.3	Turbine geometry	68
5.3.1	Experimental results	68
5.3.2	Simulated results	69
5.3.3	Comparison of simulation and experiment	71
5.3.4	EDM removal	75
5.3.5	Bulging modelling	76
5.4	Computational time in DED modelling	80
5.4.1	Contact-free approach	80
5.4.2	Thermal cycle approach	83
5.5	Industrial demonstrator part	89
5.5.1	Discussion of simulated and experimental results	89
5.5.2	Analysis of the bulging mechanism	92
5.5.3	Thermal cycle approach	94
6	Summary and Conclusion	99
6.1	Summary	99
6.2	Conclusion	102
	Bibliography	105
