Learning and Collaboration Technologies

Human and Technology Ecosystems

7th International Conference, LCT 2020
Held as Part of the 22nd HCI International Conference, HCII 2020
Copenhagen, Denmark, July 19–24, 2020
Proceedings, Part II

Springer
Contents – Part II

Communication and Conversation in Learning

Sign Language Interactive Learning - Measuring the User Engagement .......... 3
  Pietro Battistoni, Marianna Di Gregorio, Marco Romano,
  Monica Sebillo, Giuliana Vitiello, and Giandomenico Solimando

Co-design for a Competency Self-assessment Chatbot and Survey
in Science Education ......................................................... 13
  Eva Durall and Evangelos Kapros

Use of an Emotional Chatbot for the Analysis of a Discussion Forum
for the Improvement of an E-Learning Platform .................................. 25
  Karim Elia Fraoua, Jean-Marc Leblanc, and Amos David

Compare Differences of Communication and Creativity Between Different
Team Composition and Using Different Conceptual Analysis
Integrational Tools .......................................................... 36
  Yi Chi Fu and Chao Yang Yang

Development of a Visualization System to Analyze
Student-Teacher Conversations .................................................... 45
  Jun Iio and Ryuichi Sugiyama

Voice Interaction for Training: Opportunities, Challenges,
and Recommendations from HCI Perspective ...................................... 59
  Irina Kondratova and Bruno Emond

Abstract Thinking Description System for Programming
Education Facilitation ........................................................ 76
  Yasutsuna Matayoshi and Satoshi Nakamura

Supporting Student-Teacher Interaction Through a Chatbot ...................... 93
  Sonia Mendoza, Manuel Hernández-León, Luis Martín Sánchez-Adame,
  José Rodríguez, Dominique Decouchant, and Amilcar Meneses-Viveros

A Conversational Agent as Facilitator: Guiding Groups Through
Collaboration Processes .................................................... 108
  Navid Tavanapour, Daphne Theodorakopoulos, and Eva A. C. Bittner
Cognition, Emotions and Learning

Anti-procrastination Online Tool for Graduate Students
Based on the Pomodoro Technique ............................................. 133
Kholood Almalki, Omnia Alharbi, Wala’a Al-Ahmadi, and Maha Aljohani

Semantically Annnotated Learning Media for Reduced Cognitive Load .......... 145
Zainb Dawod and David Bell

Learner’s Mental State Estimation with PC Built-in Camera ..................... 165
Shinobu Hasegawa, Atsushi Hirako, Xianwen Zheng, Shofiyati Nur Karimah, Koichi Ota, and Teruhiko Unoki

Virtual Reality as a Stress Reduction Measure – Chilling Out on the Beach in My Living Room .................................................... 176
Kevin Pfeffel, Megi Elezi, Philipp Ulsamer, and Nicholas H. Müller

Brain Activation in Virtual Reality for Attention Guidance ...................... 190
Philipp Ulsamer, Kevin Pfeffel, and Nicholas H. Müller

Visualizing Students’ Eye Movement Data to Understand Their Math Problem-Solving Processes ......................................................... 201
Shuang Wei, Yan Ping Xin, and Yingjie Chen

Games and Gamification in Learning

A Co-design Approach for the Development and Classroom Integration of Embodied Learning Apps ................................................. 217
Yiannis Georgiou and Andri Ioannou

Play to Learn! Nurturing Fundamental Digital Skills of Romanian Preschoolers by Developing Edutainment Applications ....................... 230
Adriana-Mihaela Guran, Grigoreta-Sofia Cojocar, and Anamaria Moldovan

Teachers’ Adoption of Embodied Learning Digital Games with an Inclusive Education Approach: Lessons Learnt from the INTELed Project in Spain ................................................................. 241
Alejandra Martínez-Monés, Sara Villagrá-Sobrino, Eva María Fernández Faundez, and María Jiménez Ruiz

Do Individual Differences Modulate the Effect of Agency on Learning Outcomes with a Serious Game? ........................................... 254
Julien Mercier, Kathleen Whissell-Turner, Ariane Paradis, Ivan Luciano Avaca, Martin Riopel, and Mélanie Bédard
Agency Affects Learning Outcomes with a Serious Game
Julien Mercier, Ivan Luciano Avaca, Kathleen Whissell-Turner,
Ariane Paradis, and Tassos A. Mikropoulos

Experiential Learning and STEM in Modern Education: Incorporating
Educational Escape Rooms in Parallel to Classroom Learning
Leonidas Papadakis and Modestos Stavrakis

EDUGAME4CITY. A Gamification for Architecture Students. Viability
Study Applied to Urban Design
Ernest Redondo, David Fonseca, Mónica Sánchez-Sepúlveda,
Héctor Zapata, Isidro Navarro, Lluís Gimenez, and Miguel Ángel Pérez

GAME4CITY. Gamification for Citizens Through the Use of Virtual
Reality Made Available to the Masses. Viability Study
in Two Public Events
Ernest Redondo, Héctor Zapata, Isidro Navarro, David Fonseca,
Lluís Gimenez, Miguel Ángel Pérez, and Mónica Sánchez-Sepúlveda

StickAndClick – Sticking and Composing Simple Games
as a Learning Activity
Andrea Valente and Emanuela Marchetti

Facilitating Ideation and Knowledge Sharing in Workplaces:
The Design and Use of Gamification in Virtual Platforms
Olga Viberg, Mohammad Khalil, and Alexandros Lioliopoulos

VR, Robot and IoT in Learning

Immersive Telepresence Framework for Remote Educational Scenarios
Jean Botev and Francisco J. Rodríguez Lera

Web-based Teleoperation System for Learning of 3D Prototype
Designing and Printing
Siam Charoenseang, Poonsiri Jailungka, and Chaowwalit Thammatinno

Building STEM Capability in a Robotic Arm Educational Competition
Lin Chu, Yu-Liang Ting, and Yaming Tai

Using Virtual Reality Simulations to Encourage Reflective Learning
in Construction Workers
Eileen Fiala, Markus Jelonek, and Thomas Herrmann

First-Person Perspective Physics Learning Platform Based
on Virtual Reality
Yu Han, Yining Shi, Juanjuan Wang, Yue Liu, and Yongtian Wang
Telepresence Robots and Their Impact on Human-Human Interaction .......................... 448
Lisa Keller, Kevin Pfeffel, Karsten Huffstadt, and Nicholas H. Müller

3D Hologram Learning Kit Development for Elementary Education .......................... 464
Youbin Kim and Dong Yeong Lee

Does Immersive VR Increase Learning Gain When Compared to a Non-immersive VR Learning Experience? ................................................................. 480
Khadija Mahmoud, Isaac Harris, Husam Yassin, Thomas J. Hurkxkens, Omar K. Matar, Nitesh Bhatia, and Irene Kalkanis

Fabric Robotics - Lessons Learned Introducing Soft Robotics in a Computational Thinking Course for Children ............................................................ 499
Bjarke Kristian Maigaard Kjaer Pedersen, Emanuela Marchetti, Andrea Valente, and Jacob Nielsen

Preschool Safety Education with Digital Media-Based Learning Application – Kinder ................................................................. 520
Cheng-Feng Sun, Yao-Cheng Chan, Shih-Yi Chien, Yi-Ling Lin, and I-Han Hsiao

Let’s Learn! An Initial Guide on Using Drones to Teach STEM for Children ................................................................. 530
Dante Tezza, Sarah Garcia, and Marvin Andujar

Using Arduino in Service Learning to Engage Pre-service STEM Teachers into Collaborative Learning ................................................................. 544
Yu-Liang Ting, Yu-Chen Lin, Shin-Ping Tsai, and Yaming Tai

Teaching STEM Competencies Through an Educational Mobile Robot ................................................................. 560
José Varela-Aldás, Jorge Buele, Janio Jadan-Guerrero, and Víctor H. Andaluz

The Use of Augmented Reality for Solving Arithmetic Problems for Preschool Children ................................................................. 574
Siyuan Zhou, Xu Sun, Zhiyu Shi, and Yanyi Lu

Collaboration Technology and Collaborative Learning

Towards an Information Security Awareness Maturity Model ................................................................. 587
Tobias Fertig, Andreas E. Schütz, Kristin Weber, and Nicholas H. Müller

Who Knows What in My Team? – An Interactive Visualization-Based Instrument for Developing Transactive Memory Systems in Teams ................................................................. 600
Josef H. Gammel, Dorothea Pantfoerder, Timon Schulze, Katharina G. Kugler, and Felix C. Brodbeck
Proactive Smart City Interactions ................................................. 615
   Madlen Müller-Wuttke, Andreas E. Schütz, Felix Franz,
   and Nicholas H. Müller

An Authoring Platform for CSCL Script Definition ......................... 625
   Andreas Papasalouros and George Chatzimichalis

Utilizing Context Effects of Banner Ads for Conversion
Rate Optimization ............................................................................. 641
   Peter Silbermann, Tobias Fertig, Andreas E. Schütz,
   and Nicholas H. Müller

Exploiting the Human Factor: Social Engineering Attacks on
Cryptocurrency Users ........................................................................ 650
   Kristin Weber, Andreas E. Schütz, Tobias Fertig,
   and Nicholas H. Müller

Author Index ....................................................................................... 669
