### Contents – Part I

#### UX Topics in Automated Driving

**Shut Up and Drive? User Requirements for Communication Services in Autonomous Driving** .......................... 3  
*Hannah Biermann, Ralf Philipsen, Teresa Brell, and Martina Ziefle*

**Towards User-Focused Vehicle Automation: The Architectural Approach of the AutoAkzept Project** .......................... 15  
*Uwe Drewitz, Klas Ihme, Carsten Bahnmüller, Tobias Fleischer, Huu Chuong La, Anna-Antonia Pape, Daniela Gräfing, Dario Niermann, and Alexander Trende*

**In the Passenger Seat: Differences in the Perception of Human vs. Automated Vehicle Control and Resulting HMI Demands of Users** .......................... 31  
*Franziska Hartwich, Cornelia Schmidt, Daniela Gräfing, and Josef F. Krems*

**Ambivalence in Stakeholders’ Views on Connected and Autonomous Vehicles** .......................... 46  
*Celina Kacperski, Tobias Vogel, and Florian Kutzner*

**User Perception and the Effect of Forms and Movements in Human-Machine Interaction Applying Steer-By-Wire for Autonomous Vehicles** .......................... 58  
*Dokshin Lim, Jihoon Lee, and Sung Mahn Kim*

**Human-Systems Integration for Driving Automation Systems: Holistic Approach for Driver Role Integration and Automation Allocation for European Mobility Needs** .......................... 78  
*Peter Mörtl*

**Affective Use Cases for Empathic Vehicles in Highly Automated Driving: Results of an Expert Workshop** .......................... 89  
*Michael Oehl, Klas Ihme, Anna-Antonia Pape, Mathias Vukelić, and Michael Braun*

**A Pilot Study on the Dynamics of Online Risk Assessment by the Passenger of a Self-driving Car Among Pedestrians** .......................... 101  
*Jeffery Petit, Camilo Charron, and Franck Mars*

**Fluid Interface Concept for Automated Driving** .......................... 114  
*Paolo Pretto, Peter Mörtl, and Norah Neuhuber*
Contents – Part I

Human Factor Considerations on Timing of Driver Taking Over in Automated Driving Systems: A Literature Review ........................................... 131
Hua Qin, Ran Zhang, and Tingru Zhang

Gender Differences in Simulation Sickness in Static vs. Moving Platform VR Automated Driving Simulation ............................................ 146
Stanislava Rangelova, Karolin Rehm, Sarah Diefenbach, Daniel Motus, and Elisabeth André

Measures for Well-Being in Highly Automated Vehicles: The Effect of Prior Experience ................................................................. 166
Vanessa Sauer, Alexander Mertens, Alexander Heyden, Stefan Groß, and Verena Nitsch

A Filed Study of External HMI for Autonomous Vehicles When Interacting with Pedestrians ......................................................... 181
Ya Wang and Qiang Xu

Designing In-Vehicle Experiences

Evaluating HMI-Development Approaches from an Automotive Perspective ......................................................... 199
Jan Bavendiek, Yannick Ostad, and Lutz Eckstein

Smart and Seamless: Investigating User Needs and Recognition for Smartphone-Automobile Interactive Features .................................. 217
Hsinwen Chang and Liping Li

Jiyong Cho and Jeongyun Heo

An Introduction to a Psychoanalytic Framework for Passengers’ Experience in Autonomous Vehicles ........................................... 249

Weaving Social Networks from Smart Card Data:
An On-Journey-Accompanying Approach ........................................... 266
Wei Geng and Dingzhe Zhang

Effective Alerts for Autonomous Solutions to Aid Drivers Experiencing Medical Anomalies ......................................................... 279
Mariah Havro and Tony Morelli

Complexity in In-Vehicle Touchscreen Interaction:
A Literature Review and Conceptual Framework ........................................... 289
Young Woo Kim, Da Yeong Kim, and Yong Gu Ji
The Effects of Collision Avoidance Warning Systems on Driver’s Visual Behaviors
Jung Hyup Kim

Acceptance and Diffusion of Services Based on Secure Elements in Smartphones – Study Design and First Results of the Pretests.
Andreas Kreisel, Gertraud Schäfer, and Ulrike Stopka

Ontology for Mobility of People with Intellectual Disability: Building a Basis of Definitions for the Development of Navigation Aid Systems
Laurie Letalle, Aymen Lakehal, Hursula Mengue-Topio, Johann Saint-Mars, Christophe Kolski, Sophie Lepreux, and Francoise Anceaux

The Effect of Multiple Visual Variables on Size Perception in Geographic Information Visualization
Yun Lin, Chengqi Xue, Yanfei Zhu, and Mu Tong

Jia-xin Liu, Xue Zhao, and Ying Cao

Age-Related Differences in the Interaction with Advanced Driver Assistance Systems - A Field Study
Norah Neuhuber, Gernot Lechner, Tahir Emre Kalayci, Alexander Stocker, and Bettina Kubicek

Using Augmented Reality to Mitigate Blind Spots in Trucks
Dan Roland Persson, Valentino Servizi, Tanja Lind Hansen, and Per Bækgaard

Range InSight: Visualizing Range-Related Information in Battery Electric Buses.
Jacob Stahl, Markus Gödker, and Thomas Franke

Investigating the Benefits of Haptic Feedback During In-Car Interactions in Virtual Reality
Mareike Stamer, Joseph Michaels, and Johannes Tümler

A Fluid-HMI Approach for Haptic Steering Shared Control for the HADRIAN Project
Myriam E. Vaca-Recalde, Mauricio Marcano, Joseba Sarabia, Leonardo González, Joshuë Pérez, and Sergio Díaz

BLOKCAR: A Children Entertainment System to Enrich and Enhance Family Car Travel Experience
Hsin-Man Wu, Zhenyu (Cheryl) Qian, and Yingjie (Victor) Chen
Influence of Position and Interface for Central Control Screen on Driving Performance of Electric Vehicle

Ran Zhang, Hua Qin, Ji Tao Li, and Hao Bo Chen
