# Contents

## I  INTRODUCTION
1. Abstract Interpretation and Its Main Applications  
2. Basic Set Theory  
3. Syntax, Semantics, Properties, and Static Analysis of Expressions

## II  SYNTAX
4. Syntax  
5. Parsing

## III  TRACE SEMANTICS
6. Structural Deductive Stateless Prefix Trace Semantics  
7. Maximal Trace Semantics

## IV  PROPERTIES AND THEIR ABSTRACTIONS
8. Program Properties  
9. Undecidability and Rice Theorem  
10. Posets, Lattices, and Complete Lattices  
11. Galois Connections and Abstraction  
12. Relational and Transformer Semantics  
13. Topology  
14. Safety and Liveness Trace Properties

## V  FIXPOINTS AND THEIR ABSTRACTIONS
15. Fixpoints  
16. Fixpoint, Deductive, Inductive, Structural, Coinductive, and Bi-inductive Definitions  
17. Structural Fixpoint Prefix and Maximal Trace Semantics  
18. Fixpoint Abstraction

## VI  REACHABILITY SEMANTICS
19. Structural Forward Reachability Semantics  
20. Calculational Design of the Forward Reachability Semantics

## VII  ABSTRACT DOMAIN AND ABSTRACT INTERPRETER
21. Abstract Domain and Abstract Structural Semantics  
22. Chaotic Iterations  
23. Abstract Equational Semantics
## VIII SPECIFICATION AND VERIFICATION

24 Fixpoint Induction  275
25 Abstract Reachability / Invariance / Safety Verification Semantics  281
26 Hoare Logic  293

## IX CARTESIAN STATIC ANALYSIS

27 Abstraction  307
28 Abstract Cartesian Semantics  321
29 Reduction  347
30 Basic Number Theory  351
31 Cartesian Congruence Analysis  357
32 Dynamic Interval Analysis  367
33 Static Interval Analysis  389

## X EFFECTIVE FIXPOINT APPROXIMATION

34 Fixpoint Approximation by Extrapolation and Interpolation  401
35 Fixpoint Checking  413
36 Reduced Product  417

## XI RELATIONAL STATIC ANALYSIS

37 Basic Linear Algebra  437
38 Linear Equality Analysis  453
39 Graphs  459
40 Zone and Octagon Analysis  481

## XII SYMBOLIC STATIC ANALYSIS

41 Dataflow Analysis  497
42 Stateful Prefix Trace Semantics  515
43 Transition Semantics  521
44 Software Model Checking  527
45 Flow-Insensitive Static Analysis  553
46 Points-To Analysis  559
47 Dependency Analysis  591
48 The Herbrand Abstract Domain of Symbolic Terms  623
49 Typing  649

## XIII BACKWARD STATIC ANALYSIS

50 Backward Accessibility Semantics  675
51 Reduced Forward—Backward Analysis  695

## XIV SOUND STATIC ANALYSIS TOOLS

52 Semantic Soundness, Completeness, and Definedness  705
53 Static Analysis Tools  713
