VOLUME 2

GEO TELECOMMUNICATION SATELLITE: NEW OPPORTUNITIES ENABLED BY A 20KW CLASS HALL THRUSTER ................................................................. 559
Christopher Andrea Poissoni, Jasmine Rimani, Nicole Viola, Tommaso Andreussi

3U NANOSATELLITE WITH ELECTRIC PROPULSION AS A MOON PROBE FOR A FLYBY MISSION .......................................................................................... 570
Derik Bhardwaj, Ugur Guven, Chesler Thomas, Ayush Tiwari, Deeksha Navlani, Kunal Garg, Yash Advani

ROTARY SOLAR SAIL FOR NANOSATELLITE CONSTELLATION FORMATION .................................................. 580
Vera Mayorova, Stepan Tenenbaum, Dmitry Rachkin, Oleg Kotsur, Valerii Melnikova, Dmitry Romanenko, Kirill Frolov, Veronika Pavlyuchenko, Victoria Goryunova, Adelina Gataulina

THE VALUE PROPOSITION OF MULTI-MEGAWATT ELECTRIC POWER/PROPULSION FOR THE HUMAN EXPLORATION OF MARS ........................................ 586
John Scott

MANNED MISSION TO EUROPA USING ADVANCED POSITRON DRIVE .......................................................... 596
Mridul Jain, Ugur Guven, Vishwani Aggarwal, Hema Punni, Sambhav Jain

PROSPECTS FOR THE USE OF HELICON THRUSTERS FOR SPACE EXPLORATION ................................... 597
Iana Kharlan, Ighor Uzhinsky, Ruslan Rakhimov

THE KON-TIKI MISSION — DEMONSTRATING LARGE SOLAR SAILS FOR DEEP SPACE MISSIONS ......................................................... 605
Les Johnson, Frank Curran, Andrew Heaton, Richard Dissly

LAUNCH SYSTEM SOLUTIONS FOR INTERSTELLAR TRAVEL ............................................................ 610
Steven Vernon

JOINT SESSION ON ADVANCED AND NUCLEAR POWER AND PROPULSION SYSTEMS

POWERING EXPLORATION OF THE SOLAR SYSTEM — A FIFTY YEAR LEGACY CONTINUES ................................................................. 611
Thomas J. Sutliff, Leonard Dudzinski, John Hamley

ANALYSIS AND SYSTEM DESIGN OF NUCLEAR THERMAL ROCKET EMPLOYING PROPELLANT PRODUCED IN-SITU FOR PLANETARY EXPLORATION .................. 612
Davide Barbero, Alessandro Lovagnini

VERSATILE NUCLEAR THERMAL PROPULSION (NTP) ........................................................................... 613
Michael Houts
IMPACT MODELLING AND SAFETY TESTS FOR THE ESA RADIOISOTOPE POWER SYSTEMS ................................................................. 619
Alessandra Barco, Richard Ambrosi, Martin Libessart, Julien Moriceau, Pierre Brunet, Christophe Fongarland, Keith Stephenson

ANALYSIS OF INTERNATIONAL TREATIES AND POLICIES RELATED TO SPACE NUCLEAR POWER AND PROPULSION .................................................. 625
Jericho Locke, Bhavya Lal, Jonathan Behrens

NUCLEAR PROPULSION TECHNOLOGY FOR EXPLORATION AND A SUSTAINABLE PRESENCE ON THE MOON, MARS AND BEYOND .................. 633
Claude Joyner

COMPUTATIONAL ANALYSIS OF NUCLEAR THERMAL PROPULSION ROCKET (NTPR) BIMODALITY, FUEL, AND PROSPECTIVE COATING ........................................ 642
Valerie Lawdensky, William Culbreth

EVALUATION OF MINIMALLY-INTRUSIVE POWER GENERATION SYSTEM (MIPS) DESIGN ALTERNATIVES FOR NUCLEAR THERMAL PROPULSION ............................. 653
Samantha Rawlins, Dale Thomas

THE PYLON: COMPACT LEU COMMERCIAL FISSION POWER THE MOON, MARS, AND SPACE .......................................................... 658
Christopher Morrison, Paolo Venneri, Michael Eades, Mark Reed, Vishal Patel, Wesley Deason, Samuel Judd

LIQUID FLUORIDE THORIUM REACTOR - CURRENT RESEARCH AND CAPABILITIES FOR MARS AND MOON HUMAN COLONIES............................ 659
Jakub Nalewaj, Slawomir Malkowski, Diana Pawlicki

THE DIPOLE DRIVE A NEW CONCEPT IN PROPELLANTLESS PROPULSION .......... 667
Robert Zubrin

FUSION PROPULSION AND POWER FOR EXTRASOLAR EXPLORATION ........ 679
Stephanie Thomas, Charles Swanson, Michael Paluszek, Samuel Cohen, Slava G. Turyshev

RADIOISOTOPE THERMOELECTRIC GENERATORS (RTGS) AND HEATER UNITS (RHUS) BASED ON AMERICIUM-241 FOR SCIENCE AND EXPLORATION .................. 691
Richard Ambrosi, Alessandra Barco

THE SPACEDRIVE PROJECT – OVERVIEW OF REVOLUTIONARY PROPULSION EFFORTS AT TU DRESDEN .................................................. 697
Martin Tajmar, Matthias Kössling, Marcel Weikert, Maxime Monette, Oliver Neunzig

JOINT SESSION BETWEEN IAA AND IAF FOR SMALL SATELLITE PROPULSION SYSTEMS

HIGH-MATURITY ELECTRIC PROPULSION SYSTEM FOR ENABLING DEEP SPACE CUBESAT MISSIONS .......................................................... 708
Michael Tsay

LIGHTSAIL 2: CONTROLLED SOLAR SAIL PROPULSION USING A CUBESAT .......................................................... 709
Bruce Betts, David Spencer, John Bellardo, Bill Nye, Alex Diaz, Barbara Plante, Justin Mansell, Michael Fernandez, Cole Gillespie, Darren Garber
GROUND TEST RESULTS OF THE WATER RESISTOJET PROPULSION SYSTEM AQUARIUS FLIGHT MODEL INSTALLED ON A 6U CUBESAT: EQUEULEUS ........................................ 714
Mariko Akiyama, Keita Nishii, Kosei Kikuchi, Wang Qihang, Masaya Murohara, Yasuho Ataka, Jun Asakawa, Hiroyuki Koizumi, Kota Kakihara, Kanta Yanagida, Ryo Suzumoto, Ryu Funase, Kimiya Komurasaki

PERFORMANCE IMPROVEMENT OF MEMS MICRO-THRUSTERS THROUGH NOVEL DOUBLE DEPTH AEROSPIKE DESIGN .................................................. 720
Chaggai Ganani, Angelo Cervone

ENHANCEMENT OF MICROSATELLITES' MISSION CAPABILITIES: INTEGRATION OF REGULUS ELECTRIC PROPULSION MODULE INTO UNISAT-7 ........................................ 729
Nicolas Bellomo, Alessia Gloder, Marco Manente, Elena Toson, Fabio Trezzolani, Antonio Selmo, Riccardo Mantellato, Lorenzo Cappellini, Matteo Duzzi, Mirko Magarotto, Riccardo Di Roberto, Daniele Pavarin, Filippo Graziani

FREEFORM PROPELLANT DELIVERY SYSTEM FOR CUBESATS ........................................ 739
Amanda Steckel

VERSATILE, LOW COST, MICRO-PROPULSION TECHNOLOGY DEMONSTRATION PLATFORM USING THE 3U CUBESAT STANDARD ........................................ 750
Sean Crowley, Alyssa Ralph, Amelia Greig

THE COMET THRUSTER: ON-ORBIT RESULTS AND EXPANDING PRODUCTION CAPABILITY ......................................................................................... 762
Vincent Tarantini, Nathan Orr, Scott Armitage, Karan Sarda, Daniel Cajacob, Niels Roth

CHARACTERIZATION OF FILM EVAPORATING MICROCAPILLARIES FOR MICRONEWTON THRUSTERS .................................................. 763
Steven Pugia

PET-100: THE ULTIMATE ELECTROSPrAY THRUSTER FOR CUBESAT CONSTELLATIONS ......................................................................................... 774
Alberto Garbayo, Chengyu Ma, Charlie Ryan, Daniel Staab

OVERVIEW OF ELECTRIC AND ADVANCED PROPULSION DEVELOPMENTS AT TU DRESDEN ................................................................. 781
Martin Tajmar

DEVELOPMENT OF N2O/HDPE HYBRID ROCKET FOR MICROSATELLITE PROPULSION ................................................................. 782
Landon Kamps, Pau Molas-Roca, Erika Uchiyama, Tomohiro Takanashi, Harunori Nagata

DEVELOPMENT AND QUALIFICATION OF THE IFM MICRO THRUSTER .................................................. 796
Lou Grimaud, David Krejci, Alexander Reissner, Bernhard Seifert

HYPersonic Air-Breathing AND Combined Cycle Propulsion

KEYNOTE: TEST COMPLEX M11: RESEARCH ON FUTURE ORBITAL PROPULSION SYSTEMS AND SCRAMJET ENGINES ........................................... 806
Marius Wilhelm, Lukas Werling, Christoph Kirchberger, Friedolin Strauss, Felix Lauck, Michele Negri, Helmut Ciezki

ULTRA-Fast LASER-ABSORPTION TECHNIQUES FOR PERFORMANCE CHARACTERIZATION OF ADVANCED AIRBREATHING HYPERSONIC PROPULSION SYSTEMS .................................................. 821
Subith Vasu, Kyle Thurmond
BANTAM AFTER BURNING ROCKET ENGINE (ABRE) PROPULSION SYSTEM FOR A REUSABLE HYPERSONIC TEST BED ................................................................. 822
   Joaquin Castro

CFD ANALYSIS OF SUPERSONIC TURBULENT COMPRESSIBLE FLOWS WITH DETAILED PLUME STRUCTURE FOR SINGLE AND MULTI-NOZZLES FOR AEROSPACE VEHICLES DESIGN ................................................................. 823
   Muhammad Amjad Sohail

CHEMICAL TIME SCALES DISTRIBUTION FOR SCRAMJET OPERATION ................................................................. 824
   Sterian Danaila, Dragos Isvoranu, Alina Bogoi, Constantin Leventiu

DEVELOPMENT OF ROCKET-RAMJET PROPULSION BASED ON CONTINUOUSLY ROTATING DETONATION ................................................................. 835
   Piotr Wolanski, Michal Kawalec

DYNAMIC MODELING OF RAMJET ENGINE BASED ON SIMULATED ANNEALING ALGORITHM ................................................................. 836
   Qin Yan-Ping, Junlong Liang, Li Bin

EXPERIMENTAL INVESTIGATION OF HYDROCARBON BASED FUELS IN SOLID FUEL RAMJET PROPULSION ................................................................. 837
   Olexiy Shynkarenko, Victor Azevedo, Carlos Veras, Ivo Alves

EXPERIMENTAL RESEARCH FOR THE EFFECTS OF TRAILING EDGE STRUCTURE ON THE SUPERSONIC MIXING LAYER ................................................................. 846
   Shen Chibing, Wang Peng, Fang Xinlin

FUZZY CONTROL OF SHOCK POSITION OF WIDE RANGE RAMJET ................................................................. 847
   Qin Yan-Ping, Lili Fu

NUMERICAL INVESTIGATION ON NONLINEAR DYNAMIC RESPONSE OF THE RAMJET ENGINE TO FREESTREAM PERTURBATIONS BASED ON WENO SCHEME ................................................................. 848
   Qin Yan-Ping, Junlong Liang, Li Bin

CFD INVESTIGATION OF RAMJET FLAMEHOLDER NEAR-WAKE FLOW BASED ON OPENFOAM FRAMEWORK ................................................................. 849
   Yi Wang, Baoyuan Wu, Sigang Yu

PROGRESS ON COMPUTATIONAL DISINTEGRATION AND SEPARATION PROCESS FOR HYPERSONIC VEHICLE ................................................................. 856
   Dun Li, Yuelong He, Liu Shuai, Yu Haichuan, Meng Xuefei, Li Zhikui

RESEARCH ON BOUNDARY LAYER COMBUSTION FOR SKIN-FRICTION REDUCTION ................................................................. 863
   Rui Xue

NUMERICAL SIMULATION OF TURBULENT FLOW AND COMBUSTION IN RAMJET CHAMBER WITH NON-UNIFORM INFLOW ................................................................. 864
   Yi Wang, Baoyuan Wu, Sigang Yu

PROPULSION TECHNOLOGY (3)

A TEST RIG FOR MEASURING ROTORDYNAMIC FORCE COEFFICIENTS OF SEALS, HYDROSTATIC BEARINGS AND IMPELLERS: SUMMARY OF A DECADE OF TESTS ................................................................. 870
   Pascal Jolly, Olivier Bonneau, Mihai Arghir
INTERACTIVE PRESENTATIONS - IAF SPACE PROPULSION SYMPOSIUM

TRANSIENT SIMULATION OF THE IGNITION OVER-PRESSURE PHENOMENON IN THE ALTITUDE TEST OF THE STAGED-COMBUSTION-CYCLE ROCKET ENGINE

Hongyue Wang, Fanchao Kong, Mao Li, Ruimin Liu, Zhang Jiaxian, Chuangchuang Yu, Jia Zhang

PARAMETRIC PERFORMANCE EVALUATION OF LIQUID INJECTION THRUST VECTOR CONTROL IN HYBRID ROCKETS

Eunkwang Lee, Yongtae Yun, Sejin Kwon

ANALYSIS OF OPERATING DIAGRAM FOR KEROSENE / OXYGEN-ENRICHED AIR ROTATING DETONATION COMBUSTORS UNDER LEAN FUEL CONDITION

Qiaofeng Xie, Bing Wang, Haocheng Wen

PROJECT ICE RABBIT: INTEGRATED LIQUID OXYGEN/LIQUID METHANE PROPULSION SYSTEM FOR FUTURE PLANET EXPLORATION VEHICLE

Cheng Cheng

PRELIMINARY DESIGN OF HIGH SPEED TEST FACILITY FOR COUNTERFLOW JET EXPERIMENTS REDUCING HEAT AND DRAG

Yuseok Lee, Hansol Kim, Hwanil Huh

EFFECT OF RESIDUAL STRAIN ON STRUCTURAL INTEGRITY OF SRM GRAIN DURING IGNITION

Jiming Cheng, Jinxian Li, Guoqiang Zhu

EJECTOR DEVELOPING OF VACUUM IGNITION TEST SYSTEM FOR UPPER-STAGE LH2-LOX ROCKET ENGINES

Fanchao Kong, Ruimin Liu, Zhang Jiaxian

RING ROCKETS

Oleg Aleksandrov

DEVELOPMENT OF ADAPTABLE ELECTRODELESS PLASMA PROPULSION SYSTEMS USING EVOLUTIONARY TOPOLOGY OPTIMISATION AND PARTICLE IN CELL SIMULATION

Alexander Ryan, Marcela Bilek, David McKenzie, Iver Cairns, Stephen Bathgate, Warwick Holmes

THE P-5 ENGINE: A COSTA RICAN, COST-EFFECTIVE, LOW POWER LIQUID ROCKET ENGINE

Roy Ramirez

EXPERIMENTAL INVESTIGATION ON DRAG REDUCTION BY PLASMA COUNTERFLOW JETS IN MACH 7 SHOCK TUNNEL

Jaecheong Lee, Yuseok Lee, Yongchan Kim, Hyoungjin Lee, Hwanil Huh

PLASMA ASSISTED NITROUS OXIDE DIRECT THERMAL DECOMPOSITION AND COMBUSTION FOR HYBRID ROCKET

Myoungjin Kim, Taegyu Kim

OPTIMUM DESIGN OF LOX RECIRCULATION SYSTEM IN KSLV-II 1ST STAGE

Youngsuk Jung, Seungwhan Baek, Kie Joo Cho
ON THE EFFECTS OF THERMOACOUSTICS ON SOOT FORMATION AND FLAME INSTABILITY ................................................................. 1071
   Rahul Ravi Ravichandran, Sambit Supriya Dash, Jayraj Chaudhary, Tathagat Sarangi,
   Vinayak Malhotra, Mohammed Abrar Nizami

STUDY OF DUAL-CATALYTIC BED SCALE-UP PARAMETERS FOR HIGH TEST HYDROGEN PEROXIDE THRUSTERS ........................................ 1083
   Sangwoo Jung, Yongtae Yun, Sejin Kwon

COMBUSTION AND PROPULSIVE CHARACTERISTICS OF POTENTIAL HYBRID ROCKET PROPELLANT .................................................... 1084
   Aditya Virkar, Rahul Sunil, Vinayak Malhotra

THE PROJECTS OF THE RAPID INTERSTELLAR EXPEDITIONS ................................................................. 1085
   Oleg Aleksandrov

PRELIMINARY EVALUATION OF ENGINE HEALTH MONITORING FOR HALL THRUSTER ................................................................. 1086
   Christopher Andrea Paissoni, Tommaso Andreussi, Fabrizio Paganucci, Nicole Viola

THE EFFECT OF FUEL LENGTH ON THE REGRESSION RATE IN SWIRLING-OXIDIZER-FLOW-TYPE HYBRID ROCKET USING A LIQUEFYING FUEL ................................................................. 1087
   Yo Kawabata, Kazunari Onagano, Yutaka Wada, Nobuji Kato, Keiichi Hori, Ryo Nagase

ELECTRIC PROPULSION’S RATIONAL APPLICATION RANGE ON THE SMALL SPACECRAFTS ................................................................. 1088
   Alexey Sidorov, Viktor Pererva
