The Chemistry and Technology of Solid Rocket Propellants
(A Treatise on Solid Propellants)

by

V.N. Krishnamurthy
T.L. Varghese

ALLIED PUBLISHERS PVT. LTD.
New Delhi • Mumbai • Kolkata • Lucknow • Chennai
Nagpur • Bangalore • Hyderabad • Ahmedabad
Contents

Foreword ................................................................. vii
Preface ................................................................. ix

CHAPTER 1: Propellants—An Introduction .......................... 1–19

CHAPTER 2: Composite Propellants—Ingredients and their Functions .................................. 20–55

CHAPTER 3: Composite Solid Propellants—Energetic Aspects ...................... 56–90

CHAPTER 4: Propellant Processing Technology 91–119

CHAPTER 5: Propellant Characterization and Rheology 120–154

CHAPTER 6: Internal Ballistics of Rockets ........................................ 155–171

Solid Propellant Burn Rate, Motor Burning Pattern—Progressive Burning Motor, Neutral Burning Motor, Regressive Burning Motor, Plateau and Mesa Burning Propellants, Ultrasonic Burn Rate Determination, Pressure-Time Curves, Ignition Delay, Ignition Rise Time, Pressure—Thrust Build Up, Web Burn Time, Action Time, Thrust (F) and Total Impulse (I), Total Thrust (F) or Total Impulse (I), Specific Impulse (Iₛₑ), Exhaust Velocity (Vₑ), Thrust Coefficient (Cₚ), Characteristic Velocity (C*), Mass Flow Rate or Mass Burning Rate (Mₘ), Mass Discharge Rate (Mₒ), Discharge Coefficient (Cₗ), Equilibrium Pressure, Idialised P–T Curve, Importance of K & Factors Affecting Equilibrium Pressure, Erosive Burning, Factors Affecting Erosive Burning & Validation of Erosive Burning, Chuffing, Factors Affecting Chuffing and Resonance Burning, Questions and References.

CHAPTER 7: Advanced Solid Propellants ........................................ 172–196

CHAPTER 8: Safety, Quality and Reliability in Solid Propellants .......... 197–222

CHAPTER 9: Homogeneous Propellants ................................. 223–259

APPENDIX: The Evolution of Solid Propellants in ISRO ..................... 260–301

Glossary .................................................................................. 302–308
