Rewriting Logic
and Its Applications

13th International Workshop, WRLA 2020
Virtual Event, October 20–22, 2020
Revised Selected Papers
Combining Parallel Graph Rewriting and Quotient Graphs
Thierry Boy de la Tour and Rachid Echahed

Connecting Constrained Constructor Patterns and Matching Logic.
Xiaohong Chen, Dorel Lucanu, and Grigore Roșu

Analysis of the Runtime Resource Provisioning of BPMN Processes
Using Maude
Francisco Durán, Camilo Rocha, and Gwen Salaün

A Rule-Based System for Computation and Deduction in Mathematica
Mircea Marin, Besik Dundua, and Temur Kutsia

Variants in the Infinitary Unification Wonderland
José Meseguer

Variant Satisfiability of Parameterized Strings
José Meseguer

Inductive Reasoning with Equality Predicates, Contextual Rewriting
and Variant-Based Simplification
José Meseguer and Stephen Skeirik

A Simplified Application of Howard’s Vector Notation System to
Termination Proofs for Typed Lambda-Calculus Systems
Mitsuhiro Okada and Yuta Takahashi

Strategies, Model Checking and Branching-Time Properties in Maude
Rubén Rubio, Narciso Marti-Oliet, Isabel Pita, and Alberto Verdejo

Verification of the IBOS Browser Security Properties
in Reachability Logic
Stephen Skeirik, José Meseguer, and Camilo Rocha

Automated Construction of Security Integrity Wrappers for Industry
4.0 Applications
Vivek Nigam and Carolyn Talcott
