## Contents

|                             |      |
|-----------------------------|------|
| List of Abbreviations ..... | XXIX |
|-----------------------------|------|

### Part A Kinetics and Thermodynamics at Surfaces

|   |    |
|---|----|
| <b>1 Roughening Transition: Theories and Experiments</b>        |    |
| <i>Gianangelo Bracco, Andrea Claudio Levi</i> .....             | 3  |
| 1.1 Overview .....  | 3  |
| 1.2 Theoretical Considerations.....                             | 4  |
| 1.3 Renormalization Group Analysis .....                        | 7  |
| 1.4 (110) Surfaces .....  | 10 |
| 1.5 Vicinal Surfaces .....                                      | 13 |
| 1.6 Kinetic Roughening .....                                    | 14 |
| 1.7 Nozières–Gallet Effect.....                                 | 15 |
| 1.8 Experimental Considerations .....                           | 17 |
| 1.9 Diffraction Techniques .....                                | 19 |
| 1.10 Experimental Results.....                                  | 20 |
| 1.11 Conclusions: Growth .....                                  | 37 |
| <b>References</b> .....   | 37 |
| <b>2 Surface Diffusion</b>                                      |    |
| <i>Riccardo Ferrando, Andrew P. Jardine</i> .....               | 45 |
| 2.1 Elementary Mechanism of Surface Diffusion .....             | 45 |
| 2.2 Single-Particle and Collective Diffusion Coefficients ..... | 51 |
| 2.3 Experimental Measurements of Diffusion .....                | 56 |
| 2.4 Perspectives—Towards Complex Surface Motion .....           | 64 |
| <b>References</b> .....   | 65 |
| <b>3 Surface Thermodynamics and Vibrational Entropy</b>         |    |
| <i>Talat S. Rahman</i> .....                                    | 71 |
| 3.1 Some Essentials of Bulk Thermodynamics.....                 | 72 |
| 3.2 Surface Thermodynamic Functions .....                       | 73 |
| 3.3 Surface Nomenclature and Geometry.....                      | 73 |
| 3.4 Theoretical Techniques.....                                 | 77 |
| 3.5 Results.....  | 82 |
| 3.6 Summary .....   | 90 |
| <b>References</b> .....   | 91 |

### Part B Surface Crystallography

|   |     |
|---|-----|
| <b>4 Crystallography of Surfaces</b>                  |     |
| <i>Stephen J. Jenkins</i> .....                       | 99  |
| 4.1 Context .....                                     | 99  |
| 4.2 Bravais Lattices and Crystal Structure .....      | 99  |
| 4.3 Point and Space Group Symmetries.....             | 101 |
| 4.4 The Reciprocal Lattice and Its Implications ..... | 104 |

|          |   |     |
|----------|---|-----|
| 4.5      | Low-Energy Electron Diffraction (LEED) .....                                | 106 |
| 4.6      | Stereographic Representation of Surface Symmetry and Structure ..           | 108 |
| 4.7      | Notational Conventions for Surface Superstructure .....                     | 115 |
| 4.8      | On the Choice of the (1 × 1) Cell .....                                     | 116 |
|          | <b>References</b> .....   | 117 |
| <b>5</b> | <b>Ab Initio Simulations of Semiconductor Surfaces and Interfaces</b>       |     |
|          | <i>Arrigo Calzolari, Giancarlo Cicero, Alessandra Catellani</i> .....       | 119 |
| 5.1      | Overview .....  | 119 |
| 5.2      | Theoretical Framework .....   | 120 |
| 5.3      | Surface/Molecule Interaction .....  | 125 |
| 5.4      | DFT for Sensing .....   | 129 |
| 5.5      | DFT for Interfaces .....  | 135 |
| 5.6      | Exploring Water/Solid Interfaces via DFT Simulations .....                  | 144 |
| 5.7      | Conclusions .....   | 148 |
|          | <b>References</b> .....   | 148 |
| <b>6</b> | <b>Surfaces of Bulk Oxides</b>  |     |
|          | <i>Jacques Jupille</i> .....  | 155 |
| 6.1      | Overview .....  | 155 |
| 6.2      | Oxides of Rocksalt Structure .....  | 160 |
| 6.3      | The SrTiO <sub>3</sub> (100) Surface .....                                  | 169 |
| 6.4      | Outlook .....   | 185 |
|          | <b>References</b> .....   | 186 |
| <b>7</b> | <b>Crystallography of Metal Surfaces and Adsorbed Layers</b>                |     |
|          | <i>Georg Held</i> .....   | 197 |
| 7.1      | Experimental Techniques .....   | 197 |
| 7.2      | Surface Geometries .....  | 211 |
| 7.3      | Conclusion .....  | 218 |
|          | <b>References</b> .....   | 218 |
| <b>8</b> | <b>Local Information with Scanning Tunneling Microscopy</b>                 |     |
|          | <i>Francesca Moresco</i> .....  | 225 |
| 8.1      | Introduction .....  | 225 |
| 8.2      | Principles of Scanning Tunneling Microscopy .....                           | 227 |
| 8.3      | Local Imaging .....   | 229 |
| 8.4      | Local Spectroscopy .....  | 231 |
| 8.5      | Manipulation .....  | 234 |
| 8.6      | Outlook .....   | 238 |
|          | <b>References</b> .....   | 239 |
| <b>9</b> | <b>Two-Dimensional Crystals: Graphene, Silicene, Germanene, and Stanene</b> |     |
|          | <i>Yu-Yang Zhang, Jinbo Pan, Shixuan Du, Hong-Jun Gao</i> .....             | 243 |
| 9.1      | Graphene on Transition-Metal Substrates .....                               | 244 |
| 9.2      | Epitaxial Silicene on Transition-Metal Substrates .....                     | 249 |
| 9.3      | Germanene Growth on Transition-Metal Surfaces .....                         | 252 |
| 9.4      | Synthesis of Stanene and Other Related Monolayers .....                     | 257 |
| 9.5      | Outlook .....   | 260 |
|          | <b>References</b> .....   | 261 |

|  |     |
|--|-----|
| <b>10 Thin Oxide Films as Model Systems for Heterogeneous Catalysts</b>  |     |
| <i>Hans-Joachim Freund, Markus Heyde, Helmut Kuhlenbeck, Niklas Nilus, Thomas Risse, Svetlana Schaueremann, Thomas Schmidt, Shamil Shaikhutdinov, Martin Sterrer</i> ..... | 267 |
| 10.1 Preamble .....  | 267 |
| 10.2 Structural Properties of Epitaxial Oxide Films .....  | 269 |
| 10.3 Tuning the Properties of Oxide Films .....  | 284 |
| 10.4 Chemical Reactivity of Oxide Surfaces .....   | 295 |
| 10.5 Oxide Films Beyond UHV .....  | 310 |
| 10.6 Conclusions .....   | 318 |
| <b>References</b> .....  | 318 |

## Part C Electronic Structure Of Surfaces

|  |     |
|--|-----|
| <b>11 Integrated Experimental Methods for the Investigation of the Electronic Structure of Molecules on Surfaces</b> |     |
| <i>Andrew J. Yost, Prescott E. Evans, Iori Tanabe, Guanhua Hao, Simeon Gilbert, Takashi Komesu</i> .....             | 331 |
| 11.1 Photoemission Spectroscopy .....  | 331 |
| 11.2 Chemical Shifts in XPS .....  | 341 |
| 11.3 Concluding Remarks .....  | 347 |
| <b>References</b> .....  | 348 |
| <b>12 Electronic States of Vicinal Surfaces</b>  |     |
| <i>J. Enrique Ortega, Aitor Mugarza, Frederik Schiller, Jorge Lobo-Checa, Martina Corso</i> .....                    | 351 |
| 12.1 General Considerations About Vicinal Surfaces .....   | 351 |
| 12.2 Structural Properties of Vicinal Surfaces .....   | 355 |
| 12.3 Surface Core-Level Shifts at a Vicinal Surface .....  | 359 |
| 12.4 Surface States at Vicinal Noble Metal Surfaces .....  | 361 |
| 12.5 Quantum Well States in Stepped Thin Films .....   | 372 |
| 12.6 Spin-Textured Surface Bands at Vicinal Surfaces .....   | 374 |
| 12.7 Summary and Outlook .....   | 380 |
| <b>References</b> .....  | 380 |
| <b>13 Imaging at the Mesoscale (LEEM, PEEM)</b>  |     |
| <i>Alessandro Sala</i> .....   | 387 |
| 13.1 Cathode Lens Microscopy .....   | 389 |
| 13.2 Low-Energy Electron Microscopy .....  | 398 |
| 13.3 Photoemission Electron Microscopy.....  | 410 |
| 13.4 Perspectives.....   | 420 |
| <b>References</b> .....  | 421 |
| <b>14 Scanning Photoelectron Microscopy: Past, Present and Future</b>  |     |
| <i>Matteo Amati, Alexei Barinov, Luca Gregoratti, Hikmet Sezen, Maya Kiskinova</i> .....                             | 427 |
| 14.1 X-Ray Microscopy—A Brief Overview .....   | 427 |
| 14.2 Operation Principle of SPEM .....   | 429 |
| 14.3 Some Representative Examples of Systems Studied with SPEMs.....   | 435 |

|  |   |     |
|--|---|-----|
| 14.4   | Near-ambient Pressure (NAP) Experiments with SPEM .....   | 440 |
| 14.5   | Conclusions .....   | 445 |
|  | <b>References</b> .....   | 446 |
| <b>15</b>  | <b>Natural Topological Insulator Heterostructures</b>   |     |
|  | <i>S. V. Eremeev, Igor P. Rusinov, Evgueni V. Chulkov</i> .....                                       | 449 |
| 15.1   | Computational Methods .....   | 451 |
| 15.2   | $(C^{IV}B^{VI})_n(A_2^{VB_3^{VI}})_m$ Superlattices ( $n = 1, m > 1$ ) .....                          | 451 |
| 15.3   | $(C^{IV}B^{VI})_n(A_2^{VB_3^{VI}})_m$ Compounds ( $n > 1, m = 1$ ) .....                              | 457 |
| 15.4   | Phase-Change Materials .....  | 462 |
| 15.5   | Conclusions .....   | 464 |
|  | <b>References</b> .....   | 467 |
| <b>16</b>  | <b>Energetic Ground State Calculations, Electronic Band Structure at Surfaces</b>                     |     |
|  | <i>Gian Paolo Brivio, Guido Fratesi</i> .....   | 471 |
| 16.1   | Preliminary Remarks .....   | 471 |
| 16.2   | Density Functional Theory at Surfaces .....   | 472 |
| 16.3   | Electronic States at Surfaces .....   | 479 |
| 16.4   | Adsorption of Simple Atoms and Molecules .....  | 483 |
| 16.5   | Adsorption of Organic Molecules .....   | 485 |
| 16.6   | Conclusions .....   | 492 |
|  | <b>References</b> .....   | 493 |
| <br><b>Part D Collective And Single Particle Excitations</b> |   |     |
| <b>17</b>  | <b>Electron Energy-Loss and Photoelectron Spectroscopies of Surfaces and Two-Dimensional Crystals</b> |     |
|  | <i>Vladimir U. Nazarov, Eugene E. Krasovskii, Vyacheslav M. Silkin</i> .....                          | 501 |
| 17.1   | Probing Solid Targets with Electrons and Light: What Kind of a Theory Do We Need? .....               | 502 |
