

Introduction to the Biogeochemistry of Soils

RONALD AMUNDSON

University of California, Berkeley

Contents

<i>Preface</i>	<i>page xi</i>
1 Introduction to Soils	1
1.1 Introduction	1
1.2 Factors Defining the Soil System	3
1.3 Summary	8
1.4 Activities	9
2 An Overview of the Biogeochemistry of Soils	14
2.1 The Chemistry of the Earth's Crust	14
2.2 Mineralogical Composition of the Earth's Crust	17
2.3 Mineralogical Composition of Soils	21
2.4 Pathways of Mineral Weathering	28
2.5 Chemistry of Soil Formation	28
2.6 Summary	35
2.7 Further Reading	37
2.8 Activities	37
3 The Biology in Soil Biogeochemistry	39
3.1 Microbiology and Soil Processes	39
3.2 The Diversity of Life on Earth	40
3.3 The Biological Imprint on Earth's Biogeochemistry	40
3.4 The Geography of Soil Microbiology	46
3.5 Parameterizing Biology in Biogeochemical Models	50
3.6 Plants	54
3.7 Biosequences	58
3.8 Summary	59
3.9 Activities	59
4 Field-Based Properties of Soils	62
4.1 The Soil Profile	62
4.2 Field Data Sheets	65
4.3 Soil Horizon Nomenclature	71
4.4 Synthesis of Data	72
4.5 Summary	75
4.6 Activities	75

5 Soil Biogeochemical Measurements and Data	77
5.1 Soil Characterization Data	77
5.2 Soil Characterization Data Reports	78
5.3 An Overview of the Memphis Soil History	87
5.4 Summary	92
5.5 Activities	92
6 Time and Soil Processes	101
6.1 Soils and Geomorphic Surfaces	101
6.2 Relative and Numerical Geologic Time	102
6.3 Soil Biogeochemical Processes and Time – An Example	105
6.4 An Introduction to the Dating of Soils	108
6.5 Soils and the Recognition of the Expanse of Geologic Time	111
6.6 Summary	112
6.7 Activities	113
7 The Soil Carbon Cycle	115
7.1 Introduction	115
7.2 Chemical Composition of Plants	117
7.3 Processes and Factors Controlling Soil Organic Matter	118
7.4 One-Box Model of Soil Organic Matter Cycling	122
7.5 Soil Carbon Distribution with Depth	125
7.6 Soil Carbon Pools and Factors Controlling Soil Carbon Decomposition	130
7.7 Soil Respiration and CO ₂ Transport	131
7.8 Summary	135
7.9 Activities	136
8 Chemical and Physical Processes in Soils	141
8.1 Transfer of Heat, Gas, and Water in Soil	141
8.2 Chemical Weathering of Minerals	142
8.3 Soil Biogeochemical Processes in Dry Environments	151
8.4 Integration	158
8.5 Summary	159
8.6 Activities	160
9 Soil Processes on Sloping Landscapes	161
9.1 The Nature of Hillslopes	162
9.2 Soil Erosion	163
9.3 Soil Production	165
9.4 Steady-State Hillslopes	166
9.5 Relevance to Soil Biogeochemistry	166
9.6 Depositional Landforms	171
9.7 Summary	172
9.8 Activities	172

10 Humans and Soil Biogeochemistry	176
10.1 Natural vs. Domesticated Soils	176
10.2 The History of Human Soil Use	178
10.3 Summary	200
10.4 Activities	200
Afterword	202
<i>Notes</i>	204
<i>Index</i>	220
