

**VOLATILES AS TRACERS FOR MANTLE PROCESSES AND MAGMA
FORMATION AND EVOLUTION**

als Habilitationsschrift
der Mathematisch-Naturwissenschaftlichen Fakultät
der Universität Potsdam
vorgelegt von

Nicole A. Stroncik

**Juli
2019**

Contents

Chapter 1	Introduction.....	1
Chapter 2	Methods	17
Chapter 3	Plume–ridge interaction revisited: Evidence for melt mixing from He, Ne and Ar isotope and abundance systematics.....	25
Chapter 4	Atmospheric contamination of the primary Ne and Ar signal in mid-ocean ridge basalts and its implications for ocean crust formation	35
Chapter 5	Chlorine in oceanic intraplate basalts: Constraints on mantle sources and recycling processes.....	53
Chapter 6	Recycled gabbro signature in hotspot magmas unveiled by plume–ridge interactions.....	59
Chapter 7	Helium isotope evidence for a deep-seated mantle plume involved in South Atlantic break-up	65
Chapter 8	Neon and helium isotopes as tracers of mantle reservoirs and mantle dynamics.....	71
Chapter 9	Discussion.....	83
Chapter 10	Summary	91
	References.....	95
	Acknowledgements	101
