Culturally Sustainable Social Robotics
Proceedings of Robophilosophy 2020
August 18–21, 2020, Aarhus University and online

Edited by
Marco Nørskov, Johanna Seibt and Oliver Santiago Quick
Research Unit for Robophilosophy and Integrative Social Robotics, School of Culture and Society, Aarhus University, Denmark

Fourth Event in the Robophilosophy Conference Series organized by
Research Unit for Robophilosophy and Integrative Social Robotics
School of Culture and Society
Aarhus University, Denmark

IOS Press
Amsterdam • Berlin • Washington, DC
Contents

Preface
   The Editors v
Acknowledgements ix

PART I. Abstracts of Plenaries

Designing “Companion Artifacts”: The Relational Construction of Culture and Technology in Social Robotics
   Selma Šabanović 3

What Robots Represent... and Why It Matters
   Robert Sparrow 5

Flourishing Isn’t Free: Paying Down Our Moral and Social Debt in Robotic Systems
   Shannon Vallor 6

“Why Did You Just Do That?” Explainability and Artificial Theory of Mind for Social Robots
   Alan Winfield 8

Social Robots Through the Lens of Care Ethics
   Aimee van Wynsberghe 10

Robots and Moral Revolutions
   John Danaher 11

PART II. Session Papers

1. Theoretical Tools for Describing Human-Robot Interaction

Towards a Middle-Ground Theory of Agency for Artificial Intelligence
   Louis Longin 17

RoboLabs: Building Surfaces of Intelligibility
   Henning Mayer 27

Applying the Theory of Make-Believe to Human-Robot Interaction
   Matthew Rueben, Eitan Rothberg and Maja J. Matarić 40

Sociomorphing, Not Anthropomorphizing: Towards a Typology of Experienced Sociality
   Johanna Seibt, Christina Vestergaard and Malene F. Damholdt 51

   Tom Poljanšek and Tobias Störzinger 68
The Artificial Nature of Social Robots: A Phenomenological Interpretation of Two Conflicting Tendencies in Human-Robot Interaction

Peter Remmers

A Robot-Human Handshake in Space: Touch and Lively Alterity Relations in Social Robotics

Chris Chesher and David Silvera-Tawil

The Growing Need for Reliable Conceptual Analysis in HRI Studies: The Example of the Term ‘Empathy’

Joanna K. Malinowska

Engaging in Deep Wonder at the Experience of Encountering a Lawnmower Robot

Rebekka Soma

Empathy and Instrumentalization: Late Ancient Cultural Critique and the Challenge of Apparently Personal Robots

Jordan Joseph Wales

2. Methods for Culturally Sustainable Social Robotics

Culturally Sustainable Social Robotics as an Empowerment Technology

Patrick Grüneberg

Mindreading in the Production of Culturally Sensitive Robot Behaviour

Gary Smith and Mark L. Ornelas

Working Alongside Service Robots: Challenges to Workplace Identity Performance

Anna Dobrosovestnova and Glenda Hannibal

Can Current Methods in Knowledge Representation and Reasoning Make Robots Culturally Robust?

Masoumeh Mansouri

From Values to Design Requirements

Christoffer Madsen, Sebastian Madsen and Mikkel Mørk

3. Case Studies on Challenges for Culturally Sustainable Robotics

Persuading Youth in Civic Participation with Social Robots: What Is Appropriate?

Kirsikka Kaipainen, Salla Jarske, Jari Varsaluoma and Kaisa Väänänen

The “Social” of the Socially Interactive Robot: Rethinking Human-Robot Interaction Through Ethnomethodology

Salla Jarske, Sanna Raudaskoski and Kirsikka Kaipainen

A Horizontal Approach to Communication for Human-Robot Joint Action: Towards Situated and Sustainable Robotics

Kathleen Belhassein, Victor Fernández Castro and Amandine Mayima
The Material Re-Turn of the Avatar: Computational Commemoration of the Deceased via Social Robots  
Kirsten Brukamp  

“How Nice That I Could Love Someone”: Science Fiction Film as a Virtual Laboratory  
Frederieke Y. Jansen  

4. Design Issues in Culturally Sustainable Social Robotics  

Stereotyping of Social Robots in Eldercare: An Explorative Analysis of Ethical Problems and Possible Solutions  
Merle Weßel, Niklas Ellerich-Groppe and Mark Schweda  

Ascribing Gender to a Social Robot  
Malene Flensborg Damholdt, Christina Vestergaard and Johanna Seibt  

The Morality Menu Project  
Oliver Bendel  

In Love with a Corporation Without Knowing It: An Asymmetrical Relationship  
Claire Boine, Céline Castets-Renard, Aurélie Clodic and Rachid Alami  

Applying Integrative Social Robotics: The Case of Silbot  
Christoffer Madsen, Sebastian Madsen and Mikkel Mork  

5. Normative Issues of Human-Robot Interaction  

Social Norms for Artificial Systems  
Anna Strasser  

Robots to Blame?  
Dina Babushkina  

The Complexity of Autonomy: A Consideration of the Impacts of Care Robots on the Autonomy of Elderly Care Receivers  
Shuhong Li, Aimee van Wynsberghe and Sabine Roeser  

Challenges for Sympathetic Robot Design  
Oliver Santiago Quick  

Nudging by Social Robots  
Raffaele Rodogno  

Ethical Nudging of Users While They Interact with Robots  
John P. Sullins and Sean Dougherty  

Preserving Personal Perspectives in Coaching Technology  
Marcus Westberg and Monika Jingar  

6. Ethical Issues of Autonomous Driving  

Understanding Autonomous Driving as Institutional Activity: Opening New Ways to React to Discriminatory Concerns in Autonomous Driving  
Manuel Dietrich
Sustaining the Higher-Level Principle of Equal Treatment in Autonomous Driving
   Judit Szalai

Discrimination Issues in Usage-Based Insurance for Traditional and Autonomous Vehicles
   Martim Brandão

7. Moral Behavior in Machines

Protomoral Machines: The Evolution of Morality as a Guideline for Robot Ethics
   Tomi Kokkonen

Moral Machines: Using Natural Morality to Guide Artificial Morality
   Aleksandra E. Kornienko

Permissibility-Under-A-Description Reasoning for Deontological Robots
   Felix Lindner

Culturally Aware Social Robots That Carry Humans Inside Them, Protected by Defeasible Argumentation Systems
   Selmer Bringsjord, Michael Giancola and Naveen Sundar Govindarajulu

Considering Human-Computer Conflicts
   Dave B. Miller

8. Culturally Sustainable Social Robotics in Larger Perspectives

What Is Robot Ethics? ...And Can It Be Standardized?
   Michael Funk

On Human Freedom in a Posthuman Future: Sources of Dialogical Tensions
   Raya A. Jones

Anthropomorphism in Social Robotics: Simondon and the Human in Technology
   Juho Rantala

Becoming Cyborg: Liberating One’s Real Species-Being. A Materialist Ontology of the Posthuman
   Gerrit Krueper

PART III. Workshops

1. Workshop: Social Models for Social Robotics

Social Models for Social Robotics
   Aurélie Clodic, Frank Dignum, Victor Fernández Castro and Raul Hakli

Context-Awareness for Social Robots
   Helena A. Frijs and Oliver Schürer
Robots as Ideal Moral Agents per the Moral Responsibility System
Dane Leigh Gogoshin
525

The Social Uncanniness of Robotic Companions
Guy Hoffman
535

What Does It Take to Be a Social Agent?
Victor Fernández Castro, Raul Hakli and Aurélie Clodic
540

2. Workshop: Should Robots Have Standing? The Moral and Legal Status of Social Robots

Should Robots Have Standing? The Moral and Legal Status of Social Robots
David J. Gunkel
553

Who or What is to Blame? Personality and Situational Attributions of Robot Behavior
Autumn Edwards and Chad Edwards
558

Could Autonomous Vehicles Become Accidental Autonomous Moral Machines?
Martin Cunneen
563

Greening the Machine Question: Towards an Ecological Framework for Assessing Robot Rights
Joshua C. Gellers
570

Do We Need to Understand Social Robots to Grant Them Rights?
Anne Gerdes
575

The Rights of (Social) Robots
David J. Gunkel
578

3. Workshop: Robots in Religious Contexts

Robots in Religious Contexts
Simon Balle and Charles Ess
585

Pioneering Religion in Robotics: An Historical Perspective
Gabriele Trovato
592

Does AI Have Buddha-Nature? Reflections on the Metaphysical, Soteriological, and Ethical Dimensions of Including Humanoid Robots in Religious Rituals from one Mahāyāna Buddhist Perspective
Gereon Kopf
596

Robots’ Spiritual Superpowers
Diana Löffler and Marc Hassenzahl
601

On the Magical Dimension of Religion. Theological Questions Concerning Robots in Religious Contexts
Ilona Nord and Thomas Schlag
606

Between Luther and Buddhism: Scandinavian Creation Theology and Robophilosophy
Charles Ess
611
4. Workshop (Early Career Researchers): Trust in Robots and AI

Trust in Robots and AI

Jesse De Pagter, Guglielmo Papagni, Laura Crompton, Michael Funk and Isabel Schwaninger

A Critical Analysis of the Trust Human Agents Have in Computational and Embodied AI

Laura Crompton

Gamification of Trust in HRI?

Michael Funk, Bernhard Dieber, Horst Pichler and Mark Coeckelbergh

Conceptualizing Trust in Objects of Speculation: A Narrative Approach to Robot Governance

Jesse De Pagter

Interpretable Artificial Agents and Trust: Supporting a Non-Expert Users Perspective

Guglielmo Papagni and Sabine Köszegi

Practice-Based Trust Research: Towards Situated Human-Robot Interaction in Older People’s Living Spaces

Isabel Schwaninger

5. Performance Workshop and Artist-Audience Dialogue Session

Think and Perform Tank

Oliver Schürer

Artist-Audience Dialogue Session

Theater Ensemble MEINHARDT & KRAUSS

Research Network TRANSOR. An International Cross-Cultural Network for Transdisciplinary Research in Social Robotics
