

**Effect of sodium chloride on acidophilic iron- and sulfur- oxidizing  
microorganisms and their bioleaching activity**

Faculty for Chemistry and Physics

Technische Universität Bergakademie Freiberg

approved

**DOCTORAL THESIS**

submitted for the academic degree

doctor rerum naturalium

Dr. rer. nat

submitted

by M.Sc. Water Science Ngoc Dieu Huynh

born on July 24, 1987 in Ben Tre, Vietnam

Reviewers:

3. Prof. Dr. Michael Schlömann, TU Bergakademie Freiberg
4. Prof. Dr. Wolfgang Sand, Donghua University Shanghai, China.

Award day: August 20<sup>th</sup>, 2021

## Table of Contents

1	Introduction.....	1
1.1	Energy and carbon metabolism of iron-/ sulfur-oxidizing microorganisms.....	2
1.2	Diversity of acidophilic iron-/sulfur-oxidizers.....	7
1.3	Applications of acidophilic iron-/sulfur-oxidizing bacteria.....	9
1.4	Toxicity of chloride ions for acidophilic microorganisms.....	15
1.5	Bioleaching in the presence of high chloride concentrations.....	17
1.6	Aims of this thesis.....	19
1.7	Overview of the results.....	20
2	Effect of sodium chloride on <i>Leptospirillum ferriphilum</i> DSM 14647 <sup>T</sup> and <i>Sulfobacillus thermosulfidooxidans</i> DSM 9293 <sup>T</sup> : growth, iron oxidation activity and bioleaching of sulfidic metal ores.....	21
2.1	Introduction.....	21
2.2	Materials and methods.....	23
2.3	Results.....	25
2.4	Discussion.....	33
2.5	Acknowledgement.....	35
2.6	Contributions of the authors.....	35
3	Effect of sodium chloride on pyrite bioleaching and initial attachment by <i>Sulfobacillus thermosulfidooxidans</i> .....	37
3.1	Introduction.....	37
3.2	Materials and methods.....	40
3.3	Results.....	43
3.4	Discussion.....	50
3.5	Acknowledgments.....	54
3.6	Supplementary materials to chapter 3.....	54
3.7	Contributions of the authors.....	56
4	Effect of inoculum history, growth substrates and yeast extract addition on inhibition of <i>Sulfobacillus thermosulfidooxidans</i> by NaCl.....	57

4.1	Introduction .....	57
4.2	Materials and methods.....	60
4.3	Results .....	62
4.4	Discussion .....	67
4.5	Acknowledgement .....	70
4.6	Supplementary materials to chapter 4.....	70
4.7	Contributions of the authors.....	71
5	Enrichment and isolation of iron/ sulfur- oxidizing acidophiles tolerant to sodium chloride from tailings at Portmán Bay, Cartagena-La Unión mining district, Spain.....	72
5.1	Introduction.....	72
5.2	Materials and methods.....	75
5.3	Results .....	78
5.4	Discussion .....	85
5.5	Acknowledgement .....	87
5.6	Supplementary materials to chapter 5.....	87
5.7	Contributions of the authors.....	90
6	Genome analysis of the ferrous iron oxidizing <i>Alicyclobacillus</i> sp. S09, a novel halophilic bacterium isolated from tailings at Portmán Bay, Cartagena-La Unión mining district, Spain	91
6.1	Introduction.....	91
6.2	Materials and Methods.....	92
6.3	Results and Discussion.....	92
6.4	Acknowledgement .....	102
6.5	Supplementary materials to chapter 6.....	102
6.6	Contributions of the authors.....	109
7	Conclusion and Outlook.....	110
8	References .....	113
	Acknowledgement.....	i
	CIRRICULUM VITAE.....	ii
	List of publications .....	iv

Peer-reviewed publications.....	iv
Oral presentations.....	v
Poster presentations.....	v
