

Matthias Merzkirch

Mechanical Characterization Using Digital Image Correlation

Advanced Fibrous Composite Laminates

 Springer

Contents

| | |
|--|----|
| 1 Introduction and Theoretical Background | 1 |
| Motivation | 1 |
| Fibrous Composite Laminates | 3 |
| Historical Background | 3 |
| Configuration | 3 |
| Structural Mechanics | 4 |
| Mechanical Characterization | 15 |
| Test Methods and Materials of Investigation | 19 |
| Digital Image Correlation | 23 |
| Historical Background | 23 |
| Configuration | 24 |
| From Speckles to Displacements | 26 |
| Virtual Strain Gauge | 29 |
| Resolution and Uncertainty Quantification | 30 |
| Patterning Methods | 35 |
| Practice Exercises | 38 |
| References | 40 |
| 2 Tensile Testing | 47 |
| Background | 47 |
| Specimen Geometry | 52 |
| Experimental Setup and DIC Configuration | 53 |
| Mechanical Response | 56 |
| Data Reduction | 56 |
| Fractography | 59 |
| Sensitivity Analysis—Angularity | 59 |
| Sensitivity Analysis—Strain Location and Range | 61 |
| Visualization of Strains and Displacements | 62 |
| Strains | 63 |
| Displacements | 69 |

| | |
|--|------------|
| Effect of Specimen Geometry and Fiber Orientation | 74 |
| Summary and Discussion | 78 |
| In-Plane Extensional and Intralaminar Shear Properties | 78 |
| Testing of Assorted Materials | 79 |
| Woven-CFRP—Uniaxial and $\pm 45^\circ$ Tensile Testing | 80 |
| UD-GFRP—Uniaxial and 10° Off-Axis Tensile Testing | 84 |
| Key Conclusions | 85 |
| DIC | 85 |
| Structural Mechanics and Testing | 86 |
| Practice Exercises | 86 |
| References | 87 |
| 3 V-Notched Specimen Testing | 91 |
| Background | 91 |
| Specimen Geometry | 95 |
| Experimental Setup and DIC Configuration | 96 |
| V-Notched Beam Test | 96 |
| V-Notched Rail Test | 99 |
| Mechanical Response | 103 |
| Data Reduction | 103 |
| Fractography | 105 |
| Sensitivity Analysis—Strain Type, Location, and Range | 106 |
| Visualization of Strains and Displacements | 107 |
| Strains | 108 |
| Displacements | 118 |
| Effect of Fiber Orientation | 121 |
| Effect of Specimen Geometry | 125 |
| Summary and Discussion | 128 |
| Intralaminar Shear Properties | 128 |
| Testing of Assorted Materials | 129 |
| Woven-CFRP—V-Notched Beam Test | 129 |
| UD-GFRP—V-Notched Rail Test | 131 |
| Key Conclusions | 132 |
| DIC | 132 |
