

Canadian Aeronautics and Space Institute
L'Institut aérospatial et spatial du Canada

Proceedings

of the

Seventh CASI

Conference on Astronautics

"Canada in Space: A Coming of Age and New Horizons"

held at The Westin Hotel
Ottawa, Canada
November 5-6, 1992

Technical Program Chairman: Darin P.W. Graham
Thomson-CFS Systems Canada

Proceedings Chairman: Eric White
Canadian Space Agency

UB/TIB Hannover 89
112 380 263

TABLE OF CONTENTS

KEYNOTE ADDRESS

- Canada in Space: A Coming of Age and New Horizons** 1
Dr. Roland Doré, President, Canadian Space Agency

PLENARY

- RADARSAT and Beyond**..... 2
J.L. McNally, Canadian Space Agency

LUNCHEON SPEAKER

- The Changing Nature of Spacecraft Operations:
from the Vikings of the 70's to the Great Observatories of the 90's and Beyond** 5
K.W. Ledbetter, Office of Space Science and Applications, NASA

Access to Space

Chair: R. McCullough, KlasTek Ltd

- Small Satellites: Opportunities for the Canadian Space Program** 6
V.A. Wehrle, R.D. Hendry, Canadian Space Agency; B. Payne, Bristol Aerospace Ltd

- Canadian Utilization of Space Station Freedom** 13
J. Faulkner, H. Gindl, Canadian Space Agency

- Black Brant System Upgrades** 23
A. Reinhardt, R. Rob, Bristol Aerospace Ltd

Materials and Structures

Chair: J. Anderson, Oerlikon Aerospace

- Stable Silicon-Oxygen-Network Coatings as a Viable
Tool for Protection of Materials in Space**..... 32
S.N. Kumar, J. Worsfold, National Research Council of Canada
T.R. Dickson, A. Pant, R.R. Sood, Ceramics Kingston Ceramiques Inc.

- Suggestions for Coating Systems to Increase the Useful Life Expectancy
of Particular Exposed Spacecraft Components in Low Earth Orbit**..... 34
M.G. Blum, FRE Group, A. Singh, AECL

- Structural Analysis of Radarsat SAPA Antenna Using Finite Element Methods**..... 35
S. Bain, CAL Corp.

Assessment of the Condition of Aviation Structures Through Integrated Statistical Processing of NDE Signals	36
P. A. Dickstein, Tel Aviv; H. Leibovitch, S. Girshowich, Y. Sternberg, G. Aloni, Israel Aircraft Industries	

IML-1

Chairs: A. Mortimer & L. Tomi, Canadian Astronaut Program

Demixing Behaviour of Immiscible Aqueous Two Phase Mixtures in Reduced Gravity	45
D.E. Brooks, J. Janzen, R. Norris-Jones, R. Muelchen, J.F. Boyce, UBC	

Back Pain in Astronauts - Preliminary Results of an Experiment Conducted on IML-1 in January 1992	53
P.C. Wing, I.K.Y. Tsang, F.A. Gagnon, L.E. Susak, R. Gagnon Department of Othopaedic Surgery, University Hospital - Shaughnessy Site	

Evaluation of An Experimental Antigravity Suit For Astronauts	54
P. J. Sullivan, R. Thirsk, R. Bondar, Canadian Space Agency L. Goodman, K. Ackles, M. Pecaric, Defence & Civil Inst. of Environmental Medicine M. Kassam, R. Aaslid, P. Dunphy, F. Stein, CATE-Ryerson Polytechnical Institute	

Venous Compliance and Fluid Shift Measurements on Spacelab IML-1	59
D. Leiski, R. Thirsk, Canadian Space Agency; J. Charles, NASA B. Bennett, KRUG Life Science	

Energy and Body Composition Changes During IML-1	65
H. Parsons, R. Preshaw, R. Krouse, J. Thirsk, University of Calgary	

Spontaneous and Positional Nystagmus In and Out of Weightlessness	67
J.A. McClure, London Ear Clinic	

Effects of Long-Term Weightlessness on Roll Circularvection	68
D.G.D. Watt, McGill University; J.P. Landolt, D.C.I.E.M.; L.R. Young, M.I.T.	

Planetary Exploration

Chairs: F. Vigneron, Canadian Space Agency; B. Vachon, DND

Robotic Gravimetric Surveys on Mars	77
A. Hugill, H.O. Seigel, Scintrex Ltd; J. Pilon, Geological Survey of Canada	

Issues in Contact Motion Control for Wheeled Mobile Robots	85
D.S. Neculescu, B. Kim, University of Ottawa; H. Reynaud, Canadian Space Agency	

**In-Space Robotics Assembly and Operations for
All Phases of a Nuclear Mars Transfer System** 94
H.G. Kleinberg, Spar Aerospace Ltd

Satellite Communications and Systems

Chairs: E. Bertenyi, Telesat Canada

A. Maclatchy, Canadian Space Agency

Superconducting Microwave Devices for Satellite Payloads..... 95
R. R. Mansour, J. Olney, C. Kudsia, COM DEV Ltd

**A Standard Switching Platform for Advanced Geosynchronous
Satellite Systems** 105
P.J. Garland, Spar Aerospace Ltd

**A 60 GHz Proof-of-Concept Intersatellite Communications Link
for Wide Area Surveillance** 106
A.B. Bell, Spar Aerospace Ltd; J. Bhagwan, COM DEV Ltd; G.A. Morin, DREO

The Space-Based Radar Simulation Laboratory 116
S. Richard, I.M. Denny, M. Grégoire, S.Y. Maskell, W.R. McPherson, B.C. Eatock,
Defence Research Establishment Ottawa; M. Gibb, Aastra Aerospace

Automation and Robotics 1

Chairs: D. Staley, Carleton University

D.P.W. Graham, Thompson-CFS

Ground-Based Control of the MSS..... 126
E. Jackson, International Submarine Engineering Ltd

**Preliminary Development of a Trajectory Planning and
Object Avoidance System for Kinematically Redundant Manipulators** 127
C. Tessier, J.N. Brodtkin, A.J. Robins, Bombardier Inc., Canadair Group
C.A. Balafoutis, Z. Lin, R.V. Patel, Concordia University

**Trajectory Planning and Obstacle Avoidance
for the STEAR/ISE SPDM Testbed Manipulator** 137
O. Williams, E. Jackson, Z. Lin, International Submarine Engineering Ltd
V. Hayward, McGill Research Centre for Intelligent Machines
K. Gupta, Simon Fraser University, G. Dinardo, Canadian Space Agency

**Robot Path Planning Critical Evaluation by
Expert Choice Sensitivity Analysis** 147
S. Kalaycioglu, Canadian Space Agency; R.V. Mayorga, University of Waterloo
D.S. Neculescu, University of Ottawa; A.K.C. Wong, University of Waterloo

Automated Path and Trajectory Planning for Space Robotic Manipulators and Mobile Robots157
C.S. Sallaberger, G.M.T. D'Eleuterio, Univ. of Toronto Institute for Aerospace Studies

Parametric Control of Point-to-Point Robotic Arm Movements Using Artificial Neural Networks167
J. Lipitkas, O. Bock, Institute for Space and Terrestrial Science; G.M.T. D'Eleuterio, University of Toronto Institute for Aerospace Studies; J.J. Grodski, DCIEM

Active Control of Interference in CMAC/MOVE Neural Networks for Robotic Applications174
P.F. McGuire, M. Lang, G.M.T. D'Eleuterio, UTIAS

The Efficiency of the MOVE Artificial Neural Network Architecture on a Multi-Transputer Platform184
G.D.M. DiNardo, D.P.W. Graham, Canadian Space Agency

Space Radar
Chair: B. Eatock, DREO

Fiber Optic Feed Networks for Phased Array Antenna Systems in Space194
J. Gazdewich, L.R.B. Patterson, MPB Technologies Inc.

The Canadian Space-Based Radar Signal Processing Demonstrator - Objectives and Design Considerations195
P. Scarlett, Ratheon Canada Ltd., P. Lee, MacDonald Dettwiler; B. Eatock, DREO

Ferrite Phase Shifter Technology for Beam Control of the RADARSAT SAR Antenna205
D. Sutherland, H.G. McDonald, G. Wray, COM DEV Ltd

Performance of the RADARSAT SAR Antenna211
G. Bush, Spar Aerospace Ltd, D.G. Zimcik, Canadian Space Agency

Space Science and Education
Chair: P. Kumar, Canadian Astronaut Program

Queen's University Activity Using CSARI, STS 47 and CANEX 2 - A Review213
R.W. Smith, Queen's University

Motor Performance in Changed Gravity214
O. Bock, I.P. Howard, K. Money, K.E. Arnold, Institute for Space and Terrestrial Science

Elementary School Children Launch Space Station CSS Explorer..... 215
I. Benning, R. Waldron, J. Luciuk, Sask. Board of Public Education; M. Strankay, Sask.
Inst. of Applied Science & Technology; W.S.C. Brooks, University of Saskatchewan

Starting an Aerospace Project at School, in Our Own Area 225
C. Dignard, Amateur Research and Development Aerospace Agency

Policy and Commercialization

Chair: J. McNally, RADARSAT

Manned Space Programs - Maximizing the Benefits to Canada 226
B.C. Bourne, Spar Aerospace Ltd

**The Legality of the Military Uses of Outer Space by the Canadian Forces/
La légalité de l'utilisation militaire de l'espace par les Forces Canadiennes** 227
L. Haeck, Collège Militaire Royal de Saint-Jean

Canada's RADARSAT Satellite Program and RADARSAT International 237
R.E. Tack, Radarsat International Inc.

Multinational Space Power Consortium..... 247
D. Lewis, S. Talon, D. St. Pierre, M. Paraschivoiu, CAISU

Automation and Robotics 2

Chairs: J. Beck, Canadian Space Agency

R. Ravindran, Spar Aerospace

Implementation of a Collision Detection Algorithm for Robotic Manipulators..... 248
L. McIntyre, M. Nahon, University of Victoria

Delayed Force Feedback in the Digital Implementation of Space Teleoperators.... 257
G.M.H. Leung, B.A. Francis, University of Toronto

**A Robust Approach for the Path Planning of Redundant
Manipulators for Space Operations**..... 267
R.V. Mayorga, K.S. Ma, A.K.C. Wong, University of Waterloo

**Robotics Evaluation and Characterization (REACH) of the
Space Station Remote Manipulator System** 277
W.B. Graham, R.K. Singhal, M.E. Stieber, CSA; A. Fahim, University of Ottawa

**Advanced Operator Interface for Supervised-Autonomous
Operation of Space Robots**..... 288
G. Immega, Kinetic Sciences Inc.

Multi-Sensor System for a Teleautonomous Mobile Robot.....298
W.S. McMath, S.K. Yeung, Canadian Space Agency; E.M. Petriu, University of Ottawa

**Adaptive Hybrid Force/Position Control for the Space Station
Freedom Robotic Operations**.....308
S. Kalaycioglu, Canadian Space Agency; A. Brown, Thomson-CSF Systems Canada Inc.

Earth Observation

Chair: J. Hornsby, Radarsat International Ltd
R. Holdway, COM DEV

Innovative Signal Processing for the MIPAS Instrument.....318
D. Beresford, C. Doyle, COM DEV Ltd

**A Solid State Microwave Noise Standard for the Calibration of
NASA Scatterometer**.....320
D. Henry, R. Tong, D. Huber, COM DEV Ltd

The Design of a Small Satellite Sensor for Forestry.....327
M.-J. Montpetit, Spar Aerospace Ltd; D. Gratton, D. Marceau, INRS-eau
N. O'Neill, Universite de Sherbrooke (CARTEL)

EESI From an International Perspective.....334
H. Zwick, MacDonald Dettwiler & Associates; S. Parashar, Canadian Space Agency
D. Thompson, Intera Information Technologies; E. Epp, SED Systems Inc.;
G. Tyc, Bristol Aerospace Ltd

Recent Developments in Groundbased Optical Imagers.....343
E.P. King, G. Garbe, D. Steele, L. Cogger, University of Calgary
S.K. Babey, Itres Research Ltd

The AURIO Instrument Ensemble - Conceptual Design.....345
L. Cogger, R. King, University of Calgary; R. Gattinger, National Research Council
S. Mende, Lockheed; H. Richardson, HRL; K. Smith, Routes Inc.

The Freja Spacecraft Ultraviolet Imaging System.....346
W.F. Payne, Routes Inc.; R. Wlochowicz, Canadian Space Agency;
S. Murphree, University of Calgary; K. Smith, Routes Inc.; B. Gordon, CAL Corp.

Space Technology

Chair: V. Wehrle, Canadian Space Agency

The Radarsat Synthetic Aperture Radar Antenna.....347
P. Arsenault, A. Baylis, C. Grenier, L. Martins-Camelo, Spar Aerospace Ltd

The Structural Design, Analysis and Test of the RADARSAT Payload Module Structure	348
F. Lefebvre, D. McLaren, P. Tremblay, Spar Aerospace Ltd	
A 25 kW Solar Array for Space-Based Radar.....	358
K. Karia, Spar Aerospace Ltd; C. Maskell, Defence Research Establishment Ottawa	
Dynamic Active Impedance for Vibration Suppression of LSS.....	368
J. de Carufel, D.S. Neacsulescu, Univ. of Ottawa; W.B. Graham, Canadian Space Agency	
Système séquentiel d'initiation pyrotechnique par laser: architecture de chaine et concepts envisageables.....	378
P. Baraër, J. Masson, Aerospatiale	
Space Power - An Opportunity for Canada?	391
R. B. Erb, Canadian Space Agency
