# TABLE OF CONTENTS

	Page
<b>Foreword</b>	3
<b>Acknowledgments</b>	5
<b>Table of Contents</b>	7
<b>OPENING SESSION AND KEYNOTE SPEECHES</b>	17
<b>Opening Speeches:</b>	
<b>Formal Opening of the Conference:</b> <i>S. Garribba, Director, Energy Technology and R&amp;D, International Energy Agency, Paris</i>	19
<b>Remarks and Introduction:</b> <i>S. Schweitzer, US Agency for International Development, Washington DC, US</i>	23
<b>Keynote Speeches:</b>	
<b>World Energy Outlook and Technology Challenges:</b> <i>S. Garribba, Director, Energy Technology and R&amp;D, International Energy Agency, Paris</i>	25
<b>Coal and Lignite: The Needs and Concerns of Developing and Industrialising Nations:</b> <i>C. Ji, Under-Secretary General, United Nations, New York</i>	49
<b>Energy for Tomorrow's World:</b> <i>I. Lindsay, Secretary General, World Energy Council, London</i>	57
<b>Clean Coal Production and Rational Use of Coal in China:</b> <i>Deputy Minister Baoming Zhang, Ministry of Coal Industry, People's Republic of China</i>	71
<b>The Perspectives of Coal Users and Suppliers:</b> <i>J. Williams, Managing Director, Shell Coal International, Ltd., UK</i>	87
<b>The Reality of Coal and Coal Technology:</b> <i>A.C. Toohey, Chief Executive, World Coal Institute, London</i>	95
<b>The Technological Pathway for Coal:</b> <i>J. Siegel, Acting Assistant Secretary for Fossil Energy, US Department of Energy, Washington DC, US</i>	103

<b>Coal in the 21st Century:</b> <i>R. Higgins, Executive Director, Minerals and Fisheries Group, Department of Primary Industries and Energy, Australia</i>	111
<b>Coal Technology Options, International Co-operation Partnership:</b> <i>M. Ichikawa, Director, Coal Mining Department, Agency of Natural Resources and Energy, Japan</i>	123
<b>SESSION I. ASIA-PACIFIC COAL USE STRATEGIES: NEEDS, PLANS AND OPPORTUNITIES</b>	131
<b>Development and Demonstration of Clean Coal Technologies:</b> <i>A. Kunito and M. Takahashi, Electric Power Development Co., Japan</i>	133
<b>Integrating Improved Coal Technologies into Regional Energy System:</b> <i>S. Boedihardjo, Director, Engineering Service Center, PLN, Indonesia</i>	151
<b>International Collaboration and Partnering for Effective Selection, Demonstration and On-going Use of Clean Coal Technologies:</b> <i>A.M. Ferrer, Vice-President, Stone &amp; Webster Engineering Corp., US</i>	177
<b>SESSION II. ASIA-PACIFIC COAL USE STRATEGIES: AN INTEGRATED APPROACH</b>	185
<b>Environmentally Sound Technologies for Sustainable Development:</b> <i>S. Schweitzer, Office of Energy and Infrastructure, US Agency for International Development, US</i>	187
<b>Improved Coal Technologies for the Asia-Pacific 21st Century Economic Development:</b> <i>G. Preston, Vice-President, Generation &amp; Storage Div., EPRI, US</i>	205
<b>Integrating Coal Use into Korean Energy Systems:</b> <i>H.S. Moon, Chairman of the Board, Korea Electric Power Corp., Republic of Korea</i>	219
<b>Coal in Power Generation: How the E7 Utilities Look at Technology Transfer to the Developing Countries:</b> <i>D. Kallmeyer, Head of Fossil Fired Power Plants, RWE Energie, Germany</i>	231
<b>Clean Coal Technology Development, Dissemination and Cooperation Through CCT Center of Japan:</b> <i>H. Okamoto, Director-General, Clean Coal Technology Centre, New Energy Development Organization, Japan</i>	249

<b>The Reality of Coal Technology for Today and Tomorrow:</b> <i>D. Pai, Chairman and President, Foster Wheeler Development Corp., US</i>	259
<b>WORKSHOP A1. FINANCING</b>	287
<b>Barriers to Investment in Emerging Power Markets:</b> <i>J. Beardsworth, Hunton &amp; Williams, US</i>	289
<b>Financing Coal and Lignite Development and Electricity Projects:</b> <i>M. Agata, Special Advisor to the Governor, The Export-Import Bank of Japan, Japan</i>	325
<b>Process for Encouraging Investment and Technology Co-operation in the Electric Power Industry:</b> <i>F. Denny, Vice-President, Engineering and Fossil Fuels, Edison Electric Institute, US</i>	337
<b>Assisting Financeability Through Rate Structure Design:</b> <i>D. Keith, President, Keith and Associates and R. Bibb, President, Bibb and Associates, Inc., US</i>	345
<b>Critical Issues in Power Project Financing:</b> <i>W. Holland, Partner, LeBoeuf, Lamb, Leiby and MacRae, US</i>	353
<b>WORKSHOP A2. TECHNOLOGY OPTIONS: OVERVIEW</b>	357
<b>Coal Technology Selection Methods and Tools for New Power Generation and Environment/Performance Upgrading:</b> <i>A. Armor, Director, Fossil Power Plants, EPRI, US</i>	359
<b>Highly Efficient Pulverised Coal-Fired Power Plants:</b> <i>U. Hauser, Engineering Manager, ABB Kraftwerke AG, Germany</i>	381
<b>Systematic Coal Utilization Technology Options Evaluation Process:</b> <i>A.M. Ferrer, Vice-President, Stone &amp; Webster, US</i>	397
<b>Development of Coal Utilisation Technologies in India:</b> <i>B.C. Misra, Director, Central Mine Planning &amp; Design, Ltd., India</i>	409
<b>Coal Utilization in China: Technology Options by Sector:</b> <i>D. Simbeck, Vice-President, Technology, SFA Pacific, Inc., US</i>	415
<b>Development and Option of Retrofit and New Technologies for Low-Rank Coal:</b> <i>G. Moumdjian, Head of Thermal and Nuclear Energy, University of Sofia, Bulgaria</i>	427

<b>Production of Coal-Based Domestic Fuel: An Environmentally Friendly Technology:</b> <i>B.C. Misra, Director, Central Mine Planning &amp; Design, Ltd., India</i>	429
<b>Coal Technology for Developing Countries:</b> <i>M. Matei, Fuel and Chemical Methods Manager, ICEMENRG, Romania</i>	437
<b>Technology Options for Industrial, Commercial, and Residential Applications:</b> <i>J. Harrison, Professor, Leeds University, and J. Topper, Commercial Director, British Coal Corp., UK</i>	453
<b>General Overview of Emerging Clean Coal Technology in the U.S. as Applicable to Asian Countries:</b> <i>F. Emmett, Partner, Sargent &amp; Lundy, US</i>	469
<b>Review of Vietnamese Coals:</b> <i>N.V. Quynh, Deputy Director-General, Coalimex, Vietnam, and P. Bosak, Senior Geologist, GMS, Czech Republic</i>	481
<b>Coalbed Methane - the Cleanest Coal Utilisation Yet:</b> <i>I. Clements, President and CEO, Powerbridge, Inc., US</i>	487
<b>WORKSHOP A3. TECHNOLOGY OPTIONS: EMISSIONS CONTROL, COAL PREPARATION AND CLM FUELS</b>	495
<b>Carbon Dioxide Capture and Disposal as a Greenhouse Gas Abatement Option:</b> <i>I. Webster, GHG Programme Director, IEA Greenhouse Gas R&amp;D Programme, London, UK</i>	497
<b>Clean and Efficient Use of Coal with CO<sub>2</sub> Stabilization:</b> <i>V. A. Iyengar, and M.S. Iyengar, M.S. Iyengar &amp; Assoc., India</i>	505
<b>Improved Coal Utilisation Technology: Potential to Reduce Carbon Dioxide Emissions:</b> <i>K. Sullivan, Global Climate Committee, Coal Industry Advisory Board, IEA, Paris</i>	513
<b>Perspective on Coal Liquid Mixtures (CLM):</b> <i>H. Feibus, Chair, IEA Coal-Liquid Mixtures Executive Committee, US</i>	523
<b>Clean Competitive Coal Water Fuel:</b> <i>D. Dunlop, President, Fuels Management Inc., US, and C. Capes, National Research Council of Canada, Canada</i>	531
<b>Clean and Efficient Coal Handling Systems: Development of Coal Cartridge System (CES):</b> <i>T. Yamada, General Manager, Technology/Energy Development Department, Idemitsu Kosan Co., Japan</i>	541

<b>New Development of Processing for Coal Beneficiation:</b> <i>P. Ling, Senior Preparation Engineer, Ministry of Coal Industry, People's Republic of China</i>	551
<b>Advanced Flotation: Packed Column Froth Separation for Fine Coal Cleaning:</b> <i>D. Yang, President, Mineral Technologies International, US</i>	557
<b>Significance of Recent SCI Advances to Future of Coal Liquid Mixtures:</b> <i>T. Hamieh, Professor of Physical Chemistry, CNRS, France</i>	567
<b>Low-Grade Coal Upgrading: Application of the Liquids from Coal (LFC) Technology to Coals in the Pacific Rim:</b> <i>S. van Hoften, SGI International, US</i>	577
<b>Coal Liquefaction in Indonesia - Programme and Prospect:</b> <i>A. Dasuki and H. Soedieto, Agency for the Assessment and Application of Technology, Indonesia</i>	599
<b>WORKSHOP A4. REGIONAL NEEDS</b>	611
<b>Integrating Improved Coal Technology into Regional Energy Systems:</b> <i>D. Boyd, Executive General Manager, Coal &amp; Allied Industries, Australia</i>	613
<b>Asia-Pacific and Europe Comparison of Coal Prospects/Opportunities:</b> <i>M. Daniel, Head of Supply Transport and Markets, IEA Coal Research, UK</i>	625
<b>Regional Analysis and Architecture of the Whole Energy System:</b> <i>W. Gouse, Senior Vice-President, MITRE, US</i>	633
<b>Efficient Use in Integrated Regional Energy Systems:</b> <i>T. Kashiwagi, Professor, Tokyo University of Agriculture and Technology, Japan</i>	647
<b>The Role of Coal in the Development of Pakistan:</b> <i>R.M Sultan, Chief Inspector of Mines, Department of Labour and Manpower, Pakistan</i>	665
<b>Changes in German Lignite Mining: Just the Effects of Reunification:</b> <i>F. von Bismarck, Head of Lignite Planning Section, Ministry for Environment and Regional Planning, Brandenburg, Germany</i>	667
<b>Some Considerations on Imported Coal and the Environment in Morocco:</b> <i>M. Moubaraki, Engineer, Ministry of Energy and Mines, Morocco</i>	675
<b>Indonesian Coal for Environmental Value in Slovenia Cogeneration Plants:</b> <i>M. Vedenik-Novak, TETOL, Slovenia</i>	697
<b>Low-Rank Coal Water Fuel (LRCWF) Commercial Demonstration:</b> <i>W. Wilson, Senior Research Advisor, Energy Research Center, US</i>	705

<b>Regional Perspectives on Externalities Analysis and Electric Resource Planning:</b> <i>S. Kotz, J. London, California Public Utilities Commission, US</i>	707
<b>WORKSHOP A5. ENVIRONMENTAL STRATEGIES: ENVIRONMENTAL CONSEQUENCES AND RESPONSE</b>	717
<b>Overview of Coal Use and Efficient Future Technology:</b> <i>Y. Yu, Chief, Central Coal Mining Research Institute, People's Republic of China</i>	719
<b>Reducing Environmental Impact from Using Coal and Lignite in Thailand:</b> <i>A. Chiewwattakee, Senior Economist, Department of Energy Development and Promotion, Thailand</i>	729
<b>Air Toxic Emissions from Coal-Fired Power Plants: Opportunities and Challenges:</b> <i>K. Connor, Senior Associate, Decision Focus, Inc., Hong Kong</i>	741
<b>Analysis of Development of Low-Emission Boiler Systems for DOE PETC Combustion 2000 Programme:</b> <i>R. Kaminski, Raytheon Engineering &amp; Constructors, US</i>	759
<b>WORKSHOP B1. CO-OPERATION AND PARTNERSHIP</b>	773
<b>Improving Coal Use in Developing Countries through Technology Transfer:</b> <i>J. Topper, Commercial Director, Coal Research Establishment, UK</i>	775
<b>USAID Experience in Co-operation and Partnership:</b> <i>S. Schweitzer, Chief, Energy Innovation and Private Sector Division, US Agency for International Development, US</i>	793
<b>Promoting International Cooperation of Coal Patent Technology Development:</b> <i>J. Lin, Engineer, Nanjing Coal Mining Machinery Factory, People's Republic of China</i>	811
<b>US-AEP Programs: A Model for Public/Private Co-operation:</b> <i>L.P. Reade, Director General, US-Asia Environmental Partnership, US</i>	815
<b>Technology Options and Technology Transfer - An Indian Experience:</b> <i>K. Ramakrishnan, Corporate Director, Bharat Heavy Electricals, Ltd., India</i>	825
<b>Role of Multilateral Co-operation in Technology Development and Deployment: The IEA Experience:</b> <i>J. Tilley, Head, Energy Technology Collaboration Division, International Energy Agency, Paris</i>	833

<b>Comprehensive Promotion of Coal Use Technology and International Co-operation for Transfer of Appropriate Technology:</b> <i>T. Abe, Senior Staff, International Co-operation Department, Center for Coal Utilization, Japan</i>	841
<b>WORKSHOP B2. TECHNOLOGY OPTIONS: DESULFURISATION AND INTEGRATED DEGASIFICATION COMBINED CYCLE</b>	855
<b>Flue Gas Desulfurisation for Coal-Fired Power Generation in the Asia-Pacific Region: An Overview of Best Available Options:</b> <i>I. Smith, Head of Environmental Group, IEA Coal Research, UK</i>	857
<b>Gravimelt Process for Coal Desulfurization and Demineralization:</b> <i>R. Meyers, Manager, Chemical Technology, TRW, Inc., US</i>	869
<b>Available Technologies for Flue Gas Desulfurization in Thermal Power Plants:</b> <i>R.J. Batyko, Manager, Environmental Projects, Babcock &amp; Wilcox, US</i>	871
<b>Techno-Economic Feasibility Assessment of Integrated Gasification Combined Cycle (IGCC) Power Generation Technology with High Ash Indian Coals:</b> <i>O.P. Rao, Council of Scientific &amp; Industrial Research, India</i>	883
<b>Indirect Coal Liquefaction via Fischer-Tropsch Technology for Baseload IGCC Plant:</b> <i>S. Tam, Manager, Advanced Process, Bechtel Corp., US</i>	895
<b>Control of SO<sub>2</sub> and NO<sub>x</sub> Emissions from Fossil Power Plants:</b> <i>M. Zhang, Thermal Power Research Institute, Ministry of Power Industry, People's Republic of China</i>	905
<b>WORKSHOP B3. TECHNOLOGY OPTIONS: PYROLYSIS AND FLUID-BED COMBUSTION</b>	915
<b>Coal Complex Centering on Coal Pyrolysis:</b> <i>T. Kawamura, Senior Researcher, Nippon Steel Corp., Japan</i>	917
<b>Cleaning of Sulphur-Contaminated Coal with Product Control Indirect Flash Pyrolysis Technology:</b> <i>E. Someus, Director, Product Control, UK</i>	927
<b>Circulating Fluidized Bed Gas-Steam Cogeneration and Its Environmental Assessments:</b> <i>Y. Li, Director, and D. Qiu, Professor, INET/ITEESA, People's Republic of China</i>	949
<b>Design Considerations for Utility Size CFB Steam Generators:</b> <i>R. Skowrya, Engineering Manager, Fluidized Bed Steam Generation, ABB Combustion System, US</i>	957

<b>Pressurized Fluidized Bed Combustion: Efficient, Clean and Compact Power Generation:</b> <i>S. Jansson, Manager, Science and Technology, ABB Carbon AB, Sweden</i>	971
<b>Technology Integration in Efficient and Clean Coal Use for Utilities:</b> <i>T. Ogawa, Assistant General Manager, EPDC, Japan</i>	981
<b>WORKSHOP B4: REGIONAL NEEDS AND PUBLIC OUTREACH</b>	991
<b>Energy-Environmental Issues in Shanxi Province and Taiyuan City:</b> <i>S. Xia, Professor, Tsinghua University, People's Republic of China</i>	993
<b>Coal-Fired Power Stations and Their Effect on the Environment in Shanxi, China:</b> <i>R. Hui, Associate Professor, Shanxi, Province Planning Committee, People's Republic of China</i>	1001
<b>The Way of Utilisation of Lignite in Yunnan Province of China:</b> <i>Z. Ma, Central Coal Mine Research Institute, People's Republic of China</i>	1011
<b>Clean Coal Transport System CWM Chain Between China and Japan:</b> <i>N. Hashimoto, Manager, CWM Project Operations Department, JGC Corp., Japan</i>	1015
<b>Coal Use: Public Perceptions:</b> <i>G. Shedji, Superintending Engineer, Maharashtra State Electricity Board, India</i>	1025
<b>The Effects of Environmental Compliance on Coal Use in the Midwestern United States: How Regulators Balance the Competing Interests:</b> <i>J.M. Biddison, Commissioner, Public Utilities Commission of Ohio, US</i>	1031
<b>Heat Rate Improvement Technology Transfer to Asian Countries: A US-Japan Initiative:</b> <i>F. Wong, President, FKW Eneritech, Inc., US and M. Takahashi, EPDC, Japan</i>	1043
<b>WORKSHOP B5: ENVIRONMENTAL STRATEGIES: ENVIRONMENTAL CONTROL AND MANAGEMENT</b>	1053
<b>Energy Efficient Air Pollution Control for Fossil-Fuelled Plants:</b> <i>P. Mathusa, Program Director, New York State Energy Research and Development Authority, US</i>	1055
<b>Coal Technology and Environment:</b> <i>R. Patil, Chief Engineer, Maharashtra State Electricity Board, India</i>	1073

<b>The Role of Clean and Efficient Use of Coal in the Future Energy and Environment of China:</b> <i>X. Song, China University of Mining and Tech., People’s Republic of China</i>	1081
<b>Environmental Sound Facilities Management:</b> <i>J. Elliott and W. Cavanaugh, Ogden Environment and Energy Services, US</i>	1089
<b>CQE: Bringing New Dimensions to Fuel Decisions:</b> <i>S. Stallard, Project Manager, Black &amp; Veatch, US</i>	1099
<b>SESSION III. ENVIRONMENTAL CHALLENGES AND OPPORTUNITES</b>	1115
<b>Observations of Panelists</b>	1117
<b>CLOSING SESSION</b>	1127
<b>Closing Keynote Speech:</b> <i>J.P. Ferriter, Deputy Executive Director, International Energy Agency, Paris</i>	1129
<b>Final Remarks:</b> <i>J. Siegel, Acting Assistant Secretary, US Department of Energy, Washington DC, US</i>	1135
<b>Key Findings and Opportunities for Action:</b> <i>S. Garribba, Director for Energy Technology and R&amp;D, International Energy Agency, Paris</i>	1137
<b>CONFERENCE PROGRAMME AND COMMITTEES</b>	1147
<b>Conference Programme</b>	1149
<b>Steering Committee</b>	1165
<b>Organising Committee</b>	1167
<b>Conference Participants</b>	1169
