

STATE RESEARCH CENTRE OF RUSSIA
INSTITUTE FOR HIGH ENERGY PHYSICS

**Problems
on High Energy Physics
and
Field Theory**

PROCEEDINGS OF THE XVII WORKSHOP

Dedicated to the 140th Birth Anniversary of Henri Poincaré

Protvino, June 27 — July 1, 1994

Editors:

A.P.Samokhin, G.L.Rcheulishvili

Protvino 1995

CONTENTS

Preface. *Anatoly A. Logunov*

viii

Section 1 Space–Time and Gravity

I. Classical Fields

A.A.Logunov. <i>Classical Gravitational Field Theory and Mach Principle</i>	1
R.M.Santilli. <i>Problematic Aspects of Einstein's Gravitation and their Possible Resolution via Logunov's Relativistic Gravitation</i>	25
E.Yu.Emel'yanov, Yu.V.Chugreev. <i>Evolution of Freedman's Universe in Relativistic Theory of Gravitation Based on Constant Curvature Spaces</i>	69
A.F.Zakharov. <i>Caustic Singularities of the Cusp Type in the Theory of Gravitational Lenses</i>	79
S.N.Sokolov. <i>Equations of Motion for Anisotropic Nonlinear Elastic Continuum in Gravitational Field</i>	85
G.N.Afanasiev, R.A.Asanov. <i>On the Gravitational and Electromagnetic Two-Body Problems in the Poincaré Approach</i>	97
A.A.Vlasov. <i>Expanding Singular Shell in Nonlinear Model of Scalar Field</i>	108
O.V.Monovsky. <i>The Gravitational Field of Expanding Singular Shell (second approximation)</i>	115

II. Quantum Effects

G.Esposito. <i>Asymptotic Heat Kernels in Quantum Field Theory</i>	127
A.Yu.Kamenshchik. <i>Wave Function of the Universe and Particle Physics</i>	134
A.M.Khvedelidze, V.V.Papoyan, V.N.Pervushin. <i>Gaugeless Reduction of Gravity and Evolution of Universe</i>	140
A.Y.Shiekh. <i>The Perturbative Quantization of Gravity</i>	156
Yu.V.Baryshev, A.A.Raikov. <i>A Quantum Limitation on the Gravitational Interaction</i>	166
E.A.Tagirov. <i>Quantum Mechanical Observables in General Relativity</i>	168

III. Space–Time Discontinuity

V.S.Vladimirov. <i>Observable Space–Time Coordinates are Rational Numbers</i>	174
D.D.Ivanenko, R.V.Galiulin. <i>Quasicrystal Model of the Universe</i>	180
P.N.Antonyuk. <i>Difference Equations, Fractals and Cosmological Models</i>	186

Section 2 Particles and Fields

I. General Properties

Yu.M.Zinoviev. <i>The Role of Poincaré Group in Elementary Particle Physics</i>	189
V.O.Soloviev. <i>Total Divergences in Hamiltonian Formalism of Field Theory</i>	197
A.I.Alekseev. <i>On Possibility of Power Type Infrared Behaviour of the Gluon Propagator</i>	202
V.V.Khrushchev. <i>On the Theory of the Generalized Quark Fields</i>	206
L.L.Jenkovszky. <i>Supercooled, Metastable Quark–Gluon Plasma Universe</i>	209
R.N.Faustov, A.P.Martynenko, V.A.Saleev. $O(\alpha^2)$ <i>Corrections to the Orthopositronium Decay Rate</i>	211
E.E.Bubelev. <i>Poincaré Dynamical Approach and Imaginable Non–Euclidean Bodies in High Energy Physics</i>	219
P.S.Isaev. <i>Some Problems of High–Energy Elementary Particle Physics</i>	223

II. New Trends

M.S.Plyushchay. <i>Deformed Heisenberg Algebra, Fractional Spin Fields and Supersymmetry without Fermions</i>	228
D.R.Grigore. <i>Relativistic Physics in 1+2 Dimensions</i>	246
N.A.Sveshnikov. <i>Non–Pauli States in Quantum Systems</i>	253

Section 3 Related Mathematical Areas

D.B.Fairlie. <i>Integrable Systems in Dimensions Greater than Two</i>	260
S.V.Talalov. <i>New Version of a Quantum String in Minkowski Space–Time</i>	267
N.A.Gromov, I.V.Kostyakov. <i>The Cayley–Klein Structure on Quantum Unitary Groups</i>	270

M.Asano, Ch.Itoi, Sh.-I.Kojima. <i>Quantum Diffusion Process with a Complex Weight on Three Dimensional Lattice</i>	277
R.N.Rogalyov. <i>A Compact Expression for Bilinear Combination of Dirac Spinors via World Tensors</i>	282
List of Participants	288
