Proceedings of

THE FOURTH INTERNATIONAL SYMPOSIUM ON AVIATION PSYCHOLOGY

April 27 - 30, 1987

Sponsored by

The Aviation Psychology Laboratory
The Ohio State University
Columbus, OH 43210

and

The Association of Aviation Psychologists

Edited by

Richard S. Jensen

Richard S. Jensen, Symposium General Chair
Janeen Adrion, Symposium Technical Chair
CONTENTS

FORWARD................................................................. 1

FOURTH SYMPOSIUM SESSION CHAIRS.................................... vii

FOURTH SYMPOSIUM REPRESENTATION...................................... viii

INTRODUCTION

Keynote Address

"Aviation Safety in a Changed World: A Challenge to Aviation Psychology," Mr. John H. Enders, President, Flight Safety Foundation................................. 1

Workshop Report

"Summary of the Workshop on Cockpit Automation in Commercial Airplanes," Dr. Rolf Braune, Boeing Commercial Airplane Company.............................. 9

ENGINEERING

Cockpit Design

"Shape and Object Displays for Secondary System Monitoring" Dr. Dennis B. Beringer and S. E. Chrisman, New Mexico State University........................................ 16

"Tactical Aircraft Cockpit Study," Mr. Gregory J. Barbato and S.D. Detro, Midwest Systems Research, Inc.......................... 23

"Evaluating the Panoramic Cockpit Controls and Displays Systems," Dr. Christopher J. Arbak, McDonnell Douglas Corporation, N. Schwartz, AFWAL, and G. Kuperman, AAMRL...... 30

"Multi-Function Displays in the Cockpit: A Methodology for Interface and Interaction Design," Dr. Avraham Parush, Israel Aircraft Industries ........................................ 37

"The Peripheral Vision Horizon Display: A Review," Mr. Donald Hameluck and P. Stager, York University, Canada..... 51

"Techniques to Process, Enhance, and Display Multisensor Fused Imagery," Mr. Thomas A. Stinnett and C. Young, Westinghouse Defense and Electronics Center.............................. 58

"Attitude Awareness from Aircraft Head-Up Displays," Dr. Robert M. Taylor, RAF Institute of Aviation Medicine........ 70

Voice Technology

"Acoustic-Phonetic Changes in Speech Due to Environmental Stressors: Implications for Speech Recognition in the Cockpit" Dr. Thomas J. Moore, AAMRL/BBA and Z. S. Bond, Ohio University. 77

"The Application of Voice Technology in Space Vehicles," Dr. Harvey A. Wichman, Claremont College................................. 84

"A Comparison of Alphanumeric Data Entry Methods for Advanced Helicopter Cockpits," Mr. Frank J. Malkin and K.A. Christ, U.S. Army, Human Engineering Lab........................................... 91

"Pilot Performance Enhancements Through Voice Applications in the AFTI/F-16 Aircraft," Mr. J. Steven Eckel, F.A. Gorg, S.W. Rabeler, and F.A. Rosenhoover, General Dynamics/Fort Worth Division...............................101

Expert Systems

"Expert Systems for Risk Assessment," Dr. Joel Shechter, Consultant..........................................................115

"Human Cognitive Modeling Using an MTOS Analog," Dr. Gerald P. Chubb, W.M. Cooper, G.M. Kersnick, and R.J, Rubey, SofTech, Inc...........................................121

"Expert Systems: Their Potential For Aerospace Training," Dr. David J. Williams, Utah State University.................128

Simulation

"Flight Simulator Platform Motion and Air Transport Pilot Training," Dr. Alfred T. Lee and S.R. Bussolari, NASA Ames Research Center..........................................................135

"MANPRINT Technologies for the SDI (Strategic Defense Initiative)," Dr. Randall M. Chambers, U.S. Army Research Institute.............................................150
"Multi-attribute Evaluation of Simulator Flight Performance in Research and Training," Mr. James C. Mundt and L.E. Ross, University of Wisconsin..........................151

"Use of Microprocessor Based Simulation in Research and Training," Mr. David A. Lombardo, Frasca, International, Inc...158

"A Manufacturer's Perspective of Training Device Research Application," Mr. Edward L. Keins, Aviation Simulation Technology, Inc.................................166

"Use of the ILLIMAC Simulator in Research at the University of Illinois, Dr. Henry L. Taylor, University of Illinois......172

ATC Automation

"Human Factors Implications of Progressive Air Traffic Control Automation," Dr. V. David Hopkin, RAF Institute of Medicine....179

"The Challenges of Future ATC Automation and Airspace Redesign," Mr. Steven J. Brown, AOPA.................................186

"Sources of Stress Affecting Pilot Judgment," Dr. Edward C. Simmel, M. Cerkovnik, and J.E. McCarthy, Miami University......190

"Where Will All the Air Traffic Controllers be in the Year 2001?" Dr. Earl S. Stein, DOT/FAA Technical Center.................195

PSYCHOLOGY

Perception

"Active Control of Accelerating and Decelerating Self Motion," Mr. Brian S. Zaff and D.H. Owen, The Ohio State University.....209

"Field of View Versus Visual Retinal Field in the Detection of Loss in Altitude," Dr. Lawrence Wolpert, The Ohio State University........................................223

"How Viewing Angle Changes the Interpretation of a 2-D Scene," Dr. Thomas O. Halloran, University of Pittsburgh at Johnstown..231

"Masking of Motion Cues by Random Background Motion," Dr. Glenn L. Greig and L.D. Reid, University of Toronto Institute for Aerospace Studies.................................237
"Judgment of Speed with Computer Generated Motion Displays,"
Mr. John F. Larish and J.M. Flach, University of Illinois......244

Judgment

"A Simulator-Based Approach to Training in Aeronautical
Decision Making," Dr. Thomas J. Connolly and B.B. Blackwell,
Embry-Riddle Aeronautical University..............................251

"Mental Models, Uncertainty, and In-flight Threat Response by
Air Force Pilots," Dr. Marvin S. Cohen, Decision Science
Consortium, Inc..................................................258

"Pilot Judgement Training-The Australian Study,"
Dr. Ross Telfer, University of New Castle.........................265

"Training for Iminent Emergencies," Mr. Frank Monastero, T.M.
Monitor Corporation.............................................274

"A Methodology for Research on VFR Flight into IMC," Dr. Walter C.
Giffin and T.H. Rockwell, The Ohio State University.........278

"The Measurement of Hazardous Thought Patterns and Their
Relationship to Pilot Personality," Dr. Lewis F. Lester, Colby
College, T.J. Connolly, E-RAU..................................286

"A Program to Identify and Treat "Pilot Error", Particularly,
Poor Pilot Judgment," Ms. Maxine Lubsner, Columbia University
and L.F. Lester, Colby College.................................293

"The EMS Syndrome: A Challenge for Aviation Psychology,"
Mr. Ira J. Rimson, System Safety Associates, Ltd.............300

"Social Judgment Theory: An Investigation of its Usefulness
in Trainee Pilot Evaluation Recommendations," Capt. Philip A.
Ikomi, Bowling Green State University..........................307

"A Study of Pilot Decision Making Using MIDIS - A Microcomputer -
Based Decision Training System," Dr. Alan Stokes, C. Wickens,
T.Davis, Jr., B. Barnett, R. Rosenblum, and F. Hyman,
University of Illinois........................................314

"Simultaneous Factor Analytic Techniques for Determining
Robustness, Validity, and Reliability in a Safety Climate
Scale," Dr. Harold Holmes, University of Wisconsin - Whitewater
and R. L. Brown, University of Wisconsin - Madison........321

"The Evaluation of Pilot Judgment during Certification Flight
Tests," Mr. Denis A Caravella, FAA............................328

"The Evaluation of Pilot Judgment," Mr. Michael F. Young, New
Zealand Air Line Pilot's Association............................337

xiii
Cockpit Resource Management

"Accidents - The name we give to Management Errors,"
Mr. Bjarne Prendal, Scandinavian Airlines System.................352
"Cockpit Resource Management Concepts and Training Strategies:
Developing an Analysis of Training Needs," Capt. Tom L. Sams,
American Airlines.................................................360

"The Captain's Managerial Tasks," Drs. Ir. Andre Droog,
Psychotechniek, The Netherlands..................................372

"Cockpit Resource Management - An Antipodean View,"
Mrs. Fionna McG Scott-Milligan and B. Wyness, Air New Zealand..379

Raby, Ansett Airlines of Australia.................................384

"Changing Attitudes through Training: A Formal Evaluation of

"The Formation Process of Airline Flight Crews,"

"Communication Indexes of Crew Coordination,"
Dr. Barbara G. Kanki, S Lozito, San Jose State University,
and H.C. Foushee, NASA Ames Research Center...................406

"'But Captain, I've been doing this a Lot Longer than You Have,'
The Effects of 'Role Reversal' on Crew Interaction,"
Ms. Sandra C. Lozito, San Jose State University, B.G. Kanki
and H.C. Foushee, NASA Ames Research Center....................413

"The Synergy Diamond as a Model for Human Behavior,"
Lt. Col. Conrad S. Biegalski, USAF 349 Military Airlift Wing...419

Capt. Pieter C. Spierenburg, KLM Royal Dutch Airlines.........426

"C-5 Aircrew Coordination Training," Capt. David H. Shroyer,
United Airlines (ret.).............................................430

"Cockpit Resource Management: New Developments and Techniques,"
Mr. William R. Taggart, Cockpit Resource Management............433

"Evaluating Cockpit Resource Management Training," Dr. Robert
L. Helmreich and J.A. Wilhelm, The University of Texas........440

349 Military Airlift Wing (USAF Reserve)........................447

Communication in Aviation

"The Role of Qualitative Methods in Aviation Research,"
Dr. C. Elaine McCoy, The Ohio State University...................451
"Training Aviators in Ethnographic Techniques," Dr. Carl B. Holmberg, Bowling Green State University........................................457

"Practical Field as Communication," Dr. Algis Mickunas, Ohio University.................................................................461

"Aviation and Sign Systems: Addressing the Problem of Misunderstanding," Dr. David Descutner, Ohio University........467

SELECTION AND TRAINING

Selection

"Selection for Optimal Crew Performance: Relative Impact of Selection and Training," Mr. Thomas R. Chidester, NASA Ames Research Center.................................................................473

"Risk Assessment and the Prediction of Student Pilot Performance," Dr. Daniel L. Dolgin, R.N. Shull, G.D. Gibb, Naval Aerospace Research Laboratory.........................................................480

"Dynamic Visual Acuity in Selection of The Aviator," Dr. A. M. Prestrude, Virginia Polytechnic Institute & State University.................................................................486

"Wondrous Original Method for Basic Airmanship Testing," Dr. Stanley N. Roscoe and L. Corl, ILLIANA Aviation Sciences...493

"The Basic Attributes Tests: An Experimental Selection and Classification Instrument for U.S. Air Force Pilot Candidates," Mr. Thomas R. Carretta, Air Force Human Resources Laboratory...500

Training

"Simulator and Aircraft Training for Optimal Combat Proficiency," Dr. James W. Dees and L.C. Byars, U.S. Army Aviation Center.................................................................508

"The Role of the Flight Instructor - An Important Psychological Factor in Flying Training," Mr. Joergen Termoelen, Scandinavian Institute of Aviation Psychology, Denmark..........522

"Attitudes of Canadian Pilots Towards Private Pilot Flight Training," Dr. Neil R. Winther, University of Manitoba.........529

"Instruction for Military Air Intercept Control," Ms. Lisa F. Weinstein and G. Lintern, University of Illinois.................537
"Assessment of Student Attitudes in the Flight Training Environment," Ms. Catherine Casselman Vuksanovic and D.L. Howell, University of New Hampshire............................544

"Ab-Initio Training for Airline Pilots," Dr. Gertjan Nooy, Netherlands Government Civil Aviation School..................550

"Maintaining Minimum Pilot Aptitude Levels in Commercial Aviation," Dr. Robert O. Besco, PPI, Inc..................564

PHYSIOLOGY

Stress

Fatigue

"Subjective Fatigue in Relation to Circadian Rhythmicity and Rest-Duty-Cycle in Aircrews Operating on the Route Frankfurt - San Francisco," Dr. Alexander Samel and H.M. Wegmann, DFVLR-Institute for Aerospace Medicine - Germany..................579

Drugs and Alcohol

"Flight Performance in a Dual and Single Task Condition under Drug and No Drug Conditions: What Does the Secondary Task Tell Us?" Dr. Fred C. Hyman, H.L. Taylor, and C.D. Wickens, University of Illinois..................587

"Pilot Attitudes Toward Alcohol Use and Flying," Dr. Susan M. Ross and L. Ross, University of Wisconsin..................594

WORKLOAD ASSESSMENT

Eye Movement

"Time-Locked Time-Histories: A New Way of Examining Eye-Movement Data," Dr. J. Raymond Comstock, Old Dominion University, R.L. Harris, Sr., NASA Langley Research Center, G.D. Coates, and R.H. Kirby, Old Dominion University..................597

Correlated

"Attention in Aviation," Dr. Chris Wickens, University of Illinois.................................................602

"Concurrent Validation of Four Workload and Fatigue Measures," Dr. Valerie J. Gawron, CALSPAN, S. Schiflett, T. Slater, J. Miller, School of Aerospace Medicine, and J. Ball, CALSPAN.....609
"Automation: Changes in Cognitive Demands and Mental Workload," Dr. Pamala S. Tsang, University of Illinois and W.W. Johnson, National Research Council

Subjective

"Individual Differences and Subjective Workload Assessment: Comparing Pilots to Non-Pilots," Dr. Michael A. Vidulich, NASA Ames Research Center and P. Pandit, San Jose State University

Secondary Task

Eye Blink

"The Spontaneous Eye Blink in Workload Assessment," Dr. John A. Stern, Washington University

PERFORMANCE ASSESSMENT

"The Effects of Control System Nonlinearities on Tracking Performance: Speculations and Hypotheses," Prof. John W. Senders, University of Maine

"Multidimensional Scaling Analysis of Simulated Air Combat Maneuvering Performance Data," Dr. Donald J. Polzella, University of Dayton and G.B. Reid, AAMRL

"Inadequacy of Root Mean Square Error as a Performance Measure," Dr. David C. Hubbard, University of Dayton Research Institute
"A Comparison of One- and Two-Person Crew Performance in a Supervisory Control Task," Dr. R. Allen Miller, R.J. Jagacinski, B.D. Plamondon, L.E. Lytton, and A.C. Kirlik, The Ohio State University .......................................................... 705

"General Aviation Pilot Error Modeling—Again?" Dr. Thomas H. Rockwell and W.C. Giffin, The Ohio State University ............. 712

"Performance and Reliability in Airline Flying: Challenges to Aviation Psychology," Capt. Matti Sorsa, Finnair .................. 728

ACCIDENT INVESTIGATION

"'Were You Distracted by the Other Plane's Sudden Appearance?' The Case for Standardized Post-Accident Interviews for Air Traffic Controllers," Mrs. Darlene A. Couchman, New Mexico State University .................................................. 733

"Personal Characteristics Related to Accident Histories of Canadian Pilots," Dr. Peter H. Platenius and G.J. S. Wilde, Queen's University .................................................. 739

"Pilot Error and Human Factors: Legal and Psychological Considerations in the Cockpit," Mr. Stephen L. Hixson, Hixson and Downey .................................................. 746

"A Methodological Approach to the Search for Indirect (Human) Elements Related to Mishaps," Dr. Kingsley M. Hendrick, Transportation Safety Institute, L. Benner, Jr., Events Analysis, Inc., and R. Lawton, AOPA Air Safety Foundation ...... 753

FOURTH SYMPOSIUM ATTENDEE LIST .......................................... 768

AUTHOR INDEX ................................................................. 789
