Tagung 1986

TABLE OF CONTENTS

Session 1 Chaired by Avi Silberschatz (*University of Texas at Austin*)

Magic Sets and Other Strange Ways To Implement Logic Programs	1
Francois Bancilhon (<i>Microelectronics and Computer Technology Corporation</i>), David Maier (<i>Oregon Graduate Center</i>), Yehoshua Sagiv (<i>Stanford University</i>), and Jeffrey D. Ullman (<i>Stanford University</i>)	
On the Implementation of a Simple Class of Logic Queries for Databases	16
Domenico Sacca (<i>CRAI, Italy</i>) and Carlo Zaniolo (<i>Microelectronics and Computer Technology Corporation</i>)	
Convergence of Sideways Query Evaluation	24
Foto Afrati (<i>National Technical University of Athens</i>), Christos Papadimitriou (<i>Stanford University</i>), George Papageorgiou (<i>National Technical University of Athens</i>), Athena Roussou (<i>National Technical University of Athens</i>), Yehoshua Sagiv (<i>Stanford University</i>), and Jeffrey D. Ullman (<i>Stanford University</i>)	

Session 2 Chaired by Hector Garcia-Molina (*Princeton University*)

A Theoretical Foundation of Multi-Level Concurrency Control	31
Gerhard Weikum (<i>Technical University Darmstadt</i>)	
Deleting Completed Transactions	43
Thanasis Hadzilacos (<i>National Technical University of Athens</i>) and Mihalis Yannakakis (<i>AT&T Bell Labs</i>)	
Safety of Non-well-locked Transaction Systems	47
Jianwen Su (<i>Fudan University, Shanghai and University of Lowell</i>)	

Session 3 Chaired by Meral Ozsoyoglu (*Case Western Reserve University*)

A Calculus for Complex Objects	53
Francois Bancilhon and Setrag Khoshafian (<i>Microelectronics and Computer Technology Corporation</i>)	
Some Classes of Multilevel Relational Structures	60
Dirk Van Gucht (<i>Indiana University at Bloomington</i>) and Patrick C. Fischer (<i>Vanderbilt University</i>)	
Weak Temporal Relations	70
Shashi K. Gadia (<i>Texas Tech University</i>)	

Session 4 Chaired by Per-Ake Larson (*University of Waterloo*)

Rearranging Data to Maximize the Efficiency of Compression	78
Frank Olken and Doron Rotem (<i>Lawrence Berkeley Laboratory</i>)	
Order Preserving Linear Hashing Using Dynamic Key Statistics	91
John T. Robinson (<i>IBM Thomas J. Watson Research Center</i>)	
Balanced Multidimensional Extendible Hash Tree	100
Ekow J. Otoo (<i>Carleton University</i>)	

Session 5 Chaired by Moshe Vardi (*IBM Almaden Research Center*)

Negation as Failure for First-Order Queries	114
Shamim A. Naqvi (<i>AT&T Bell Labs</i>)	
Positivism vs. Minimalism in Deductive Databases	123
Nicole Bidoit (<i>INRIA</i>) and Richard Hull (<i>University of Southern California</i>)	
The Extended Closed World Assumption and Its Relationship to Parallel Circumscription	133
M. Gelfond, H. Przymusinska, and T. Przymusinski (<i>University of Texas at El Paso</i>)	

Session 6 Chaired by Alberto Mendelzon (*University of Toronto*)

On the Properties and Characterization of Connection-trap-free Schemes	140
Edward P. F. Chan (<i>University of Alberta</i>) and Paolo Atzeni (<i>IASI-CNR</i>)	
One Flavor Assumption and Gamma-acyclicity for Universal Relation Views	148
J. Biskup (<i>Universitat Dortmund</i>), H. H. Bruggemann (<i>Universitat Dortmund</i>), L. Schnetgoke (<i>Universitat Dortmund</i>), and M. Kramer (<i>FernUniversitat Hagen</i>)	
The Equivalence of Solving Queries and Producing Tree Projections	160
Yehoshua Sagiv (<i>Stanford University</i>) and Oded Shmueli (<i>Technion-Israel Institute of Technology</i>)	

Session 7 Chaired by Ed Sciore (*Boston University*)

On Finite FD-Acyclicity	173
Yehoshua Sagiv (<i>Stanford University</i>) and Oded Shmueli (<i>Technion-Israel Institute of Technology</i>)	
Unifying Functional and Multivalued Dependencies for Relational Database Design	183
Meral Ozsoyoglu and Li-Yan Yuan (<i>Case Western Reserve University</i>)	
Alpha-acyclic Decompositions of Relational Database Schemes	191
Detlev Ruland and Dietmar Seipel (<i>University at Wuerzburg</i>)	

Session 8 Chaired by Ronald Fagin (*IBM Research Lab*)

Constant Time Maintenance or the Triumph of the fd	202
Marc Graham and Ke Wang (<i>Georgia Institute of Technology</i>)	
Test Data for Relational Queries	217
Heikki Mannila (<i>University of Helsinki</i>) and Kari-Jouko Raiha (<i>University of Tampere</i>)	
A Model-Theoretic Approach to Updating Logical Databases	224
Marianne Winslett Wilkins (<i>Stanford University</i>)	

Session 9 Chaired by Paris Kanellakis (*Brown University*)

Deciding Properties of Transactional Schemas	235
Serge Abiteboul (<i>INRIA</i>) and Victor Vianu (<i>University of California, San Diego</i>)	
Availability in Partitioned Replicated Databases	240
Amr El Abbadi and Sam Toueg (<i>Cornell University</i>)	

Session 10 Chaired by Francois Bancilhon (*Microelectronics and Computer Technology Corporation*)

On the Integrity of Databases with Incomplete Information	252
Moshe Vardi (<i>IBM Almaden Research Center</i>)	
Data Independent Recursion in Deductive Databases	267
Jeff Naughton (<i>Stanford University</i>)	
Parallel Evaluation of Recursive Rule Queries	280
S. Cosmadakis (<i>IBM Thomas J. Watson Research Center</i>) and Paris Kanellakis (<i>Brown University</i>)
