Studnička Jiří
Wald Frantisek
Macháček Josef

Czech Technical University in Prague

TABLE OF CONTENTS

Preface 15

Welcoming Address 17

Organisation 19

VOLUME 1

SESSION – THEORY

Simplified design of thin-walled, steel, continuous beams 23
Cywiński Z.

Limit state flexural-torsional elastic postbuckling analysis of bars with asymmetric thin walled cross-sections under axial compression 27
Ioannidis G.I., Kounadis A.N.

Pseudo plastic zone analysis of steel frame structures subject to local buckling 31
Avery P., Mahendra M.

Elastic lateral buckling of coped beams 35
Abspoel R., Stark J.

Interaction of local and global phenomena in the ultimate behaviour of plate girders 39
Néző J., Dunai L., Okura I., Iványi M.

Torsional coupling in buildings under seismic loads 43
Thambiratnam D., Clark B., Williamson M., Wilkinson S.

Experimental investigation on I-girders under eccentric patch loading 47
Lucic D.

Numerical and analytical modelling of hat-section web crippling behaviour 51
Hofmeyer H., Kerstens J.G.M., Snijder H.H., Bakker M.C.M.

Lateral buckling of thin-walled beams under asymmetric loads 55
Mohri F., Brouki A., Roth J.C.

Practical design of universal steel beams with single web openings of different shapes 59
Liu T.C.H., Chung K.F.

Test of load-displacement curves of corrugated sheets under shear and compressing 63
Biegus A., Gierczak J.

Web crippling in trapezoidally profiled sheeting and decking 67
Davies J.M., Jiang C., Liu Y.J.

Influence of the inplane boundary conditions on the buckling load of ribbed plates 71
Sapountzakis E., Katsikadelis J.

Prague and Stuttgart experimental research on web breathing 75
Škaloud M., Zörnerová M., Kuhlmann U., Spiegelhalder U.

Fatigue assessment of slender webs breathing under repeated loading 79
Maquoi R., Škaloud M.

Local buckling and failure of thin-walled compression members 83
Kriváček J.

Experimental and theoretical investigation into the breathing of thin-walled steel girders 87
Brož P., Novák M., Škaloud M.

Sectional buckling modes of unstiffened thin-walled steel section 91
Ungureanu V., Dubina D.

Local buckling of undulating webs 95
Novák R., Macháček J.

On the analysis of steel structures made of thin-walled members 99
Degée H.

Experimental investigation of initial residual stresses in H-beams 103
Horokhov Y.V., Vasilev V.V., Kolesnichenko S.V., Yugov A.M.

Steelbase-product data exchange for constructional steelwork 107
Hyvärinen J.

Prediction of defects in steel castings with a multi-physics numerical code 109
Pericleous K., Bailey C., Cross M., Taylor G., Moran G., Bounds S.

Safety of buried steel pipelines subjected to explosions 113
Gantes Ch.J., Bouckovalas G.D., Gerogianni D.S.

A neural network approach to the elastoplastic identification and control problems of steel structures in presence of work-hardening 117
Avdelas A.V.

New Winrami-program based on OLE2 technique 121
Witting K.

Column strength curves in view of higher level reliability approach 125
Sadovský Z., Nádaský P.

Stochastic buckling of plate strip degraded by localized corrosion 129
Drdácký M., Sadovský Z.

Influence of the stress-strain law modelling on the non-linear analysis of steel structures 133
Baptista A.M., Muzeau J-.P., Camotim D.

Contribution of the structural steelwork educational programme WIVISS 137
Chladná M., Wald F., Burgess I.W., Plank R.J.

Experimental study on ultimate strength of plate girders with large web aspect ratio and web width-to-thickness ratio 141
Ohgaki K., Yabe J-i., Kawaguchi Y., Ohta T., Kawashiri K., Nagai M.

Fatigue in steel structures under random loading 145
Agerskov H.

Dynamic failure of steel tubes subjected to lateral impacts 149
Zeinoddini M., Harding J.E., Parke G.A.R.

Constant amplitude fatigue limit for riveted girders 153
Crocetti R., Al-Emrani M., Åkesson B., Edlund B.

Determination of the behavioural curve of eccentrically braced steel structures 157
Karakostas S.M., Mistakidis E.S.

Deformations of selected steel structural members subjected to metal plating 161
Maliszewski M., Pancewicz Z., Rękawek W., Giżejowski M.

Fire resistance of stainless steel structures 165
Ala-Outinen T.

Analysis of the influence of residual curvature on pipeline laying 169
Guarracino F., Mallardo V., Belli P.

Behaviour of structural steels in structures subjected to alternating elastic-plastic strains 173
Šimončič M.

Reliability analysis of a steel beam under fire design situation 177
Gulvanessian H., Holický M., Cajot L.-G., Schleich J.-B.

Computation of the shape and the time growth of a fatigue crack 181
Kovše I.

SESSION – STRUCTURES

Behaviour of simply supported cold-formed Z-purlins restrained by sheeting 187
Vraný T.

Steel frames using hollow columns and open section beams 191
Davison B., Kirby P., Waters S.

Benchmark solutions for steel frame structures subject to local buckling 195
Avery P., Mahendran M.

Steel sheet in post-tensioned composite slab 199
Koukkari H.

Floor vibrations due to walking loads 203
Donkervoort D.R., Hoenderkamp J.C.D., van Oosterhout G.P.C.

On the behaviour of steel gates subjected to shock strains 207
Prodescu A., Raduica N., Ilie L.

The influence of imperfections on the behavior of one-side welded I beams 211
Vašek M.

The influence of web undulations on the section resistance of slender I-beams 215
Braham M., Rangelov N.

Assessment of cumulative seismic damage in steel members 219
Platon F., Vasilescu A.

A design method for braced steel frames comprising semi-continuous composite joints 223
Kattner M., Crisinel M.

A design procedure for steel frames with rigid connections 227
Marino E., Neri F., Rossi P.P.

In-plane buckling behaviour of asymmetric pitched-roof steel frames 231
Silvestre N., Camotim D.

The design experience of membrane roof structures in CIS-countries 235
Mushchanov V., Romensky I.

Structural behaviour of standardized tubular space trusses 239
D'Este A.V., Lopes de Andrade S.A., Gonzalves da Silva Vellasco P.C.

The realistic effects of stressed skin design of typical industrial hall structure 243
Kisin S.

Study of the dynamic forces acting on steel structure during gyration motion of slewing cranes 247
Jerman B., Kramar J.

Full scale tests of steel frames under quasi-static cyclic loading 251
Iványi M., Varga G.

Perfect transparent envelope by the use of steel structure 255
Orbay Y.K.A.

Test and analysis on behaviour of tapered columns in single-span frames 259
Kvedaras A., Braham M., Šapalas V., Šaraškinas V.

Reconstruction of a two-bay industrial hall 263
Szabó G., Verőci B.

Tests of non-sway welded steel frames with RHS columns 267
Szlendak J.

Dynamic behaviour of a range of steel plane system for solar collectors 271
Axinte E., Teleman C., Taranu N.,

The influence of various errors on the durability of steel structures for industrial buildings 275
Strateanu P., Taranu N., Isopescu D.

Effects of restraint on the behaviour of steel frames in fire 279
Allam A.M., Fahad M.K., Liu T.C.H., Burgess I.W., Plank R.J., Davies J.M.

The response of industrial portal frame structures to fires 283
Wong S.Y., Burgess I., Plank R., Atkinson G.

Behaviour factor evaluation of steel frames applying energy approach 287
Petkov Z., Belev B., Milev J.

Durability and service life of over-clad steel facades 291
Nieminen J., Salonvaara M.

The service life design strategies 295
Leino T.

Low energy steel houses for cold climate 299
Aromma P.

A simplified model for beam-slab systems subject to fire 303
Izzuddin B.A., Elghazouli A.Y.

Ponding effect on nearly flat roofs of industrial or commercial single story building 307
Colombi P., Urbano C.

Optimal design of steel frames made of welded built-up members 311
Krajnc A., Beg D.

The problems of overhead transmission lines towers structures' development and making of automatic optimal designing system 315
Schevchenko Y.

Development and application of new steel structure concepts: structural systems 319
Iwata M.

Yacht landing cantilever type of structure 323
Dakov D.

Performance, durability and service life of a light framing system 327
Nieminen J., Salonvaara M.

Optimisation of bracing system of steel framed houses 331
Dubina D., Fülöp L., Zaharia R.

Economic design and construction of single storey portal frames 335
Ceuterick E., Antonissen P., Joachims W.

On structural variants of a large sluice gate 339
Raduicá N., Prodescu A.

Hard frame and expert support of connection design 343
Švarc M., Wald F., Truneček J., Vodolan M.

Study of steel lattice beams with cold-formed flanges 347
Airumyan E., Vodicka V.

Contribution of interdisciplinary collaboration of the research institute VZÚ NH a.s. to solution of problems related with higher use of steel in housing constructions 351
Ulmann J., Devátý F., Rozlívka L., Kania M.

Authors Index 355
Sponsoring Organisations 359

VOLUME 2

SESSION – BRIDGES

Effect of girder depth on ultimate behavior and strength of long-span steel cable-stayed bridges based on elasto-plastic finite displacement analysis 379
Nagai M., Niida Y., Xie X., Yamaguchi H., Nogami K.

Fatigue crack arrest in riveted bridge girders using stop-holes 383
Al-Emrani M., Crocetti R., Åkesson B., Edlund B.

Investigating the failure of a pedestrian arch bridge 387
Wang Y.-Ch., Hung F.-H.
