Contents

Section 1. Status reports

The First Operation of Control System at the SPring-8 Storage Ring R. Tanaka, T. Fukui, K. Kobayashi, T. Masuda, A. Taketani, T. Wada and A. Yamashita	1
The VLT Control Software Development and Installation G. Raffi	5
Accelerator Control at IHEP J. Zhao, L. Ma, H. Zhang, X. Geng, Y. Yu, T. Zhai, S. Tang, P. Gu	9
The Relativistic Heavy Ion Collider Control System T.S. Clifford, D.S. Barton and B.R. Oerter	12
Present Status of the KEKB Control System T. Katoh, A. Akiyama, S. Araki, M. Kaji, T. Kawaguchi, T. Kawamoto, I. Komada, K. Kudo, T. Naito, J. Odagiri, M. Takagi, S. Yoshida, N. Yamamoto	15
Upgrade Plan for the NSRL Control System W.M. Li, S.M. Hu, J.Y. Li, Y.B. Leng, S.Q. Liu	19
Construction of the Central Control System for the Large Helical Device (LHD) Fusion Experiment K. Yamazaki, H. Yamada, K.Y. Watanabe, K. Nishimura, S. Yamaguchi, M. Shoji, S. Sakakibara, J. Miyazawa, Y. Taniguchi, H. Ogawa, N. Yamamoto, T. Kato, T. Tsuzuki and O. Motojima	22
Evolution Path for the ASDEX Upgrade Real-Time Control System G. Raupp, K. Lüddecke, G. Neu, W. Treutterer, D. Zasche, T. Zehetbauer and ASDEX Upgrade Team	25
The Status of the Control System of the KEK Accelerator Test Facility N. Terunuma, H. Hayano, T. Korhonen, K. Kubo, T. Naito, K. Oide, J. Urakawa, S. Kashiwagi and T. Okugi	28
Status of the Control System for the CLAS Detector at Jefferson Lab T. Carroll and M. Vineyard, T. Auger, W. Brooks, S. Fabbro, A. Freyberger, V. Gyuriyan, M. Ito, B. Madre Y. Patois, S. Philips, M. Swynghedauw and J. Tang	31
VEPP-4 Control System Upgrade A. Aleshaev, S. Karnaev, B. Levichev, I. Protopopov, S. Tararyshkin	34
Indus-2 Control System J.S. Adhikari, B.J. Vaidya	37
Control System for VEPP-5 Electron-Positron Complex D.Yu. Bolkhovityanov and Yu.I. Eidelman	40
Status Report on the TRIUMF Central Control System M.M. Mouat, B. Davison, S.G. Kadantsev, E. Klassen, K.S. Lee, J.E. Richards, T.M. Tateyama, P.W. Wilmshurst, P.J. Yogendran	43
Overview of Control System for Jefferson Lab's High Power Free Electron Laser A.S. Hofler, A.C. Grippo, M.S. Keesee and J. Song	47
Operation Experiences and Development of the Control System in the SRRC J. Chen, C.H. Kuo, K.T. Hsu, K.K. Lin, C.J. Wang, J.S. Chen, C.S. Chen, K.T. Pan, K.H. Hu, C.C. Kuo, R. Sah ...	50
Progress of HIRFL Control System X. Huang and Z. Chu	54
Preliminary Design of the Control System for SSRF and BTCF J. Zhao, X. Geng, F. Zhang, T. Shen	56
The CDR of Computer Service System for SSRF Project D.K. Liu, T.J. Shen	59

Section 2. Engineering

The ESA Software Engineering Standard and Its Applicability to HEP J. Fairclough and W. Salter	62
Project Management as a Breakthrough at CERN M.V. Eynden, P.Ninin	67

Redesigning a Radio Frequency Control System with TACO, Why and How? J. Meyer, J.L. Pons, J.L. Revol	71
Data Archiving in Experimental Physics L.R. Dalesio, W. Watson III and M. Bickley, M. Clausen	75
Enhanced Data Logging Capabilities in Vsystem J.P. Girard, R.T. Westervelt, E.A. Zharkov and P.N. Clout	78
A Diagnostic Tool for Console Applications of the Fermilab Accelerator Control System J. Wang, B. Hendricks	82
Control System of PLS 2-GeV Storage Ring I.S. Ko, J.W. Lee, J.C. Yun, E.H. Lee and B.R. Park	85
Microprocessor Automatic Control System for Control of Physics Plants Parameters A.A. Jelezin, I.M. Koltsov, A.A. Komarov, V.M. Rybin	89
Event Handling in TRIUMF's Central Control System B. Davison, S.G. Kadantsev, E. Klassen, K.S. Lee, M.M. Mouat, J.E. Richards, T.M. Tateyama, P.W. Wilmshurst, P.J. Yogendran	92
Control System Reliability at Jefferson Lab K.S. White, H. Areti, O. Garza	95
Control System for a High Average Power Free Electron Laser K. Jordan, B. Cumbia, R. Evans, R. Hill, O. Garza, M. Wise	99
A Shareable Image Library in the BEPC Control System C. Wang, J. Zhao	102
Application Software for New BEPC Interlock System S.M. Tang, X.Y. Na, J.S. Chen, Y.L. Yu, J.X. Yan, J.M. Wu, T.H. Li, H.J. Cheng	104
Using the Tool Complex G2 for Control of Electrophysical Complex V. Rybin, G. Rybina	107
Distributed Implementation Plan for a Large, Distributed Accelerator Control System W.R. DeVan, S.A. Lewis, D.P. Gurd, J. Hammonds, J.D. Smith	110
Centrally Managed Name Resolution Schemes for EPICS J. Ding, D. Bryan and W. Watson	113
Section 3. Industrial, Off-the-shelf systems, PLCs, etc.	
Integration of Industrial Equipment and Distributed Control Systems into the Control Infrastructure at CERN R. J. Lauckner, R. Rausch	116
Technical Data Server: A Large Scale Supervision System P. Ninin, R. Bartolome, B. Cantau, C. Delgado, H. Laeger, A. Lund, R. Martini, P. Sollander	120
A Comparison of Vsystem and EPICS P.N. Clout, V.E. Martz, R.B. Rothrock, R.T. Westervelt	124
Virtual Instrument Technology Used in the BEPC Beam Diagnostic System K.Xue, P.Shi and L.Ma	128
PLC-based Machine Interlock System for PLS 2-GeV Storage Ring B.R. Park, J.W. Lee and I.S. Ko	131
Outsourcing of the New Wave Form Acquisition, Surveillance and Diagnostic System for the LEP Injection Kickers E. Carlier, V. Mertens, M.C. Raichs and J. Serrano	135
Examples of Applications of Industrial Control Systems (PLCs) for Vacuum Equipment R. Gavaggio, P. Strubin	139
Industrial Control Systems for the Technical Infrastructure at CERN P. Ninin, E. Cennini, P. Sollander, D. Blanc, F. Bonthond	142
Microwave Control and Measurement System at the KEKB Linac K. Furukawa, N. Kamikubota, H. Hanaki, H. Katagiri, T. Urano, S. Anami and K. Nakahara	146
The Prototype of a VME-Based Front-End System for the T-C Factory Control System F. Zhang, J. Zhao	150

Development of a CAMAC Distributed Control System S.M. Tang, J.X. Yan, Y.L. Yu, H. Luo, X.N. Li, J.W. Zhang	153
PLC Application in the Control of CIAE-30 Cyclotron Z. Li	156
The Virtual Instrument Control System J.W. Xu, H.J. Cheng, D.K. Liu	159
Section 4. Inexpensive systems (PC based)	
The Use of PCs in Controlling DESY Accelerators P. Duval	162
The Use of ACOP Tools in Writing Control System Software I. Deloose, P. Duval, H. Wu	166
Experience Using EPICS on PC Platforms J.O. Hill, K.U. Kasemir	169
Control System of the IHEP Cryo Complex A. Ageyev, V. Alferov, A. Dunaitsev, Y. Ivanov, A. Khvorostyanov, V. Krendelev, A. Lukyantsev, V. Proshin, A. Sytin	173
The Features of the Pulsed Power Technology Control Systems A.V. Kartashov, N.I. Lachtjushko, V.I. Zaitsev	175
The PC Based Control System of the NAC H.F. Weehuizen, I.H. Kohler, M.E. Hogan, P.J. Theron	177
Using PCs in the BEPC Beam Diagnostic Instrumentation System L. Ma, P. Shi, P. Lu, H.J. Cheng and K.R. Ye	180
A PC-Based Control System For HiSOR K. Aoki, K. Kawamura, D. Amano and K. Yoshida	183
PC-based Control System in Storage Ring TERAS H.Ohgaki, R.Suzuki, S.Sugiyama, T.Mikado, M.Chiwaki, K.Yamada, T. Ohdaira, N.Sei, H.Toyokawa and T.Yamazaki	185
R.F. Control System for Indus-1 P.S. Fatnani, B. J.Vaidya	188
The Application of Personal Computers in the Topography Experimental Station at the BSRF G. Wang, J. Jiang, Y. Tian, Y. Han, Z. Wang	191
The GNU Control System at CAMD B. Craft and P. Jines	194
A Multifunctional Magnetic Measurement Control System for NSRL Magnets L. Shen, Z. Qian, Z. Huang, Q. Liu, C. Yao	197
Upgrading a Small Accelerator Control System J.Q. Li, L. Zhang, M.H. He, C.R. Lu, C.C. Sun	200
The Control Software Based on Windows W. Gao, X. Huang	203
The Status of the BEPC Linac Control System P.D. Gu, G.X. Pei, X.C. Kong, Q. Le, F.X. Zhang	205
PC/MULTIBUS Based Control System A. Alexandrov, V. Alferov, V. Ershov, A. Gussak, V. Kovaltsov, S. Kozhin, A. Kuznetsov, I. Lobov, S. Petrov, E. Sherbakov	207
A New High Performance Data Acquisition System and Application to a Betatron Oscillation Monitor J. Kishiro, S. Igarashi, K. Nigorikawa, Y. Takeuchi, T. Toyama, Y. Yamaguchi and T. Kondo	208
Section 5. Hardware aspects, Microcontrollers, DSP, etc.	
Acquisition and Data Logging for the ANTARES Project J.F. Gourmay, R. Azoulay, N. de Botton, P. Lamare, J. Poinsignon	211

DSP Implementations for Accelerator Instrumentation	
T.J. Shea	214
Current DSP Applications in Accelerator Instrumentation and RF	
B. Chase, A. Mason, K. Meisner	219
Timing System of the ATF	
T. Naito, H. Hayano, T. Korhonen, S. Takeda, J. Urakawa	224
A Microcontroller Based Temperature Measurement Module for the I.EP2 SC RF Cavities	
R. Brun and E. Ciapala and M. Pirotte	227
Advanced DSP-Based System Architectures for Data Acquisition and Control	
V.I. Vinogradov	230
The VEPP-4 Timing System	
S. Belomestnikh, Yu. Eidelman, S. Karnaeov, E. Kuper, G. Kurkin, S. Mishnev, V. Tsukanov	234
Handling CAMAC Interrupts in Alpha OpenVMS/PCI	
K.S. Lee, S.G. Kadantsev, E. Klassen, M.M. Mouat, P.W. Wilmshurst	237
Performance Evaluation of EPICS on PowerPC	
J. Odagiri, A. Akiyama, N. Yamamoto and T. Katoh	240
KEKB Power Supply Interface Controller Module	
A. Akiyama, T. Nakamura, M. Yoshida, T. Kubo, N. Yamamoto and T. Katoh	243
Synchronization Scheme for the KEKB	
T. Naito, J. Odagiri, N. Yamamoto, M. Suetake and T. Katoh	247
LIONs at the Stanford Linear Accelerator Center	
T.N. Constant, R.W. Zdarko, R.H. Simmons, B.M. Bennett	250
The Control System for a New Proton Extraction Probe at TRIUMF	
D.B. Morris and K.S. Lee	253
DSP Application to Parallel Processing in JT-60 Plasma Control	
T. Kimura, K. Kurihara, Y. Kawamata, K. Akiba and H. Adachi	256
Timing System and Injection Control in the SRRC	
K.T. Hsu, K.H. Hu, K.K. Lin, J. Chen, J.S. Chen, C.H. Kuo, C.J. Wang, G.J. Jan	259
A DSP-based Control System for the ISAC Pre-Buncher	
M. Laverty, K. Fong and S. Fang	263
Control and Timing of the 250kA Pulsed Magnetic Horn	
Y. Suzuki, Y. Yamanoi, M. Kohama, M. Ieiri, H. Ishii, Y. Kato, M. Minakawa, H. Noumi, K.H. Tanaka, M. Takasaki and K. Nishikawa	266
Low Cost DSP Based System for Signal Processing and Control	
Y. Wang, Y.F. Wang	269
Isolation Technique Used in HIRFL Control System	
Z. Chu, X. Huang	272
A New Timing System for NSRL	
P. Zhang, Q. An, S. Liu, Y.F. Wang	274
A New Radiation Protection System	
J. Li, Y. Li, B. Shao, R. Wang, S. Zhang	277
Upgrade of Radiation Monitoring System for National Synchrotron Radiation LAB	
R. Wang	280
The Proportional Ion Chamber and its Corresponding Circuit	
B. Shao, Y. Zhao, Y. Tang	282

Section 6. Networks and fieldbuses

Recommendations for the Use of Fieldbuses at CERN in the LHC Era	
G. Baribaud, R. Barillere, A. Bland, D. Brahy, H. Burckhart, R. Brun, E. Carlier, W. Heubers, L. Jirden, F. Perriollat, D. Swoboda	285

CAN: a Smart I/O System for Accelerator Controls - Chances and Perspectives
 J. Bergl, B. Kuner, R. Lange, I. Müller, G. Pfeiffer, J. Rahn, H. Rüdiger 290

Integration of Field Devices in a PROFIBUS Environment
 H. Kleines, R. Madlener, K. Zwill 294

Experience with LonWorks as a Fieldbus for the Light Source ANKA
 B. Jeram, M. Juras, G. Mavric, M. Plesko, M. Smolej 298

An Accelerator Controls Network Designed for Reliability and Flexibility
 W.P. McDowell and K.V. Sidorowicz 302

A Comparative Reliability Study of Computer Network Configurations for Large-Scale Accelerator Systems
 E.W. Kamen and S.S. Singh 305

Using a Fiber Optic CAN Bus for the Proton Source Control of the CERN PS-Linac
 G. Gräwer, W. Heinze 309

Design and Performance of the Network System for the Storage Ring Control at SPring-8
 T. Fukui, K. Kobayashi, T. Masuda, A. Taketani, R. Tanaka, T. Wada and A. Yamashita 312

Distributed Power Supply Control Using CAN-Bus
 D. Bishop, D. Dale, H. Hui, J. Lam and R. Keitel 315

Security System Based on CAN Bus in Accelerator Control
 Y. Cui 318

A Configurable RT OS Powered Fieldbus Controller for Distributed Accelerator Controls
 A. Matiushine, A. Sytin, P. Vetrov, S. Zelepoukine, M. Clausen, W. Ebenritter, B. Schoeneburg 321

Section 7. Java and the WWW

Towards a New Generic Approach for Web Access to Control Data
 F. Momal 325

Web Utilization in Controls at Fermilab
 K. Cahill, B. Hendricks, T. Zingelman 328

A Control System Based on WWW Technologies
 B. Jeram, M. Plesko, R. Sabjan, M. Smolej, G. Tkacik 330

Using the Web to Plan Telescope Observations
 S. Wampler 334

Java Application for Creating a Shared Object Cache
 I. Mejuev, I. Abe 337

Remote Console System Using JAVA Applet for High Energy Accelerator Components at the Photon Factory
 N. Kanaya, S. Asaoka and H. Maezawa 340

Section 8. Software sharing and object oriented technologies

Meta Object Facilities and their Role in Distributed Information Management Systems
 N. L. Baker and J-M Le Goff 343

A Distributed Object-Oriented Telescope Control System Based on RT-CORBA and ATM
 J.M. Filgueira 348

Development of a CORBA Toolkit and its Evaluation
 N. Kamikubota, M. Clausen and K. Furukawa 351

The Implementation of an OO Control System API with CORBA
 S. Hunt, B. Jeram, M. Plesko, C. Watson 354

CMLOG: A Common Message Logging System
 J. Chen, W. Akers, M. Bickley, D. Wu and W. Watson III 358

Recent Developments in the Application of Object Oriented Technologies in the CERN PS Controls
 M. Arruat, F. Di Maio, N. Gomez-Rojo, Y. Pujante 364

What Objects Do Controls Applications Need?
 J.T. Morris, A.C. Abola 368

Control System Prototype for the ISAC Radioactive Beam Facility R. Keitel, M. Leross and G. Waters	372
Building Controls Software around an Object Oriented Database K. Kostro	375
Application of Object Oriented Programming Techniques in Front End Computers J.F. Skelly	379
Object-Oriented Technology in LabVIEW Programming K. Rybaltchenko	382
Control of Distributed Data Acquisition Systems Using Object Oriented Methods G. Kemmerling, M. Korten, M. Drochner, P. Wüstner, K. Zvoll	385
An Object-Oriented Framework for Client/Server Applications W. Akers	388
Generic Automated Beam Steering and Beam Shaping Programs with an Object Oriented Approach M. Arruat, A. Jansson, F. di Maio, G.-H. Hemelsoet, M. Lindroos, O. Tungesvik	391
EPICS: Extensible Record and Device Support M.R. Kraimer and L.R. Dalesio	394
DOOS: an Object Oriented Control System as the Integrating Part for the TTF Linac S. Goloborodko, G. Grygiel, O. Hensler, V. Kocharyan, K. Rehlich, P. Shevtsov	397
Knowledge Based Event-Oriented Approach in Control Systems Vikentiev A., Vaguine A., Mikheev V, Poluektov S.	400
REMOT-A Project to Remotely Monitor and Control Scientific Experiments M. Pucillo, E.G. Alcazar, F. Genova, F. Gomez, M. Korten, S.L. Izquierdo, P. Linde, W. Lourens, F. Pasian, J.D. Ponz, F. Puente, E.F. Vieira	404

Section 9. Databases

Significance of a Comprehensive Relational Database System for Modern Accelerator Controls R. Bakker, T. Birke, B. Kuske, B. Martin, R. Müller	407
Database for Accelerator Optics B. Autin, F. Di Maio, M. Gourber-Pace, M. Lindroos, J. Schinzel	412
Applying the Knowledge Discovery in Databases (KDD) Process to Fermilab Accelerator Machine Data K. Yacoben and L. Carmichael	417
Diagnostic System Using a Database for High Energy Accelerator Components at the Photon Factory N. Kanaya, S. Asaoka and H. Maezawa	420
OMG and Distributed Object Database Issues in Detector Construction and Quality Control W. Harris, J-M Le Goff, R. McClatchey, N. Baker, Z. Kovács, F. Estrella, A. Bazan, T. Le Flour	423
The Database System for the SPring-8 Storage Ring Control A. Yamashita, T. Fukui, K. Kobayashi, T. Masuda, A. Taketani, R. Tanaka and T. Wada	427
BEPC On-line Runtime Database Service System P. Shi and L. Ma	430
Integration of a Relational Database in the CERN PS Control System J.H. Cuperus, M. Lelaizant	433
Data Acquisition System with Database at the SPring-8 Storage Ring A. Taketani, T. Fukui, K. Kobayashi, T. Masuda, R. Tanaka, T. Wada and A. Yamashita	437
Towards a Data Quality Policy for Supervision Data in CERN's Technical Control Room R.Martini, P.Ninin	440
Improvements in Database System to Accelerator Control M. Mutoh and M. Nanao, I. Abe	444
WWW-based Accelerator Data Warehouse A. Chan, G. Crane, I. MacGregor, S. Meyer and R. Sass	447

Section 10. Feedback, Control theory, Automation

Luminosity Optimization Feedback in the SLC L. Hendrickson, S. Bes, P. Grossberg, D. McCormick, N. Phinney, P. Raimondi, M. Ross	450
Digital Signal Processing for Plasma Control at KT-1 J.S. Yoon, S.H. Jeong, K.W. Lee, B.H. Oh, S.J. Hong, H.J. Choi, D.C. Son	453
Automated Task Scheduling Using Multiple FSMs at Fermilab L. Carmichael	456
The ELETTRA Fast Digital Local Orbit Feedback C.J. Bocchetta, D. Bulfone, A. Galimberti, D. Giuressi, M. Lonza, C. Scafuri, L. Tosi, R. Visintini	458
A Control System for Accelerator Tuning Combining Adaptive Plan Execution with Online Learning C. Stern, E. Olsson, M. Kroupa, R. Westervelt, G. Luger, W. Klein	462
Applying Intelligent System Concepts to Automatic Beamline Alignment R. Pugliese, F. Bille, A. Abrami, O. Svensson	466
Architecture of the APS Real-Time Orbit Feedback System J.A. Carwardine and F.R. Lenkszus	470
Accelerated Ion Energy Measurement by Means of Circulating Electron Flow B. Bogdanovitch, A. Nesterovitch	474
Experimental Investigation of Optimization Control Methods in a Proton Synchrotron I.V. Mozin, V.A. Shelekhov, N.D. Vasiljev	476
Control Loop for a Pulse Generator of a Fast Septum Magnet Using DSP and Fuzzy Logic E.A. Carroll, E. Carlier, J.H. Dieperink, G.H. Schröder and E. Vossenberg	479
Software Feedback for DESY HERA-e RF Power Control F. Willeke, R. Weck, L. Kopylov, S. Merker, M. Mikheev	483
Medium-Speed Feedback Software Based on the Existing Control System A. Taketani, T. Fukui, K. Kobayashi, T. Masuda, T. Ohshima, R. Tanaka, T. Wada and A. Yamashita	486
Realtime Control Tools in the PSI Accelerator Control System T. Blumer, D. Anicic, I. Jirousek, A. Mezger	488
An Automatic Procedure to Find and Set the Shift Phases for the Superconducting Resonators in the ALPI Accelerator S. Canella	491
Orbit Feedback Development in SRRC C.H. Kuo, K.T. Hsu, J. Chen, K.K. Lin, C.S. Chen, R.C. Sah	494
Onebm: the ELETTRA Framework for Programmable Machine Operations D. Bulfone, C. Scafuri	497
MADE: an Effective Workbench for the Development of Digital Signal Processing Applications D. Bulfone, M. Lonza, C. Scafuri	500
RF System Stability Analysis by Simulink on Matlab G. Huang, G. Wang	503
An Idea on Adaptive Optimal Control of SFC G. Zhang, T. Huang	507
Design of Automatic Beam Transport System at SPring-8 LINAC H. Sakaki, H. Yoshikawa, H. Yokomizo, T. Sogo, K. Kinoshita, N. Adachi	509

Section 11. Man-machine interfaces

The APS Intranet as a Man-Machine Interface D. Ciarlette, R. Gerig, W. McDowell	512
Human Computer Interface for the Computerised Control of Electron-Cyclotron Resonance Ion Source (ECRIS) at Calcutta T. Samanta, C.D. Datta and D. Sarkar	516

MMI Object Analysis and the Distributed Components for a New Console in the KEK e-/e+ Linac I. ABE, S. Dasgupta and M. Mutoh	519
Xwin--A Graphical User Interface Developing Toolkit on Workstations G. Lei, J. Zhao	522
Implementation and Use of a Tcl/Tk API for the Accelerator Control System of the The Svedberg Laboratory L. Thuresson, V. Ziemann, E.J. Veldhuizen	525
'Sharable GUI Objects for the Operators' Console S. Dasgupta and I. Abe	528
An Object-Oriented Data Display for the TESLA Test Facility K. Rehlich	531
Man-Machine Interface for Power Supply Control for Electron Cyclotron Resonance Ion Source C.D. Datta, S.K. De and D. Sarkar	534
Feedback of Operators' Experiences to Console Programs in the KEK e-/e+ Linac M.Tanaka, I.Abe and H. Kobayashi	536
Why Physicists do not Stop Writing Their Own Accelerator Control Programs? Yu.I. Eidelman	539

Section 12. Specific systems

Using Reconfigurable Processors as Control System Elements T. Korhonen, A. Lawrence, I. Page, J. Urakawa	542
Application of Personal Computers to the Control System for the Liquid Waste Treatment Station at the Dalat Nuclear Research Institute T.H. Anh, N.N. Dien, T.D. Hai	546
Automated Control System for Radiation-Chemical Process of Composite Materials Formation G.F. Popov, A.I. Kalinichenko and Yu.A. Kresnin	550
Safety and Control System for the GSI Therapy Project E. Badura, H. Eickhoff, H. Essel, Th. Haberer, J. Hoffmann, U. Krause, W. Ott, K. Poppensieker, M. Richter, W. von Räden , D. Schardt, R. Steiner, B. Voss	555
Design of a Synchrotron Control System with DPO Series for Advanced Therapy Operations N. Araki, E. Takada, A. Itano, K. Noda, M. Kumada, M. Kanazawa, H. Nakagawa, T. Nakamura, K. Kohigashi and E. Hishitani	559
Experience with the Integration of Transient Recorders in the Daily HERA Machine Operation R. Bacher, M. Clausen, P. Duval and L. Steffen	563
Front-end Computing in the LEP2 RF System L. Arnaudon, A. Butterworth, E. Ciapala	566
Monitoring the Energy of Electrons in Industrial Linacs V.N. Boriskin, V.A. Gurin, A.N. Savchenko, V.I. Tatanov, A.E. Tolstoy, V.L. Uvarov, V.A. Shendrik	569
Nuclotron and Its Control System V. Andreev, V. Gorchenko, A. Kirichenko, A. Kovalenko, I. Kulikov, V. Mikhailov, V. Monchinsky, S. Romanov, B. Sveshnikov, A. Tsarenkov, B. Vasilishin, M.Voevodin, V.Volkov	572
The New Radiation Safety Control System of GANIL and Its Extension to the Rib SPIRAL Facility T.T. Luong, J.C. Deroy, P. De Saint Jores, L. Martina	575
Measuring Beam Losses in the THI Project L. David, P. Duneau, E. Lécorché, P. Lermine, E. Lemaitre, M. Ulrich	578
An Alternative to Classical Real-time Magnetic Field Measurements Using a Magnet Model F. Caspers, W. Heinze, J. Lewis, M. Lindroos, T. Salvermoser	581
The Alarm System for the SPring-8 Storage Ring A. Yamashita, T. Fukui, K. Kobayashi, T. Masuda, A. Taketani, R. Tanaka and T. Wada	585
Fermilab Tevatron Alarms Processing System S.C. Ahn	588

Control System of Himac Secondary Beam Course for Medical Use S. Koda, A. Kitagawa, J. Yoshizawa, M. Torikoshi, M. Kanazawa, T. Murakami, K. Noda, M. Suda, Y. Ishikawa, J. Matsuura, H. Okamura and T. Usami	590
Conversion of the TISOL Control System to EPICS J. Lam, G. Waters and R. Keitel	593
Closed Orbit Correction in CELSIUS K.J. Gajewski and V. Ziemann	596
Implementation of the Low Level RF System at PLS Storage Ring I. Yu, H.J. Park, M.H. Chun, M. Kwon and I.S. Ko	599
The Research and Industrialization of an Accelerator Control System for Large Container on-line Inspection L. Hua, H. Zhang	603
Development of Beam Diagnostic System for HIRFL J. Zheng and Beam Diagnostic Group	605
Accelerator Control System and VME Front End Computer Y. Leng, G. Wang, Y.J. Pei	608
Control System for the 6T Superconducting Wiggler at NSRL S. Hu, J. Chen, D. Pan, Z. Wu, Z. Chen	611
Control for Elliptically Polarizing Undulator at SRRC K.T. Pan, J. Chen, J.S. Chen, C.S. Chen, C.H. Kuo, S.Y. Hsu, K.T. Hsu	614
Real-Time Transverse Emittance and Phase-Space Monitor K. Jordan, J. Song, P. Piot, R. Legg, D. Kehne, R. Li, E. Feldl, G.A. Krafft, J.-C. Denard, G.R. Neil, C.L. Bohn	617
A PC-based Auto-testing System for BEPC CAMAC Modules H. Zhang, J.J. Xu, H. Ren	620
 Section 13. Technology spin-off	
A General Purpose Fieldbus Controller (GPFC) A. Sytin	623
A Russian National Network of Supercomputers for Science and Education V. Kotov	624
Knowledge Based Event-oriented Approach in Control Systems A. Vaguine	625
The Control System for a 2 MeV Tandem Accelerator used for Contraband Detection D. Dale, D. Bishop, H. Hui, B. Milton, B. Roberts	626
 Technical Summary Report I.S. Ko	629
 Acronyms and Abbreviation	632
List of Participants	636
Author Index	640
