Indoor Air 99

Proceedings of the 8th International Conference on Indoor Air Quality and Climate held in Edinburgh, Scotland, 8–13 August 1999

Volume 5, Friday

UB/TIB Hannover 89
120 050 862

Contents

Parallel sessions

Q1 Ventilation components

Measurement of air flow rates and ventilation efficiency in air handling units
C-A Roulet, F Foradini and L Deschamps Vol 5 1

A humidity control system with an adsorption material and indoor air quality improvement
Y Moriya, N Yoneno, M Oyama and S Tanabe Vol 5 7

Microbial investigations and allergen measurements in ground-coupled earth-to-air heat exchangers
B Flückiger and C Monn Vol 5 13

Storage and processing oil contamination on new HVAC components: development of measuring methods
P Pasanen, V Asikainen and J Liesivuori Vol 5 19

Design methodology and economic evaluation of central-fan-integrated supply ventilation systems
A F Rudd and J W Lstiburek Vol 5 25

Pressure relationships in hospital critical-care facilities
A J Streifel, B B Bridges, D T Grimsrud and B C Krafthefer Vol 5 31

High efficiency desiccant systems for air conditioning applications
L Schibuola Vol 5 37

Performance of an advanced air conditioning system during extreme weather conditions in a generator plant
J Räisänen, A Paakkari and R Niemelä Vol 5 43

Vent-convector: an experimental study
E Mundt, M Gustavsson and P Leksell Vol 5 45

Development of a low energy fan convector
M J Price and E M Clancy Vol 5 51

Method of air parameters control while processing in air-handling units of HVAC systems
A N Gvozdkov and V N Bogoslovsky Vol 5 57

Ventilation air intake: first line of defence against an unfavourable outdoor climate
O Kristiansen, S O Hanssen, J Stang and H N Lysne Vol 5 61

Heat and moisture exchange in counterflow rotary air dehumidifier
S Anisimov Vol 5 63

A survey study of isolation rooms for tuberculosis in Taiwan
H T Loong, M J Wang and R J Shyu Vol 5 69

Q2 VOCs: material emissions and emission chambers

Investigations on the emission behaviour of SVOC and POM from indoor materials for the example of wood preservative agents and other low volatile substances
O Jann and O Wilke Vol 5 75

Assessing the performance of full-scale environmental chambers using an independently measured emission source
J S Zhang, G Nong, M Mason, et al Vol 5 81

Determination of organic chemical emissions from electronic devices
M Wensing Vol 5 87

Comparison of field experiments in a refurbished bedroom with small chamber experiments
T H Dokka, R B Jørgensen, O Bjørseth and B Malvik Vol 5 93

Effect of climatic parameters on the release of VOC from UV-cured furniture coatings
T Salthammer, M Bednarek and F Fuhrmann Vol 5 99

Evaluation of emission test chambers by use of recovery rate determinations under dynamic conditions
E Uhde and T Salthammer Vol 5 105

Effects of temperature, humidity, air exchange rate, loading factor and storage conditions on VOC emissions from furniture boards coated with a UV-curable lacquer
O Wilke, O Jann and D Broedner Vol 5 111

Measurements of aldehydes and VOCs emission rates in two new constructed houses
S Tanabe Vol 5 117

Pollutant emission properties of photocopiers and laser printers
S K Brown Vol 5 123

The impact of wood composite panel products such as OSB, particleboard, MDF and plywood on indoor air quality
A Barry and D Corneau Vol 5 129

Evaluation of health compatibility of building products: report on a project in Germany
K Breuer and E Mayer Vol 5 135

A volatile organic compounds emission test chamber based on a standard chemical reactor vessel
A Strini, E Mapelli and L Bignami Vol 5 137

Measuring the emission behaviour of organic acids from wooden products in test chambers
S Lange, O Wilke, D Broedner and O Jann Vol 5 143

Comparison of the sink characteristics of three full-scale environmental chambers
M A Mason, Z Guo, E Howard, et al Vol 5 149

Factors influencing the measurement of VOC emission from paints for interior application using test chambers
C W F Yu and D R Crump Vol 5 155

Evaluation of VOC emissions from solid building materials by diffusion model
J S Park and S Fujii Vol 5 161

Emission of volatile organic compounds from the indoor application of water-based paints containing linseed oil
K Andersson, P Fjällström, B Andersson, et al Vol 5 167

Determination of formaldehyde emission from home furniture using a full-scale chamber
Y Yu, M Nakagawa, J Honda and Y Kobayashi Vol 5 173

Determination of formaldehyde emission from indoor materials using a small-scale chamber
M Nakagawa, Y Yu, J Honda and Y Kobayashi Vol 5 179

Effects of temperature on VOC emissions from 'wet' coating materials
J Zeng, X Yang, J S Zhang, et al Vol 5 185

Q3 Modelling, simulation and prediction of indoor air pollutants

Modelling of indoor exposures to air pollution in UK populations
M A Byrne, M R Ashmore, C Dimitroulopoulou, et al Vol 5 191

Inhalation transfer factors for assessing human health risks from air pollutant sources
A C K Lai, T L Thatcher and W W Nazaroff Vol 5 193

The influence of ventilation on reactions among indoor pollutants: dynamic modelling and experimental observations
C J Weschler and H C Shields Vol 5 199

Advances in algorithms for mapping indoor gas concentrations using optical remote sensed data
P N Price, M L Fischer, E U Finlayson, et al Vol 5 205

Effects of measuring equipment noise when monitoring and modelling indoor air pollutant concentrations
M Kraenzmer and L E Ekberg Vol 5 211

Numerical simulation of VOC emission rates from building products based on physical processes
O Hehl, W Horn and B Seifert Vol 5 217

On the sink effect of VOCs on indoor materials: consequences of repeated adsorption
P Hansson and H Stymne Vol 5 223

Quantification and apportionment of building, occupant and HVAC-related emissions: mass balance methods and applications for VOCs
C-Y Peng and S A Batterman Vol 5 229

Measurement and modelling of indoor VOC levels during and after room renovation: a case study
J Zhu, J Zhang, R Magee and C Y Shaw Vol 5 235

Evaluation of indoor air quality parameters during the design phase of a climatisation system of a restaurant in Rome
G Fasano and G Giorgiantoni Vol 5 241

Environmental chamber testing: TVOC emissions from carpets
H Guo, F Murray, K Maybury and S Wilkinson Vol 5 247

Evaluation of predictive models for solvent-based coatings with data from a test house
Z Guo, J C S Chang, K A Krebs and R C Fortmann Vol 5 251

Assessing indoor air quality and its impact on a research and treatment facility in Nova Scotia, Canada
M R Joffres, R Fox, T Williams and R Barrett Vol 5 253

Statistical distributions of indoor air pollutant concentrations in office buildings
S C Sofuoglu and D J Moschandreas Vol 5 258

Effect of reversible, diffusion-controlled sinks on VOC concentrations in buildings
D Y Zhao, J Rouques, J C Little and A T Hodgson Vol 5 264

The impact of human perception of simultaneous exposure to thermal load, low-frequency ventilation noise and indoor air pollution
O Alm, T Witterseh, G Clausen, et al Vol 5 270

Comparing two models simulating the adsorption/desorption of VOCs onto/from indoor materials on experimental data
A Arvanitis, S Kephalopoulos, S Tarantola, et al Vol 5 276

Q4 Indoor/outdoor comparison

Measurements of indoor and outdoor nitrogen dioxide concentrations using a passive sampler
B Innset, K Aspmo, A Bartonova, et al Vol 5 282

Personal exposure to air pollutants in Hertfordshire, England
D R Crump, B H Bland, H S Mann, et al Vol 5 288

Odour complaints in an office building: source identification by GC/FID
C Weber and L Carlucci Vol 5 294

The effect of wind pressure and pollutant concentration on ventilation of urban buildings
V Kukadia, D J Hall, S Walker and A M Spanton Vol 5 300

Modelling the contribution of indoor and outdoor sources to air pollution exposures in the UK
M R Ashmore, M A Byrne, C Dimitroulopoulou and R P Kinnersley Vol 5 306

Human's exposure to benzene and other aromatic hydrocarbons: indoor and outdoor sources
K Levsen, E Ilgen, J Angerer, et al Vol 5 312

Inhalation of vehicular pollutants by road users
R Kumar and A Mandal Vol 5 317

The presence of carbonyl compounds in indoor/outdoor ambient air in Sao Paulo City, Brazil
M Pires, L Montero and L R F de Carvalho Vol 5 319

Air quality at higher levels: results from detailed measurements of the vertical pollution profile to 100m in an urban environment
R Watkins and J Palmer Vol 5 325

Determining transfer factors for outdoor aerosol plumes entering buildings
T L Thatcher, W W Nazaroff and R G Sextro Vol 5 331

General population exposure to environmental levels of benzene in the UK
R Duarte-Davidson, C Courage, L Rushton and L S Levy Vol 5 333

Indoor air quality evaluation using carbon dioxide levels in bedrooms in La Coruña, Spain
E Rodríguez, A Baaliña, A Vázquez, et al Vol 5 335

Evaluation of material selection as a strategy for improving indoor air quality in new residential construction
J Vallarino, J D Spengler, Y Nishioka, et al Vol 5 341

Air quality comparison of outdoor and indoor environment in humid tropic (Cuba)
O Cuesta-Santos, M González, P Sánchez, et al Vol 5 347

Assessment of indoor and outdoor TVOC in a renovated office in Rio de Janeiro, Brazil
F R de Aquino Neto, J N Cardoso and L S R Brickus Vol 5 352

Personal exposures to VOCs: results of the NHANES pilot study
T H Stock, M T Morandi, J Cross and M Afshar Vol 5 358

Q5 Studies of sick building syndrome, part 2

The association between SBS symptoms and the physical and psychosocial environment of school personnel
K Andersson, I Fagerlund, U Norlén and M Nygren Vol 5 360

Objective versus self-reported allergy in relation to SBS symptoms
R Petersen, M L Christiansen and C Franck Vol 5 366

The SBS syndrome: do women suffer more?
M Bullinger, M Morfeld, S von Mackensen and S Brasche Vol 5 371

ProKlimA: history, aim and study design
W Bischof, S Brasche, M Bullinger, et al Vol 5 376

Physical conditions within 14 office buildings: part of an interdisciplinary SBS study in Germany
E Mayer and R Schwab Vol 5 382

Gender differences in symptom reports in a school building with indoor climate problems
B Stenberg, E Bergström and B Sjöberg Vol 5 384

Sensory evaluation of the air in 14 office buildings: part of an interdisciplinary SBS study in Germany
J Pejtersen, R Schwab and E Mayer Vol 5 390

Indoor viable mould spores in two German cities
A Koch, K-J Heilemann, W Bischof, et al Vol 5 396

Factors determining different symptom patterns of sick building syndrome: results from a multivariate analysis
S Brasche, M Bullinger, H Gebhardt, et al Vol 5 402

Indoor thermal climate, air contaminants and sensory perception in the assessment of indoor air quality (IAQ) or indoor environmental quality (IEQ) and sick building syndrome (SBS)
K Ramakrishnan, K Cena and R H Taplin Vol 5 408

Psychosomatic and psychosocial aspects of sick building syndrome
V Bencko and R Honzák Vol 5 414

SBS and work with visual display terminals: part I. Review of epidemiology
L N Petersen, P Skov and P Wolkoff Vol 5 419

Logistic and strategic planning in the ProKlimA-project
V Herzog, S von Mackensen, S Brasche and H Gebhardt Vol 5 425

The sick building syndrome as a subjective perception: theoretical approach and assessment methods
S von Mackensen, M Bullinger and M Morfeld Vol 5 429

Chemical contaminants in office air: results from a study in 14 German office buildings
J Witthauer, R Schwab, V Herzog and W Bischof Vol 5 434

Q6 Asthma and allergy

Allergic diseases among immigrant children in a Swedish metropolitan area
K Andersson, I Fagerlund, B Dahm and M Nygren Vol 5 439

The school environment: is it related to the incidence of asthma in the pupils?
G Smedje and D Norbäck Vol 5 445

Childhood asthma and residential moisture damages
A Hyvärinen, M Toivola, J Halla-aho, et al Vol 5 451

Asthma and indoor environment in Nepal
T Melsom, L Brinch, J O Hessen, et al Vol 5 453

Floor cleaning materials as a cause of occupational asthma
J S McCoach, A S Robertson and P S Burge Vol 5 459

Asthma severity in children associated with passive smoking and indoor allergens
K Belanger, B P Leaderer, T S Holford and M B Bracken Vol 5 465

Inflammatory responses and cytotoxicity in RAW 264.7 macrophages caused by mycobacteria isolated from indoor air of mouldy houses
K Huttunen, M Ruotsalainen, E Iivanainen, et al Vol 5 471

Indoor air quality in houses where children with allergy are living
S Nakai, J Nakanishi, M Kitamura, et al Vol 5 473

Indoor air and childhood asthma
K Rumchev, J Spickett, M Phillips and S Stick Vol 5 477

Indoor air quality levels in homes of environmentally hypersensitive individuals
C Y Shaw, V Salares, R J Magee and M Kanabus-Kaminska Vol 5 483

Persistent increased sensitivity of the nasal mucous membranes several years after exposure to an indoor environment with moisture problems
S Rudblad, Kjell Andersson, G Stridh, et al Vol 5 489

IAQ in homes of allergic children
A Slámová and I Holcátová Vol 5 495

Dust mite allergens, indoor humidity and asthma
S G Howieson and A Lawson Vol 5 501
