

# PROCEEDINGS

## EVS-16

### 16th International Electric Vehicle Symposium

October 12-16, 1999  
Beijing, China

Hosted by :

Electric Vehicle Association of Asia Pacific (EVAAP)

China Electrotechnical Society (CES)

Society of Automotive Engineers of China (SAE-C)

Supported by :

World Electric Vehicle Association (WEVA)

Ministry of Science & Technology of China

State Administration of Machinery Industry of China

China Association for Science & Technology

UB/TIB Hannover

89

120 939 746

# ABSTRACT

UNIVERSITÄTSBIBLIOTHEK  
HANNOVER  
TECHNISCHE  
INFORMATIONSBIBLIOTHEK

## *Lecture Sessions*

**Thursday 14 October (10:30 - 12:00)**

### ***Session A1: Electric Vehicle***

- Advanced Clean Energy Vehicle Project in Japan** 1  
Kenji Morita, Nobuo Iwai, Japan Automobile Research Institute, Japan, Osamu Notoya,  
New Energy and Industrial Technology Development Organization, Japan
- The IEA Agreement for Hybrid and Electric Vehicles Enters into its Second Phase** 2  
R. Vellone, ENEA CRE-Casaccia, Italy, U. Muntwyler, Ingenieurbüro Muntwyler,  
Switzerland. F. H. Koch, Implementing Agreement Secretary, Canada
- Research and Development of Basic EV Components for Electric Vehicles in Russia** 3  
Y. Bogachev, I. Ksenevich, S. Logunov, REVA, Russia
- BEV, FCEV, HEV ... the same electric drive train?** 4  
Wolfgang Dönitz, Karl E. Noreikat, DaimlerChrysler AG, Germany
- Development Strategy of EV Project in China** 5  
Zhiwen Zhang, Ministry of Science & Technology, China, Jinsheng Shen, Northern  
Jiaotong University, China

### ***Session B1: Batteries***

- An Overview of Battery Technology in Electric Vehicles** 6  
C.C. Chan, E.W.C. Lo, Weixiang Shen, University of Hong Kong, China
- Electric and Hybrid Vehicle Energy Storage R&D Programs of the U.S.**  
**Department of Energy** 7  
Raymond A. Sutula, Kenneth L. Heitner, Susan A. Rogers, Tien Q. Duong, Robert S. Kirk,  
U.S. Department of Energy, USA, Vincent Battaglia, Gary Henriksen, Argonne National  
Laboratory, USA, B.J. Kumar, Connie Schonefeld, Energetics, Incorporated, USA
- Lifecycle Analysis of Electric Vehicles with Advanced Batteries in Japan** 8  
Kaoru Ishihara, Komae Research Laboratory, CRIEPI, Japan. Kazuhiko Nishimura, Youji  
Uchiyama, Socio-economic Research Center, CRIEPI, Japan
- The Performance Characteristics of the New Nickel-Zinc Battery in EV, E-Bike  
and E-Scooter Applications** 9  
Chao M. Huang, B. Zhuang, D. Coates, A. Charkey and R. Kanode, Xiamen Three Circles  
ERC Battery Co., Ltd., China

|  |           |
|--|-----------|
| <b>Development of Battery System for Toyota “e-com”</b>            | <b>10</b> |
| Yasuhiro Takahashi, Masahiro Misu, Toyota Motor Corporation, Japan |           |

### ***Session C1: Drives***

|  |           |
|--|-----------|
| <b>Recent Advances in Brushless DC Motors and Drives</b>   | <b>11</b> |
| R L Hodkinson, Nelco Systems/POLARON Group, UK   |           |
| <b>A New Surface-Inset Permanent Magnet Motor Drive for Electric Vehicles</b>  | <b>12</b> |
| C.C. Chan, Jinyun Gan, K.T. Chau, University of Hong Kong, China. J.Z. Jiang, Shanghai University, China   |           |
| <b>A New Doubly Salient Permanent Magnet Motor for Electric Vehicles</b>   | <b>13</b> |
| K.T. Chau, Ming Cheng, C.C. Chan, University of Hong Kong, China   |           |
| <b>Efficiency Optimization of a Synchronous Motor and its Converter</b>  | <b>14</b> |
| J. Beretta, F. Colledani, S. Derou, E. Gimet, PSA Peugeot Citroen, France. Ph. Bastiani, J.M. Retif, X. Lin-Shi, O.Asseu, CEGELY INSA, France. G. Grellet, CEGELY UCBL, France. G. Clerc, CEGELY ECL, France |           |
| <b>A Novel Field-Circuit Approach for the Design and Analysis of Permanent Magnet Machines</b>   | <b>15</b> |
| S. Yang, Z. M. Zhao, Tsinghua University, China. E. Yamada, Isuzu Motors Limited, Japan  |           |

### ***Session D1: Charging System***

|  |           |
|--|-----------|
| <b>A 85 KVA integrated on-board battery charger for an electrical bus using traction inverter components</b>   | <b>16</b> |
| Nicolas Buchheit, George Barssoff, Eric Teyssedre, EDF Electricite de France, France. Jean-Marie Andrejak, Leroy-Somer, France   |           |
| <b>Fast Charger with Fuzzy-logic Decision</b>  | <b>17</b> |
| Jinchun Peng, Yaobin Chen, Purdue University at Indianapolis, USA  |           |
| <b>Research on the Technology of EVS' Battery Fast Charge</b>  | <b>18</b> |
| Jiuchun Jiang, Xide Zhou, Weige Zhang, Northern Jiaotong University, China   |           |
| <b>Inductive Fast-Charging EV Fleets</b>   | <b>19</b> |
| Lawrence S. Wnuk, Eric J. Mundt, Frank Zollner, Steve Tarnowsky, General Motors Advanced Technology Vehicles, USA. Naum Pinsky, Juan Argueta, Ricardo Solares, Southern California Edison, USA |           |
| <b>Pulse Charge Characteristics of Valve Regulated Lead Acid Battery for Electric Vehicles</b>   | <b>20</b> |
| Kazunari Ando, Naoto Hoshihara, Matsushita Battery Industrial Co., Ltd., Japan. Kuniaki Miyaoka, Jun Takehara, The Chugoku Electric Power Co., Inc., Japan                                     |           |

## ***Thursday 14 October (13:30 - 15:00)***

### ***Session A2: Electric Vehicle***

- Development of a Battery-Electric/Hybrid Bus for Clean Driving in the 21<sup>st</sup> Century** 21  
Sylvia Marquez, Global Products Exchange, Inc., USA. Norman Abell, GPX, USA.  
Klaus-Dieter Merz, Chloride Motive Power, Ltd., Germany
- Development of the 2-seater small electric vehicle "Honda City Pal"** 22  
Masami Ogura, Yoshinori Mita, Tatsuo Takahashi, Honda R&D Co., Ltd., Japan
- Development and Production Start-Up of an Urban Electric Vehicle for India** 23  
Chetan Maini, Reva Electric Car Company Pvt. Ltd., India
- Electric Kangoo** 24  
A. Moretti, Renault, France
- Development of the Nissan Ultra-Small Electric Vehicle** 25  
Masahiko Tahara, Naoki Amada, Youichi Hara, Nissan Motor Co., Ltd., Japan

### ***Session B2: Batteries***

- Bipolar Nickel-Metal Hydride Battery** 26  
Martin Klein, Electro Energy, Inc., USA
- Development of High Performance Nickel Metal Hydride Batteries for Electric Vehicles** 27  
Soo-Whan Kim, Ki-Chun Lee, Sung-Keun Lee, Tai-Ho Yang, San Cheon, Tae-Won Lim,  
Hyundai Motor Company, Korea
- High Power Nickel - Metal Hydride Batteries** 28  
U. Köhler and M. Ullrich, VARTA AG Research and Development Center, Germany
- Development of High Performance and Compact Ni-MH Batteries for Honda City Pal** 29  
Noboru Sato, Kazuhiko Yagi, Takashi Ishikura, Honda R&D Co., Ltd., Japan
- Life duration of Saft Ni-MH batteries for EV application** 30  
Christian Jordy, Jean-Louis Liska, Michael Saft, SAFT, France

### ***Session C2: Drives***

- A Novel Induction Machine Design Suitable for Inverter-Driven Variable Speed Systems in EV applications** 31  
Zhengming Zhao, Shuo Meng, Tsinghua University, China. Ahmed El-Antably, Electric Drive, GM, USA
- Propulsion System Control for Next Generation of EV1** 32  
Silva Hiti, Constantin C. Stancu, James M. Nagashima, General Motors Corporation, USA
- Research on Efficiency Optimization Control for Induction Motor Drive System in Electric Vehicle** 33

|  |           |
|--|-----------|
| Lingfeng Song, Shumei Cui, Shukang Chen, Harbin Institute of Technology, China   |           |
| <b>Torque-given Control of Switched Reluctance Motor Drive Suitable for Electric Vehicle</b>   | <b>34</b> |
| Wei Guo, Zhiyuan Ma, Qionghua Zhan, Huazhong University of Science and Technology, China   |           |
| <b>Comparison of Induction, PM, and SR Motor Technologies in EV Traction Systems Applications</b>  | <b>35</b> |
| Ahmad M. Nasser, Ecostar Electric Drive Systems, USA   |           |
| <br><b><i>Session D2: Charging System</i></b>  |           |
| <b>Development of A Safe and Cost Effective Electric Vehicle Charging Infrastructure</b>   | <b>36</b> |
| Stephen K. Fan, Environmental Vehicle Center, Ford Motor Company, USA  |           |
| <b>Development of Small Inductive Charge Coupling for Electric Vehicles</b>  | <b>37</b> |
| Hiroshi Naiki, Susumu Ukita, Toyota Motor Corporation, Japan. David Ouwerkerk, General Motors Advanced Technology Vehicles-Torrance, USA. Masahiko Terazoe, Toyoda Automatic Loom Works, Ltd., Japan |           |
| <b>Scheduling Method for Charging of Electric Vehicles</b>   | <b>38</b> |
| Yasuyuki Sugii, Electricity Utilization Group, Tokyo Electric Power Company, Japan. Katsuhiko Tsujino, Takafumi Nagano, Mitsubishi Electric Corp., Japan   |           |
| <b>Public Sets EV Intelligent Charging System</b>  | <b>39</b> |
| Liangguo Qian, Qingxiang Li, Jiamin Gong, Wei Zhao, Beijing Research Institute of Mechanical & Electrical Technology, China  |           |
| <b>The service battery renting program: an essential element for the success of the electric vehicle</b>   | <b>40</b> |
| C.A. Bleijs, EDF DTVE, France. C.Gaboreau, Battery Service Company   |           |
| <br><b><i>Friday 15 October (8:30 – 10:00)</i></b>   |           |
| <b><i>Session A3: Hybrid Electric Vehicle</i></b>  |           |
| <b>NECAR 4 – The First Zero-Emission Vehicle with Acceptable Range</b>   | <b>41</b> |
| Juergen Friedrich, Gerardo Friedlmeier, Ferdinand Panik, Wolfgang Weiss, DaimlerChrysler AG, Germany   |           |
| <b>Ford P2000 Fuel Cell Vehicle</b>  | <b>42</b> |
| Woong-chul Yang, Larry R. Brandenburg, Bradford Bates, Keith A. Oglesby, Kurt D. Osborne, Ford Motor Company, USA  |           |
| <b>Experiences on control of Internal Combustion Engines of Series Hybrid Electrical Vehicles</b>  | <b>43</b> |
| L. De Andreis, G. Pede, ENEA, Italy. M. Ceraolo, R. Giglioli, A. Possenti, University of Pisa, Italy   |           |
| <b>Evaluation of a true low floor 12m series hybrid bus</b>  | <b>44</b> |
| F. Badin, B. Jeanneret, R. Trigui, F. Harel, J.P. Roumégoux, INRETS LTE, France. A. Jullien, R. Périot, Alstom Transport, France. L. d'Ussel, SAFT, France   |           |

|  |           |
|--|-----------|
| <b>Algorithmic optimization tool for evaluation of HEV control strategies</b>  | <b>45</b> |
| Sébastien Delprat, Gino Paganelli, Thierry Marie Guerra, Jean-Jacques Santin, Lamih,<br>University of Valenciennes, France. Michel Delhom, Emmanuel Combes, PSA Peugeot<br>Citroën, France |           |

### ***Session B3: Battery Management***

|   |           |
|---|-----------|
| <b>A Battery Management System for optimized Control and Diagnosis of Traction Batteries in EVs and HEVs</b>  | <b>46</b> |
| Detlef Heinemann, Dietrich Naunin, Technical University of Berlin, Germany  |           |
| <b>Battery management system for hybrid batteries</b>   | <b>47</b> |
| Ling-yuan Tseng, Ta-ching Pong, Taiwan Travel Power Corporation, Taiwan   |           |
| <b>EV Battery Management System with Fuzzy Expert Diagnosing</b>  | <b>48</b> |
| Xiaomin Sun, Yufei Zhong, Guoguang Qi, Zaiqing Nie, Tsinghua University, China.   |           |
| <b>Fuzzy Logic-Enabled Battery State-of-Charge Meters</b>   | <b>49</b> |
| Sudheer Arey, Vikranth R. Gaddam, Pritpal Singh, Villanova Univ., USA. Zhenji Yang, Da<br>Lian Univ. of Technology, China. Craig Fennie, JR. David E. Reisner, US Nanocorp, Inc., USA |           |
| <b>80C196-Based EV Digital Instrumentation</b>  | <b>50</b> |
| Guijun Yao, Philip S.M. Chin, Singapore Polytechnic, Singapore  |           |

### ***Session C3: Drives***

|  |           |
|--|-----------|
| <b>A Multifunctional DC-DC Converter for an EV Drive System</b>                        | <b>51</b> |
| Xinxiang Yan, Dean Patterson, Byron Kennedy, Northern Territory University, Australia  |           |
| <b>Hybrid Vehicle Powertrain: Modeling and Control</b>                                 | <b>52</b> |
| Stephane Rimoux, Michel Delhom, Emmanuel Combes, PSA Peugeot Citroën, France           |           |
| <b>Minimization of Energy Losses in Hybrid Electric Vehicles, Theory and Practice</b>  | <b>53</b> |
| Morten Hemmingsson, Lund Institute of Technology, Sweden                               |           |
| <b>Analysis of Magnetic Radiation Noise from Electric Devices of Electric Vehicles</b> | <b>54</b> |
| Tatsuya Doi, Masato Oki, Ashikaga Institute of Technology, Japan                       |           |
| <b>Leakage Current Control in Electric Vehicles</b>                                    | <b>55</b> |
| Joseph C. Burba, Ford Motor Co., USA   |           |

### ***Session D3: Demonstration***

|   |           |
|---|-----------|
| <b>Integration of a new Annex VIII “Deployment Strategies for Hybrid, Electric and Alternative Fuel Vehicles” in the Implementing Agreement Hybrid &amp; Electric Vehicles of the International Energy Agency</b> | <b>56</b> |
| Sigrid Kleindienst Muntwyler, Engineering Office Muntwyler, Switzerland   |           |
| <b>First results of the P&amp;D Project of Mendrisio</b>  | <b>57</b> |

|   |           |
|---|-----------|
| Carlo Croci, AssoVEL and Mendrisio, Switzerland. Marco Piffaretti, InfoVEL, Switzerland               |           |
| <b>The Northernmost EV Service Network in the World – 8 Years Experience of EV Service in Finland</b> | <b>58</b> |
| Jorma Piippo, PT-Automotive Services Ltd., Finland  |           |
| <b>The Development of the Electric Vehicle in La Rochelle</b>   | <b>59</b> |
| M. Michel-Martial Durieux, the Communauté de Villes de La Rochelle, France.                           |           |
| M. Jacques Mollard, Communauté de Villes, France  |           |
| <b>The Cradle of Electric Vehicles</b>  | <b>60</b> |
| Zongkong Wen, Run Li, Jinglin Wang, Guangdong EV Project Leading & Coordinating Group Office, China   |           |

## ***Friday 15 October (10:30 – 12:00)***

### ***Session A4: Hybrid Electric Vehicle***

|   |           |
|---|-----------|
| <b>Electric and Hybrid Vehicle Demonstration Programmes in European Cities</b>                      | <b>61</b> |
| Gaston Maggetto, Wim Deloof, Peter Van den Bossche, Joeri Van Mierlo, CITELEC, Belgium              |           |
| <b>Evaluation of Energy efficiency of a Commercial HEV, Prius, at City driving</b>                  | <b>62</b> |
| H. Ishitani, Y. Baba, and R. Matsushashi, University of Tokyo, Japan                                |           |
| <b>Integration, Calibration and Evaluation of a Low Storage Requirement Hybrid-Electric Vehicle</b> | <b>63</b> |
| J.R. Blankenship, B. R. Masterson, M. S. Yamazaki and R. M. Stuntz, Ford Motor Company, USA         |           |
| <b>New Hybrid concept simulation tools, evaluation on the Toyota Prius car</b>                      | <b>64</b> |
| B. Jeanneret, R. Trigui, F. Badin, F. Harel, INRETS LTE, France. F. Damemme, J. Lavy, IFP, France   |           |
| <b>"Lightning Rod" Sets Land Speed Record for Electric Vehicle</b>                                  | <b>65</b> |
| Bill O' Brien, Hawker Energy Products Inc., USA. Eric Luebben, Cybortronics Inc., USA               |           |

### ***Session B4: Infrastructure & Test***

|   |           |
|---|-----------|
| <b>Experience feedback with EDF electric vehicles and public charging infrastructure</b>  | <b>66</b> |
| Eric Teyssedre, Electricite de France, France   |           |
| <b>Development of Chargers and Information Relays for EV Commuter's Public Use System</b> | <b>67</b> |
| Masao Nakane, Yoshihiko Taguchi, Toyoda Automatic Loom Works, Ltd., Japan                 |           |
| Akiteru Maruta, Interlink Corporation, Japan  |           |
| <b>Battery Parameterization System: Generic Battery Evaluation for Electric Vehicles</b>  | <b>68</b> |

|  |           |
|--|-----------|
| Evgenij Barsoukov, Jong Hyun Kim, Kang Seon Hwang, Dong Hwan Kim, Chul Oh Yoon, Hosull Lee, Korea Kumho Petrochemical Company, Korea   |           |
| <b>Approach for Proper Battery Adjustment for HEV Application</b>  | <b>69</b> |
| A. Szumanowski, Warsaw University of Technology, Poland. G. Brusaglino, Centro Ricerche FIAT, Italy  |           |
| <b>Development of a New Measurement Procedure and Test System for Electric Vehicles</b>  | <b>70</b> |
| Kiyomoto Kawakami, Yuko Kakizaki, Yoshinori Kondo, National Institute for Environmental Studies, Japan. Katsuhisa Kato, Junichi Yasu, Sony Tektronix, Japan. Kenichi Shimizu, Mechanical. Engineering Laboratory, Japan. Hiroshi Shimizu, Keio University, Japan |           |
| <br><b><i>Session C4: Drives &amp; Simulation</i></b>  |           |
| <b>Development of a Drive Control System for a Parallel Hybrid Electric Vehicle</b>  | <b>71</b> |
| Taizo Miyazaki, Ryoso Masaki, Fumio Tajima, Shotaro Naito, Heikichi Kuwabara, Yukinori Taneda, Hitachi Ltd., Japan   |           |
| <b>Electromagnetic Interference (EMI) Characterization for Electric Vehicles (EVs) &amp; Hybrid Electric Vehicles (HEVs)</b>   | <b>72</b> |
| Chingchi Chen, Ford Research Laboratories, USA. Xingyi Xu, Ecostar Electric Drive Systems, USA   |           |
| <b>Non-Linear Dynamic Model of an Electric Vehicle Drivetrain</b>  | <b>73</b> |
| Marcus Menne, Rik W. De Doncker, Aachen University of Technology, Germany  |           |
| <b>Power Converter Technology for EV Traction Drives</b>   | <b>74</b> |
| R. Inderka, R.W. De Doncker, Aachen University of Technology, Germany  |           |
| <b>Discrete-time ABS/TC Test Facility for Electric Vehicles</b>  | <b>75</b> |
| P. Khatun, C.M. Bingham, P.H. Mellor, N. Schofield, University of Sheffield, UK  |           |
| <br><b><i>Session D4: Demonstration, Promotion &amp; Policy</i></b>  |           |
| <b>The Incentive Project for the Purchase of Electric and Hybrid Electric Vehicles in Japan</b>  | <b>76</b> |
| Tetsuo Takeishi, Shoji Tange, Naofumi Hashitani, Japan Electric Vehicle Association, Japan   |           |
| <b>Mobility, Energy consumption and Eco-balance of the EV-Project of Mendrisio</b>   | <b>77</b> |
| Marco Piffaretti, InfoVEL, France. Carlo Croci, AssoVEL Mendrisio, Switzerland   |           |
| <b>Nissan Li-Ion Altra EV California Demonstration Status Report</b>   | <b>78</b> |
| Lance Atkins, Tetsuyuki Taniguchi, Yasufumi Sakamoto, Dean Case, Rick Reinhard, Nissan Research & Development, Japan. Hideki Shibayama, Nissan Motor Co., Ltd., Japan  |           |
| <b>Transporting people and goods, Le Touc, a new and clean alternative</b>   | <b>79</b> |
| Bernard Guellard, CERTU, France. Kamel Guessoum, Sarl Touclouse, France  |           |
| <b>EVs as a Stepping Stone towards Sustainable Mobility Stimulation by means of Strategic Niche Management</b>   | <b>80</b> |

Boelie Elzen, Remco Hoogma, University of Twente, Netherlands

## ***Friday 15 October (13:30 – 15:00)***

### ***Session A5: Electric Bicycle & Electric Motorcycle***

- Development of extended project on Electric Scooter** 81  
Hiroaki Takechi, Izumi Yamamoto, Akifumi Ooishi, Yamaha Motor Co., Ltd., Japan
- Control Design of a Brushless DC Motor Applied to Electric Scooters** 82  
C. L. Chu, Nan-Tai Institute of Technology, Taiwan. M. C. Tsai, C. S. Huang, H. Y. Chen,  
National Cheng Kung University, Taiwan
- A New PWM Method for Electric Bicycles Driven by AC Motors** 83  
Jun Wu, Shenyi Li, Mengchun Pan, Yongyi Ren, Qingxiao Shan, National University of  
Defence Technology, China
- A Electric Motorcycle with Switched Reluctance Motor Propulsion System** 84  
Lei Dong, Zhiliang Cao, Diji Liu, Nanjing University of Aeronautics & Astronautics,  
China
- Analysis of Network Operation of Shanghai Electric Scooter Battery Charging &  
Swap Station** 85  
Xionghua Tang, Shanghai Electric Scooter Battery Co., Ltd., China

### ***Session B5: Batteries***

- Progress of Lithium Secondary Battery Technology for Electric Vehicle and  
Home-Use Load Leveling System Application in the Japanese National Project** 86  
S. Arai, T. Iwahori, N. Nakajima, H. Awata, H. Momose, Y. Ozaki, S. Taniguchi and S.  
Shiraga, Lithium Battery Energy Storage Technology Research Association, Japan.  
R. Ishikawa and . K. Takei, Central Research Institute of Electric Power Industry, Japan
- Thermal Evaluation and Performance of High-Power Lithium-Ion Cells** 87  
Matt Keyser, Ahmad Pesaran, National Renewable Energy Laboratory, USA. Salah Oweis, Guy  
Chagnon, SAFT Advanced Technology Division, USA. Cyrus Ashtiani, DaimlerChrysler  
Corporation, USA
- Development of a High-Power Lithium-ion Battery for Parallel HEVs** 88  
Hideaki Horie, Yuji Tanjo, Takaaki Abe, Osamu Shimamura, Yasuhiko Ohsawa, Mikio  
Kawai, Takeshi Miyamoto, Nissan Motor Co., Ltd., Japan
- Lithium Polymer Battery for Electric Vehicle and Hybrid Electric Vehicle  
Applications** 89  
Christian St-Pierre, Roger Rouillard, Argo-Tech Productions Inc. (Hydro-Québec), Canada.  
André Bélanger, Bruno Kapfer, Martin Simoneau, Yves Choquette, Louis Gastonguay,

|   |           |
|---|-----------|
| Institut de Recherche d'Hydro-Québec, Canada. Robert Heiti, Cathy Behun, Minnesota Mining And Manufacturing Company (3m), USA |           |
| <b>Adapting the EV Battery Technology to New Hybrid Vehicle Requirements</b>  | <b>90</b> |
| Louis d'Ussel, Jean Pierre Schultze, Guy Chagnon, SAFT Advanced Technology Division, France                                   |           |

### ***Session C5: Environment Impact & Component***

|  |           |
|--|-----------|
| <b>Impacts of EVs on Energy, the Environment and Transport Systems</b>   | <b>91</b> |
| Van Den Bosch, P. McKay, Netherlands Energy Research Foundation ECN, Netherlands. T. Fisher, Austrian Mobility Research FGM, Austria. S. Lines, Natural Resources Canada, U. Schwegler, Büro für Verkehrsplanung, Switzerland. G. Reinhardt, U. Lambrecht, IFEU-Institut für Energie- und Umweltforschung, Germany |           |
| <b>Battery Cooling Technology in Nickel/Metal-Hydride Battery for Hybrid Electric Vehicles</b>   | <b>92</b> |
| Shinya Kimoto, Kunio Kanamaru, Munehisa Ikoma, Panasonic EV Energy Co. Ltd., Japan   |           |
| <b>Opportunities to Reduce Air-Conditioning Loads Through Lower Cabin Soak Temperatures</b>  | <b>93</b> |
| R. Farrington, M. Cuddy, M. Keyser, and J. Rugh, National Renewable Energy Laboratory, USA   |           |
| <b>Energy Regeneration of City Commuter-car By Ultracapacitor and Battery</b>  | <b>94</b> |
| Morimasa Hayashida, Kazuyuki Narusawa, Yushi Kamiya, Ministry of Transport, Japan  |           |
| <b>A Few Remarks on a Bench Test for Re-generative Energy Evaluation</b>   | <b>95</b> |
| Ken-Ichi Shimizu, Tetsu Iwatsuki, Nobumasa Shirai, AIST, MITI, Japan   |           |

### ***Session D5: Marketing***

|  |            |
|--|------------|
| <b>Market Introduction of Electric Vehicles in Sweden</b>  | <b>96</b>  |
| Mikael Fjällström, Anders Lewald, Swedish National Energy Administration, Sweden                             |            |
| <b>Framework for Assessing Measures to Encourage Electric Vehicle Purchase and Use</b>                       | <b>97</b>  |
| Albert W. Carlson, Abacus Technology Corporation, USA. Kenneth L. Heitner, U.S. Department of Energy, USA    |            |
| <b>Using No-Cost Vehicle Loans to Encourage EV Leasing</b>   | <b>98</b>  |
| Charles M. Shulock, Catherine Lentz, Gayle Sweigert, California Air Resources Board, USA                     |            |
| <b>Are competitive prices and practical demonstrations enough to overcome barriers to electric vehicles?</b> | <b>99</b>  |
| Jørgen Spangsberg Christensen, DEFU, Denmark   |            |
| <b>Developing the Electric Vehicle Market Through Long-Term Leasing and Used Vehicle Sales</b>               | <b>100</b> |
| Philippe le Carpentier, E.lease, France  |            |

## ***Saturday 16 October (8:30 – 10:00)***

### ***Session A6: Electric Bicycle & Electric Motorcycle***

|   |            |
|---|------------|
| <b>Scotelec-A Unique Experience in Two-wheel Electric Driving</b>                                   | <b>101</b> |
| Bernard Irion, Avere France, France   |            |
| <b>The Introduction of YAMAHA PAS</b>   | <b>102</b> |
| Nozomu Takata, PAS Operations Yamaha Motor Co., Ltd., Japan   |            |
| <b>The Vectrix Electric Scooter: Advancing Toward Production Readiness</b>                          | <b>103</b> |
| Drew Szabo, Vectrix Corporation, USA. Dal Y. Ohm, Kollmorgen Motion Technologies Group, USA         |            |
| <b>Electrically Powered Small Commuter Vehicles</b>   | <b>104</b> |
| Chiaki Kumagai, Akira Hayashi, Kaoru Hatanaka, Honda R & D Co., Ltd., Japan                         |            |
| <b>The development of electric bicycles in Shanghai</b>   | <b>105</b> |
| Tingman Wu, Sunan Ye, Lingen Liu, Xiaolin Chen, Shanghai Electric Vehicle Development Center, China |            |

### ***Session B6: Fuel Cell***

|  |            |
|--|------------|
| <b>Recent Advances in Fuel Cells for Transportation Applications</b>   | <b>106</b> |
| André Martin, Ballard Automotive Inc., Canada  |            |
| <b>The history, current situation and prospect of fuel cells in China - For the 160th anniversary of the invention of fuel cell</b>                  | <b>107</b> |
| Zongqiang Mao, Jun Yan, Lingyun Liu, INET, Tsinghua University, China  |            |
| <b>Catalytic Activity of Phthalocyanine for the Electroreduction of Oxygen in Polymer Electrolyte Fuel Cell</b>                                      | <b>108</b> |
| Zhongfang Li, Suwen Wang, Xiaoyao Tan, Shandong Institute of Technology, China   |            |
| <b>Design and evaluation of polymer-electrolyte and direct-methanol fuel cells for electric vehicles</b>   | <b>109</b> |
| K. Tanaka, Global Industrial Social Progress Research Institute, Japan. C. Wen, The University of Tokyo, Japan. K. Yamada, Shinshu University, Japan |            |
| <b>The Non-Flowing Zinc/Bromine Battery for Electric Vehicle Applications</b>  | <b>110</b> |
| Bjorn Jonshagen, ZBB Energy Corporation, Australia   |            |

### ***Session C6: Ultracapacitor***

|  |            |
|--|------------|
| <b>Ultracapacitor System Design; An energy storage solution throughout the EV/HEV</b>          | <b>111</b> |
| Richard Smith, Mark Cohen, Maxwell Technologies, Inc., USA                                     |            |
| <b>Ultracapacitor Tests for EV Applications: Introduction of New Equalisation Coefficients</b> | <b>112</b> |
| F. Brucchi, M. Conte, G. Lo Bianco, P. Salvati, ENEA Energy Department Advanced                |            |

|   |            |
|---|------------|
| Energy Technology Division, Italy. F. Giulii Capponi, University of Rome, Italy. L. Solero,<br>III University of Rome, Italy                        |            |
| <b>Development and Implementation of the Visteon Integrated Starter-Alternator<br/>System with Ultracapacitors</b>                                  | <b>113</b> |
| Habib ur Rehman, Xingyi Xu, Ecostar Electric Drives, USA. Ning Liu,<br>Gurinder S. Kahlon, Robert J. Mohan, Visteon Powertrain Control Systems, USA |            |
| <b>A simple 6-way DC-DC converter for power flow control in an electric vehicle<br/>with fuel cells and supercapacitors</b>                         | <b>114</b> |
| H. Stemmler, O. Garcia, The Swiss Federal Institute of Technology (ETH), Switzerland  |            |
| <b>Energy and Power from Supercapacitors and Electrochemical Sources</b>  | <b>115</b> |
| Hans Kahlen, University of Kaiserslautern, Germany  |            |

### ***Session D6: Standardization***

|   |            |
|---|------------|
| <b>Development of Standards for Electrically Propelled Road Vehicles in the<br/>European Committee for Standardization, Technical Committee 301</b>   | <b>116</b> |
| G. Brusaglino, C.I.V.E.S – Convenor of CEN/TC301/WG1, Italy. E. Combes, P.S.A.-<br>Peugeot/Citroën, France. J. Hilaire, Renault, France. C. Peyrière, P.S.A. – Chairman of<br>CEN/TC301, France. T. Jarvi, Elcat, Finland |            |
| <b>Standardization of Inductive Charging for Global Acceptance Revisions to the<br/>SAE J1773 Recommended Practice</b>  | <b>117</b> |
| E. Michael Steele, General Motors Advanced Technology Vehicles, USA   |            |
| <b>Current Activities of Standardisation in Japan</b>   | <b>118</b> |
| Ken-ichi Shimizu, Mechanical Engineering Lab., AIST MITI, Japan. Tadao Mochida,<br>Japan Electric Vehicle Association, Japan  |            |
| <b>Solving measurement and evaluation problems in the development of test<br/>procedures for vehicles with electric, hybrid and fuel cell power trains</b>  | <b>119</b> |
| Richard T.M. Smokers, TNO Automotive, Netherlands. Servé Ploumen, IKA, Germany.<br>Mario Conte, ENEA/ERG, Italy. Leo Buning, IAE Arnhem, Netherlands. Karl Meier-<br>Engel, HTA Biel, Switzerland                         |            |
| <b>Electric Vehicle Standardisation for the Next Century</b>  | <b>120</b> |
| Van den Bossche, CITELEC, Belgium   |            |

### ***Dialogue Session***

***Thursday 14 October (15:30 – 18:00)***

#### ***Topic 1: Electric Vehicle***

|  |            |
|--|------------|
| <b>Impact of Introducing Electric Vehicles in Portugal</b> | <b>121</b> |
|--|------------|

|  |            |
|--|------------|
| ANTÓNIO VIEIRA POMBO, JOSÉ MAIA, JORGE ESTEVES, Instituto Politécnico Setúbal & Cautl, Portugal  |            |
| <b>Complexion and Experience of Research and Development of Beijing Brand EVs in Series</b>  | <b>122</b> |
| Qingheng An, Jiazhen Yuan, Beijing No.2 Clean Electric Vehicle Research Institute, Beijing Auto Industry Group Corp., China  |            |
| <b>Oreos 55: The New Electric Bus from Ponticelli</b>  | <b>123</b> |
| Georges Barssoff, Frederic Dufourd, EDF Electricite de France. Pierre Midrouillet, Zone Industrielle de Gretz, France  |            |
| <b>The Feasibility Analysis on The Setting and Running of An Electric Public Bus Route in Beijing</b>  | <b>124</b> |
| Shengmin Cai, Guohong Pan, Dianlu Jiang, Hongkui Cai, Yu Zuo, Yanzhong Hao, Peking University, China   |            |
| <b>Autorickshaws – The EV Alternative</b>  | <b>125</b> |
| Richard Sadler, Curtis Instruments (UK) Ltd., UK. Vidyadhar Humnabadkar, Curtis Instruments India, India   |            |
| <b>The Power Design and Calculation of EV</b>  | <b>126</b> |
| Yongling Sha, Jiuxie Li, Songjiu Hu, Zude Liu, The high science and technology of electrical-driven limited company of hualian, China  |            |
| <b>EV and Asian Car (2)</b>  | <b>127</b> |
| Osamu Fuji, Kurume Institute of Technology, Japan. Hiroshi Shimizu, Keiougijuku University, Japan  |            |
| <b>International Cooperation for Information Exchange on Electric Vehicle Technologies and Programmes at Annex I of Implementing Agreement for Hybrid and Electric Vehicles in IEA</b> | <b>128</b> |
| Iwane Shiozaki, New Energy and Industrial Technology Development Organization (NEDO), Japan, Tomohiko Ikeya, Central Research Institute of Electric Power Industry (CRIEPI), Japan     |            |
| <b>A Study on Testing EQ6690EV Electric Bus</b>  | <b>129</b> |
| Jian Liu, Lin Chen, Xiaojun Pi, Xianlin Shu, Dongfeng Automotive Engineering Research Institute, China   |            |
| <b>Modular Simulation of Environmental, Energy and Mobility Aspects of Traffic Policies</b>  | <b>130</b> |
| Wim Deloof, Joeri Van Mierlo, Gaston Maggetto, Vrije Universiteit Brussel (VUB), Belgium   |            |
| <br><b>Topic 2: Hybrid Electric Vehicle</b>  |            |
| <b>Development of a High-Efficiency Hybrid Truck Incorporating a Lean-Burn Compressed Natural-Gas Engine</b>   | <b>131</b> |
| Naotake Kumagai, Akira Motooka, Nobuaki Takeda, Eiji Mizote, Yuta Susuki, Mitsubishi Motors Corporation, Japan   |            |

|   |            |
|---|------------|
| <b>Development of Hybrid Truck with Ceramic Engine</b>  | <b>132</b> |
| Takafumi Fukada, Kazunari Akiyama, Keiji Kishishita, Kenro Nakashima, Isuzu Ceramics Research Institute Co., Ltd., Japan  |            |
| <b>Hybrid Drive Structure and Powertrain Analysis for Florida Shuttle Buses</b>   | <b>133</b> |
| A. Szumanowski, A. Hajduga, P. Piórkowski, Warsaw University of Technology, Poland<br>E. Stefanakos, G. Moore, K. Buckle, Clean Energy Research Center University of South Florida, USA |            |
| <b>Hybrid Vehicle Provided with the System of “Fuel Cell-Flywheel Energy Storage” for Urban Public Transportation</b>   | <b>134</b> |
| Gino D'ovidio, Giovanni Lanzara, University of L'Aquila – Italy, Italy  |            |
| <b>Simulation of A Complex Parallel-Series Hybrid Drive Train</b>   | <b>135</b> |
| J. Van Mierlo, G. Maggetto, Vrije Universiteit Brussel, Belgium   |            |
| <b>Efficient Thermal Management a Requisite for The Success of Hybrid Vehicles</b>  | <b>136</b> |
| Arun K. Jaura, Wolfram Buschhaus, B. R. Masterson, Ford Motor Company, USA  |            |
| <b>Simulation Of Hybrid Vehicles Power Systems Using Matlab</b>   | <b>137</b> |
| P. Bolognesi, A. Landi, G. Marani, Università Di Pisa, Italy. E. Rossi, Centro Ricerche E.N.E.A. “Casaccia”, Italy  |            |
| <b>The Practical Solar Electric Vehicle in the State of Perfection</b>  | <b>138</b> |
| Masaharu Fujinaka, Koji Akimoto, Seiji Saito, Akio Nishimura, Tokyo Denki University, Japan   |            |
| <b>High-Power Hybrid Bus Fitted for Mountain Roads</b>  | <b>139</b> |
| Tetsuo Koike, Takashi Koto, Hino Motors, Ltd., Japan  |            |
| <b>Conceptual Design of Hybrid Electric Vehicle for Urban Use in China</b>  | <b>140</b> |
| Lifang Wang, Xuhui Wen, Institute of Electrical Engineering, Chinese Academy of Sciences, China   |            |
| <b>A Hybrid Electric Bus</b>  | <b>141</b> |
| Jiuxue Li, Yongling Sha, Zhengzhou HUALIAN Electric Driven Hi-tech Co., Ltd., China<br>Jian Lai, China Electrotechnical Society, China  |            |
| <br><b><i>Topic 3: Electric Bicycle and Motorcycle</i></b>  |            |
| <b>Development of Electric Scooters in Taiwan</b>   | <b>142</b> |
| Jen-Swei Kuo, Mechanical Industry Research Laboratories/ITRI, Taiwan  |            |
| <b>Performance Simulation for Motorcycle and its Application</b>  | <b>143</b> |
| Fengchun Sun, Weichen Yang, Liqing Sun, Chengning Zhang, Beijing Institute of Technology, China   |            |
| <b>Research on the Dynamics Properties of Electric bike &amp; Dynamics Property Comparison between Different Electromotors</b>  | <b>144</b> |
| Jingyuan Huang, Qinghui Yuan, Jiping Sun, Jizheng Zhang, Tsinghua University, China   |            |
| <b>The Development of PAS Ni-MH Battery System</b>  | <b>145</b> |

|  |            |
|--|------------|
| Satoshi Yamamoto, Takayoshi Muramatsu, Masaki Itou, Yamaha Motor Co., Ltd., Japan  |            |
| <b>A High Cost Performance Electric Bike Drive System</b>  | <b>146</b> |
| Qianfan Zhang, Shumei Cui, Liwei Song, Shukang Cheng, Harbin Institute of Technology, China  |            |
| <b>A Smart Ecobike with Rim-Motor</b>  | <b>147</b> |
| K. Hofer, University of Applied Sciences, Germany  |            |
| <b>A Novel Brushless D.C. Motor Drive System for an Electric Bicycle</b>   | <b>148</b> |
| T.F. Chan, The Hong Kong Polytechnic University, China. Lie-Tong Yan, Tsinghua University, China. Shao-Yuan Fang, South China University of Technology, China                            |            |
| <b>Development of Intelligent Controller for Electric Bicycle with Leveling Charging and Practical Battery SOC Tracing Algorithm</b>   | <b>149</b> |
| Chaolei Xin, Xiaomin Sun, Guoguang Qi, Tsinghua University, China  |            |
| <b>Mobile Battery Charging and Exchanging Station for Electric Scooters</b>  | <b>150</b> |
| Ling-Yuan Tseng; Clark Chen; Ta-Ching Pong; Hank Wu, Taiwan Travel Power Corporation, Taiwan   |            |
| <b>Promoting Electric Motorcycle is Inevitable</b>   | <b>151</b> |
| Weijie Huang, Shanghai Electric Scooter Battery Co., Ltd., China   |            |
| <br><b><i>Topic 4: Batteries, Fuel Cell &amp; Ultracapacitor</i></b>   |            |
| <b>Hybridization of Energy Sources in Electric Vehicles</b>  | <b>152</b> |
| Y. S. Wong, K.T. Chau, C.C. Chan, University of Hong Kong, China   |            |
| <b>Development of VRLA Batteries for Honda ICVS</b>  | <b>153</b> |
| Masaaki Hosokawa, Nobuharu Yamada, Keiich Hasegawa, Yasuhide Nakayama, Yuasa Corporation, Japan. Masahide Yokoo, Kyoichi Ariga, Toru Takeda, Honda R&D Co., Japan                        |            |
| <b>A Sealed and Maintainable Accumulator</b>   | <b>154</b> |
| Bin Lu, Hengyi Power Battery Factory, China. Yongling Sha, Zhengzhou Hualian Electric Driven Hi-Tech. Co., Ltd., China. Jian Wu, Xuzhou Forging and Pressing Factory, China              |            |
| Hongbin Dong, Yangzhou Forging and Pressing Co, Ltd., China  |            |
| <b>Study On Prismatic Sealed Ni/MH Battery for Evs</b>   | <b>155</b> |
| Borong Wu, Zhihua Xia, Feng Zhan, Lijun Jiang, Jun Du, Zhijun Kang, Zhuo Huang, Xiuying Wei, Guangrong Qing, Peng Yuan, Beijing General Research Institute for Non-Ferrous Metals, China |            |
| <b>Porous Polymer Electrolyte Li Ion Battery with Superior Performance</b>   | <b>156</b> |
| Mikio Okada, Hideo Yasuda, Masanori Yamachi, Japan Storage Battery Co., Ltd., Japan  |            |
| Eriko Yagasaki, Shozo Hashizume, Kansai Electric Power Co.Inc.   |            |
| <b>High-Performance Air-Diffusion Electrode for Metal-Air Systems</b>  | <b>157</b> |
| Tsepin Tsai, Wayne Yao, Sadeg Faris, Reveo, Inc., USA  |            |
| <b>Zoxy Cells for an Electric Bus</b>  | <b>158</b> |
| P. S. M. Chin, H. Jiang, D. Battul, F. C. Leong, Singapore Polytechnic, Singapore  |            |

|   |            |
|---|------------|
| <b>Preparation of High Quality Nation Solution and Nanometer Pt/C Electrocatalyst</b>   | <b>159</b> |
| Zhongde Zheng, Yongjin Qiao, Liqiang Ji, Qingsu Yang, Beijing Fuyuan New Technology Development General Corp., China  |            |
| <b>The Newest Achievements of PEM Fuel Cell Theory Research</b>   | <b>160</b> |
| Yuhou Wu, Hong Sun, Hongtan Liu, Shenyang Architectural and Civil Engineering Institute, China  |            |
| <b>The Progress of Tractive Battery in China</b>  | <b>161</b> |
| Zhaowen Sui, Shanghai Rare Earth Materials Developing and Application Office, ChinaZhihua Wang, China Electrotechnical Society, China. Zhijie Miao, Nokia(China) Investment Co., China. Minchang Ji, Shanghai Xin Min Wei Industries Co., Ltd., China |            |
| <b>About The Super-Capacitor Researches</b>   | <b>162</b> |
| Guili Xu, Shijiazhuang University, China  |            |
| <br><i><b>Topic 5: Drives, Simulation &amp; Test</b></i>  |            |
| <b>Arbin High Power Electric Vehicle Battery Testing System (EVTS)--"Advanced Technology Reaching Deep Into the Future"</b>   | <b>163</b> |
| John Zhang, Arbin Instruments, USA  |            |
| <b>The Sizing of TFPM Machines for Bus and Truck Hybrid Vehicle Applications</b>  | <b>164</b> |
| Ahmed Masmoudi, University of Sfax, Tunisia. Ahmed Elantably, Allison Transmission Division of General Motors, USA  |            |
| <b>Brushless DC Motor and the Controlling System</b>  | <b>165</b> |
| Dehua Wang, Jun Chen, Junli Wan, Huadong Xu, Tangxian Chen, Chuanxin Li, Hubei Three Gorges University, China   |            |
| <b>Design of Electronic Differential and Sliding Mode Controller for a Direct Electric Vehicle Wheel Drive</b>  | <b>166</b> |
| Branislav Hredzak, Philip S. M. Chin, Singapore Polytechnic, Singapore  |            |
| <b>The Optimization of Permanent Magnet Brushless Motor Drive System for Electric Vehicle</b>   | <b>167</b> |
| Xinjian Jiang, Dan Jiang, Dongqi Zhu, Yuande Hu, Sixiang Liu, Tsinghua University, China  |            |
| <b>Analysis of Different Permanent Magnet Brushless Motor Drives for Electric Vehicles</b>  | <b>168</b> |
| W. Xia, Philip S. M. Chin, Singapore Polytechnic, Singapore   |            |
| <b>Modeling and evaluation of advanced traction systems and new technology vehicles with SABER</b>  | <b>169</b> |
| J. Li, P. H. Mellor, A. J. Brown, K. Atallah, D. Howe, University of Sheffield, UK  |            |
| <b>Development of a Simple Permanent Magnet DC Motor Control with Field Weakening</b>   | <b>170</b> |
| Peter Coenen, Paul Van Tichelen, VITO, Belgium  |            |
| <b>The BIT design of AC drive system</b>  | <b>171</b> |

|   |            |
|---|------------|
| QingXiao Shan, MengChun Pan, WuJun, GuanJun Liu, National Univ. of Defence<br>Technology, China   |            |
| <b>An Indirect Vector Control of Induction Motor Based On Microprocessor 80C196<br/>for Electric Vehicles</b>   | <b>172</b> |
| Wenlong Qu, Bing Zhou, Dewei Xu, Shixiang Liu, Dongqi Zhu, Tsinghua University, China   |            |

| Kaigui Li, Wuhan Stand Control Technology Co., Ltd. (027-87801280)  |            |

## ***Topic 6: Charging System & Infrastructure***

|   |            |
|---|------------|
| <b>Coordination of Charging Stations for Electric Vehicles</b>  | <b>185</b> |
| Marco S. W. Chan, K.T. Chau, C.C. Chan, University of Hong Kong, China  |            |
| <b>Development of Conductive Supply Equipments for Electric Vehicles in Japan</b>   | <b>186</b> |
| Kiyoshi Goto, Yoichi Kunimoto, Takaaki Chuzawa, Matsushita Electric Works, Ltd., Japan  |            |
| <b>Development of a Ferrite Material for Inductive Chargers</b>   | <b>187</b> |
| Y. Matsuo, S. Otohe, F. Nakao, FDK Corporation, Japan. H. Sakamoto, Kumamoto Institute of Technology, Japan   |            |
| <b>A Study of the Methods of Charging Electric Vehicle's Nickel/Metal Hydride Battery</b>   | <b>188</b> |
| Tomohiko Ikeya, Kazuyuki Adachi, Kaoru Ishihara, Yuichi Tomaki, Shunji Taniguchi, The Electric Vehicle Committee, The Central Electric Power Council, Japan   |            |
| <b>The Nonlinear Shift Invariant Discrete Model for Electrical Vehicle Inductive Automatic Charger (EVIAC) Operating Above Resonant Frequency</b>   | <b>189</b> |
| Li Wan, Gaston Maggetto, Philippe Lataire, Haijiang Jiang, TW-EETEC, VUB, Belgium   |            |
| <b>Automatic Monitoring System of Traction Battery for Electric Vehicle</b>   | <b>190</b> |
| Xiaodong Han, Yu Du, Quanshi Chen, Tsinghua University, China   |            |
| <b>High Efficiency Battery Load Leveling EV</b>   | <b>191</b> |
| Nobuyuki Kasuga, Hiroko Yoshikawa, Nobuhito Ohnuma, Tokyo R&D Co., Ltd., Japan<br>Junichi Murakami, Tohoku Electric Power Co., Inc., Japan. Hideki Mori, Chubu Electric Power Co., Inc., Japan. Shozo Hashizume, The Kansai Electric Power Company Inc., Japan. Kiyomi Yamasaki, Kyusyu Electric Power Co., Inc., Japan |            |
| <b>The Charging Technologies of Electric Vehicles</b>   | <b>192</b> |
| Wenwei Wang, Zu-ming Wang, Nan Tong Zhen Hua Electrical Equipment Corp., Ltd., China  |            |
| <b>Charging gear for EV to work on powered roadway</b>  | <b>193</b> |
| Ling-yuan Tseng, Taiwan Travel Power Corporation  |            |
| <b>Design and Implementation of Energy Recovery Charging Technology for Electric Vehicle Controller</b>   | <b>194</b> |
| Li Kaigui, Wuhan Stand Control Technology Co., Ltd.   |            |

## ***Topic 7: Demonstration, Environmental Impact, Promotion & Marketing***

|   |            |
|---|------------|
| <b>Rental EVs: Expanding the Retail Market</b>  | <b>195</b> |
| Terry O'Day, EV Rental Cars, USA  |            |
| <b>The Green Index Survey: Do Electric Vehicles Contribute to an Automakers Environmental Image</b> | <b>196</b> |

|  |            |
|--|------------|
| Bill Van Amburg, Michael Gage, West Start CALSTART, USA  |            |
| <b>Economic and Efficient Concept to Implement Electric Vehicles in Polluted Cities</b>  | <b>197</b> |
| Klaus Dieter Merz, CMP Batteries Ltd., UK. Graham Burgess, EVIndia, India  |            |
| <b>Promotional Measures in the Mendrisio Project</b>   | <b>198</b> |
