

Proceedings

The 3rd International Symposium on Electromagnetic Processing of Materials

EPM2000

April 3-6, 2000
Nagoya Noh Theater
Nagoya, Japan

 *The Iron and Steel Institute of Japan*

CONTENTS

Plenary Lectures

Technological and Economical Challenges Facing EPM in the Next Century

M. Garnier EPM-MADYLAM, France	3
---	---

Novel Magnetic Field Effects on Non-Magnetic Substances: --- Moses Effect, Magneto-Archimedes Levitation, Magneto-Enhanced Vaporization and Oxygen Dissolution into Water ---

K. Kitazawa, N. Hirota, Y. Ikezoe, H. Uetake The University of Tokyo, Japan	9
--	---

State of Art Electromagnetic Processing in Japanese Iron and Steel Industry

T. Fujii Kawasaki Steel Corporation, Japan	14
---	----

Electromagnetic Casting Technology of Steel

E. Takeuchi, K. Miyazawa Nippon Steel Corporation, Japan	20
---	----

Fundamentals of EPM

The Application of the Electric Sensing Zone to Liquid Metals for the On-Line Detection of Inclusions

R. I. L. Guthrie, M. Li, C. Carrozza McGill University, Canada	31
---	----

Molten Metal Flow Measurement with Circular Cylinder and Hall Element

M. Iguchi*, Y. Terauchi**, H. Kosaka**, K. Nakajima*** * Hokkaido University, ** Heraeus Electronite Japan, *** Tohoku University, Japan	37
---	----

Measuring Techniques for Model Experiments in Liquid Metal Alloys

S. Eckert, G. Gerbeth, W. Witke Forschungszentrum Rossendorf, Germany	43
--	----

Control of Free Surface Shape on a Molten Metal by Synchronous Imposition of a Mechanical Oscillation and Intermittent Alternating Magnetic Field

Y. Chino, K. Iwai, S. Asai Nagoya University, Japan	49
--	----

MHD Instabilities in Liquid Metal

Y. Fautrelle*, A. D. Sneyd** * EPM-MADYLAM, France, ** University of Waikato, New Zealand	55
--	----

Generation of Compression Waves in a Liquid Metal by the Simultaneous Imposition of DC and AC Magnetic Fields

K. Iwai, Q. Wang, T. Momiyama, S. Asai Nagoya University, Japan	61
--	----

Research of the Creation Process of the Modulated Oscillations of Electromagnetic Force and Their Use for Processing Aluminum Alloy

V. I. Dubodelov, V. N. Fixsen, V. K. Pogorsky, A. O. Gorshkov, N. A. Slazhnev
National Academy of Sciences, Ukraine 67

Numerical Computation of Natural and Mixed Convection of Liquid Metal in a Cubical or Cylindrical Enclosure with a Uniform Magnetic Field

H. Ozoe
Kyushu University, Japan 73

A New Stabilized Finite-Element Method for MHD Problems

T. Tanahashi, C.-H. Jung, T. Makihara
Keio University, Japan 79

Modelling Turbulent Flow Dynamics in AC Magnetic Field

V. Bojarevics, K. Pericleous, M. Cross
University of Greenwich, U. K. 85

Mathematical Model for Fluid Flow in a Continuous Casting Mold with Electromagnetic Brake

K. Takatani, Y. Tanizawa, M. Kawamoto
Sumitomo Metal Industries, Ltd., Japan 91

Modeling of Anisotropic Turbulent Transport in Simulations of Liquid Metal Flows in Magnetic Fields

O. Widlund*, G. Tallbäck**
* Royal Institute of Technology, ** ABB Automation Systems AB, Sweden 97

Si Crystal Growth by the Electromagnetic Czochralski Method (EMCZ)

M. Watanabe, M. Eguchi, W. Wang, T. Hibiya
NEC Corporation, Japan 103

Nonlinear Shallow Water Model of the Interfacial Instability in Aluminum Reduction Cells

O. Zikanov*, A. Thess**, P. A. Davidson***, D. P. Ziegler****
* Dresden University of Technology, ** Ilmenau University of Technology, Germany, *** University of Cambridge, U. K.,
**** Alcoa Technical Center, U. S. A. 109

A Contactless Induction Diagnosis Method Used for Real Time Detection of the Semi-Solid Fraction of Inductive Heated Thixotropic Alloys

J.-P. Chaignot*, F. Durand**, R. Ernst**, F. Schlecht**
* CELES, ** EPM-MADYLAM, France 115

Separation of Metal Droplets from a Slag Using an Electric Field

T. Takasu*, H. Itou*, T. Nakamura**
* Kyushu Institute of Technology, ** Tohoku University, Japan 121

The Effect of a Uniform DC Magnetic Field on the Stability of Stratified Liquid Flux/Molten Steel System

P.-R. Cha, J.-K. Yoon
Seoul National University, Korea 127

Magnetic Processing of Biological and Synthetic Polymers and Crystals

J. Torbet*, L. Tranqui**, C. Bureau***
* Laboratoire d'Elaboration par Procédés Magnétiques, ** Laboratoire de Bioénergétique Fondamentale et Appliquée,
*** Laboratoire de Chimie Industrielle, France 133

Imposition of Static Magnetic Field

MHD Damped Buoyant Flow in Horizontally Elongated Enclosures

R. Moreau

EPM-MADYLAM, France 141

Stabilising the Direct Melt Extraction of Intermetallic Fibres by Magnetic Fields

A. Cramer*, G. Gerbeth*, A. Bojarevics**, Y. Gelfgat**

* Forschungszentrum Rossendorf, Germany, ** Institute of Physics, Latvia 147

Three-Dimensional Buoyant Convection in a Rectangular Cavity with Differentially Heated Walls in a Strong Magnetic Field

S. Aleksandrova, S. Molokov

Coventry University, U. K. 153

MHD Control of Convection Applied to the Measurement of Chemical Diffusivities in Liquid Metal

V. Botton, P. Lehmann, R. Bolcato, R. Moreau

EPM-MADYLAM, France 159

Numerical Computation of Natural Convection of Liquid Metal in a Cubic Enclosure on the Effect of Seebeck Convection

M. Kaneda, T. Tagawa, H. Ozoe

Kyushu University, Japan 165

Application of D.C. Magnetic Field to Iron and Steel Making Technologies

S. Takeuchi

Kawasaki Steel Corporation, Japan 171

Development of New EMBR for Reducing the Inclusions in the Fully Curved Type Continuous Casting Machine

M. J. Cho*, S. J. Kim*, I. C. Kim*, J. K. Kim*, D. W. Cha**, J. S. Kim**, J. H. Park**

* RIST, ** POSCO, Korea 176

Modification of a Turbulent Two-Phase Flow by a Magnetic Field as Applied to the Continuous Casting of Steel

H. A. Wouters*, R. P. J. Duursma*, A. A. Kamperman*, W. F. M. Damen**

* Corus Research, ** Corus Strip Products, The Netherlands 182

The Distribution Characteristics of Magnetic Fields and the Behavior of Molten Steel Flow in FC. Mold

J. He*, G. Xu*, J. Wu**, G. Yu*, Y. Zhang*, D. Ding*, G. Jia*

* Northeastern University, ** University of Science and Technology Beijing, China 188

Control of Molten Steel Flow in Mold with Intense Static Magnetic Fields by Using Superconducting Magnets

S. Nara, Y. Kishimoto, N. Bessho, K. Sorimachi

Kawasaki Steel Corporation, Japan 193

Imposition of Alternating Magnetic Field

A 3D Analytical Tool for Design and Optimization of Transverse Flux Induction Heating Systems

M. Battistetti*, F. Colaone*, F. Dughiero**, M. Forzan*, S. Lupi*, S. Ponchiroli*

* Padua University, ** Catania University, Italy 199

Numerical Tools for Optimum Design of Transverse Flux Induction Heating of Non-Ferrous Metal Strip

A. Muhlbauer*, G. Nauvertat*, A. Nikanorov*, S. Lupi**, F. Colaone**, M. Forzan**, S. Ponchiroli**, F. Dughiero***

* Hanover University, Germany, ** Padua University, *** Catania University, Italy 205

Numerical Evaluation and Experimental Validation of Eddy Currents and Electromagnetic Forces in Transverse Flux Induction Heating of Magnetic Steel Sheets Y. Neau*, B. Paya*, T. Tudorache**, V. Fireteanu** * Electricité de France, France, ** Universitatea Politehnica Bucuresti, Romania	211
Induction Heating in the Chemical Industry: an Asset for Chemists, Specially in the Field of High Temperature A. Riou, Y. Wilhelm ASP, France	218
New Generation of Galvanizing Lines Utilizing Induction Heating Technology V. Demidovitch, J. Nelson, E. Blake BRICMONT Inc., U. S. A.	224
Advanced Induction Coils for Heating Steel Plate Products V. Demidovitch*, G. Komrakova**, M. Zlobina**, F. Tchmilenko** * BRICMONT Inc., U. S. A., ** St. Petersburg Electrotechnical University, Russia	230
Effect of Electromagnetic Field on Continuously Cast Steel Billet H. Kim, J.-P. Park, D. J. Sim, H.-T. Jeong, J. Kim Research Institute of Industrial Science & Technology, Korea	236
Twin Roll Casting Parameters that Affect the Operation of an Electromagnetic Edge Dam H. Gerber*, K. Blazek**, Y. Wang**, W. Praeg*** * Purdue University, ** Ispat Inland Inc., *** Retired, U. S. A.	241
Inverse Middle Frequency Electromagnetic Stirring Using the Single Phase Asynchronous Motor Principle Applied on the Cold Crucible Continuous Casting Installations G. Darmon, R. Ernst EPM-MADYLAM, France	247
Electromagnetic Continuous Pulling of Photovoltaic Silicon, Use of Models for the Design and the Process Control P.-J. Ribeyron, A. Gagnoud, R. Ernst, F. Durand EPM-MADYLAM, France	253
MHD-Effects in Silicon Single Crystal Growth from Free Melt Zones P. Dold*, A. Cröll**, K. W. Benz* * University of Freiburg, Germany, ** University of Alabama in Huntsville, U. S. A.	259
Impurity Transport in a Silicon Molten Bath under Electromagnetic Stirring C. Alemany, Y. Delannoy, Y. Fautrelle EPM-MADYLAM, France	265
High Volume Reduction and Group Separation of Simulated Fission Products by Cold Crucible T. Tanaka*, N. Yoshida*, Y. Ikenaga*, M. Horie** * Sumitomo Metal Industries, Ltd., ** Japan Nuclear Cycle Development Institute, Japan	271
Vacuum Melting with Cold Crucible Levitation Melting Furnaces H. Tadano*, K. Kainuma**, T. Take**, T. Shinokura***, S. Hayashi* * Fuji Electric Furnace Co., Ltd., ** Fuji Electric Corporate Research and Development Ltd., *** Fuji Electric Co., Ltd., Japan	277

Numerical Calculations of the Thermal Behaviour and the Melt Flow in Induction Furnace with Cold Crucible F. Bernier, M. Vogt, A. Muehlbauer University of Hanover, Germany	283
Experimental Investigation of Temperature Field and Energy Flows in Induction Furnace with Cold Crucible and a Practical Application of the Results M. Vogt*, F. Bernier*, A. Muehlbauer*, M. Blum**, G. Jarczyk** * University of Hanover, ** ALD Vacuum Technologies GmbH, Germany	289
Some Research on Metallurgical Magnetohydrodynamics at Berkeley J. W. Evans*, R. Kageyama** * University of California, U. S. A., ** Nippon Steel Corporation, Thailand	295
Application of Alternating Magnetic Fields: a Frequency, an Effect Y. Fautrelle EPM-MADYLAM, France	300
A New Composite Processing Technology and a Discussion on Separated Eutectic Phenomena Z. Cao, L. Piao, Z. Li, J. Jin Dalian University of Technology, China	306
Effects of Imposition of Multi-Electromagnetic Field on Quality of Cast Metal in Continuous Casting Z. Zhang*, B. Wen*, T. Li*, J. Jin*, Y. Yu**, Z. Liu**, H. Xu**, Y. Chen** * Dalian University of Technology, ** Shanghai Bao Steel, China	310
Removal of Nonmetallic Inclusion from Liquid Metal by AC-Electromagnetic Force S. Taniguchi, A. Kikuchi Tohoku University, Japan	315
Contribution to Fundamental Study of Metal-Slag Mass Transfer in Ladle Metallurgy M. Burty*, J. M. Galpin*, Y. Fautrelle**, F. Debray*, T. Inomoto***, Y. Ogawa***, T. Toh***, I. Sawada***, K. Harashima*** * IRSID, ** EPM-MADYLAM, France, *** Nippon Steel Corporation, Japan	321
Numerical Modeling of Mold Walls Influence on the Eddy-Current Transducer Characteristics V. Fireteanu, O. Nica Politehnica University of Bucharest, Romania	327
A Numerical Model for Magnetic Fields Calculation for Slab Caster Mould Systems Including a Free Surface J. Li*, H. Yang** * ABB Automation Systems AB, ** Royal Institute of Technology, Sweden	333
The Experimental Study on the Flow Law of Molten Steel in CCM with Two Pairs of Magnetic Poles Y. Zhang, G. Yu, G. Xu, G. Jia, Y. Gao, J. He Northeastern University, China	339
Thermal Electromagnetic Levitation Y. Bayazitoglu, X. Zhong Rice University, U. S. A.	345
Instabilities of Electromagnetically Levitated Bodies and Their Prevention J. Priede* **, G. Gerbeth*, A. Mikelsons**, Y. Gelfgat** * Forschungszentrum Rossendorf, Germany, ** University of Latvia, Latvia	352

Alloying Titanium with Tantalum which has High Melting Point and Great Difference in Specific Gravity, with Cold Crucible Levitation Melting (CCLM)

A. Morita*, H. Fukui**, J. Hasegawa**, S. Hayashi*

* Fuji Electric Furnace Co., Ltd., ** Aichi-Gakuin University, Japan 358

Reaction between Molten Metal and Flux in a Cold Crucible (Dephosphorization of Molten Stainless Steel by a Reducing Reaction)

Y. Kobayashi*, K. Sakuraya*, T. Watanabe**, S. Iwasaki*, A. Fukuzawa*

* National Research Institute for Metals, ** Fuji Electric Furnace Co., Ltd., Japan 364

Optimized Magnetic Levitation with Minimum Power Dissipation

D. Batic*, R. Clemente**, M. Tessarotto***

* Rossendorf Research Center, Germany, ** UNICAMP, Brazil, *** University of Trieste, Italy 370

Outline of National Project on Application of Electromagnetic Force to Continuous Casting of Steel

K. Ayata*, K. Miyazawa*, E. Takeuchi*, N. Bessho*, H. Mori**, H. Tozawa**

* Planning Committee of EMC National Project, ** The Japan Research and Development Center for Metals, Japan 376

The Control of Initial Solidification by the Imposition of Pulsative AC Electromagnetic Field

M. Tani, K. Shio, K. Wajima, E. Takeuchi, J. Tanaka, K. Miyazawa

Nippon Steel Corporation, Japan 381

Surface Quality of Cast Ingot and Mold Friction Behavior in Continuous Casting Process with Electromagnetic Oscillation Method

M. Nakada, H. Shimizu, I. Sumi, K. Murakami

NKK Corporation, Japan 385

Newly Designed Stiff EMC Mold with Imposition of Super-High Frequency Electromagnetic Field

N. Yoshida, S. Furuhashi, T. Tanaka

Sumitomo Metal Industries, Ltd., Japan 388

Improvement of Billet Surface Quality by Ultra-High-Frequency EMC

T. Inoue, H. Nakata, K. Ayata, S. Ishiguro

Kobe Steel, Ltd., Japan 392

Research on the Magnetic Field Analysis of the Mold for Electromagnetic Casting

M. Fukuda, H. Satoh, D. Itoh

Mitsubishi Steel Mfg. Co., Ltd., Japan 396

The Slit-Less Mold with the Composite Material for the Electromagnetic Casting

T. Suzuki, T. Shibata, H. Mori

Daido Steel Co., Ltd., Japan 402

Imposition of Traveling Magnetic Field

Application of Travelling Magnetic Fields in Metallurgy

K.-H. Spitzer, O. Pesteanu

Technische Universität Clausthal, Germany 409

Edge Effect Asynchronous Stirrer and Meniscus Disturbance by Billet Casting

V. Buryak, Anastasia Kolesnichenko, Anatoly Kolesnichenko, S. Zhuravytska

Net Shape Cast (Ukraine) Ltd., Ukraine 415

A Comparison of Electromagnetic Actuator Efficiencies for Cleanliness in a Steel CC Mould by Means of Numerical Simulations	
P. Gardin, J.-F. Domgin, M. Anderhuber, J.-M. Galpin, J.-Y. Lamant IRSID, France	422
3-D MHD Calculation in Consideration of Free Surface, Heat Transfer and Solidification	
K. Fujisaki Nippon Steel Corporation, Japan	428
MHD Seal for Hot Dip Galvanizing Process	
A. Shishko*, J. Valdmans*, A. Krauze*, Y. W. Cho** * Latvian University, Latvia, ** Korea Institute of Science and Technology, Korea	434
Effect of Electromagnetic Centrifugal Processing on the Structure and Mechanical Properties of the Alloys	
Y. Qiu, G. Jia, Y. Zhang, G. Zhang, G. Chen, Y. Gao, J. He Northeastern University, China	440
Free Surface Shape, Fluid Flow and Crystallization of Thixotropic Aluminum Alloy Slurries and Composites in the Presence of Contra-Rotating Magnetic Fields	
C. Vivès RETIRED, France	445
Effect of an AC Travelling Field on Medium Scale Segregation, Some Results of a Numerical Model	
M. Medina**, Y. Du Terrail*, F. Durand*, Y. Fautrelle* * EPM-MADYLAM, France, ** Universidad Nacional de Rosario, Argentina	451
Numerical Analysis of Fluid Flow and Solidification in DC Casting of Aluminum Alloys under Travelling Magnetic Field	
S.-H. Chung, H.-P. Ha, J. Y. Byun, Y. W. Cho, Y. J. Oh, J.-D. Shim Korea Institute of Science and Technology, Korea	457
Magnetothermal FEM Simulation on Scanning Induction Hardening of Cylindrical Steel Workpiece	
S. T. Hagen*, J. I. Asperheim**, L. Markegård** * Telemark College, ** EFD Elva Induksjon as, Norway	463
Electromagnetic Control of Melt Flow in Electron Beam Evaporation: Part 1: Experimental Investigations	
Y. Kolesnikov*, O. Andreev*, R. Schaller**, B. Scheffel***, A. Thess**** * Institute of Physics, Latvia, ** Dresden University of Technology, *** Fraunhofer Institute for Electron Beam and Plasma Technology, **** Ilmenau University of Technology, Germany	469
Electromagnetic Control of Melt Flow in Electron Beam Evaporation Part 2: Numerical Simulations	
C. Karcher, U. Luedtke, D. Schulze, A. Thess Ilmenau University of Technology, Germany	473
Electromagnetic Stirring of Molten Steel Using Upper Side Coil of a Ladle	
M. Hisatani*, F. Matsuura*, H. Imajou*, K. Marukawa**, K. Takatani** * Mitsui Engineering & Shipbuilding Co., Ltd., ** Sumitomo Metal Industries, Ltd., Japan	479
3D Parameterized Magneto-Thermal Simulations for Modular Induction Heating Devices	
Y. Du Terrail Couvat*, M. Garnier*, C. Allemann** * EPM-MADYLAM, ** ACES Company, France	485

Axial Driving Force Induced by Rotating Twisted Magnetic Field

K. Ueno, T. Ando, S. Taniguchi, T. Takagi

Tohoku University, Japan 491

Systematic Study of Buoyant Flows in Vertical Melt Cylinders under the Influence of Rotating Magnetic Fields

B. Fischer*, J. Friedrich**, U. Hilburger*, G. Müller*

* University of Erlangen-Nürnberg, ** Fraunhofer Institute for Integrated Circuits, Germany 497

Simultaneous Imposition of Electric and Magnetic Fields

Simultaneous Imposition of Magnetic and Electric Field of the Metallurgy Technologies

Anatoly Kolesnichenko

Net Shape Cast (Ukraine) Ltd., Ukraine 505

Effect of Crossed Electric and Magnetic Fields on Metals Recovery from Slags

A. Warczok*, G. Riveros*, R. Fuentes**, A. Alvarez**

* Universidad de Chile, ** Instituto de Innovación en Minería y Metalurgia S. A., Chile 512

Effect of Electromagnetic Force on Solidification Structure

T. Kozuka, M. Kawahara

Kumamoto University, Japan 519

Lifting of Liquid Metal Upward by Twin Roll Strip Casting

Anatoly Kolesnichenko, Anastasia Kolesnichenko, S. Zhuravytska, V. Buryak, S. Prymak, A. Shevchenko,
O. Shevchenko

Net Shape Cast (Ukraine) Ltd., Ukraine 525

Mathematical Modelling and Experimental Model Validation for a DC Electromagnetic Valve for Liquid Steel

A. Codutti*, A. Martinis*, M. Pavlicevic*, M. Tessarotto**, D. Batic**

* Danieli & C., ** University of Trieste, Italy 530

Efficient Electromagnetic Device for the Control of Liquid Steel Movement inside the DC Electric Arc Furnace

M. Pavlicevic*, A. Poloni*, A. F. Kolesnichenko**, C. Bassi*, A. Codutti*

* Danieli & C., Italy, ** Net Shape Cast (Ukraine) Ltd., Ukraine 536

Investigation of Turbulent MHD Flow in Hydraulic Branching under the Simultaneous Action of Alternating Electric and Magnetic Fields

V. Dubodelov, A. Podoltsev, I. Kucheryavaya, V. Seredenko, A. Gorshkov

National Academy of Sciences, Ukraine 542

Effect of DC Electric Field Annealing on Recrystallization and Recrystallization Texture of a Cold-Rolled Copper

Y. Wang, C. He, X. Zhao, L. Zuo, Z. Liang, J. He

Northeastern University, China 548

Effects of the Simultaneous Imposition of Alternating Electric and Stationary Magnetic Fields on the Microstructure of Al-Si Alloys

A. Radjai*, K. Miwa**

* Japan Science and Technology Corporation, ** National Industrial Research Institute of Nagoya, Japan 553

Application of Magnetization (Magnetic) Force

Magnetic Processing of Nonconducting Material - Use of Upward Magnetization Forces -

- N. I. Wakayama, J. Qi
National Institute of Materials & Chemical Research, Japan 561

Magnetic Control of Diffusion Flames

- C. Ducruet, P. Gillon
EPM-MADYLAM, France 567

Magneto electropolymerization of a Conducting Polymer

- I. Mogi, K. Watanabe, M. Motokawa
Tohoku University, Japan 573

Electrodeposition of Copper under Magnetic Field

- Y. Fukunaka*, Y. Tanaka*, E. Kusaka*, R. Ishii*, I. Mogi**
* Kyoto University, ** Tohoku University, Japan 578

Martensitic Transformations in Some Ferrous and Non-Ferrous Alloys under High Magnetic Field

- T. Kakeshita, T. Fukuda
Osaka University, Japan 584

Electroplastic Effect of the Stainless Steel Wire during Different Drawing Velocities

- G. Tang* **, J. Zhang*, W. Fang*, W. Sprengel**
* Tsinghua University, China, ** Stuttgart University, Germany 590

Diffusional Transformation Behavior and Structure in High Magnetic Field

- H. Ohtsuka*, Y. Xu*, J.-K. Choi**, Y. Oishi***, T. Murai***, H. Wada*
* National Research Institute for Metals, Japan, ** Pohang Iron & Steel Co., Ltd., Korea,
*** Sumitomo Electronic Industries, Ltd., Japan 596

Strengthening of Carbon Steels by Means of Magnetic Patenting

- M. Shimotomai, K. Maruta
Kawasaki Steel Corporation, Japan 600

Effect of a Pulsed Magnetic Treatment on the Dislocation Substructure of a Commercial High Strength Steel

- G. Tang, A. Lu, X. Chen, H. Zhou, F. Tang
Tsinghua University, China 606

Orientation and Levitation Effects in High Magnetic Fields and Their Applications to Material Synthesis

- M. Motokawa
Tohoku University, Japan 612

Advances in Superconducting Magnets for Materials Processing

- J. W. Burgoyne
Oxford Instruments, U. K. 618

Crystal Orientation in Electrodeposition, Vapordeposition and Solid Reaction Processes by Imposition of a High Magnetic Field

- S. Asai*, K. Sassa*, M. Ito*, M. Tahashi*, T. Taniguchi*, T. Yamada**
* Nagoya University, ** Nagoya Municipal Industrial Research Institute, Japan 624

Physical Vapor Deposition in a High Magnetic Field

S. Mitani* **, H. L. Bai**, Z. J. Wang**, H. Fujimori**, M. Motokawa* **

* CREST, ** Tohoku University, Japan 630

Processing of Materials with High D.C. Magnetic Field Gradients: Basic Ideas and Developing Applications

P. Gillon

EPM-MADYLAM, France 635

Melt-Growth Process of $YBa_2Cu_3O_7$ Bulk in High Magnetic Fields

S. Awaji*, K. Watanabe*, M. Motokawa*, A. Kuramochi*, T. Fukase*, K. Kimura**

* Tohoku University, ** Nippon Steel Corporation, Japan 641

Processing for Aligned Structure by a Magnetic Field

H. Yasuda*, I. Ohnaka*, K. Shimamura**, T. Fukuda**, K. Watanabe**

* Osaka University, ** Tohoku University, Japan 647

Magnetic Separation of Inclusions in a Molten Metal by Using a High Magnetic Field

K. Sassa, N. Waki, S. Asai

Nagoya University, Japan 653
