

INTERNATIONAL WORKSHOP ON COMPACTION OF SOILS, GRANULATES AND  
POWDERS / INNSBRUCK / 28-29 FEBRUARY 2000

# Compaction of Soils, Granulates and Powders

*Edited by*

**D. KOLYMBAS & W. FELLIN**

*University of Innsbruck, Institute of Geotechnics and Tunnelling*

**A.A. BALKEMA/ROTTERDAM/BROOKFIELD/2000**

# Table of contents

Preface	IX
<b>1 Practical applications in engineering</b>	
Newest innovations into soil and asphalt compaction technology <i>R. Floss &amp; H.-J. Kloubert</i>	3
Soil improvement by vibro compaction in sandy gravel for ground water reduction <i>N. Sidak</i>	23
The in-situ densification of granular infill within two cofferdams for seismic resistance <i>B.C. Slocombe, A.L. Bell &amp; R.E. May</i>	33
Vibro compaction for the lock Hohenwarthe <i>P. Scheller</i>	43
<b>2 Verification of compaction</b>	
Field tests before and after blasting compaction <i>R. Cudmani &amp; G. Huber</i>	55
Dynamic testing methods for the stiffness of compacted pavement <i>E. Maranini, G. Masé, G. Andrighetti, A. Zecchi &amp; V. Fioravante</i>	77
Compaction control of a soil improvement with powder columns <i>W. Wehr &amp; J. Berg</i>	91
Compaction control with a dynamic cone penetrometer <i>L. Chaigneau, R. Gourves &amp; D. Boissier</i>	103

### 3 On-line compaction control

- Sophisticated roller compaction technologies and roller-integrated compaction control 113  
*D. Adam & F. Kopf*
- Quality control in deep vibrocompaction 133  
*W. Fellin*

### 4 Quasi static experimental investigations, cyclic loading

- Material fabric and mechanical properties after compaction for unbounded granular materials 147  
*G. Gidel, D. Breysse, A. Denis & J.-J. Chauvin*
- Soil compaction by kneading: Comparison of existing methods and proposal of a new laboratory test 159  
*H. Girard, D. Breysse, R. Fabre, P. Kouassi & D. Poulain*
- Soil compaction by cyclic loading: Ins and outs 175  
*A. Vuez, C. Lanos & A. Rahal*
- Interpretation method of compaction test results on powders 187  
*C. Lanos & A. Vuez*

### 5 Dynamic experimental investigations

- Densification of bulk materials in process engineering 199  
*R. Linemann, J. Runge, M. Sommerfeld & U. Weißgüttel*
- Compaction of loose flooded granular masses using air pulses 207  
*N. Pralle & G. Gudehus*

### 6 Theoretical approaches

- Compaction dynamics of tapped granular matter: A mean field model and its Langevin extension 235  
*A. Döhle & S.J. Linz*
- A minimal model for slow dynamics: Compaction of granular media under vibration or shear 241  
*S. Luding, M. Nicolas & O. Pouliquen*

## 7 Numerical investigations: Distinct element models, lattice models

DEM simulations of uniaxial compression and decompression 251

*C. Thornton & L. Liu*

Generation and effects of different compacted granular materials within the DEM 263

*M. Herten*

Slow relaxation in a diffusional model for granular compaction 275

*M.J. de Oliveira & A. Petri*

## 8 Numerical investigations: Continuum models

Influence of pressure level and stress amplitude on the compaction of granular soils 285

*I. Herle*

Settlement of liquefied sand after a strong earthquake 297

*V.A. Osinov & I. Loukachev*

Numerical analysis of a dynamic intensive compaction 307

*K. Nübel, A. Schünemann & S. Augustin*

## Late paper

Experimental investigation of blasting compaction of a cohesionless pit mine fill 319

*G. Huber & R. Cudmani*
