

ELEVENTH INTERNATIONAL CONFERENCE ON  
COMPUTATIONAL METHODS AND EXPERIMENTAL MEASUREMENTS

**CMEM XI**

**CONFERENCE CHAIRMEN**

**C.A. Brebbia**

*Wessex Institute of Technology, UK*

**G.M. Carlomagno**

*University of Naples, Italy*

**P. Anagnostopoulos**

*University of Thessaloniki, Greece*

**INTERNATIONAL SCIENTIFIC ADVISORY COMMITTEE**

J Antunes	M Rahman
G C Beolchini	E R Real
C Cali	H Sakamoto
R Carneiro-Barros	M G Satish
R Cerny	F Seiler
W P De Wilde	M Skrinar
J Degrieck	J Srulijes
L Fryba	P Stroeven
W Graf	G Szwengier
V Kozak	K Takayama
J Naprstek	Z Wisniewski
Y Noguchi	

**Organised by**

*Wessex Institute of Technology, UK,  
University of Naples, Italy  
and  
University of Thessaloniki, Greece*

# Contents

## Section 1: Computational and analytical methods

Dynamical analysis of frame type structures with local stiffness reductions by a new finite element based on the dynamic stiffness and mass matrices <i>M. Skrinar</i> .....	3
Consideration of plastic flow near the contact surface of rotating disks under a large pressure <i>T. Sawada &amp; K. Kurokawa</i> .....	13
Numerical and experimental analysis of bulk forming processes <i>M.L. Alves, J.M.C. Rodrigues &amp; P.A.F. Martins</i> .....	23
Sensitivity analysis and optimisation of thermo-elasto-plastic process with applications to welding side heater design <i>P. Michaleris &amp; J. Song</i> .....	33
A simulation of bending by the rigid-plastic hybrid element method <i>Y.-M. Guo &amp; K. Nakanishi</i> .....	43
Soil nonlinear stiffness for SSI involving embedded foundations <i>P. Carrubba, M.R. Massimino &amp; M. Maugeri</i> .....	53
Modelling the viscosity of natural gas mixtures <i>A. Miadonye &amp; W. Clyburn</i> .....	63
Model-based optimisation of gas turbine maintenance <i>J. Kaikko &amp; P. Sarkomaa</i> .....	75
Decision making in mining operations – inaccurate timely data, accurate tardy data <i>J.E. Everett</i> .....	87

## Section 2: Computer interaction and control of experiments

Interaction of experimental and modelling procedure to improve the fatigue behaviour of a metal matrix composite <i>J.M. Hausmann, C. Leyens &amp; W.A. Kaysser</i> .....	99
Computational and experimental process control by combining neurofuzzy approximation with multicriteria optimization <i>A.F. Batzias &amp; F.A. Batzias</i> .....	107
Overshooting error in inelastic pseudodynamic tests on stiff specimens <i>F. Colangelo</i> .....	119
A computer aided optical technique for creep strain determination <i>K. Zarrabi &amp; Z. Lu</i> .....	129
Integration of computer model of drug delivery with human subject testing <i>T. Martonen, D. Hwang &amp; J. Fleming</i> .....	135
A computer model for the interpretation of soil resistivity measurement data collected in the vicinity of grounding systems <i>B. Handziski, V. Handziski, V. Dimcev &amp; P. Vrangalov</i> .....	147

## Section 3: Damage mechanics

Crack growth under general load spectrum: numerical simulation and experimental tests <i>C. Cali, R. Citarella &amp; M. Perrella</i> .....	159
Wrinkling modes of sheet metal during press forming measured by optical reflection of grating <i>M. Sakamoto &amp; T. Sawada</i> .....	171
Ultrasonic method of non-destructive testing: quantification, application and computer simulation <i>A.B. Aliyu</i> .....	181
Honeycombs onset of failure and failure processes under in-plane loading <i>C. Cali, G. Cricri &amp; M. Perrella</i> .....	191
Finite element analysis of crack growth from a rectangular notch in mixed mode loading <i>M.R.M. Zin &amp; A.K.A. Ihsan</i> .....	205

Noise diagnostics of a single-stage gear unit <i>A. Belšak, M. Ploj &amp; B. Aberšek</i> .....	211
---	-----

A computational model for residual life assessment of dents generated by explosive loads in pipelines <i>J. Useche &amp; J. Gomez</i> .....	221
--	-----

Sensitivity of a stress measurement method for copper electroplating using the effects of stress concentration <i>S.J. Kwon, T. Kinji, K. Ogawa &amp; T. Shoji</i> .....	231
---	-----

Spall strength and flow stress – the dependence of strain-rate and temperature <i>H. Xiaomian &amp; S. Chengqin</i> .....	241
--	-----

## Section 4: Data acquisition and processing

Data acquisition and management system for environmental monitoring data <i>H.T. Hsieh, Y. Chen, D. Pepper, L. Sun &amp; S. Lei</i> .....	249
--	-----

Conversion of time-sampled data of track irregularity to distance-sampled data by dynamic programming based elastic matching <i>A. Yoshimura, A. Furukawa &amp; M. Kamiyama</i> .....	255
--	-----

Multimedia presentation and interactive interrogation of reverse roller-coating data <i>I. Deliyannis, J. Harvey &amp; M.F. Webster</i> .....	265
--	-----

A content-addressing memory (CAM) architecture and its reasoning algorithm <i>F. Wang &amp; N. Helian</i> .....	275
--	-----

HPC application services providing portal <i>Y.L. Li, B.T. Cheok &amp; S.K. Chin</i> .....	287
---	-----

## Section 5: Dynamics and vibrations

Vertical accelerations of bridges – a new limit state <i>L. Frýba</i> .....	299
--	-----

Dynamic SSI investigation in the frequency-domain on a scaled steel frame by shaking table tests <i>M. Maugeri &amp; D. Novità</i> .....	309
---	-----

Numerical experiment on influence of resonance on seismic response of buildings with low damping <i>P. Papadopoulos, P. Lazaridis &amp; A. Tassopoulos</i> .....	321
Identification of imperfections of building structures by dynamic response <i>M. Pirner, L. Frýba &amp; Sh. Urushadze</i> .....	333
Simulation of the vibrations produced during the rock excavation by different methods <i>J. Toraño &amp; R. Rodríguez</i> .....	343
Simulation and testing of the Silicon Tracker dynamic behaviour in the Agile space mission <i>E. Rotta, C. Pontoni &amp; M. Prest</i> .....	351
Chaotic and multiple periodic vibrations due to clearance <i>Z. Hossain</i> .....	361
Nonlinear simulation of acoustic waves in thermoacoustic resonator <i>N. Mohd-Ghazali &amp; J.P. McHugh</i> .....	371
High frequency modelling of porcine brain tissue <i>S. Nicolle, R. Willinger &amp; L. Mourad</i> .....	381
Nonlinear dynamics and playability of bowed instruments: from the bowed string to the bowed bar <i>O. Inácio, L. Henrique &amp; J. Antunes</i> .....	391
<b>Section 6: Electrical and electromagnetic applications</b>	
Electromagnetic forming of thin steel beverage cans <i>T.E. Manea &amp; M.D. Verweij</i> .....	403
New approach to electromagnetic field calculations in the near-field of microwave antennas <i>R. Kubacki, M. Wnuk, W. Kolosowski &amp; J. Sobiech</i> .....	413
<b>Section 7: Fluid mechanics</b>	
Finite length bearings and squeeze-film dampers: A two-dimensional dynamical solution <i>J. Antunes, M. Moreira &amp; P. Piteau</i> .....	425

An experimental study on the flow within two disks <i>P. Tsifourdaris, G.H. Vatistas &amp; W. Ghaly</i> .....	435
Hydrodynamic analysis of non-Newtonian fluid flow between two eccentric rotating cylinders <i>S.A. Gandjalikhan Nassab</i> .....	445
Numerical study of oscillatory flow past two cylinders in oblique arrangement <i>P. Anagnostopoulos, A. Koutras &amp; S. Seitanis</i> .....	455
Investigation of vortex shedding in transitional separating-reattaching flow on a blunt plate <i>I.E. Abdalla &amp; Z. Yang</i> .....	465
Simulation of two-phase flow of hydrogen at cryogenic conditions <i>O. Schmidtke, A. Sutiono, M. Herr &amp; J. Hapke</i> .....	475
Attenuation of shocked gas flow by porous medium <i>K. Kitagawa, M. Yokoyama, M. Kainuma, H. Ojima, K. Takayama &amp; M. Yasuhara</i> .....	485
Dynamics of interfacial and surface waves in a layered fluid <i>M. La Rocca, G. Sciortino, M.A. Boniforti &amp; M. Moroni</i> .....	495
Numerical simulation of shock mach effect on normal shock/homogeneous turbulence interaction <i>M.A. Jinnah &amp; K. Takayama</i> .....	505
Numerical simulations and experimental investigations of an offset strip fin compact heat exchanger <i>F. Michel, P. Tochon, Ph. Marty &amp; J.B. Lopez-Velasco</i> .....	517
An object oriented finite volume code for multithreaded computations of 3-D viscous flows on unstructured grids <i>V. Botte, F.E Corcione, M. Costa, F.M. Denaro &amp; G. De Stafano</i> .....	527
Two dimensional lagrangian simulations of the free surface motion in a periodic domain <i>G. Riccardi &amp; C. Golia</i> .....	537
Progress on the development of B-spline collocation for the solution of differential model equations: a novel algorithm for adaptive knot insertion <i>R.W. Johnson</i> .....	547

Cartesian grid methods for simulating flows with moving boundaries <i>R. Mittal, C. Bonilla &amp; H.S. Udaykumar</i> .....	557
Three-dimensional CFD modelling of blood flow through asymmetric stenosis <i>Y. Noguchi &amp; M.I. Wishah</i> .....	567
Image-based diagnostics for flow field characterization <i>G. Papadopoulos &amp; F. Guillard</i> .....	575
Two-dimensional correction of data measured using a large pressure sensor <i>M. Pohanka</i> .....	587
Study of pressure fluctuations generated by an expansion <i>A. Hammi</i> .....	597

### Section 8: Structural and stress analysis

Models and experiments concerning structures with multi-directional, multi-layered textile strengthening <i>W. Graf, B. Möller, A. Hoffmann &amp; F. Steinigen</i> .....	611
Reliability of notched composite laminates using a combined experimental investigation and stochastic finite element analysis methodology <i>R. Ganesan &amp; S.M. Venugopal</i> .....	621
Analysis and testing of composite wood-concrete floor/deck systems <i>R. Gutkowski, J. Balogh, M. Wieligmann, C. Rogers &amp; P. Haller</i> .....	631
The design of the composite end closures for an autonomous underwater vehicle <i>V. Antonelli &amp; O. Bergsma</i> .....	641
A new finite element for generalized in-plane pipe loading. Experimental and numerical comparison <i>E. Fonseca, C. Oliveira, F. Melo &amp; P. Piloto</i> .....	651
Shear behaviour of stainless steel plated girders with rigid and non-rigid end post – An experimental and numerical investigation <i>I. Estrada, E. Real &amp; E. Mirambell</i> .....	661

### Section 9: Thermal processes

Topography of laminar and oscillatory thermal and thermocapillary convection in a Czochralski process <i>J.A. Szymczyk, J. Aleksic &amp; P.Ch. Zielke</i> .....	673
Experimental and numerical investigation on semi-crystalline polymer behaviour in transient cooling processes <i>G.C. Alfonso, M. Cartesegna &amp; L.A. Tagliafico</i> .....	681
An improved algorithm for thermal dynamic simulation of walls using Z-transform coefficients <i>G. Beccali, M. Cellura, V. Lo Brano &amp; A. Orioli</i> .....	691
The effect of non-uniform gravity on mixed convection along a vertical surface <i>A. Postelnicu</i> .....	701
3-D modeling of ignition and combustion processes in combustion chamber of automobile airbag <i>A. Rychkov, N. Shokina &amp; H. Miloshevich</i> .....	711
The numerical and experimental investigation of a concasting process <i>J. Stetina, F. Kavicka, K. Stransky, J. Dobrovsk &amp; J. Heger</i> .....	721
Experimental and numerical estimation of gun barrel heating for rapid fire <i>F. Seiler, G. Mathieu, H. Peter &amp; K. Zimmermann</i> .....	731
The effect of LITS on concrete indirect tension <i>H.P. Caraslindas &amp; R.C. Barros</i> .....	741
<b>Index of authors</b> .....	751
