

Martin Rosner

**Boron as
a tracer for material transfer in
subduction zones**

Dissertation
zur Erlangung des akademischen Grades
Doktor der Naturwissenschaften
- Dr. rer. nat. -
eingereicht an der
Mathematisch- Naturwissenschaftlichen Fakultät
der Universität Potsdam

Januar 2003

Scientific Technical Report STR04/09

Table of contents

ERWEITERTE ZUSAMMENFASSUNG	1
CHAPTER I - Methodology of boron isotope and concentration analyses	
I.1 Introduction	7
I.2 Reagents and laboratory equipment	10
I.3 Boron concentration analyses	11
I.4 Methods of boron isotope analysis	12
I.4.1 Mass spectrometric methods	12
I.4.1.1 Thermal ionisation mass spectrometry (TIMS)	13
I.4.1.1.1 PTIMS: The Cs_2BO_2^+ -graphite method	13
I.4.1.1.2 NTIMS: The BO_2^- method	14
I.4.1.2 MC-ICP-MS and SIMS	14
I.5. Sample preparation	15
I.5.1 Dissolution methods	15
I.5.1.1 Carbonate fusion	16
I.5.1.2 Acid attack	16
I.5.2. Boron separation by ion exchange chromatography	17
I.5.2.1 Ion exchange chromatography after alkaline fusion	19
I.5.2.1.1 Purification after K_2CO_3 fusion (first separation step)	19
I.5.2.1.2 Removal of major cations (second separation step)	20
I.5.2.1.3 Purification of boron (third separation step)	21
I.5.2.2 Ion exchange chromatography after HF attack	22
I.6 Loading techniques for TIMS	22
I.7 Mass spectrometry and data reduction	24
I.7.1 PTIMS measuring procedure and data reduction	24
I.7.2 NTIMS measuring procedure and data reduction	26
I.8 Analytical boron blank	28
I.8.1 NIST SRM 952 as the spike material	28
I.8.2 Air-derived boron-blank	30
I.8.3 Reagent blanks	32
I.8.4 PTIMS loading blank	33
I.8.5 PTIMS procedure blanks	33
I.8.6 Overall blank effect on the "true" $\delta^{11}\text{B}$ value of a sample	35
I.9 Summary of new methodological developments	36

CHAPTER II - Boron isotopic composition and concentration of ten geological reference materials

II Abstract	38
II.1 Introduction	38
II.2 Samples	40
II.3 Analytical methods	41
II.3.1 Boron concentration analyses	41
II.3.2 Boron isotope analyses	41
II.3.2.1 PTIMS: The Cs_2BO_2^+ -graphite method	41
II.3.2.2 NTIMS: The BO_2^- method	42
II.3.3 Boron blank	42
II.4 Results and discussion	43
I.4.1 Boron concentrations	43
I.4.2 Boron isotopic compositions	44
I.4.2.1 NIST SRM 951	44
I.4.2.2 Influence of chemical separation	45
I.4.2.3 Silicate reference material	47
I.5 Conclusions and recommended values	51

CHAPTER III - Slab-derived boron isotope signatures in arc volcanic rocks from the Central Andes and evidence for boron isotope fractionation during progressive slab dehydration

III Abstract	53
III.1 Introduction	54
III.2 Geological setting	54
III.3 Boron behavior in subduction zone processes	57
III.4 Samples and analytical methods	59
III.5 Results	61
III.6 Discussion	68
III.6.1 Boron sources in CVZ magmas	68
III.6.2 B-isotope fractionation, crustal contamination and the across-arc $\delta^{11}\text{B}$ variation	72
III.6.3 Coupled B, Sr and Nd mixing models	77
III.7 Conclusions	81
