

**PROCEEDINGS OF
THE 8th ESAFORM CONFERENCE ON MATERIAL FORMING
„ESAFORM 2005”**

Volume II

Editor:

Prof. Dorel BANABIC

TIB/UB Hannover 89
126 679 487

VOLUME II

Extrusion and drawing technologies and modelling

FP007 (Keynote paper)	Fast Material Forming N.D. Cristescu	541
FP185 (Keynote paper)	Measurement of Temperature and Pressure During Thin-Strip Extrusion W. Wajda, P.T. Moe, S. Støren, M. Lefstad, R. Flatval	545
FP001	Effect of Strain-Hardening Exponent on the Occurrence of Central Burst in Aluminum Wire Drawing Process S.M. Koohpayeh, A. Karimi Taheri	549
FP044	An Innovative Experimental Procedure To Investigate Seam Welding In Aluminum Extruded Profiles A. Ghiotti, S. Bruschi, T. Dal Negro	553
FP080	Flash Formation In Conform Extrusion T. Manninen, P. Ramsay, A. S. Korhonen	557
FP124	3D FEM Analysis of Seam Welds Formation in Aluminum Extrusion and Product Characterization L. Donati, L. Tomesani	561
FP155	An Upper Bound Analysis of Forward Extrusion through Rotating Dies X. Ma, M.R. Barnett	565
FP208	Development of a Laboratory Hot Extrusion Apparatus for Tribology and Rheology Parameters Identification R.E. Logé, M. Minvielle, E. Cini, A. Le Floc'h, E. Felder	569
FP008	Finite-Element Modelling of Hydrostatic Extrusion of Magnesium G. Barton, R. Kopp	573
FP230	An Experimental and Numerical Study of Induction Heating P.T. Moe, W. Wajda, S. Støren, M. Lefstad, R. Flatval	577
FP277	Radial Gear Extrusion Modeling: Analytical, Numerical and Experimental Approach P. Skakun, M. Skunca, M. Plancak	581

Superplastic forming of aluminium and magnesium alloys

FP047 (Keynote paper)	Optimum Variable Strain Rate Deformation Paths for Superplastic Forming of AA5083 using Multiscale Stability Criterion N. Thuramalla, M. K. Khraisheh	587
FP017	Finite Element Simulation of Warm Deep Drawing of Magnesium Alloy AZ31 Sheet H. Takuda, T. Morishita	591
FP035	Superplastic Response in Coarse-Grained Al-Mg Alloys A.R. Chezan, W.A. Soer, J.Th.M. De Hosson	595
FP059	Microstructural Evolution During Superplastic Forming of Coarse-Grained Al-Mg Alloys W.A. Soer, A.R. Chezan, J.Th.M. De Hosson	599
FP061	A Unified Interpretation of Hubble Flow, Plastic Flow and Super Plastic Flow J. D. Muñoz-Andrade	603
FP068	Hot Deformation Characteristics of AZ31 Magnesium Alloys S.M. Fatemi-Varzanch, A. Zarci-Hanzaki, A. Araic	607
FP070	AA5083-SPF: From Bulge-Testing to Automotive Body Parts Forming M. Vulcan	611
FP077	Tensile Ductility of Aluminium-Magnesium Alloys Sheets at Elevated Temperatures D. Glišić, M. Popović, E. Romhanji	615
FP149	High Temperature Characterization of a 2024 Aluminium Alloy by Tensile Tests and the Blow Forming Technique D. Sorgente, L. Tricarico	619
FP043	On the Failure of Superplastic PbSn60 Alloy in Biaxial Tension Tests G.Giuliano, L. Carrino and S.Franchitti	623
FP046	Deformation Characteristics of AZ31 Magnesium Alloy under Various Forming Temperatures and Strain Rates F. K. Abu-Farha, M. K. Khraisheh	627
FP192	Aspects Concerning Superplastic Behaviour of Some Aluminum Alloys A. - L. Rus, T. Canta, D. Frunza	631

Nanostructuring metals by severe plastic deformation

FP050 (Keynote paper)	3D-ECAP of Square Aluminium Billets A. Rosochowski, L. Olejnik, M. Richert	637
--------------------------	---	-----

FP052	Effect Of The Strain Inhomogeneity On The Microstructure Evolution During Bidirectional Compression Of IF Steel Using MaxStrain Technology	641
	R. Kuziak, V. Podvysockyy, M. Pietrzyk, D. Ferguson	
FP060	Experimental and Numerical Investigation of Equal Channel Angular Pressing of 1230 aluminium alloy	645
	D.A. Gnevashev, P.A. Petrov, M.A. Petrov, S.A. Stebunov	
FP107	Ultrafine Recrystallized Grains by Severe Shear Deformation During Hot Rolling of β -Titanium Alloy	649
	T. Sakai, K. Nakamura, Y. Saito	
FP249	The Influence of the ECAP Temperature on Superplasticity of Aluminium Alloys	653
	R.K. Islamgaliev, N.F. Yunusova, R.Z. Valiev	
FP250	Processing of Ultrafine-Grained Structure in the Ti-6Al-4V Alloy by Severe Plastic Deformation	657
	I.P. Semenova, L.R. Saitova, G.I. Raab, R.Z. Valiev	
FP251	Nanostructuring of Ti in Long-Sized Ti Rods by Severe Plastic Deformation	661
	G.H. Salimgareeva, I.P. Semenova, V.V. Latysh, R.Z. Valiev	
FP240	The Influence of the ECAP Temperature on Microstructure and Mechanical Properties of a Magnesium Alloy	665
	O.B. Kulyasova, R.K. Islamgaliev	

Rapid prototyping and rapid tooling

FP289 (Keynote paper)	Initial Experimental and Numerical Investigations into a Class of new Strategies for Single Point Incremental Sheet Forming (SPIF)	671
	M. Bambach, J. Ames, M. Azaouzi, L. Campagne, G. Hirt, J.L. Batoz	
FP274 (Keynote paper)	Achievable Accuracy in Single Point Incremental Forming: Case Studies	675
	J. R. Duflou, B. Lauwers, J. Verbert, Y. Tunckol, H. De Baerdemacker	
FP231 (Keynote paper)	The Application of Rapid Prototyping Technologies for Manufacturing the Custom Implants	679
	P. Berce, H. Chezan, N. Balc	
FP009	An Approach in Manufacturing of Medical Implants	683
	P. Raos, A. Stoić	
FP014	Microstructural and Hardness Investigation in Welding Based Rapid Prototyping Process	687
	R.A. Mufli, M.P. Mughal, A.A. Khan, H.F. Junejo, M. Siddique, I. Khan	
FP020	Optimization of Sheet Incremental Forming Process by Means of FE Simulations	691
	E. Ceretti, A. Attanasio, C. Giardini	

FP027	Finite Element Analysis of Laminated Tools for Sheet Metal Stamping M. Oudjene, F. Mercier, L. Penazzi, J.L. Batoz	695
FP056	Application of the Neural Network Technique for Reducing Springback in Incremental Forming Processes G. Ambrogio, L. Filice, F. Gagliardi, F. Micari, D. Umbrello	699
FP241	Experimental validation of the Finite Element Simulation of the First Stroke in Single Point Incremental Forming K. Watzeels, Y. Tunckol, C. Henrard, J. Gu, H. Sol, J. Duflou, A.M. Habraken	703
FP256	Deep-Drawing Die Controlled by a Multi-Point Die-Support System T. Ohashi	707
FP262	Effect of FEM Choices in the Modeling of Incremental Forming of Aluminum Sheets S. He, A. Van Bael, P. Van Houtte, Y. Tunckol, J. Duflou, C. Henrard, C. Bouffieux, A.M. Habraken	711
FP221	Active Elements Tools Made By Selective Laser Sintering N. Balç, P. Berce, R. Pacurar	715

Machining and cutting technologies and modelling

FP023 (Keynote paper)	Metal Forming Simulations using Recent Advances in the Natural Element Method J. Yvonnet, D. Ryckelynck, P. Lorong, F. Chinesta	721
FP026 (Keynote paper)	Numerical Investigation of Effect of Hard Turning on Residual Stress Distribution of Shot Peened Surface X. Cheng, J. Hua, D. Umbrello, R. Shivpuri, F. Hashimoto	725
FP057 (Keynote paper)	On the Finite Element Simulation of Thermal Phenomena in Machining Processes L. Filice, D. Umbrello, F. Micari, L. Settineri	729
FP089	Simulation Analysis on Chip Breaking Process by Grooved Tool T. Shirakashi, J. Shinozuka, T. Obikawa	733
FP120	High Speed Experimental Analysis of Orthogonal Cutting using Hopkinson Bars and Optical Deformation Measurements P. Guégan, Y. Guetari, A. Poitou	737
FP125	Simulation of The Blanking Process of Aluminium Sheet Using the Engineering Software DEFORM W. W. Wenzl, S. Trembl	741
FP129	Study of the X-FEM Method Possibilities for the Simulation of Machining Y. Guetari, S. Le Corre, N. Moës	745
FP145	Comparison of Different Fracture Models for the Metal Blanking Process V. Lemiale, J. Chambert, P. Picart	749

FP147	A Finite Element Three Dimensional Approach to Metal Evaporative Laser Cutting: Temperature Field Non-Linear Model P. Carlone, C. Cataldo, G.S. Palazzo	753
FP166	Simulation of Drilling Process Base on Energy Approach T. Matsumura, I. Hori, T. Shirakashi, E. Usui	757
FP217	Experimental and FEM Study of the Temperature Field During Superficial Grinding A. Aguiar Vieira, A. Monteiro Baptista, R. Natal Jorge, M. Lages Parente	761
FP288	Dexel-based Milling Simulation K. Tracht, B. Denkena, M. Clausen, J.-H. Yu	765
FP123	2D Orthogonal Cutting Simulation of C15 Steel L. Donati, G. Tani, L. Tomesani	769
FP229	Numerical Modeling of the Chip Geometry in end Milling Operation M. Ancău	773

Constitutive models for polymers

FP030	Deterministic Approach of Multi Bead-Spring Polymer Models A. Ammar, F. Chinesta, D. Ryckelynck	779
FP034	Constitutive Model for Amorphous Polymers Based on the Quasi Point Defect Theory R. Rinaldi, R. Gaertner, M. Brunet, E. Vidal-Sallé, L. Chazeau	783
FP193	Hyper Elasticity and Strain-Rate Dependence of Behaviour in Amorphous Polymer in Stretch-Blow Moulding and Thermoforming N. Billon	787
FP267	Constitutive Modeling of Polymers Solutions in Simple Shear and Oscillatory Tests A. Marin, A. Calin, C. Balan	791

Structure development of polymers

FP113 (Keynote paper)	Effect of Short Branches on the Crystallization of Polyamides P. Van Puyvelde, S. Acierno	797
FP121 (Keynote paper)	α -relaxation in polyethylene as a function of crystal thickness T. Kazmierczak, A. Galeski	801
FP278 (Keynote paper)	Heat Transfer and Crystallization During Fast Cooling of Thin Polymer Film G. Lamberti, F. De Santis, V. Brucato, G. Titomanlio	805

FP028	External Calibration in PA12 Tube Extrusion: Influence on Microstructure and Mechanical Properties A. Carin, J.-M. Haudin, M. Vincent, B. Monasse, G. Bellet, N. Amouroux	809
FP039	Contribution to Numerical Modelling of Polymer Crystallization J.-L. Chenot, J. Smirnova, J.-M. Haudin and B. Monasse	813
FP130	Structural and Melting Studies on Photocrosslinked Polyethylene V. Barboiu, M. Avadanci, C. V. Grigoras	817
FP159	Rheological Study of the Early Crystallization Stages S. Acierno, S. Coppola, N. Grizzuti, D. Vlassopoulos	821
FP195	Flow Induced Crystallization of Polymers at Elevated Pressures M.H.E. van der Beck, G.W.M. Peters, H.E.H. Meijer	825
FP198	Crystallization and Properties of Plasticized Poly(L-lactide) R.Kulinski, E.Piorkowska	829
FP268	Determination of the Crystallization Kinetics of a PBT/PET Blend in Relation to the Behaviour of the Constituents V. La Carrubba, A. Stocco, S. Piccarolo, V. Brucato	833
FP021	Tabu Search Method Used In Macromolecular Design T. Rusu, V. Bulacovschi	837
FP106	On the Effect of Chain Ends and Chain Stiffness on the Second Virial Coefficient of Polysulfone - Theoretical Aspects A. Filimon, S. Ioan, E. Avram	841
FP108	Crosslinked Structures in Solution of poly(ether urethane)s M. Lupu, S. Ioan, D. Macocinschi	845
FP112	The Role Of Compatibilizers In The Structure Development Of Polymer Blends E. Van Hemelrijck, P. Van Puyvelde, P. Moldenaers	849

Link between process and final properties

FP036	Development of a Neural Network to Predict the Final Geometry of Forged Rings after Cooling S. Casotto, S. Bruschi, F. Pascon, A. M. Habraken	855
FP138	Numerical Implementation of a Fatigue Criterion Taking into Account the Grain Flow Orientation N. Caillet, P.-O. Bouchard, Y. Chastel	859
FP173	Dimensional Stability and Mechanical Properties of Mouldings Featuring Novel Morphologies Produced with by Active Shear Rotation During Injection Moulding C.A. Silva, J. C. Viana, A. M. Cunha	863

FP207	Influence of Process Parameters on Friction Stir Welding Conditions - Application to 6061 T6 Al Alloy Thin Plates	867
	F. Gratecap, G. Racineux, A. Poitou	
FP172	Melt Manipulation Techniques in Non-Conventional Injection Moulding: Structure Development and the Mechanical Properties	871
	A. D. Kouyumdzhev, J. C. Viana, A. M. Cunha	

Polymer Processing and Modelling

FP051 (Keynote paper)	Numerical Simulation Of Plastic Sheath Coating Of Telephone Wires	877
	E. Mitsoulis	
FP148 (Keynote paper)	Role of Process Simulation in Liquid Composite Moulding	881
	V. Neacsu, A. Gokce, P. Simacek, J. M. Lawrence, S. G. Advani	
FP287 (Keynote paper)	Modeling of Anisothermal Dynamic Crystallization in Injection Molding	885
	J. Smirnova, L. Silva, B. Monasse, J.-M. Haudin, J.-L. Chenot	
FP045	Influence of the PET Chain Structure on its Stretch Blow Moulding Ability	889
	E. Déloye, J.-M. Haudin, N. Billon	
FP167	PET under Uniaxial and Biaxial Tension Loading: Models Validation by Comparison Between Uniaxial and Biaxial Data's	893
	L. Chevalier, Y. Marco	
FP180	Determination of the Spatial Distribution of Molecular Orientation in Injection Molded iPP	897
	R. Mendoza, G. Régnier, L. David, R. Fulchiron, C. Rochas	
FP189	Multilayer Film Blowing Process. Numerical and Experimental Results	901
	E. Gamache, J-F. Agassant, Y. Demay, P.G. Lafleur	
FP190	3D Finite Element Modelling of the Stretch Blow Moulding Process	905
	C. Champin, M. Bellet, F.M. Schmidt, J.-F. Agassant, Y. Le Maoult	
FP254	Vectorial Algorithm for Bi-phasic Simulation of the Powder Segregation in Metal Injection Moulding	909
	Z.Cheng, T.Barriere, B.Liu, J.C.Gelin	
FP255	Experimental Study and Simulation of Heterogeneous Anisotropic Elastic Properties of Injection-molded Fiber-Reinforced Polymer	913
	D. Liksonov, T. Barriere, N. Boudeau, J.C. Gelin, L. Maslov	
FP269	Determination of the Volumetric Thermal Expansion Coefficient of Glass Fiber Reinforced (GFR) Thermoplastics through Pressure-Volume-Temperature (PVT) Measurements	917
	V. La Carubba, M. Bulters, G. Struijk, W. Zoetelief	

FP282	Evolution of Morphology During Processing of Thermoplastic Polymers: the Injection Moulding Process	921
	G. Titomanlio, I. Coccorullo, R. Pantani, V. Speranza	
FP191	Optimisation of Infrared Heating System for the Thermoforming Process	925
	M. Bordival, S. Andrieu, F.M. Schmidt, Y. Le Maout, S. Monteix	
FP194	Film Blowing and Characterization of PA6/LDPE Blends	929
	F.P. La Mantia, N. Tzankova Dintcheva	

Composite forming technologies and modelling

FP012 (Keynote paper)	Strain Field in the Picture Frame Test: Large and Small Scale Optical Measurements	935
	S.V. Lomov, A. Willems, M.Barburski, T.Stoilova, I.Verpoest	
FP076 (Keynote paper)	Modelling the Effects of Blank-Holder Pressure and Material Variability on Forming of Textile Preforms	939
	A. C. Long, J Wiggers, P Harrison	
FP094 (Keynote paper)	Spring-Forward in Composite Plate Elements	943
	S. Wijskamp, E.A.D. Lamers, R. Akkerman	
FP139 (Keynote paper)	Consistent Preprocessor for the Unit Woven Cell for Meso-Macro Analyses of Fabric Forming	947
	G. Hivet, B. Laine, P. Boisse	
FP025	Development of a Simplified Finite Element Model for Draping and Wrinkling of Woven Material	951
	A. A Skordos, C. Monroy Aceves, M. P F Sutcliffe	
FP062	Mechanical Analysis of 3D Braided Fiber Reinforced Composites Based on Homogenization and Elastic-Plastic Constitutive Laws	955
	J.-H. Kim, M.-G. Lee, H. Ryou, M.-H. Lee, K. Chung, T. J. Kang, J. R. Youn	
FP079	Towards Real Time Manipulation of Virtual Fabric Reinforcement – Extending and Enhancing Kinematic Drape Simulation Tools	959
	S.G. Hancock, K.D. Potter	
FP087	Finite Element Forming Simulation of NCF Considering Natural Variability of Fiber Direction	963
	W.R. Yu, P. Harrison, A.C. Long	
FP100	Influence of Material and Process Parameters on Segregation Phenomena During Compression Molding of GMT	967
	P. Dumont, L. Org�as, C. Servais, V. Michaud, D. Favier, J.-A. E. M�anson	
FP101	Development of a RTM Mould Filling System Integrating Simulation, Optimisation and Control Techniques	971
	F. S�anchez, J.A. Garc�a, F. Chinesta, G.Salvador, Ll.Gasc�on	

FP102	Flow Of Non-Newtonian Viscous Fluids Through Fibrous Media: Experimental And Numerical Study	975
	Z. Idris, C. André, C. Geindreau, L. Orgças, J.-F. Bloch, L. Debove	
FP104	Micro-Deformation Of Foam-Composite Sandwich Structures During Curing	979
	S. S. Cheon, S. H. Chang	
FP115	FE Modelling of Micro-Deformation of Carbon Fabric-Metallic Foam Sandwich Structures	983
	S.S. Chang, S.S. Cheon	
FP131	Kinematics of Intra-Ply Slip of Textile Composites During Bias Extension Tests	987
	P. Harrison, M.-K. Tan, A. C. Long	
FP137	Drape Simulation of Non-Crimp Fabrics	991
	R.H.W. ten Thije, R. Locndersloot, R. Akkerman	
FP202	Permeability Of The Woven Fabrics: A Parametric Study	995
	B. Laine, G. Hivet, P. Boisse, F. Boust, S. V. Lomov	
FP206	Experimental Study on Woven Composites with Different Temperature Trajectories	999
	H. S. Cheng, J. Cao, N. Mahayotsanun	
FP085	Simulation of Double Dome Stamping of Twill Woven Fabric Composites	1003
	X. Li, J. A. Sherwood, L. Liu, J. Chen	
FP118	Biaxial Tensile Tests on Glass/PP under Optical Strain Measurement	1007
	A. Willems, D. Vandepitte, S. V.Lomov, I. Verpoest	
FP133	Simulations and Experiments in Continuous Fibres Composites Forming	1011
	J.L Daniel, D. Soulat, P. Boisse	
FP157	Measurement of the Transverse and Longitudinal Viscosities of Continuous Fibre Reinforced Composites	1015
	P. Harrison, T. Haylock, A.C. Long	
FP162	Mechanical Analysis of 3D Braided Fiber Reinforced Composites Based on Homogenization and Elastic-Plastic Constitutive Laws	1019
	J.-H. Kim, M.-G. Lee, H. Ryou, M.-H. Lee, K. Chung, T. J. Kang, J. R. Youn	
FP279	Technological Parameters Optimisation for High Compression Strength of Parts Made of Melamine and Clay Compounds	1023
	L. Hancu, D. Păunescu, H. Iancău	

General and special topics

FP266 (Keynote paper)	Experimentation and FE Simulation of a Flow Forming Process	1029
	C.C. Wong, J. Lin, T.A. Dean	
FP048 (Keynote paper)	Three-Dimensional Finite Element Modelling for an Uterus Surgery	1033
	A. Paccini, Y. Tillier, J. Dclotte, M. Durand-Reville, J.-L. Chenot	

FP058	Behaviour of Friction Stir Welded T-Components under Loading	1037
	G. Buffa, L. Filice, L. Fratini, F. Gagliardi	
FP150	Two Simple Models for Exploring a Novel Flexible Ring Rolling Process	1041
	T. F. Stanistreet, J. M. Allwood	
FP186	Simulation of Deformation in Mannesmann Piercing Process	1045
	K. Komori	
FP187	Power Evaluation in a Hot Rod Rolling Process	1049
	F. Capece Minutolo, M. Durante, L. Giorleo, A. Langella	
FP291	Requirements for the Design of Roll Materials for Wire Rod Rolling	1053
	S.-E. Lundberg	
FP300	High Magnetic Field Effect on Texture of Low GNO Silicon Steel	1057
	C.M.B. Bacaltchuk, G.A. Castello-Branco, H. Garmestani, C. Iskandar, P. Koo, A. Kasseh, R. Abourialy, O.S. Es-Said	
FP013	Clad Sheet Rolling Analysis by the Modified Slab Method	1061
	F. Farhat-Nia, M. Salimi	
FP071	An Investigation to the Alpha Phase Dynamic Globularization in Ti-6Al-4V Alloys	1065
	A.R. Shahab, A. Zarei-Hanzaki, M. Mastroori, S.M.H. Hoseiny, H. Azizi-Alizamini	
FP074	3-D Finite Element Modelling of Macular Translocation	1069
	Y. Tillier, C. Falcot, A. Paccini, G. Caputo, J.-L. Chenot	
FP093	A cost model for the Friction Stir Welding process	1073
	R. Di Lorenzo, L. Fratini	
FP299	The Components of Logarithmic Strain Tensor in Material Forming and Comparison with the Components of Conventional Strain	1077
	V. Ungureanu	

Semi-solid processing

FP174 (Keynote paper)	Thixoforming of Steel: Experiments on Thermal Effects and Micromechanical Modelling	1083
	P. Cezard, R. Bigot, V. Favier, M. Berveiller, M. Robelet	
FP276 (Keynote paper)	Study of liquid fraction evolution of semi-solid steels for thixoforming	1087
	J. Lecomte-Beckers, A. Rassili, M. Carton, M. Robelet	
FP199	Pseudo-Semi-Solid Thixofroming of Ceramics Matrix Composite	1091
	Y.-S. Cheng, S.-J. Luo, Z.-M. Du	
FP203	Semi-Solid Forming of Steels	1095
	A. Rassili, C. Geuzaine, P. Dular, M. Robelet, J. Demeurger, D. Fischer	

FP215	Twin roll casting of Al-16%Si hypereutectic aluminium alloy strip T. Haga, M. Ikawa, W. Hisaki	1099
FP261	Semi-solid roll casting of AZ31B magnesium alloy by a horizontal roll caster H. Watari, T. Haga, K. Davey, M. Sato, N. Takada	1103
FP294	Flow Visualisation for Semi-Solid Alloys H.V. Atkinson, P.J. Ward	1107
FP295	Rheological properties of semi-solid metallic alloys M. Modigell, L. Pape, M. Hufschmidt	1111
FP211	SLC™ - Sub Liquidus Casting: An Economical Route to Rheocasting J. Jorstad, M. Thieman, R. Rogner	1115
FP214	Semisolid roll casting of wire-inserted composite strip T. Haga, K. Takahashi, W. Hisaki	1119
