Introduction.....	xxv

Chapter 1 Historical Use of Chlorinated Solvents and Their Stabilizing Compounds	1
1.1 History of Chlorinated Solvents	1
1.1.1 Major Applications of Chlorinated Solvents	4
1.1.1.1 Chlorinated Solvents in Historical or Current Use	4
1.1.1.2 Cold Cleaning.....	10
1.1.1.3 Vapor Degreasing.....	11
1.1.1.4 Dry Cleaning.....	17
1.1.1.5 Off-Site Solvent Recycling	22
1.2 Role of Solvent Stabilizers	24
1.2.1 Types of Solvent Stabilizers and Solvent Breakdown	24
1.2.2 Consequences of Solvent Breakdown.....	25
1.2.2.1 Operator Safety	25
1.2.2.2 Off-Spec Work	27
1.2.2.3 Production Line Shutdown.....	27
1.2.3 Stability of the Major Solvents	28
1.2.3.1 Performance Criteria for Solvent Stabilizers in Various Applications	29
1.2.3.2 Selection of Solvent Stabilizers	30
1.2.4 Causes of Solvent Breakdown	31
1.2.4.1 Oxidation.....	31
1.2.4.2 Ultraviolet Light Breakdown.....	32
1.2.4.3 Thermal Breakdown.....	33
1.2.4.4 Acid Breakdown.....	34
1.2.4.5 Solvent Deterioration Catalyzed by Metals and Metal Salts.....	35
1.2.5 Testing Solvent Stability and Performance.....	38
1.2.5.1 Acid Acceptance Value	39
1.2.5.2 Aluminum Scratch Test.....	40
1.2.6 Identifying Solvent Stabilizers Used in Chlorinated Solvents	40
1.2.6.1 Solvent Stabilizer Chemicals	44
1.2.6.2 Antioxidants	47
1.2.6.3 Light Inhibitors.....	47
1.2.6.4 Thermal Stabilizers.....	48
1.2.6.5 Acid Acceptors	48
1.2.6.6 Metal Inhibitors.....	49
1.2.7 Fate of Stabilizers in Industrial Applications and Solvent Recycling.....	54
1.2.7.1 Boiling-Point Differences.....	54
1.2.7.2 Solubility Differences.....	58

	1.2.7.3	Vapor Pressure Differences	61
	1.2.7.4	Carbon Adsorption	61
	1.2.7.5	Thermal Stability	62
	1.2.7.6	Replenishing Solvent Stabilizers	63
		Acknowledgments	65
		Bibliography	65
Chapter 2		1,4-Dioxane: Chemistry, Uses, and Occurrence	75
	2.1	Chemistry of 1,4-Dioxane	75
	2.2	History of 1,4-Dioxane Production	79
	2.2.1	1,4-Dioxane Production for Commercial Applications	79
	2.2.2	Impurities and Stabilizers of 1,4-Dioxane	80
	2.3	Direct Uses of 1,4-Dioxane	81
	2.3.1	Cellulose Acetate Membrane Production for Reverse Osmosis and Kidney Dialysis Filters	83
	2.3.2	Liquid Scintillation Cocktails	83
	2.3.3	Tissue Preservative in Histology and Other Laboratory Microscopy Methods	85
	2.3.4	Printing Inks and Paints and Related Uses	86
	2.3.4.1	Inks and Printing Operations	86
	2.3.4.2	Historical Restoration	86
	2.3.4.3	Painting, Coating, and Paint Stripping	86
	2.3.5	Flame Retardant Production	87
	2.3.6	Rubber and Plastics Industry	87
	2.3.7	Aircraft Deicing Fluid and Antifreeze	88
	2.3.8	Adhesives	88
	2.3.9	Polyurethane Materials for Medical Devices	89
	2.3.10	Solvent-Based Cleaning Agents	89
	2.3.11	Ether Supplements in Fuels	90
	2.4	1,4-Dioxane as a By-Product of Manufacturing	90
	2.4.1	Ethoxylated Surfactants	90
	2.4.1.1	Personal Care Products: Detergents, Shampoos, and Sundries	91
	2.4.1.2	Personal Care Products: Cosmetics	93
	2.4.1.3	1,4-Dioxane in Contraceptive Sponges and Spermicidal Lubricants	95
	2.4.1.4	1,4-Dioxane in Polyethylene Glycol	95
	2.4.1.5	1,4-Dioxane in Glyphosphate Herbicides (Accord®, Roundup®, Rodeo®, Vision®)	96
	2.4.1.6	1,4-Dioxane in Pesticides	96
	2.4.2	Terephthalate Esters (Polyester) and Resins	97
	2.4.3	1,4-Dioxane as a By-Product of Petroleum Refining and Gasoline Antiknock Agent	98
	2.5	1,4-Dioxane in Food	99
	2.6	1,4-Dioxane Use in the Pharmaceutical Industry	101
	2.7	Detections of 1,4-Dioxane in Ambient Surface Water, Groundwater, and Air	102
	2.8	Estimated Releases of 1,4-Dioxane to the Environment	103
	2.8.1	1,4-Dioxane in Wastewater	104
	2.8.2	1,4-Dioxane in Landfills	105
		Bibliography	106

Chapter 3	Environmental Fate and Transport of Solvent-Stabilizer Compounds	115
3.1	Fate and Transport Processes.....	115
3.1.1	Atmospheric Fate and Transport Processes.....	116
3.1.2	Volatilization from Dry Soil	116
3.1.3	Volatilization from Water	119
3.1.3.1	Henry's Law	119
3.1.3.2	Mass Transfer Rates from Water to Air: Flux Density	120
3.1.4	Atmospheric Fate of Stabilizer Compounds.....	122
3.1.4.1	Photolysis.....	122
3.1.4.2	Photo-Oxidation in the Atmosphere	126
3.1.4.3	Photo-Oxidation in Water	129
3.2	Surface-Water Fate and Transport Processes.....	129
3.2.1	Hydrolysis	130
3.2.2	Acid Dissociation Potential	131
3.3	Subsurface Fate and Transport Processes.....	133
3.3.1	Aqueous Solubility of Stabilizer Compounds and Stabilizer-Solvent-Waste Mixtures	134
3.3.2	Adsorption	137
3.3.2.1	Soil Properties Affecting Adsorption.....	138
3.3.2.2	Molecular Properties Affecting Adsorption	139
3.3.2.3	Distribution Coefficients and Sorption Isotherms.....	139
3.3.2.4	Organic Carbon Partition Coefficient, K_{oc}	141
3.3.2.5	Predicting K_{oc} from K_{ow} , the Octanol/Water Partition Coefficient	142
3.3.2.6	Effect of Surface Oxides on Sorption	144
3.3.2.7	Competitive Sorption	144
3.3.2.8	Use of Laboratory Batch Tests to Measure K_d in Soil.....	146
3.3.2.9	Sorption of Vapor-Phase 1,4-Dioxane	147
3.3.2.10	High-Strength 1,4-Dioxane Solutions May Cause Clay Swelling	147
3.3.3	Subsurface Vapor-Phase Transport.....	149
3.3.4	Biodegradability of Solvent-Stabilizer Compounds	150
3.3.4.1	Predicting Biodegradability	154
3.3.4.2	Biodegradability of 1,4-Dioxane: Laboratory Studies	156
3.3.4.3	Synopsis of 1,4-Dioxane Biodegradability Studies.....	161
3.4	Laboratory, Field, and Modeling Studies of 1,4-Dioxane Mobility.....	169
3.4.1	Laboratory Studies.....	169
3.4.2	Field Studies	169
3.4.3	Modeling 1,4-Dioxane Transport	171
3.5	Diffusive Transport of 1,4-Dioxane and Storage in Fine-Grained Soils	173
	Bibliography	180
Chapter 4	Sampling and Laboratory Analysis for Solvent Stabilizers	191
4.1	The Flawed Paradigm of Analyte Lists	191
4.2	Sample Collection, Preservation, and Handling for Analysis of 1,4-Dioxane.....	193
4.2.1	Sampling for 1,4-Dioxane in Water	193
4.2.1.1	Passive-Diffusion Bag Samplers	195
4.2.1.2	Rigid Porous Polyethylene Samplers.....	195

4.2.1.3	Snap Sampler.....	196
4.2.1.4	Gore Sampler.....	198
4.2.2	Sampling for 1,4-Dioxane in Air and Landfill Gas.....	198
4.2.3	Personnel Air Monitoring.....	199
4.3	Sample Preparation.....	199
4.3.1	Purge and Trap.....	199
4.3.2	Heated Purge and Trap.....	200
4.3.3	Equilibrium Headspace Extraction.....	200
4.3.4	Vacuum Distillation.....	201
4.3.5	Azeotropic Distillation.....	202
4.3.6	Sample Extraction.....	202
4.3.6.1	Liquid–Liquid Extraction.....	202
4.3.6.2	Solid-Phase Extraction.....	204
4.4	Laboratory Methods for the Analysis of 1,4-Dioxane by GC–MS.....	209
4.4.1	Gas Chromatography.....	210
4.4.1.1	Methods in Gas Chromatography.....	211
4.4.1.2	Selecting Chromatographic Columns for 1,4-Dioxane Analysis.....	211
4.4.2	Detectors in Gas Chromatography.....	212
4.4.2.1	Mass Spectroscopy.....	213
4.4.2.2	Mass Spectroscopy and 1,4-Dioxane.....	214
4.5	Environmental Protection Agency Methods for Analysis of 1,4-Dioxane.....	214
4.5.1	Environmental Protection Agency Method 8015B.....	215
4.5.2	Environmental Protection Agency Method 8260B.....	216
4.5.3	Environmental Protection Agency Method 8260C.....	217
4.5.4	Environmental Protection Agency Method 8261A.....	217
4.5.5	Environmental Protection Agency Method 8270C—Extracted Semivolatile Organic Compounds by Gas Chromatography– Mass Spectroscopy.....	219
4.5.6	Environmental Protection Agency Method 1624— Isotope-Dilution Gas Chromatography–Mass Spectroscopy.....	219
4.5.7	Environmental Protection Agency Method 522—Solid-Phase Extraction and Gas Chromatography–Mass Spectroscopy with Selective Ion Monitoring.....	222
4.6	Laboratory Safety for 1,4-Dioxane Handling and Instrument Cleaning.....	222
	Acknowledgments.....	223
	Bibliography.....	223
Chapter 5	The Toxicology of 1,4-Dioxane.....	229
5.1	Toxicokinetics.....	229
5.2	Toxicity Studies in Humans.....	232
5.3	Toxicology Studies in Laboratory Animals.....	232
5.3.1	Acute and Short-Term Toxicity Studies (<1 Month Exposure).....	232
5.3.2	Subchronic and Chronic Toxicity Studies.....	238
5.3.3	Mechanistic Toxicology Studies.....	246
5.3.3.1	Genotoxicity.....	246
5.3.3.2	Initiation/Promotion Studies.....	247
5.3.3.3	Mechanistic Studies Evaluating Mode of Action for Carcinogenicity.....	252
5.4	Summary of Noncancer Health Effects.....	254

5.5	Characterization of Cancer Potential.....	255
5.5.1	Summary of Human and Animal Data	255
5.5.2	Weight-of-Evidence Evaluation	255
5.5.3	Mode of Action.....	256
5.6	1,4-Dioxane Toxicology and Risk Assessment.....	257
	Acknowledgments	258
	Bibliography	258
Chapter 6	Regulation and Risk Assessment of 1,4-Dioxane	263
6.1	Drinking Water Regulations for 1,4-Dioxane.....	264
6.1.1	Federal	265
6.1.2	Basis for State Regulations or Guidelines: Colorado, California, Connecticut, and Michigan.....	270
6.1.2.1	Colorado's 1,4-Dioxane Standard.....	271
6.1.2.2	California's Notification Level	273
6.1.2.3	Connecticut's Comparison Value for 1,4-Dioxane.....	275
6.1.2.4	Michigan's Proposed Maximum Contaminant Level	275
6.1.3	Need for Regulation: Occurrence of 1,4-Dioxane in Drinking Water.....	277
6.2	Water Quality Regulations: Protection of Ecological Receptors.....	279
6.2.1	National Pollution Discharge Elimination System Regulations	279
6.2.2	Toxicity of 1,4-Dioxane to Aquatic Organisms	279
6.2.3	Toxicity of 1,4-Dioxane to Aquatic and Terrestrial Organisms	281
6.2.4	Regulating 1,4-Dioxane Discharges from Groundwater Cleanup Sites	281
6.2.5	Regulating 1,4-Dioxane in Industrial Wastewater Discharges and Recycled Water	284
6.2.5.1	Industrial Wastewater Discharge Regulations	286
6.2.5.2	Recycled Water Regulations.....	287
6.3	Air Quality Regulations: Occupational Health and Safety and Ambient Air Quality.....	287
6.3.1	Occupational Health and Safety Regulations for 1,4-Dioxane.....	288
6.3.2	Emissions Standards and Air Quality Regulations for 1,4-Dioxane.....	288
6.4	Regulating 1,4-Dioxane in Food, Pharmaceuticals, Cosmetics, and Sundries.....	292
6.4.1	Food Regulations	292
6.4.1.1	1,4-Dioxane in Dietary Supplements	292
6.4.1.2	1,4-Dioxane in Ice Cream	293
6.4.1.3	1,4-Dioxane in Gluten-Free Bread	293
6.4.1.4	1,4-Dioxane in Food-Packaging Materials.....	293
6.4.1.5	The Delaney Clause	294
6.4.2	Regulation of 1,4-Dioxane in Pharmaceutical Products.....	294
6.4.3	Regulation of 1,4-Dioxane in Cosmetics and Shampoos	295
6.4.4	California Proposition 65	297
6.5	Risk Assessments of 1,4-Dioxane.....	298
6.5.1	Overview of Risk-Assessment Process and Data Requirements	298
6.5.2	Exposure Pathways and Routes	299
6.5.3	1,4-Dioxane Toxicity Data Used in Risk Assessments.....	299
6.5.4	Risk from Dermal Exposure to 1,4-Dioxane.....	302

6.5.5	Risk from Inhalation Exposure to 1,4-Dioxane.....	306
6.5.5.1	Lactational Transfer Following Occupational Exposure.....	307
6.5.5.2	Inhalation Risk from Showering in 1,4-Dioxane Contaminated Water.....	307
6.5.6	Risk of 1,4-Dioxane Oral Ingestion in Drinking Water, Food, and Drugs	310
6.5.7	Relative Risks of Solvent Stabilizers	310
	Acknowledgment.....	314
	Bibliography	314
Chapter 7	Remediation Technologies	327
7.1	Vapor-Phase Transfer	327
7.1.1	Air Stripping.....	327
7.1.2	Accelerated Remediation Technologies, LLC In-Well System	328
7.1.3	Pervaporation	329
7.1.4	Summary	330
7.2	Sorption.....	330
7.2.1	Adsorptive Media	331
7.2.2	Activated Carbon.....	331
7.2.3	Organoclays	332
7.2.4	Palladium-111	332
7.2.5	Summary	333
7.3	Natural Attenuation	333
7.3.1	Evidence of the Effectiveness of Natural Attenuation.....	333
7.3.2	Diffusion into Immobile Porosity.....	333
7.3.3	North Carolina Example.....	334
7.3.4	Summary	336
7.4	Ultraviolet Photolysis.....	336
7.5	Phytoremediation.....	337
7.5.1	Bench-Scale Tests	337
7.5.2	Mathematical Modeling.....	338
7.5.3	Greenhouse and Field Studies	339
7.5.4	Summary	339
7.6	Bioremediation.....	339
7.6.1	Mixed Bacterial Cultures	340
7.6.1.1	Actinomycete Culture	340
7.6.1.2	Indigenous Soil Microbes.....	340
7.6.1.3	Degradation of Tetrahydrofuran and 1,4-Dioxane Together	341
7.6.1.4	Kinetics of Cometabolism.....	342
7.6.2	Bacteria Genus: <i>Rhodococcus</i>	342
7.6.3	Bacteria Genus: <i>Pseudonocardia</i>	342
7.6.3.1	Degradation of Multiple Ether Pollutants	342
7.6.3.2	Degradation of 1,4-Dioxane	345
7.6.4	Gasotrophic Bacteria: Cometabolic Biodegradation	345
7.6.5	Bioreactors and Biobarriers	346
7.6.6	Anaerobic Bacteria	348
7.6.7	Fungi.....	349
7.6.8	Enhancing Biodegradability with <i>In Situ</i> Chemical Oxidation.....	350
7.6.9	Bacteria Summary	351

7.7 Chemical Oxidation 351

7.7.1 Hydrogen Peroxide and Ozone—*Ex Situ* 352

7.7.2 Hydrogen Peroxide and Ozone—*In Situ* 354

7.7.3 Hydrogen Peroxide and Ultraviolet Light 357

7.7.4 Hydrogen Peroxide and Ferrous Iron 357

7.7.5 Persulfate 358

7.7.6 Permanganate 360

7.7.7 Photocatalytic Oxidation 360

7.7.8 Ozonation 361

7.7.9 Sonochemical Oxidation 362

7.7.10 Chemical Oxidation Summary 363

Bibliography 363

Chapter 8 Case Studies of 1,4-Dioxane Releases, Treatment, and Drinking Water Contamination 369

8.1 Superfund Site at Seymour, Indiana 369

8.1.1 Contaminant Distribution and Hydrogeology 370

8.1.2 Risk Management 371

8.1.3 Treatment 372

8.1.4 Discussion 373

8.2 Solvent Services Site, San Jose, California 373

8.2.1 Treatment 374

8.2.2 1,4-Dioxane Detection and Laboratory Challenges 375

8.2.3 Regulation 377

8.2.4 Discussion 377

8.3 Pall/Gelman Sciences Inc., Ann Arbor, Michigan 378

8.3.1 Wastewater Disposal 378

8.3.2 Geologic Setting 379

8.3.3 Delineating 1,4-Dioxane Contamination 380

8.3.4 Regulation 381

8.3.5 Treatment 382

8.3.6 Legal Actions 384

8.4 Former American Beryllium Company, Tallevast, Florida 386

8.4.1 Geologic Setting 386

8.4.2 Site History 387

8.4.3 Regulatory Response: Remediation and Water Supply Replacement 391

8.4.3.1 UV Oxidation Pilot Treatability Study 391

8.4.3.2 Ozone and Peroxide Oxidation Pilot Study 393

8.4.3.3 *In Situ* Biostimulation and Bioaugmentation Treatability Study 393

8.4.4 Community Response 394

8.4.5 Discussion 396

8.5 Stanford Linear Accelerator Center Groundwater Cleanup Sites 396

8.5.1 SLAC Site History 397

8.5.2 Geologic and Hydrologic Setting 397

8.5.3 Contaminant Releases 398

8.5.3.1 Remediation at Former Hazardous Waste Storage Area 400

8.5.3.2 Former Solvent Underground Storage Tank Area 400

8.5.4	Possible Reasons for 1,4-Dioxane Removal by Granular Activated Carbon.....	401
8.6	1,4-Dioxane and Orange County Water District OCWD Groundwater Replenishment System.....	403
8.6.1	History of the Orange County Water District Groundwater Replenishment System.....	404
8.6.2	1,4-Dioxane Detected at Water Factory 21.....	405
8.6.3	Wastewater Treatment and 1,4-Dioxane Removal.....	406
8.6.4	Communicating with Water Utilities and the Public about 1,4-Dioxane in Drinking Water Wells.....	406
8.6.5	Institutional Measures to Prevent Future Industrial Discharges Adverse to Recycling Wastewater.....	408
8.7	Air Force Plant 44, Tucson, Arizona.....	408
8.7.1	Background.....	408
8.7.2	Geologic and Hydrogeologic Setting.....	409
8.7.3	Chlorinated Solvent Use, Release Mechanisms, and Discovery.....	410
8.7.4	Community Involvement.....	411
8.7.5	Remedial Actions.....	412
8.7.6	1,4-Dioxane Discovery and Regulation.....	413
8.7.7	Advanced Oxidation Treatment System Upgrade.....	414
8.7.8	Cost Analysis.....	416
8.7.9	Future Plans.....	416
	Acknowledgments.....	417
	Bibliography.....	417
