

Lecture Series on Computer and Computational Sciences
Editor-in-Chief and Founder: Theodore E. Simos

Volume 4A

Advances in Computational Methods in Sciences and Engineering 2005

Selected Papers from the International Conference of
Computational Methods in Sciences and Engineering
2005 (**ICCMSE 2005**)

Recognised Conference by the European Society of
Computational Methods in Sciences and Engineering
(**ESCMSE**)

Editors:

Theodore Simos and George Maroulis

Table of Contents

P. Acebal, L. Carretero, S. Blaya, R.F. Madrigal, A. Murciano, A. Fimia	1-4
Simulation of Diffraction Efficiency in Oriented Bacteriorhodopsin Films	
<i>Jaemin Ahn, Chung-Ki Cho, Sungkwon Kang</i>	5-8
An Efficient Estimation Scheme for the Space Dependent Dispersion of a Solute Transport Equation	
<i>Jaemin Ahn, Sungkwon Kang, YongHoon Kwon</i>	9-12
A Fast Laplace Transform Finite Difference Scheme for the Black-Scholes Equation	
<i>B. Akay</i>	13-16
Adaptive Model Based Control of Optimized Bioprocess Temperature	
<i>A. R. Alyyan, M. A. Lahham, M. S. Arni, A. M. O'kool and S. A. Al-Jufout</i>	17-20
Immittance Matrix Partition by Hypothetical Capacitor	
<i>Ana M. Amado, Sónia Fiuza, J.C. Otero, M. Paula M. Marques and Luís A.E. Batista de Carvalho</i>	21-24
Theoretical Studies on Solid α,ω-Diamine Salts	
<i>Sergio R. Aragon and David K. Hahn</i>	25-32
Polarizability and Capacitance of Platonic solids and Kerr constant of Proteins	
<i>Ioannis Argyropaidas, Evan Mitsoulis, Georgios Georgiou</i>	33-36
Flow Cessation of Viscoplastic Fluids in Poiseuille Flows	
<i>F. Arickx, J. Broeckhove, K. Vanmechelen, P. Hellinckx, V. Vasilevsky</i>	37-43
Quantum Nuclear Scattering calculations on the BEgrid	
<i>M. Arshad, Taj M. Khan, Dr. M. A. Choudhry</i>	44-47
A New Approach of Dynamics Model	
<i>L. Balas and A. İnan</i>	48-51
Three Dimensional Modelling of Turbulence	
<i>P. Barragán, L. F. Errea, L. Fernández, A. Macías, L. Méndez, I. Rabadán and A. Riera</i>	52-55
Sign-consistent <i>ab initio</i> Molecular Wave Functions	
<i>N. A. Baykara and M. Demiralp</i>	56-59

Fluctuation Expansion in the Quantum Optimal Control of One Dimensional Perturbed Harmonic Oscillator	
<i>L. Bayón, J.M. Grau, M.M. Ruiz, P.M. Suárez</i>	60-64
A Constrained and Nonsmooth Hydrothermal Problem	
<i>Monique BECKER, Alexandre DELYE de CLAUZADE de MAZIEUX, Vincent GAUTHIER, Michel MAROT</i>	65-65
Cross-layer Simulations for Performance Evaluation of Self-organized Wireless Networks	
<i>S.Benkner, L. Halada, M.Lucka and I. Melicherik</i>	66-69
Tuning a Portfolio Management Model on Historical Data using a Parallel Three-Stage Stochastic Programming Model	
<i>Mário N. Berberan-Santos</i>	70-73
Inverse Laplace transforms of luminescence relaxation functions	
<i>D.S. Bezrukov, Yu.V. Novakovskaya, A. Bäck, G. Nyman</i>	74-76
Calculation of Vibrational Levels of Three-Atomic Molecules in the Ground Rotational State on Example of NO₂	
<i>Trygve Buanes, Bjørn Kvamme, Aile Svandal</i>	77-80
Two Approaches for Modelling Hydrate Growth	
<i>X. Cai and F. Liu</i>	81-84
An Implicit Finite Difference Scheme for Simulating the Space Fractional-order Riesz Diffusion Processes	
<i>M. Chalaris, J. Samios</i>	85-88
Statistical Mechanical Study of Dimethyl-Sulfoxide/Water Eutectic Mixture by Molecular Dynamics Simulation	
<i>K. B. Chang, I. J. Shim and G.T. Park</i>	89-93
Adaptive Repetitive Control for an Eccentricity Compensation of Optical Disk Drivers	
<i>Kyungbae Chang, Iljoo Shim and Gwitae Park</i>	94-98
Intelligent Building Network System Integration using TCP/IP	
<i>Kyungbae Chang, Iljoo Shim and Gwitae Park</i>	99-104
DSCM (Dual Switching Control Module) Design to Heighten Reliability of System	
<i>Kyungbae Chang and Gwitae Park</i>	105-111
Performance Evaluation of the Smart Airbag ECU	

<i>P. K. Chattaraj, U. Sarkar, D. R. Roy, R. Parthasarathi, J. Padmanabhan, V. Subramanian</i>	112-116
Global and Local Electrophilicities as Descriptors of Toxicity	
<i>Chung-Ki Cho, Sungkwon Kang, YongHoon Kwon</i>	117-120
Estimation of Spatially Varying Diffusivity in an Infiltration Problem	
<i>Muhammad Ahmad Choudhry, Wazir Zada, Aamir Hanif and Tahir Mehmood</i>	121-125
A Simplistic Technique to Optimize Reactive Power Management in the Electrical Installation for Ensuring Maximum Savings and Reducing Cost of Electricity Consumed	
<i>A.P.L. Cipollini</i>	126-130
An Elementary Speculative Strategy in the case of Informations about the Future Behaviour of the Market	
<i>F. Costabile, A. Napoli</i>	131-134
A Mathematica package for the solution of ordinary differential equations using Taylor series method	
<i>Manuel Urbano Cuadrado, Irene Luque Ruiz, Gonzalo Cerruela García, Miguel Ángel Gómez-Nieto</i>	135-138
A New Quantitative Structure-Property Relationship (QPRS) Model based on Topological Distances of Non-Isomorphic Subgraphs	
<i>J. Czernek</i>	139-142
A MP2 Study of Low Energy Structures of the Fluorobenzene Dimer	
<i>A. Delavarkhalafi</i>	143-145
Computation of Switching Surfaces using Grobner Basis	
<i>M. Demiralp</i>	146-149
Determination of Quantum Expectation Values Via Fluctuation Expansion	
<i>G. Dezsö, I. Bálint, I. Gyémánt</i>	150-153
Structure analysis of second order reduced density matrix expanded in geminal basis	
<i>J. J. del Coz Díaz, J.A. González Pérez and P.J. García Nieto</i>	154-158
Numerical analysis of pressure field on curved self-weighted metallic roofs due to wind effect by the Finite Volume Method	
<i>J. J. del Coz Díaz, P. J. García Nieto, J. A. Vilán Vilán, A. Martín Rodríguez and A. Lozano Martínez-Luengas</i>	159-162
Non-linear buckling analysis of a self-weighted metallic roof by the finite element method	

<i>Karl F. Doerner, Richard F. Haril and M.Lucka</i>	163-166
Cooperative Ant Colonies Solve the Vehicle Routing Problem	
<i>Denis Donnelly</i>	167-170
A Perspective on Computational Science and Its Status in Academia	
<i>C.A. Dorao, H.A. Jakobsen</i>	171-174
Time-Space Least-Squares Spectral Element Method for Population Balance Equations	
<i>I. Dorta, C. León</i>	175-178
MPI and JAVARMI Skeletons for the Branch-and-Bound Technique	
<i>Stefan Emet</i>	179-182
An Approach for Simultaneous Structure Determination and Parameter Estimation Using MINLP Techniques	
<i>N. Fallah</i>	183-186
Using Shape Function in Cell Centred Finite Volume Formulation for Two Dimensional Stress Analysis	
<i>N. Fallah</i>	187-190
A New Approach in Cell Centred Finite Volume Formulation for Plate Bending Analysis	
<i>Sónia Fiuza, Ana M. Amado, Luís A.E. Batista de Carvalho and M. Paula M. Marques</i>	191-194
Performance of Different DFT/ECP Combinations in the Study of Platinum Anticancer Drugs	
<i>M. Franchin and E. Smargiassi</i>	195-197
The Sound of a Different Bell: Density Functional Theory as a Tool for the Study of Classical Liquids	
<i>E. Francomano, C. Macaluso, A. Tortorici, E. Toscano</i>	198-203
An Advanced Numerical Method for Recovering Image Velocity Vectors Field	
<i>S. B. Gashkov, I. B. Gashkov</i>	204-206
Remark on Testing Irreducibility of Polynomials over Finite Fields	
<i>Aamir Hanif, M. A. Choudhry and Tahir Mehmood</i>	207-210
A Generic Design of Ladder Algorithm for Automation of Backwash Water Treatment Plant	
<i>Thomas M. Henderson</i>	211-214
Embedding Wave Function Theory in Density Functional Theory	

<i>C.H. Huang, H.L. Li</i>	215-218
Convexification Strategies for Solving the Nonlinear Sum of Ratios Problem	
<i>N. Ikeda</i>	219-222
Information Theoretical Analysis of Diagrams Represented by Cutting Segments	
<i>A. Amat, J. Rigau, R. W. Waynant, I. K. Iliev and J. J. Anders</i>	223-226
Adenosine Triphosphate ATP, a Cellular Key Molecule, is Affected by Non-Resonant Optical Frequencies	
<i>E. Barkanov, W. Hufenbach and L. Kroll</i>	227-230
Systems with Combined Damping: Finite Element Modelling and Dynamic Analysis	
<i>E. Barkanov, A. Chate, E. Skukis and T. Gosch</i>	231-234
Optimal Design of Large Wheel Loaded Vehicle Decks	
<i>A. Garrido</i>	235-238
Heuristic Functions, Primitive Recursion and Recursivity	
<i>Y. Onur Devres, Kenan Gürsoy</i>	239-243
Prediction of thawing time of frozen foodstuffs with a one dimensional finite difference model	
<i>A. Galani, P. Neofytou, A. Venetsanos, J. Bartzis, S. Neville</i>	244-248
Prediction and Study of Passive Pollutant Dispersion in a Street-Canyon in London Using Computational Fluid Dynamics Techniques	
<i>M. K. Ginalski, A. J. Nowak, L. C. Wrobel</i>	249-253
Combined heat and fluid flow in a double wall infant incubator	
<i>Kenan Gürsoy, Y. Onur Devres</i>	254-258
The effect of process parameters on thawing time of frozen foodstuffs with a one dimensional finite difference model	
<i>Saeed Jameh-Bozorghi, Davood Nori-Shargh, Romina Shakibazadeh and Farzad Deyhimi</i>	259-261
DFT Study and NBO (Natural Bond Orbital) Analysis of the Mutual Interconversion of Cumulene Compounds	
<i>Soon Suck Jarng, You Jung Kwon, Je Hyoung Lee</i>	262-265
Digital Hearing Aid DSP Chip Parameter Fitting Optimization	
<i>JIANG Hong-Yan, LIN Ya-Ping, HUANG Sheng-Ye, LIU Xiao-Fan</i>	266-269
Model and Algorithm Research for Seeking Efficient Monitor-Nodes Measuring Network Traffic	

<i>Z. Kalogiratou, Th. Monovasilis, T. E. Simos</i>	270-274
Numerical Solution of the two-dimensional time independent Schrödinger Equation by symplectic schemes based on Magnus Expansion	
<i>H.-Y. Kao</i>	275-278
Modeling Knowledge in Traditional Chinese Medicine with Influence Diagrams and Possibility Distributions	
<i>Athanassios Katsis, Hector E. Nistazakis</i>	279-282
Bayesian Sample Size Calculations with Imperfect Diagnostic Tests	
<i>A. Kaya, D. Öktem, A. Önal</i>	283-287
Practical Aspect of Refactoring Patterns for a XP Project	
<i>H. Koshigoe, T. Shiraishi and M. Ehara</i>	288-291
Vertical temperature in the atmosphere during surface inversions	
<i>Areti Kosma, Sonia E. Ulic, Carlos O. Della Vedova and Heinz Oberhammer</i>	292-294
Molecular Structures and Conformations of Some Thioperoxides RS-OR': Experiment and Theory	
<i>S. Kovačič, A. Lesar, M. Hodošček</i>	295-298
ClONO Loss Mechanism in The Presence of NO₂ : A Quantum-Mechanical Study	
<i>D. Krstić, D. Nikezić and N. Stevanović</i>	299-302
Input File of Mathematical Phantom for MCNP-4B Code	
<i>Bjørn Kvamme, Tatyana Kuznetsova, Daniel Uppstad</i>	303-306
Modeling excess surface energy in dry and wetted calcite systems	
<i>Bjørn Kvamme, Tatyana Kuznetsova</i>	307-310
Investigation into Stability and Interfacial Properties of CO₂ Hydrate – Aqueous Fluid System	
<i>S. Lanquetin, R. Raffin, M. Neveu</i>	311-314
Constrained free form deformation on subdivision surfaces	
<i>Beáta Lemli, László Kollár, Géza Nagy, Gellért Molnár, Sándor Kunsági-Máté</i>	315-318
The Predictive Behavior of The Phase Transition Temperatures of Imidazolium Based Ionic Liquids	
<i>O. Levi, B. A. Efros</i>	319-322
A New Fast Algorithm for Exact Calculation of the Discrete 2-D and 3-D X-Ray Transform	
<i>Li Zhong-wen, Jiang Ye-peng, Yu Shui</i>	323-329

An Integration Technology of Checkpointing for DMR with Energy-Aware*W. Liao, D. Lin, P. Wang, Y. Wu*

330-333

Open Mathematical Engine Interface and Its Application*A.C. S. Lino and C. Jaime*

334-336

Theoretical and experimental methods applied to development of new medicines. The arise of new era of drug delivery systems based upon cyclodextrins molecular structure*George P. Lithoxos and Jannis Samios*

337-339

Monte Carlo Simulation of Hydrogen Adsorption in Single Walled Silicon Nanotubes*J. A. López, M. Barreda, J. Artés*

340-343

Algorithms for the Construction of the Semi-analytical Planetary Theories*Jean M.-S. Lubuma and Kailash C. Patidar*

344-347

Finite Element Methods for Self-adjoint Singular Perturbation Problems*Luo Xiangyang, Luo Junyong, Liu Fenlin*

348-352

Fast Searching and Blind Detecting LSB Steganographic Images on the Internet*Ying Luo, Chaolin Wu, Yong Xue, Guoyin Cai, Yingcui Hu and Zhengfang Wang*

353-360

A Remote Sensing Application Workflow and its Implementation in Remote Sensing Service Grid Node*L. Ma, H. Miyajima, N. Shigei*

361-364

Learning Characteristics of Multi-Layered Higher Order Neural Networks*L. Madej, P. D. Hodgson, M. Pietrzyk*

365-368

The Remeshing Problem in the Multi Scale Strain Localization CAFÉ Approach*Tahir Mahmood, M. A. Choudhry, Salman Amin, Aamir Hanif*

369-372

Methodology to Modify Existing Electromechanical Disc-type Energy Meters to AMR*Joanna Makowska, Katarzyna Bagińska, Franciszek Kasprzykowski, Jorge A. Vila, Anna Jagielska, Adam Liwo, Lech Chmurzyński and Harold A. Scheraga*

373-376

Interplay of Charge Distribution and Conformation in Polypeptides. Comparison of Theory and Experiment*Mariusz Makowski, Joanna Makowska, Lech Chmurzyński*

377-380

Theoretical Calculations of Homoconjugation Equilibrium Constants in Systems Modeling Acid-Base Interactions the in Side-Chain of Biomolecules Using the Potential of Mean Force

<i>Ch. Mamaloukas, S. I. Spartalis and Z. Manussaridis</i>	381-383
Decomposition method in comparison with Numerical Solutions of Burgers Equation	
<i>A. Margaris, E. Kotsialos and M. Roumeliotis</i>	384-387
Speech Frame Extraction Using Neural Networks and Message Passing Techniques	
<i>I. Martín, E. Mayor, A. M. Velasco</i>	388-389
Photoionisation of Nitric Oxide in the Upper Atmosphere. A MQDO Study	
<i>J. M. Matías, J. Taboada, C. Ordóñez</i>	390-393
Partially Linear SVMs used to Predict Mine Slope Movements	
<i>M. Matsumiya and M. Shimoike</i>	394-397
Estimation of Chemical Potential in Molten Rare Earth and Alkali Chlorides by Molecular Dynamics Simulation	
<i>E. D. Mantzourani, T. V. Tselios, S. Golič-Grdadolnik, J. M. Matsoukas, A. Brancale, J. A. Platts, and T. M. Mavromoustakos</i>	398-401
Exploration of conformational space of linear EAE antagonist [Arg⁹¹, Ala⁹⁶] MBP₈₇₋₈₉ and proposal of a putative bioactive conformation in DMSO-d₆	
<i>T. Mavromoustakos, P. Zoumpoulakis, M. Zervou, N. Benetis</i>	402-405
Theoretical Calculations constitute a Valuable Tool to Understand the Molecular Basis of Hypertension	
<i>E. Meral and M. Demiralp</i>	406-409
Phase Space Consideration in Quantum Dynamical Fluctuation Expansion	
<i>A. Mohajeri</i>	410-413
The Gas-Phase Proton Affinity: Basis Set And Correlation Effects	
<i>P. Mohn, S. Khmelevskiy and J. Redinger</i>	414-416
Surface Magnetism in YCo₂	
<i>Th. Monovasilis, Z. Kalogiratou, T. E. Simos</i>	417-420
Application of Symplectic Partitioned Runge-Kutta Methods to Hamiltonian Problems	
<i>Alejandro Montoya and Brian S. Haynes</i>	421-424
Binding States and Structural Analysis of Hydroxyl on Ag(111)	
<i>José F.M. Morgado and Abel J.P. Gomes</i>	425-428
A Generalized False Position Numerical Method for Finding Zeros and Extrema of a Real Function	

<i>Panjit Musik and Krisanadej Jaroensutasinee</i>	429-432
Large-Scale Water Flow Simulation in <i>Mathematica</i> Computing Environment with a PC Cluster	
<i>Davood Nori-Shargh, Fahimeh Roohi, Farzad Deyhimi and Reza Naeem-Abyaneh</i>	433-435
Natural Bond Orbital (NBO) Analysis Of The Metallotropic Shifts in Cyclopentadienyl(trimethyl)silane, -germane and -stannane	
<i>Z. Slanina and S. Nagase</i>	436-437
Kinetic Control of the Production of Fullerene Derivatives: Illustrative Computations on Thermodynamics and Kinetics of C60O and C60O2	
<i>D. Öktem, A. Kaya, Ş. Çakar</i>	438-443
Virtual Plant Evolution with Genetic Algorithms	
<i>S. Ch. Palligkinis, G. Papageorgiou and I. Th. Famelis</i>	448-448
Runge - Kutta Methods for Fuzzy Differential Equations	
<i>Mi-Young Park, Young-Cheol Kim, Moon-Hye Kang, and Yong-Kee Jun</i>	449-454
Improving On-the-fly Race Detection for Message-Passing Programs	
<i>G. Pelekanos, V. Sevroglou</i>	455-458
Estimating the Regularization Parameter for the Linear Sampling Method in Acoustics	
<i>Manuel Perez, L. Carretero, P. Acebal</i>	459-462
Fixed Point Iterative Method to solve 1D wave equation. Application to 1D photonic crystals	
<i>Raquel R. Pinho, João Manuel R. S. Tavares and Miguel V. Correia</i>	463-466
A Movement Tracking Management Model with Kalman Filtering, Global Optimization Techniques and Mahalanobis Distance	
<i>G. Plitsis</i>	467-470
Application of Nonlinear Dynamics in WLANs	
<i>G. Plitsis</i>	471-474
Chaos Engineering against Conflicts between WiFi and Bluetooth Coexisting Devices	
<i>Katerina Pokozy-Korenblat, Federica Ciocchetta, and Corrado Priami</i>	475-478
Formalization of a Biological Domain with Beta Binders	
<i>R. Prosmitti, A. Valdés, P. Villarreal, G. Delgado-Barrio</i>	479-482
Potential Energy Surfaces For Triatomic And Tetratomic van der Waals Complexes	

<i>H.W. Pyun</i>	483-486
An Efficient Facial Animation Method for Mobile Agent Display	
<i>J. Reimann and G. Vachtsevanos</i>	487-491
Computational Methods in Pursuit-Evasion Problems	
<i>A. Roman</i>	492-495
Synchronizing Finite Automata with Short Reset Words	
<i>M. Ropotar, Z. Kravanja</i>	496-499
Profit optimization of Batch Reactor	
<i>I.G. Ryabinkin, N.F. Stepanov, G. Nyman</i>	500-503
Reduced Dimensionality Approaches in Quantum Dynamics. Ozone Photodissociation including Nonadiabatic Effects	
<i>Ryo Saegusa and Shuji Hashimoto</i>	504-508
Theory and Applications of a Nonlinear Principal Component Analysis	
<i>S. Sakata, F. Ashida, M. Zako</i>	509-512
Comparative Study on Gradient and Hessian Estimation by Kriging and Neural network approximation for Optimization	
<i>Teruji Sekozawa, Shinsuke Takahashi</i>	513-517
Energy Management System Based on Nonlinear Optimization for Direct Fuel Injection Engine and Continuous Variable Transmission	
<i>Mayumi Shimizu and Yasuaki Nakamura</i>	518-522
Smooth Surface and Detailed Voxel Construction with Volumetric Implicit Function for Neurosurgical Simulation	
<i>DongMyung Shini, HeeUn Park, YooJae Won, ByungJin Cho</i>	523-526
Hierarchical-Key Renewal Scheme For Multi-level Multicast Access Control	
<i>Ranber Singh</i>	527-530
Boson Peak in Amorphous Silicon	
<i>K. Skowronska, Z. Skowronski, M. Biziuk</i>	531-536
The Fuzzy Neural Network: Application For Trends in River Pollution Prediction	
<i>Z. Skowronski, K. Skowronska, M. Biziuk, J. Namieśnik</i>	537-541
Key Concepts for Implementation a Web-Based Project Management in Worldwide Science Project	
<i>A. Svandal, B. Kvamme, L. Grønås and T. Pusztai</i>	542-545
Modeling the dissociation of carbon dioxide and methane hydrate using the Phase	

Field Theory

Kornélia Szabó, László Kollár, Géza Nagy, Sándor Kunsági-Máté 546-549

Effect of the Entropy Compensation on the Stability of Host-Guest Complexes Applied in Selective Chemical Sensors

Tarmo Tamm, Juha Linnanto, Aleksandr Ellervee, Arvi Freiberg 550-553

Modeling of Pressure Effects on Absorption Spectra of Solvated Chlorophyll and Bacteriochlorophyll Molecules

Y. -H. Tang and M. -H. Tsai 554-557

Electronic Structures of Self-Assembled Monolayer of Molecules of Symmetric Disulfides of Benzoic Acid

Jiakui Tang, Yong Xue, Yanning Guan, Yincui Hu, Aijun Zhang, Guoyin Cai 558-563

Grid-based Dichotomy Search Algorithm with Radiative Transfer Computation for Atmospheric pollution monitoring

M.E. Theocharis , C.D. Tzimopoulos , M. A. Sakellariou - Makrantonaki , S. I. Yannopoulos, and I. K. Meletiou 564-569

Optimal Rural Water Distribution Design Using Labye's Optimization Method and Linear Programming Optimization Method

Francisco Torrens 570-571

Resonance in an Interacting Induced-Dipole Polarization Model

G. Tsigaridas, I. Polyzos, V. Giannetas and P. Persephonis 572-575

Effects of Two-Photon Absorption on the Propagation of Optical Solitons

Ch. Tsitouras 576-581

Explicit Eighth Order Hybrid Numerov Type Methods With Nine Stages

Antonio Jr Vallejo Guevara, Rubén Morales-Menéndez, Juan A. Nolasco Flores, L. Enrique Sucar Succar, Ciro A. Rodríguez 582-585

New Approach to Monitor the Tool Condition in a CNC Machining Center

H. Voss 586-589

Electron Energy Level Calculation for a Three Dimensional Quantum Dot

Quanyu WANG, Zhe WANG, Jiaping HAO 590-594

A Generic Numerical Inverse Kinematic Algorithm for the Articulated Robot

Thomas Wüst and Jürg Hulliger 595-598

Vector Property Generation by a Stochastic Growth Process

Xiaohua Xu, Ling Chen, Ping He 599-601

Variable Population Size Made Genetic Algorithm Optimal

<i>İ. Yıldız, A. İnan, L. Balas</i>	602-605
Numerical Modelling Of Wave Induced Circulation	
<i>J. Zamastil, J. Čížek, L. Skála and M. Šimánek</i>	606-611
Calculation of the Atomic Integrals by means of $so(2,1)$ Algebra	
<i>Qin Zheng, Wang Lei, Zou Jian-jun</i>	612-615
Vector based Fault-Tolerant Routing in Hypercube Multicomputers	
<i>S. Zimeras</i>	616-618
Automatic Reconstruction in Single Photon Emission Computed Tomography Using Inhomogeneous Markov Random Fields Models	
<i>S. Zimmermann</i>	619-622
Convergence of a Colocated Finite Volume Scheme for the Incompressible Navier-Stokes Equations	

Symposiums of ICCMSE 2005

<i>George Maroulis</i>	623-624
Electric (hyper)polarizability: From atoms and molecules to the nonlinear optics of materials. A celebration of David Bishop's contribution	
<i>Ajit J. Thakkar</i>	625-629
David M. Bishop, the quintessential gentleman-scientist	
<i>M.Yu. Balakina</i>	630-632
Anisotropic Continuum Model for the description of the Effect of Deformable Polarizable Polymer Matrix on the Nonlinear Optical Response of Incorporated Chromophores	
<i>Benoît Champagne, Milena Spassova And Bernard Kirtman</i>	633-636
<i>Ab initio</i> Investigation of Doping-effects on the Electronic and Vibrational Second Hyperpolarizabilities of Polyacetylene Chains	
<i>M. Del Zoppo, A. Lucotti, G. Zerbi</i>	637-638
New Conjugated Organic Systems With Large Vibrational Polarizabilities	
<i>Feng Long Gu, Bernard Kirtman, and Yuriko Aoki</i>	639-642
Localization Scheme for the Elongation Method in the Presence of an Electric Field	
<i>Uwe Hohm</i>	643-646
Fuzzy electro-optics: Approximations of linear and non-linear electro-optical	

properties

Ji-Kang Feng, Xin Zhou 647-650

Theoretical Investigation on Two-photon Absorption of C₆₀ and C₇₀

Josep M. Luis, Miquel Torrent-Sucarrat, Nicolas S. Bonness, David M. Bishop And Bernard Kirtman 651-654

Treatment of Vibrational Contribution to Resonant and Non-Resonant Optical Properties for Molecules with Large Anharmonicity

P. Karamanis, C. Pouchan, G. Maroulis 655-658

Polarizability in Small Cadmium Selenide Clusters (CdSe)_n, n=1, 2, 3 and 4

P. Karamanis, G. Maroulis 659-662

(hyper)polarizability Evolution in the Series H-C≡C-C≡C-CX₃, X = H, F, Cl, Br and I

Akihiro Morita and Tateki Ishida 663-666

Charge Response Kernel Theory based on Ab Initio and Density Functional Calculations

D. Y. Zhang, C. Pouchan, D. Jacquemin, E. A. Perpète 667-673

Ab Initio Studies of Electronic First Hyperpolarizability of AB Systems Containing Phosphorus and Silicon Atoms

O. Quinet 674-677

Fully Analytical TDHF Schemes for the Determination of Mixed Derivatives of the Energy : Application to the ZPVA Corrections of $\beta(-\omega_\sigma; \omega_1, \omega_2)$

R. Resta, K.N. Kudin and R. Car 678-678

About the Longitudinal Polarizability of Quasilinear Systems

Chiara Cappelli, Susanna Monti, Antonio Rizzo 679-681

The Infrared and Vibrational Circular Dichroism Spectra of (S)-Proline in Water: an ab initio study

Kenneth Ruud 682-685

Computational Challenges in Vibrational Contributions to (non)linear Optical Properties in the Gas and Liquid Phase

H. Sekino, Y. Maeda and S. Hamada 686-688

Dynamic Response Property Evaluation by Multi-resolution Multi-wavelet Basis Set

Hajime Torii 689-692

Responses of Molecular Vibrations to Electric Fields and Their Effects on Vibrational Spectra

<i>Demetrios Xenides</i>	693-696
On the (hyper)polarizability of N_4 (Td)	
<i>George Maroulis</i>	697-698
Trends and perspectives in Computational Chemistry	
<i>Y. Aoki, M. Makowski and F. L. Gu</i>	699-702
Performance of the Elongation Method for Large Systems	
<i>C. Ghanmi, H. Berriche and H. Ben Ouada</i>	703-708
Theoretical investigation of the KRb^+ ionic molecule: potential energy, K and Rb polarisabilities and long-range behaviour	
<i>S. Consta</i>	709-712
Detecting Reaction Pathways and Computing Reaction rates in Condensed Phase	
<i>V. S. Gurin, Vitaly E. Matulis, M. V. Korolkov, S. K. Rakhmanov</i>	713-716
SAC-CI study of a series of the lowest states of HCl^+	
<i>K. Harigaya</i>	717-720
Exciton Effects in Möbius Conjugated Polymers	
<i>Agnie M. Kosmas and Evangelos Drougas</i>	721-723
Complex Orbital Calculation of Singlet-Triplet Molecular Oxygen Spacing and its Effect on the Theoretical Investigation of a Large Number of Atmospheric Reactions	
<i>R. J. Magyary, V. Mujica, C. Gonzalez and M. Marquez</i>	724-726
Chemically Induced Magnetism in Nano-clusters	
<i>M. Menadakis, G. Maroulis, P. G. Koutsoukos</i>	727-730
A Quantum Chemical Study of Doped Aragonite and Comparison with Calcite	
<i>Areti Kosma, Sonia E. Ulic, Carlos O. Della Vedova and Heinz Oberhammer</i>	731-731
Molecular structure and conformations of some thioperoxides RS-OR': experiment and theory	
<i>P. Ramasami</i>	732-734
Gauche and Trans Conformers of 1,2-Dihaloethanes: A Study by <i>ab initio</i> and Density Functional Theory Methods	
<i>G. Rollmann and P. Entel</i>	735-738
Electron Correlation Effects in Small Iron Clusters	
<i>Peter Schwerdtfeger</i>	739-739

The Quest for Absolute Chirality

V.F. Sokolov, G.N. Chuev 740-743
Efficient Computation of Hydrophobic Interactions Based on Fundamental Measure Treatment

Ioannis Thanopoulos and Moshe Shapiro 744-747

Switching Nucleotide Base Pairs by Coherent Light

T. A. Wesolowski 748-750

Multi-level Computer Simulations of Condensed Matter Based on Subsystem Formulation of Density Functional Theory

D. Xenides, B. R. Randolph and B. M. Rode 751-754

On the Structure of Liquid Water: An ab initio QM/MM MD Simulation Study

K. Balasubramanian 755-756

Preface to the Minisymposium on Mathematical and Computational Approaches to Structure, Dynamics and Biology

J. Arsuaga, M. Vazquez, J. Roca, D.W. Summers 757-758

Using DNA Knots To Assay Packing of DNA in Phage Capsids

K. Balasubramanian 759-764

Relativistic Effects in the Chemistry of very Heavy and super heavy Molecules

K. Balasubramanian 765-767

Computational and Mathematical Approaches to Clusters, Fullerenes and Proteomes

S. C. Basak 768-771

Use of Proteomics Based Biodescriptors Versus Chemodescriptors in Predicting Halocarbon Toxicity: An Integrated Approach

D. G. Bonchev 772-775

Networks – The Universal Language of the Complex World

Ramon Carbó-Dorca 776-780

Molecular Quantum Similarity Measures in Minkowski Metric Vector Semispaces

Laurence E. Fried, M. Riad Manaa and Evan J. Reed 781-784

Simulations of Highly Reactive Fluids

Richard H. Gee, Naida M. Lacey, and Larry E. Fried 785-789

Molecular Dynamics Simulations of Spinodal-Assisted Polymer Crystallization

Haruo Hosoya 790-791

Quantum Chemistry Literature Data Base

R. Bruce King 792-795
The Mathematics of Zeolite-like Possible Carbon and Boron Nitride Allotropes

Xiangzhu Li and Josef Paldus 796-799

STATE-UNIVERSAL MULTIREFERENCE COUPLED-CLUSTER METHOD USING A GENERAL MODEL SPACE

Chandrika J. Moudgal 800-801

Applying Computational Methods to Assess the Toxicity of Chemical and Biological Agents that Lack Empirical Data

Lionello Pogliani 802-803

An Algorithm for the Hydrogen Atoms in Chemical Graphs

Ioan Silaghi-Dumitrescu, Attila Kun, Alex Lupan, and R. Bruce King 804-806

Germanium Cluster Polyhedra: A Density Functional Theory Study

Masae Takahashi 807-810

Prediction of Reaction Pathways and New Properties in Organosilicon Compounds Based on *ab initio* MO and Density Functional Theory Calculations

2nd Symposium on Industrial and Environmental Case Studies - Preface 811-814

Nicolas Abatzoglou and Maher Boulos 815-821

Preliminary Engineering Study for Evaluating the Industrial Feasibility of the Chemical Recycling of PET through Glycolysis

E. Dimitriou and I. Zacharias 822-826

Micro-climatic and Anthropogenic Impacts on the Hydroecological Regime of a Large Freshwater Body

Rubén Morales-Menéndez, Sheyla Aguilar, Antonio Jr Vallejo, Miguel Ramírez Cadena, Francisco J Cantú Ortiz 827-830

Surface Roughness Modelling in High Speed Machining

Irma Yolanda Sánchez Chávez, Rubén Morales-Menéndez, Sergio Omar Martínez Chapa 831-834

Glucose Optimal Control System in Diabetes Treatment

D. Benson-Karhi, H. Shore, M. Shacham 835-838

Applying Response Modeling Methodology to Model Temperature-Dependency of Vapor Pressure

I.V. Soboleva, E.M. Koltsova, A.V. Jensa 839-842

Industrial Case Study of Reaction Kinetics Applied for Continuous Dihydrate – Hemihydrate Method of P2O5 Production for Low Grade Phosphorites

<i>G. Triantafyllou, G. Korres, I. Hoteit, A. Pollani and G. Petihakis</i>	843-847
Simultaneous assimilation of physical and biological observations into a coupled ecosystem model using Joint and Dual Kalman filtering	
<i>Antonio Jr. Vallejo Guevara, Rubén Morales-menéndez, Juan A. Nolasco Flores, L. Enrique Sucar Succar, Ciro A. Rodríguez</i>	848-851
New Approach to Monitor the Tool Condition in a CNC Machining Center	
<i>F. A. Batzias, C.G. Siontorou</i>	852-858
Odor Fingerprinting/Monitoring within a Processing Industry Environment by Means of Distributed Biosensors – The Case of Oil Refineries	
<i>F. A. Batzias, C.G. Siontorou</i>	859-865
Introducing Chemical Engineering Processes into Optimal Design of Measuring Systems Equipped with Biosensors	
<i>A. I. Pollani</i>	866-871
Modeling Oil Spills in Areas of Complex Topography	
<i>P. Stathatos, D.K. Sidiras and F.A. Batzias</i>	872-877
Co-firing Different Types of Biomass as a Contribution to Households' Energy Independence and Environment Protection at Local Level	
<i>F. A. Batzias</i>	878-886
Computer Aided Design of an Anaerobic Digester with Low Biogas Production for Decision Making Under Uncertainty	
<i>F. A. Batzias and D.K. Sidiras</i>	887-893
Optimal Design of Cyclone/Chimney System – Implementation within an Olive Pomace Oil Mill	
<i>F.A. Batzias</i>	894-901
Contribution to Pre-Selection and Re-Design of Cyanides Destruction Method at Industrial Level for Environmental Protection	
<i>D.F. Batzias</i>	902-909
Determination of Optimal Subsidy for Renewable Energy Sources Exploitation by Means of Interval Analysis	
<i>Y.G. Matsinos, A.D. Mazaris</i>	910-914
Simulating Nest Census Data for the Endangered Species of Marine Turtle <i>Caretta-caretta</i>	
<i>A. Bratsos</i>	915-915
Modelling and Analysis of Nonlinear Physical Problems	

<i>A. G. Bratsos</i>	916-919
On the Numerical Solution of the Sine-Gordon Equation in 2+1 Dimensions	
<i>A. G. Bratsos and I. Th. Famelis</i>	920-923
On the Numerical Solution of the Kadomtsev-Petviashvili Equation	
<i>J. A. Esfahani , Y. Daghighi , A. Nabovati</i>	924-927
Numerical Analysis of Turbulent Fluid Flow in Rotor Stator Gap with Injection from Rotor Surface	
<i>J. A. Esfahani , A. Mokhtari, Y. Daghighi</i>	928-932
Numerical Analysis of Taylor-Couette Flows in Wavy and Non-Wavy Regimes	
<i>Z.X. Yu, Y.R Shi, H.Y Hsu, L.X Kong</i>	933-936
Application of Nonlinear Regression Method in the Evaluation of Piezoelectric Materials	
<i>Per-Olof Åstrand</i>	937-941
Computational Molecular Science: Hybrid Classical-Quantum and Force Field Methods	
<i>G. Archontis and T.Simonson</i>	942-944
Proton Binding to Proteins: Insights from Continuum Models with a Linear Response Approximation	
<i>M. L. Chodkiewicz</i>	945-948
Multicenter Multipolar Representation of Electrostatic Potential for Flexible Molecules	
<i>Z. Cournia , J.C. Smith and G.M. Ullmann</i>	949-953
Development and Validation of a Force-Field for Biologically Important Sterols in Biomembranes	
<i>Luca Frediani</i>	954-957
Third-Order Optical Properties of Molecular Systems in Solution by Means of Response Theory	
<i>L. Jensen</i>	958-960
Local Field Effects on Nonlinear Optical Properties: Insights From Combined Quantum Mechanical and Molecular Mechanics Models	
<i>B. Mennucci</i>	961-965
New frontiers for Continuum Solvation Models	
<i>Kurt V. Mikkelsen</i>	966-971
Correlated Electronic Structure Nonlinear Response Methods for Structured Environments	

<i>S. Polydoridis and G. Archontis</i>	972-975
Aromatic Association in Aqueous Solution: a Potential of Mean Force Study	
<i>C.F. Sanz-Navarro, C. Dezi, J. Brea, M. Pastor and F. Sanz</i>	976-979
Molecular Dynamics Simulations of Conformational Changes in 7-helix Transmembrane Receptors	
<i>M. Swart and F. M. Bickelhaupt</i>	980-982
Computational study on the structure and replication of DNA	
<i>Gaétan Weck and Per-Olof Åstrand</i>	983-986
Interaction and Equalization Models to Calculate Molecular Dipole Moments and Polarizabilities	
<i>René Fournier and Michael Springborg</i>	987-989
Symposium on Computational Methods for Atomic and Molecular Clusters	
<i>Hannu Häkkinen and Michael Walter</i>	990-993
Computational Spectroscopy of Supported Cluster nanocatalysts	
<i>J. A. Alonso and M. Isla</i>	994-997
Computer Simulation of the Fragmentation and Coulomb Explosion of Clusters by the Interaction with a Femtosecond Laser	
<i>Gilles H. Pestherbe, Qadir K. Timerghazin and Denise M. Koch</i>	998-1001
First-Principles Molecular and Reaction Dynamics Simulations: Application to the Structure, Thermodynamics and Photochemistry of Ionic Aqueous Clusters	
<i>Roger P. Webb</i>	1002-1005
Insight into Energetic Cluster Impacts on Solid Surfaces Provided by Computer Simulation	
<i>Stephanie Wong, Nicholas Blinov, and Pierre-Nicholas Roy</i>	1006-1009
Rotations in Doped Quantum Clusters	
<i>Yi Dong, Michael Springborg, Markus Burkhardt, and Michael Veith</i>	1010-1013
Structural and Electronic Properties of Nanostructured HAIO and AIO	
<i>John D. Head and Yingbin Ge</i>	1014-1017
Theoretical identification of the lowest energy Si_xL_y clusters using Genetic Algorithms	
<i>Mukul Kabir, Abhijit Mookerjee and D. G. Kanhere</i>	1018-1021
Magnetism in Pure and Doped Manganese clusters	

<i>O. I. Obolensky, I. A. Solov'yov, A. V. Solov'yov, W. Greiner</i>	1022-1025
Determination of Atomic Cluster Structure with Cluster Fusion Algorithm	
<i>Michael Springborg, Valeri G. Grigoryan Yi Dong, Denitsa Alamanova, Habib ur Rehman, and Violina Tevekeliyska</i>	1026-1031
Structural and Electronic Properties of Metal Clusters	
<i>Chih-Young Hung</i>	1032-1033
Symposium	
Computational Economics and Data Analysis	
<i>Wen-Han Tang, Jia-Ren Yang, Hua-Kai Chiou</i>	1034-1038
Multiple Objective Compromise Optimization Method to Analyze the Development Strategies of Nanotechnology in Taiwan	
<i>Chih-Young Hung, Yi-Hui Chiang</i>	1039-1043
Using Fuzzy MCDM Approach on A/R Collection Instruments selection in Taiwan's Hsinchu Science Park	
<i>Hsun-Jung Cho, Yuh-Ting Wu</i>	1044-1047
Microscopic Analysis of Desired-Speed Car-Following Phenomena	
<i>Terry Friesz, Hsun-Jung Cho, Pei-Ting Yeh</i>	1048-1052
Estimating O/D Matrix from Traffic Count with Network Sensitivity Information	
<i>Yow-Jen Jou, Chien-Lun Lan</i>	1053-1056
User-Oriented Travel Time Prediction Using Grey System and Real-time Vehicle Detector Data	
<i>T. E. Simos</i>	1057-1057
Preface of the Symposium : Stochastic Computational Techniques in Engineering and Sciences	
<i>M. M. Kamiński</i>	1058-1061
Generalized Stochastic Perturbation Technique in Engineering Computations	
<i>L. Figiel and M. Kamiński</i>	1062-1064
Deterministic and Probabilistic Sensitivity Analysis of Fatigue Fracture Model Parameters for a Curved Two Layer Composite	
<i>M. Gall and R. Kutner</i>	1065-1068
Simulation of the Carnot Engine in the Frame of Statistical Mechanics	
<i>Li Zhong-wen, Yu Shui</i>	1069-1072
