CONTENTS

OBITUARY
Em. Professor E.J. Underwood ....................................................... 14

KEYNOTE PAPERS

Parenteral and enteral nutrition
B. Isaksson ................................................................. 18

Hospital malnutrition
B. Isaksson ................................................................. 26

SYMPOSIA

DETERMINATION OF NUTRIENT REQUIREMENTS

Trace element requirements
R.M. Smith ................................................................. 36

Determination of essential fatty acid requirements
A.J. Sinclair ................................................................. 44

Determination of vitamin requirements in human nutrition
D.M. Flint, M.J. Wahlqvist and E.A. McLennan ......................... 52

AUSTRALIAN GROWTH STUDIES

A review of the Melbourne child growth study
A. Cahn and J. Steel ......................................................... 64

The Perth study
N.E. Hitchcock and E.N. Owles .......................................... 71

The Geelong study
I.H.E. Rutishauser and S. Hunter .................................... 79

LACTATION

Hormone regulation of milk secretion
I.R. Falconer and A.T. Vacek ............................................ 90

The influence of nutrition on milk yield and composition in ruminants
E.F. Annison and G.H. McDowell .................................. 96

Lactation in Australian women
P.E. Hartmann, J.K. Kulski, S. Rattigan and L. Saint ............. 104

DIETARY FIBRE

Fibre in human nutrition - present status
M. Eastwood ............................................................... 112

Physical chemistry of dietary fibre
D. Oakenfull ................................................................. 119
The chemical analysis of dietary fibre and its implications for human nutrition
G.P. Jones ................................................................. 126

VITAMIN D AND DIETARY CALCIUM AND PHOSPHORUS

Are dietary calcium and phosphorus important?
P. Clifton-Bligh .................................................. 134

Vitamin D
R.G. Larkins .......................................................... 139

Calcium and phosphorus metabolism in the ruminant animal
J.H. Ternouth .......................................................... 144

CONTRIBUTED PAPERS - ABSTRACTS

The dietary management of children with cow milk allergy
B.C. Lynch .......................................................... 154

The influence of nutritional advice in the development of infant obesity
S. Alexander and J.M. Court ........................................ 155

Influence of early nutrition on the development of body fat and cellularity of adipose tissue in the growing pig
R.G. Campbell and A.C. Dunkin .................................... 156

Compositional development of the zinc-deficient foetal rat
I.R. Record, I.E. Dreosti, S.J. Manuel and R.A. Buckley ...... 157

Use of the lactating ewe as a model for studying effects of nutrition on lactation in the cow
S. Aryajasse, J.M. Gooden and G.H. McDowell ............... 158

The use of a combined mammary gland and hind limb muscle preparation for studies on metabolite utilization in the conscious lactating ewe
J.M. Gooden, J.R. Mercer, E. Teleni, G.M. Hough, G.H. McDowell and E.F. Annison ........................................... 159

Adolescent dietary patterns of Sydney school students

Relationship between blood pressure and water sodium in rural school children
B.M. Margetts, B.K. Armstrong, C.W. Binns, J.R. Masarei and M.G. McCall .......................................................... 161

Rate of weight gain as a function of age
J.C. Brand, J.J. Miller, and I. Darnton-Hill ..................... 162
Nutrient intakes and anthropometric measurements in rural West Australian children
B.M. Margetts, M. Miller, C.W. Binns and B.K. Armstrong ...... 163

Anthropometric measurements of pre-school aboriginal children in rural New South Wales
M. Dowling, D. Condon-Paoloni and T. Coyne ...................... 164

Food intake patterns amongst Greek migrants in Melbourne

Food belief and attitude differences in responders/non-responders to a food education campaign
A.C. Bell, P. Schoeffel and A.M. Stewart ............................ 166

A catalogue of take-away food and take-away food outlets in Adelaide
A.C. Bell and V. Sarafis .................................................. 167

The energy expenditure and food intake of trainee naval clearance divers
J. Pennefather, W.E. Badcock, and D.J. Lichtenstein .............. 168

A nutritional evaluation of the Australian Defence Force Ration Scale
W.E. Badcock and D.J. Lichtenstein .................................... 169

Uptake and oxidation of glucose by the hind limb muscle and mammary gland of the lactating ewe

Dietary adequacy among young mothers in a western Sydney suburb
J.R. Allen and S. Ash ....................................................... 171

Estimation of milk production by lactating mothers
F.J. Cumming and I.H.E. Rutishauser ................................. 172

The relationship between alcohol intake and attitudes towards various aspects of alcohol consumption in a group of adolescent school children
K.I. Baghurst ............................................................. 173

A survey of adolescent attitudes to the relationship between nutrition and health
J.E. Pritchard ............................................................. 174
Folic acid status of new admissions to a geriatric unit
L. Lo, D.M. Flint, and M.L. Wahlqvist .................................. 176

Food patterns of Australians at the turn of the century
Wahlqvist ............................................................. 177

A new understanding of the role of vitamin B₁₂ in methylation of
proteins in the nervous system
D.H. Small and P.R. Carnegie ........................................... 178

Effect of zinc supplementation in hypoalbuminaemia
D.M. Flint, M.L. Wahlqvist, D.M. Prinsley, and P.A. Dryden ... 179

Aspects of zinc deficiency in the hippocampus and cerebellum of
suckling rats
I.E. Dreosti, S.J. Manuel, F.J. Fraser, R.A. Buckley and
I.R. Record ............................................................. 180

The influence of milk in the diet on the retention of orally
ingested lead in the rat
R.R. Bell and J.T. Spickett .............................................. 181

Increased glutathione peroxidase activity in zinc-deficient
sheep
C.L. White ................................................................. 182

An improved assay of ceruloplasmin activity in domestic species
D.I. Paynter ................................................................. 183

Analysis of metal content of scalp hair as a diagnostic tool:
a study of sample preparation techniques
C. Reilly ................................................................. 184

Effect of alcohol on plasma and platelet ascorbic acid in
gastrointestinal bleeding
B.J. Strauss, P.S. Hunt, M.L. Wahlqvist, M.G. Korman,
G.N. Brodie, and H. Setiadi ........................................... 185

Post-war trends in bowel cancer in twelve countries in relation
to war time changes in flour milling
J. Powles and D.R.R. Williams .......................................... 186

The lipid-lowering effect of soy protein in hyperbetalipoprotein-
aemic men
and K.K. Carroll ....................................................... 187

Effect of physical form of dietary carbohydrate in determining
postprandial glucose and insulin responses in diabetics
G. Collier, K. O'Dea and P. Nestel ................................... 188

Ammonia treatment of whole wheat grain for cattle
S. Low and R.C. Kellaway .............................................. 189
Amino acid availability in the small intestine of sheep given labelled proteins treated with formaldehyde
   J.R. Ashes, L.A. Colgan, J.L. Mangan, and G.S. Sidhu ............ 190

Roughage intake and digestion comparisons with lambs and adult sheep
   R.H. Weston .................................................. 191

The effect of α-tocopherol and other dietary antioxidants on plasma high density lipoprotein levels
   D.R. Sullivan and A.S. Truswell ................................ 192

Effects of vitamin C and dietary fat on plasma cholesterol in the marmoset
   G.H. McIntosh, R.J. Illman, and D.L. Topping ..................... 193

Polyunsaturated fatty acids in meat from eight mammalian species
   A.J. Sinclair and W. Slattery .................................. 194

Effects of Quillaja and soya saponins on plasma cholesterol and faecal steroid excretion in the rat
   D.L. Topping, R.J. Illman, D.E. Fenwick and D.G. Oakenfull ... 195

Lipoprotein and sterol metabolism in vegetarians
   P. Nestel and T. Billington ................................... 196

Computer assessment of diet histories : fibre
   A. Wailes ........................................................ 197

The effect of lipid on invitro assessment of rice pollard and wheaten chaff by ruminants
   S.K. Gulati and the late L.J. Cook ............................... 198

Role of linoleic, γ-linolenic and arachidonic acids in the prevention of clinical signs of essential fatty acid deficiency in cats
   E.A. Monger, A.J. Sinclair and J.G. McLean ...................... 199

The kinetics of fibre digestion in the rumen of sheep
   A.C. Dunlop and R.C. Kellaway ................................ 200

Acetate metabolism in the sheep hind limb : effects of exercise and plane of nutrition
   A.R. Bird, K.D. Chandler and A.W. Bell .......................... 201

Methionine : hormone interactions and wool growth
   P.C. Wynn, A.L.C. Wallace and E.F. Annison ..................... 202

Glucocorticoid effects in protein deficient rats
   F.M. Tomas and L.M. Pope ..................................... 203
Effects of dietary nitrogen content and source on faecal nitrogen excretion
G. McL. Dryden .................................................. 204

The estimation of metabolic faecal nitrogen loss in the sheep
G. McL. Dryden .................................................. 205

Ethionine as an inhibitor of wool growth
P. J. Reis and D. A. Tunks ..................................... 206

Digestion kinetics of untreated and alkali-treated oat straw in cattle
N. Sriskandarajah, J. Leibholz and R. C. Kellaway .......... 207

The nutritional value of rice pollard for lambs
The late L. J. Cook, J. P. Hogan and P. Davis ............... 208

Fatty liver and kidney syndrome in biotin supplemented broiler chicks
P. Steele, G. Doncon and J. Edgar .......................... 209

Development of ruminal thiaminase type 1 activity in grain fed sheep
P. Steele, D. P. McKenzie and G. Doncon .................... 210

Urea synthesis by the sheep foetus
G. J. Faichney and G. A. White ............................ 211

Does gastrin cross the sheep placenta?
A. W. Bell, P. D. Cranwell and J. Hansky .................. 212

Net glucose and amino nitrogen uptake by the pregnant uterus and leg muscle of sheep
V. H. Oddy and A. W. Jones .................................. 213

Dietary fibre and constipation in pre-school age children
S. J. Duncan and G. P. Jones ................................ 214

A study to examine the prevalence of coronary risk factors in an industrial community

Evaluation of a diabetes education program
G. Blau, D. M. Flint and M. L. Wahlqvist .................. 216

Use of nicotinic acid and clofibrate in the management of hyperlipidaemic patients
D. L. McInnis, M. L. Wahlqvist and N. Balazs .............. 217
