Proceedings

Of the

First International

Citrus Symposium

Held at
The University of California
Riverside, California, U.S.A.
March 16-26, 1968

In celebration of the
Centennial of
The University of California

Volume II

Edited by

Homer D. Chapman
Department of Soils and Plant Nutrition

University of California Riverside, California
March 1969
# Volume II
## Table of Contents

**Foreword** ................................................................. XI

**CITRUS COLD HARDINESS AND COLD PROTECTION WORKSHOP** Arranged by F.M. Turrell

A.M. Boyce, Dean, School of Agricultural Sciences, University of California, Riverside, California.
"Comments on Conference Objectives" .................................. 503

L.W. Snellman, Head, Scientific Services Division, Weather Bureau, Western Region, Salt Lake City, Utah.
"Development and Limitations of Extended Range Forecasts" ........ 505

Dale R. Harris, Meteorologist in Charge, ESSA-Weather Bureau, Fruit-Frost Service, Pomona, California.
"Practical Application of the Extended Period Forecast" .............. 515

"Features of 30 Years of Weather in Florida's Agricultural Areas" ..... 517

Norman P. Maxwell, Assistant Professor, Texas A&M University, Lower Rio Grande Valley Research and Extension Center, Weslaco, Texas.
"Use of Petroleum Wax Under-the-Tree Heaters in Citrus Groves in the Lower Rio Grande Valley of Texas" ............................... 521

Kenneth K. Barnes and Kenneth R. Frost, Professor and Head, and Professor, Agricultural Engineering Department, The University of Arizona, Tucson, Arizona.
"Petroleum-Coke Heaters: Labor Requirements and Temperature Effects in Under-Tree and Between-Tree Placement" ....................... 525

R.A. Hensz, Director, Texas A&I University Citrus Center, Weslaco, Texas.
"Petroleum Coke Fuel Blocks: Alone and With Wind Machines" ........ 529

J.F. Gerber, Associate Professor of Climatology, University of Florida, Gainesville, Florida.
"Petroleum Coke Heaters vs. Conventional Heaters" ...................... 535

"Electrostatic Heating of Citrus Trees" ................................ 539

J.F. Gerber, Associate Professor of Climatology, University of Florida, Gainesville, Florida.
"Methods of Determining Nocturnal Heat Requirements for Citrus Orchards" ................................................................. 545
C.H. Hendershot, Professor and Chairman, Department of Horticulture, University of Georgia, Athens, Georgia.
“Cold Hardiness and Freezing Point of Citrus” (Abstract) ................................................. 551

“Effect of Freezing on the Photosynthetic System in Citrus” ................................................. 553

“Methods of Determining Cold Hardiness and Cold Injury in Citrus” ...................................... 559

“Recovery of Florida Citrus Trees from Freeze Injury” .............................................................. 565

H.B. Schultz, Professor of Agricultural Engineering, Department of Agricultural Engineering, University of California, Davis, California.
“Influence of Wind Drift on Frost Protection Methods” ............................................................ 571

Neil P. Woodruff, Agricultural Engineer, USDA, Agricultural Research Service, Kansas State University, Manhattan, Kansas.
“Aerodynamics of Windbreaks and Barriers” (Abstract) ............................................................. 551

R.A. Hensz, Director, Texas A&M University Citrus Center, Weslaco, Texas.
“The Use of Insulating Wraps for Protection of Citrus Trees from Freeze Damage” ..................... 575

David E. Angus, Leader in Environmental Physics, University of Queensland, St. Lucia, Queensland, Australia.
“Windmachine Theory and Design” (Abstract) .............................................................................. 577

Physical Characteristics of a Cetyl-Alcohol Fog for Frost Protection” (Abstract) ......................... 579

“The Environment in a Citrus Grove With and Without Heater Blocks During Cold Conditions” ........ 583

Pieter J.C. Kuiper, Associate in Biochemistry, University of California, Riverside, California.
“Surface-Active Chemicals, Membrane Permeability and Resistance of Freezing” ......................... 593

Shonosuki Komiya, Professor of Agriculture, Meiji University, Meiji, Japan.
“On the Frost Injury at the Fujiyoshida Experimental Farm of Meiji University” ......................... 597

F.M. Turrell and S.W. Austin, Professor of Biochemistry, and Principal Laboratory Technician, University of California, Riverside, California.
“Thermal Conductivity and Mass in Stems, Leaves and Fruit in Relation to Frost Resistance” .......... 601

HARVESTING AND PACKING Arranged by R.L. Perry

Roy J. Smith, University of California, Riverside, California.
“Reducing The Obstacles to Efficient Picking in Citrus” .............................................................. 609

Maurice Johnson, Sunkist Growers Inc., Ontario, California.
“Systems Engineering for Citrus Production, Harvest, Packing and Distribution” ......................... 619

Y. Alper and Y. Sarig, Agricultural Engineering Institute, Bet Dagan, Israel.
“Citrus Harvest Mechanization in Israel” ...................................................................................... 623

D.T. Seamount and R.L. Perry, University of California, Riverside, California.
“Single Man Picker Positioning Machines” ................................................................................... 639
John M. Ross, Sunkist Growers Inc., Ontario, California.
"Multiman Picking Machines and Systems in California" ........................................... .647

"Citrus Tree Orchard Modification to Facilitate Mechanical Harvest" ........................... .653

"Citrus Harvest Mechanization in Florida" ........................................................................ .659

G.K. Brown, and P.F. Burkner, Harvesting and Farm Processing Research Branch, AERD, ARS, USDA, Riverside, California and C.E. Chertz, Agricultural Engineering Department, University of Minnesota, St. Paul, Minnesota.
"Mass Harvest Problems in California Citrus" .................................................................... .667

P.G. Wright and P.R. McKinlay, Australian Paper Manufacturers LTD, Melbourne, Australia.
"Citrus Packinghouse Modernization in Australia" ............................................................... .675

Ken Koenig, Sunkist Growers Inc., Ontario, California.
"Packing House Mechanization in California and Arizona" ................................................... .685

Roy J. Smith, University of California, Riverside, California.
"Developments in Fresh Fruit Citrus Packing" ..................................................................... .689

AIR POLLUTION Arranged by O.C. Taylor

J.T. Middleton, National Center for Air Pollution Control, Washington, D.C.
"Air Pollution—Enemy of Man and Agriculture" ............................................................... .699

C.R. Thompson, Statewide Air Pollution Research Center, University of California, Riverside, California.
"Effects of Air Pollutants in the Los Angeles Basin on Citrus” ............................................. .705

W.M. Dugger, Jr., and R.L. Palmer, University of California, Riverside, California.
"Carbohydrate Metabolism in Leaves of Rough Lemon as Influenced by Ozone” .................. .711

C.D. Leonard, and H.B. Graves, Jr., University of Florida, Institute of Food and Agricultural Sciences, Citrus Experiment Station, Lake Alfred, Florida.
"Effect of Fluoride Air Pollution on Florida Citrus” .............................................................. .717

R.F. Brewer, University of California, Riverside, California.
"The Effects of Fluoride Air Pollution on Citrus Growth and Fruit Production” .................... .729

J. Matsushima, Mie University, (Tsu), Mie, Japan.
"Problems in SO₂ Gas Injury to Citrus Trees in Japan” ....................................................... .733

O.C. Taylor, University of California, Riverside, California.
"Oxidant Air Pollutants and Plant Damage” ......................................................................... .741

Shin Suzuki, University of Chiba, Chiba-Shi, Chiba-ken, Japan. Yoshiro Matsuoka, Agricultural Experiment Station, Chiba-shi, Chiba-ken, Teinosuke Kawamura, University of Chiba, and Ichiro Mitani, Meteorological Observatory, Chiba-shi, Chiba-ken.
"Recent Studies on Air Pollution in Chiba” .......................................................................... .747

BIOLOGICAL CONTROL OF INSECTS Arranged by Paul DeBach

Harold Compere, University of California, Riverside, California.
"Changing Trends and Objectives in Biological Control” ..................................................... .755
F.J. Simmonds, Commonwealth Institute of Biological Control, Trinidad, West Indies.  
“The Work of the Commonwealth Institute of Biological Control Relating to Citrus Insects” .................. 765

Israel Cohen, Citrus Marketing Board of Israel, Tel Aviv, Israel.  
“Biological Control of Citrus Insects in Israel” ................................. 769

K. Yasumatsu, Entomological Laboratory, Faculty of Agriculture, Kyushu University, Fukuoka, Japan.  
“Biological Control of Citrus Pests in Japan” ................................. 773

E.J. Jimenez, Departamento de Control Biologico, S.A.G., Mexico.  
“Biological Control of Some Citrus Insects in Mexico” .................. 781

V.P. Rao, Commonwealth Institute of Biological Control, Bangalore, India.  
“India as a Source of Natural Enemies of Pests of Citrus” .................. 785

C. Benassy, Institut National De La Recherches Agronomique, Antibes.  
“The Biological Control Against Coccids of Citrus in the Country of the French Zone” .................. 793

Paul DeBach, University of California, Riverside, California.  
“Biological Control of Diaspine Scale Insects on Citrus in California” .................. 801

C. Argyriou, Benaki Phytopathological Institute, Kifissia, Athens, Greece.  
“Biological Control of Citrus Insects in Greece” ................................. 817

I.M. Hall, University of California, Riverside, California.  
“Diseases of Citrus Insects and Mites” ................................. 823

O. Benoigues Guerrero, Sanidad Vegetal, Lima, Peru.  
“Biological Control of Citrus Pests in Peru” ................................. 827

R.H. Gonzales, University of Chile, Santiago, Chile.  
“Biological Control of Citrus Pests in Chile” ................................. 839

D.P. Annecke, Plant Protection Research Institute, Pretoria, South Africa.  
“Recent Developments in Biological and Integrated Control of Citrus Pests in South Africa” .................. 849

J.A. McMurtry, University of California, Riverside, California.  
“Biological Control of Citrus Mites in California” ................................. 855

M.H. Muma, University of Florida, Institute of Food and Agricultural Sciences, Citrus Experiment Station, Lake Alfred, Florida.  
“Biological Control of Various Insects and Mites on Florida Citrus” ................................. 863

V. Delucchi, FAO Crop Protection Branch, Rome, Italy.  
“Biological Control of Citrus Insects in the Mediterranean Area Excluding Maghreb Countries and Israel” .................. 871

B.R. Bartlett, University of California, Riverside, California.  
“The Biological Control Campaigns Against Soft Scales and Mealybugs on Citrus in California” .................. 875

W.H. Ewart, Department of Entomology, University of California, Riverside, California.  
“Factors Involved in the Development of Control Treatments for Unarmored Scales” ................................. 879

CHEMICAL CONTROL OF INSECTS Arranged by G.E. Carman

L.F. Steiner, Entomology Research Division, Agricultural Research Service, USDA, Honolulu, Hawaii.  
“Control and Eradication of Fruit Flies on Citrus” ................................. 881

W.A. Simanton, University of Florida, Citrus Experiment Station, Lake Alfred, Florida.  
“Use and Value of a Continuous Field Survey in the Control of Citrus Pests” ................................. 889
L.A. Riehl, Department of Entomology, University of California, Riverside, California. 
"Advances Relevant to Narrow-Range Spray Oils for Citrus Pest Control" .......................... 897
"Advances Relevant to Narrow-Range Spray Oils for Citrus Pest Control"

P. de Pietri-Tonelli, G. Biondi and V. Corradini, Montecatini Edison S.P.A., Milan, Italy. 
"Development and Evaluation of Non-Oil Chemical Control Treatments" .......................... 909

L.R. Jeppson, Department of Entomology, University of California, Riverside, California. 
"Impact of Insect and Mite Resistance on Chemical Control Programs on Citrus" .......................... 917

R.F. Brooks, University of Florida, Citrus Experiment Station, Lake Alfred, Florida. 
"Developing Pesticide Application Equipment for Citrus" .......................... 923

K.A. Bederski, Canete, Peru. 
"Insect Population Surveys and Oilrotenone Sprays: Their Use in Peruvian Citrus Orchards" .......................... 933

"Development and Use of Citrus Rootstocks Resistant to the Burrowing Nematode, Radopholus similis" .......................... 941

J.W. Cameron, R.C. Baines, and R.K. Soost, Departments of Horticultural Science and Nematology, University of California, Riverside, California. 
"Development of Rootstocks Resistant to the Citrus Nematode, by Breeding and Selection" .......................... 949

R.C. Baines, T. Miyakawa, J.W. Cameron and R.H. Small, University of California, Riverside, California. 
"Biotypes of the Citrus Nematodes" .......................... 955

G. Scaramuzzi and G. Perrotta, Institute of Plant Pathology, University of Catania, Italy. 
"Research on the Control of Citrus Nematode in the Mediterranean Area" .......................... 957

R.F. Suit, University of Florida Citrus Experiment Station, Lake Alfred, Florida. 
"Treatment of Citrus Trees for Burrowing Nematode Control" .......................... 961

"Control of the Citrus Nematode Under Southwest Irrigation Conditions" .......................... 969

R.C. Baines and R.H. Small, University of California, Riverside, California. 
"Efficacy of Some New Compounds for Control of the Citrus Nematode, Tylenchulus semipenetrans on Established Trees" .......................... 973

E.P. DuCharme, University of Florida Citrus Experiment Station, Lake Alfred, Florida. 
"Temperature in Relation to Radopholus similis (Nematode) Spreading Decline of Citrus" .......................... 979

S.D. Van Gundy and F.D. McElroy, University of California, Riverside, California. 
"Sheath Nematode Its Biology and Control" .......................... 985

"Increasing Yield of Florida Citrus Through Chemical Control of the Citrus Nematode" .......................... 991

J.W. Meagher, Victorian Plant Research Institute, Burnley, Victoria, Australia. 
"Nematodes as a Factor in Citrus Production in Australia" .......................... 999

Y.P. Hung, Kaohsiung District Agricultural Improvement Station, Department of Agriculture & Forestry, Provincial Government of Taiwan, Republic of China. 
"Occurrence of Plant Parasitic Nematodes in Taiwan Citrus Plantations" .......................... 1007
E. Cohn, The Volcani Institute of Agricultural Research, Bet Dagan, Israel.
“The Citrus Nematode, *Tylenchulus semipenetrans* Cobb, as a Pest of Citrus in Israel” .................1013

G. Swarup, Division of Nematology, Indian Agricultural Research Institute, New Delhi, India.
“Nematode Problems of Citrus in India” .................................................................1019

RESIDUES Arranged by Francis A. Gunther

W.E. Baier, Sunkist Growers, Inc. (Retired), Ontario, California.
“Pesticides in Citrus Fruits and Products and United States Governmental Regulations and Tolerances”1021

S. Dormal-van den Bruel, Commission des Communautés Européennes, Direction Général de L’Agriculture, Bruxelles, Belgium.
“Pesticides in Citrus Fruits and Products, and Common Market Regulations and Tolerances” ........1023

L.W. Hazleton, Hazleton Laboratories, Inc., Falls Church, Virginia.
“Sampling and Analysis for Various Pesticides in Single Samples of Citrus Fruits” .................1027

R. Mestres, Faculté de Pharmacie, University of Montpellier, Montpellier, France.
“Pesticides in Citrus Fruits on the French Market” ......................................................1035

C.H. Van Middelem, Pesticide Research Laboratory, Department of Food Science, University of Florida, Gainesville, Florida.
“Review of Pesticides in Florida Citrus and Products” ................................................1043

F.A. Gunther and W.E. Westlake, Department of Entomology, University of California, Riverside, California.
“Studies of Organic Insecticide Residues in California Citrus Fruits and Products” .................1053

L.S. Jordan, B.E. Day, and V.A. Jolliffe, Department of Horticultural Sciences, University of California, Riverside, California.
“Residue of Herbicides and Plant Growth Regulators in Citrus” ......................................1063

M.J. Kolbezen, J.W. Eckert, and Brigittee Bretschneider, Department of Plant Pathology, University of California, Riverside, California.
“Sym-Dibromotetrachloroethane, Analysis of Formulations, Residues and Metabolites” ...........1071

M.J. Kolbezen, J.W. Eckert, and F. Abu-el-haj, Department of Pathology, University of California, Riverside, California.
“Analysis of 2-Aminobutane Residues on Citrus” .........................................................1077

R.H. de Vos, Central Institute for Nutrition and Food Research TNO Zeist - The Netherlands.
“Sampling and Analysis for Biphenyl Residues in Citrus Fruit” ....................................1081

S.W. Souci, Deutsche Forschungsanstalt für Lebensmittelchemie, Munich, Germany.
“Biphenyl and o-Phenylphenol as Post-Harvest Fungistats in Citrus Fruits and Citrus Products” ...1087

J.W. Eckert, M.J. Kolbezen, and B.A. Kramer, Department of Plant Pathology, University of California, Riverside, California.
“Accumulation of o-Phenylphenol by Citrus Fruit and Pathogenic Fungi in Relation to Decay Control and Residues” .................................................................1097
