

**PROCEEDINGS OF 7th INTERNATIONAL  
TOOLING CONFERENCE**

**Tooling materials and their applications from  
research to market**

**POLITECNICO di TORINO**

**TORINO - Italy,**

**2-5 MAY 2006**

**VOLUME I**

Edited by:  
M. ROSSO, M. ACTIS GRANDE, D. UGUES

POLITECNICO di TORINO

## Contents of Volume I

### Introduction

### Topic 1: Cold working

#### Keynote Lecture

Fatigue of carbide rich materials 3

*W. Theisen, C. Broeckmann, A. Packeisen*

Advanced low friction tool steel for metal processing – properties and industrial experiences 13

*O. Sandberg*

Microstructure and distortion after vacuum heat treatment of conventional and recently developed ledeburitic cold-work tool steels 21

*F. Arieta, D.P. Silva, E.B.M. Netto, C. Ernst, W. Pannes.*

Damage mechanisms in materials for cold forging dies under loading conditions typical for dies 29

*G. Jesner, S. Marsoner, I. Schemmel, K. Haeussler, R. Ebner*

Influence of the heat treatment on the mechanical properties of ductile alloying concepts 37

*I. Schemmel, S. Marsoner, G. Jesner*

Tool steels for shaping AHSS 45

*B. Casas, D. Marco, I. Valls*

Characteristics of new developed free cutting cold die steel 53

*H. Ouchi, N. Tsujii, K. Shimizu, D. Yokoi, Y. Haruna*

Contributions to fine machining the gears by cold plastically deformation 61

*D. Eftimie, A. Goanta, A. Ciurea*

Development of a stainless cold work tool steel 69

*C. Escher, U. Djuren, S. Siebert, H. Berns*

Properties of double dispersed tool steels 77

*H. Berns, T. Schneiders, W. Theisen*

**Topic 2: High Speed Steel applications**

**Keynote Lecture**

Integrated Development of High Performance Tools for Efficient Machining of Difficult-To-Cut Materials in Automotive and Aerospace Applications <i>S. Durante, M. Comoglio, K. Ridgway, F. Natale, D. Franchi</i>	87
Performance assessment of spray formed AISI M2 high-speed steel tools <i>E. R. B. Jesus, E.S. Jesus Filho, J.L. Rossi</i>	95
The influences from microstructure on grinding of high alloyed PM-HSS <i>S. Sundin</i>	103
New CPM® Super High Speed Steel with Balanced Properties for Advanced Applications <i>A. Wojcieszynski, A. Kajinic</i>	111
Short-time heat treatment of high-speed steels <i>D. Caliskanoglu, H. Leitner, K. Vrtacnik, H. Clemens</i>	119
Deep cryogenic treatment of AISI M2 high speed steel <i>M. Pellizzari, A. Molinari, L. Girardini, L. Maldarelli</i>	127
Improvement in tool life of cutting tool by application of deep cryogenic treatment <i>R.G. Tated, S.R. Kajale, K. Iyer</i>	135
Fracture toughness of as-cast, conventional and sintered from powder high-speed tool steels <i>W.S. da Silva, J.T.N. Medeiros, H. Goldenstein.</i>	143
Correlation between microstructure and wear resistance of high speed steel after deep sub zero treatment <i>C.L.Gogte, K.M. Iyer, R.K. Paretkar</i>	151

**Topic 3: Hot Work applications**

**Keynote Lecture**

Thermal fatigue behaviour of hot work tool steels – heat check nucleation and growth <i>R. Ebner, S. Marsoner, I. Siller, W. Ecker</i>	161
Influence of aging on microstructure and toughness of die casting die steels <i>G. Cornacchia, M. Gelfi, M. Faccoli, R. Roberti</i>	175

- From development to practice – the success story of a new hot work tool steel 183  
*P. Muhr, I. Siller*
- Performance of low-silicon vacuum remelted hot work tool steel under high thermal load 191  
*Đ. Gorščak, V. Leskovšek, M. Godec, S. Vujnovic, D. Kapudija, L. Curkovic*
- An assessment of critical defect size of hot-work tool steels using the K<sub>IC</sub>/HRc ratio 199  
*V. Leskovšek B. Šuštaršic, D. Baksa*
- Study on high-toughness hot work die steels of SDH2 207  
*C. Jianting, W. Xiaochun, M. Yongan, L. Guangqi*
- Increase of dam-blocks endurance used on the continuous flow casting-rolling of copper wires 215  
*A. Popa, C. Macovei, I. Avasilichioaiei, V. Candea, P. Manicatide*

#### Topic 4: Heat Treatments

##### Keynote Lecture

- Intensive quenching for improved hardness, fatigue and residual stress properties 225  
*G. E. Totten, N.I. Kobasco, L.C.F. Canale*
- A new principle of equipment for the hardening of tools and dies 241  
*M. Stupnišek, Z. Kostanjki, R. Lisac*
- Improvement of die casting tools service properties by action on composition equilibrium and heat treatment parameters 249  
*A. Grellier, P.E. Richy, D. Dautheribes, J.F. Soler*
- Examination on surface films of plasma nitrided and post stream oxidized H13 steel 257  
*Y. Min, X. Wu, L. Xu*

#### Topic 5: Plastic Applications

##### Keynote Lecture

- Abrasive /corrosive wear on plastic mould steels, measured under practical conditions 267  
*W. Friesenbichler, G.R. Langecker, D. Caliskanoglu*

New multi-purpose pre-hardened tool steels <i>P. Hansson</i>	275
Microstructure and mechanical properties of a new cpm corrosion and wear resistant tool steel <i>A. Kajinic, A.L. Wojcieszynski, M.K. Sawford</i>	283
A new practical testing apparatus to evaluate corrosion on plastic mold steels <i>G.R. Berger, W. Friesenbichler, G.R. Langecker, B.J. Hiebler, J. Perko, D. Caliskanoglu</i>	291
Study and application of the steel M333 isoplast in the pet injection moulds for packaging systems <i>A. Cavalet, A. Varaschin, M. Degan</i>	299
Comparison of machinability of new developed plastic mould steels <i>F. Obermair, D. Caliskanoglu, G. Klammer, J. Merkingner</i>	309
A new pre-hardened plastic mould steel as a tailored solution for large moulds <i>P. Vetter, F. Hippenstiel</i>	317
Relation between hardness, microstructure and toughness in vacuum heat treated tool steels for plastic injection molding <i>D. Ugues, M. Rosso, A. Rivolta</i>	325
Adaptive system for electrically driven thermoregulation of moulds for injection moulding <i>B.Žagar, B.Nardin, A.Glojek, D. Križaj</i>	333
Thermal cracking and abrasive wear of high speed steels for rolls <i>C. R. S. da Silva, F. G. Bernardes, A. Sinatora, M. Boccalini</i>	341

## Topic 6: Wear

The contribution of the surface properties of tool steels for galling behaviour in sheet metal forming <i>I. Heikkilä, M. Lundberg, L. Gunnarsson, A. Feiler, M.W. Rutland</i>	351
Wear evaluation of ion nitrided steels used for wood machining tools <i>A. N. Lombardi, C.K.N. Oliveira, G.E. Totten, L.C. Casteletti</i>	359
Experimental investigations on the influence of oxidation of hot working roll grades on their tribological behaviour against a strip material – consequences at the industrial level <i>C. Vergne, C. Boher, D. Batazzi, C. Gaspard, T. Nylen</i>	367

High temperature sliding of high speed and tool steels <i>D. Cescato, M. Pellizzari, A. Molinari</i>	377
Micro-abrasive wear of boride layers on AISI D2 tool steel <i>C. K. N. Oliveira, G.E. Totten, A. Lombardi Neto, L.C. Casteletti</i>	385
Wear of thermoreactive layers produced on AISI H13 and D2 tool steels <i>C. K. N. Oliveira, G.E. Totten, A. Lombardi Neto, L.C. Casteletti</i>	393

## Topic 7: Surface engineering

Surface hardening of an 8%-Cr cold-work tool steel <i>R. Schneider, R. Grunwald, H. Maisser, F. Tejral</i>	403
High-temperature arc evaporation of AlTiXN coatings on powder metallurgical high-speed steels <i>M. Pfeiler, C. Mitterer, P.H. Mayrhofer, D. Caliskanoglu, W. Kolker, R. Pitonak</i>	411
Innovative surface hardening of large tools using modern SDF (simultaneous dual frequency) generators <i>T. Henke, C. Escher</i>	419
Tooling demand and experiences in the bearing manufacturing industry <i>C. Gay, A. Vinçon</i>	427
Effects of retained austenite and nitriding on rotating bending fatigue properties of cold work tool steel <i>D. Yokoi, Y. Haruna, K. Shimizu</i>	433
Machining of lightweight alloys for aeronautic and automotive application with new tool steels and coatings <i>A. Herrmann Praturlon, M. Stalley, W. Sim, T. Zeus, D. Caliskanoglu, M. Joenzen, P. Hovsepian, T. Deeming, M. Bolton, W. Fleischer, R. Tietema</i>	441
Developing PVD zirconium-oxide coatings for use of thixoforming of steel <i>K. Bobzin, E. Lugscheider, M. Maes, P. Immich</i>	449
Influence of the plasma pre-nitriding surface treatment on wear and adhesion of pvd/tin coating for the hot work tool steel AISI H13 <i>A. R. Franco Jr, C. E. Pinedo, A.P. Tschiptschin</i>	457
Improvement of hot work steels wear resistance by plasma nitriding and PVD coatings <i>L.A. Dobrzanski, M. Polok, M. Adamiak</i>	465

Mechanical properties and application of various PVD hard coatings in cold work tools	473
<i>D. Gorščak, P. Panjan, L. Curkovic, D. Kapudija</i>	
Grain boundary oxidation in endothermic gas carburising process	481
<i>E. Gianotti, I. Calliari, M. Zanesco, E. Ramous</i>	
An analysis of the indentation fracture test method applied to nitrided layers on tool steel	491
<i>D. Nolan, V. Leskovsek</i>	
Effect of plasma nitriding and chrome plating treatments on repair welding performance of moulds	499
<i>E. Capello, B. Previtali, A. Sancito, G. Somaschini, M. Vedani, GM. Vimercati</i>	
PVD surface modifications to prevent tool from steels die casting washout	507
<i>E. Torres, D. Ugues, M. Albertinazzi, M. Perucca, M. Rosso</i>	
Research on S-N-C plasma multi-surface treatment for Cr12MoV die steel	515
<i>X. Wu, J. Zhang</i>	
Superhard coatings for cutting tools applications	523
<i>I. Carceanu, R. Fako, G. Cosmeleata, C. Trisca Rusu, G. Popescu, B. Ghiban</i>	

## Topic 8: Tool modelling

Characterization and simulation of precipitation kinetics during heat treatment of the hot-work tool steel X 38 CrMoV 5-3	533
<i>B. Sonderegger, E. Kozeschnik, M. Bischof, H. Leitner, H. Clemens, J. Svoboda, F.D. Fischer</i>	
Cold work tool steels with improved hardenability and wear resistance: the use of thermo-calc for alloy design	541
<i>S. Weber, W. Theisen</i>	
Modelling of the protective gas electro slag remelting process and its validation	549
<i>W. Schützenhöfer, G. Reiter, R. Rabitsch, A. Ludwig, A. Kharicha, M. Gaumann, V. Maronnier, A. Mackenbrock, H. Scholz, R. Sorci, F. Arcobello-Varlese, A. Carosi</i>	

Identification and validation of a continuum damage model applied for lifetime prediction of H11 tool steel <i>V. Velay, G. Bernhart, D. Delagnes.</i>	557
An Application of JM <sup>®</sup> -test in Computer Simulation of Quenching of Cold Work Tool Steels <i>B. Smoljan, D. Iljkic, G.E. Totten, I. Felde</i>	565
Employment of the finite element method for determining stresses in coatings obtained on high speed steel with the PVD process <i>L.A. Dobrzanski, A. Sliwa, W. Kwasny, W. Sitek.</i>	573
Optimization of rough turning operation on Inconel 718 turbine disk <i>M. Cherubini, F. Linares, A. Brucoli</i>	581
Investigation and numerical modelling of extrusion tool life time <i>C. Redl, V. Wieser, C. Sommitsch, T. Wlanis, W. Schutzenhofler, S. Gaudin, B. Geigges</i>	589
Analysis and optimization of forging dies by FEM simulation <i>M. Gabrielli, N. Gramegna, S. Andrinelli</i>	597
A study on cutting rate and kerf in WEDM of Al/SiCp composites <i>N.G.Patil, P.K. Brahmankar, D.G. Thakur</i>	605

## Topic 9: Processing

At the cutting edge of bandsawing tool steels <i>M. Sarwar, N. Persson, H. Hellbergh</i>	615
Milling of prehardened mould steels – role of microstructure on machinability and tool wear <i>H. Chandrasekaran, R. M. Saoubi, O. Karlsson, U. Persson</i>	623
Machinability of modern hot work tool steels <i>N. Broqvist, S. Hogmark, E. Coronel</i>	631
Characterization and fatigue behaviour of a starch consolidated and sintered high speed steel <i>Y. Wang, J. Bergstrom</i>	643
Atom-probe tomography investigation of the precipitation behavior in a nickel and aluminium alloyed secondary hardening steel <i>J. Akre, F. Danoix, S. Erlach, H. Leitner, P. Auger</i>	651

Contributions of generating the internal gear obtained by worm hob <i>D. Eftimie, A. Goanta, A. Ciurea</i>	661
Technological method of increasing the machinability for C45 steel grade <i>C. A. Moldoveanu, F. Zaman, S. Stan, T. Grigoriu</i>	669
Wear resistance evaluation of TiC hardfacing to sugar cane industry applications <i>L. de Campos Franceschini Canale, F.H. Bellam, G.E. Totten.</i>	677
Diamond composites with non metal bonding phases for cutting tools applications <i>L. Jaworska, M. Szutkowska, J. Wszolek, B. Krolicka, M. Rozmus</i>	685

## Topic 10: Properties

### Keynote Lecture

Characterization of nanometer-sized precipitates in tool steels <i>H. Leitner, H. Clemens</i>	695
Microstructural effects on the fracture resistance of cold work tool steels <i>D. Casellas, J. Caro, S. Molas, A. Beltran, J.M. Prado</i>	707
Fracture mechanics of large plastic moulds and property assessment of 1.2738 (P20 modified) plastic mould steel <i>D. Firrao, P. Matteis, G.M.M. Mortarino, G. Scavino, G. Ubertalli, M. Chiarbonello, M.G. Ienco, A. Parodi, M.R. Pinasco, E. Stagno, R. Gerosa, B. Rivolta, G. Silva, A. Ghidini</i>	715
Isothermal aging kinetics of NiAl precipitates in a secondary hardening steel <i>S. Erlach, I. Siller, H. Leitner, H. Clemens</i>	725
Influence of chemical composition on the precipitation of secondary carbides in modified AISI H11 hot-work tool steels <i>P. Michaud, D. Delagnes, P. Lamesle, M.H. Mathon, C. Levallant</i>	733
How carbides and inclusions influence fatigue strength in tool steels <i>M. Randelius, A. Melander</i>	741
X36CrMo17-type plastic mould steel optimised for excellent machinability and polishability by nitrogen alloying <i>J. Perko, I. Siller</i>	749

Room Temperature Elastic Properties of Conventional and Powder Metallurgical High Alloy Tool Steels <i>P. Beiss, B.J. Buvanewari, S.B.P. Subramanian, J. Jain, J. Steiner</i>	757
Improvement in properties of tool steels by temperature controlled rolling <i>B. Wewers, A. Van Bennekom, D. Mehren, F. Wilke</i>	767
Defect tolerance in welded pre-hardened 33/44 HRc tool steels <i>C. Larsson, P. Hansson, P. Kihlmark</i>	775
Mechanical characterization of carbides in cold work tool steels <i>D. Casellas, J. Caro, J.M. Prado, I. Valls</i>	783
Considerations about rising the durability of moulds <i>A. Ciurea, A. Goanta, D. Eftimie</i>	791
Detection of carbide bands in bearing steel <i>S. Harksen, M. Pant, W. Bleck</i>	797
Experimental study of plasticity of CrV3 steel by hot compression tests <i>T. Vecko Pirtovšek, G. Kugler, M. Godec, M. Tercej</i>	805
The role of microstructure on the toughness behaviour of aisi d2 cold work tool steel <i>A. Mendanha, H. Goldenstein, C.E. Pinedo</i>	813
Mechanical properties of powder metallurgy and conventional AISI M3 class 2 high speed steels <i>J. Vatavuk, D. Domingues, G.E. Totten</i>	821
Diode laser surface treatment of hot-work tool steel <i>M. Bonek, L.A. Dobrzanski, E. Hajduczek</i>	829
