

ESTUARINE AND COASTAL MODELING

PROCEEDINGS OF THE TENTH INTERNATIONAL CONFERENCE

November 5–7, 2007
Newport, Rhode Island

SPONSORED BY
University of Rhode Island

EDITED BY
Malcolm L. Spaulding, Ph.D., P.E.

ASCE

Contents

Finite Volume Methods

Modeling the Hydrodynamics of Puget Sound Using a Three-Dimensional Unstructured Finite Volume Coastal Ocean Model	1
Zhaoqing Yang and Tarang Khangaonkar	
Delaware River and Bay Hydrodynamic Simulations with FVCOM.....	18
Aijun Zhang and Eugene Wei	

Shelf Sea Modeling

A Five-Level Nested-Grid Coastal Ocean Circulation Prediction System for Canadian Atlantic Coastal Waters.....	38
Jinyu Sheng and Bo Yang	
The Effect of Stratification on the Tidal Circulation over the Scotian Shelf and the Gulf of St. Lawrence: A Numerical Study	57
Kyoko Ohashi, Jinyu Sheng, Keith R. Thompson, Charles G. Hannah, and Harold Ritchie	
Barotropic Tidal Energetics and Tidal Datums in the Gulf of Maine and Georges Bank Region	74
Zhizhang Yang and Edward P. Myers	

Estuarine and Coastal Modeling in Florida I

Integrated Modeling in South Florida Coastal Area.....	95
Miao-Li Chang, Peter Doring, Yongshan Wan, Chenxia Qiu, and Detong Sun	
Development of a Hydrodynamic and Salinity Model in the Caloosahatchee Estuary and Estero Bay, Florida.....	106
Chenxia Qiu, Y. Peter Sheng, and Yanfeng Zhang	
Development of FVHYDRO, a 3D Non-Orthogonal Unstructured Grid Finite Volume Hydrodynamic Model	124
Detong Sun, Guangdou Hu, Yongshan Wan, and Chenxia Qiu	
Modeling the Hydrology and Hydrodynamics in Loxahatchee River and Estuary, Florida during Hurricanes Frances and Jeanne.....	138
Guangdou Gordon Hu and Yongshan Wan	

Nearshore Circulation and Dispersion

Coupling of Meteorology, Ocean, and Nearshore Models for Predicting Coastal Inundation along Delaware's Coast.....	150
Yunfeng Chen, Fengyan Shi, Wenting Qin, and James T. Kirby	
Coastal Numerical Modeling of Peninsula Beach, California.....	163
Lihwa Lin, Zeki Demirbilek, Frank Wu, Jeremy T. Jackson, and Arthur T. Shak	

Hydrodynamic and Environmental Impact of Edisto Beach Causeway on the Scott Creek Estuary, South Carolina	186
Feleke Arega, Straud Armstrong, and A. W. Badr	

Estuarine and Coastal Modeling in Florida II

Essential Considerations for Development of Estuarine Ecological Modeling Tools.....	203
Melody J. Hunt	

On the Framework of an Integrated 3D Surface, Subsurface, and Overland Hydrodynamic Model for Flow and Transport	223
Hua Shan, Gour-Tsyh Yeh, Gordon Hu, and Tien-Shuenn Wu	

Computational Modeling of Moving Boundaries in a 3D Surface Water Model	243
Tien-Shuenn Wu, Hua Shan, Gour-Tsyh Yeh, and Gordon Hu	

Bay and Estuarine Circulation I

Simulating Spring Freshet Conditions of 2003 in the Delaware Bay.....	260
Michael Piasecki and T. Kutay Celebioglu	

Assimilating Hydrographic Observations into a Nested-Grid Coastal Circulation Model	274
Zhai Li and Jinyu Sheng	

Modeling Methods

Primitive Equation Alternatives to the Wave Equation Formulation	291
Roy A. Walters and Daniel R. Le Roux	

Non-Hydrostatic Modeling of Vegetation Effects on Wave and Flow Motions.....	304
Chin H. Wu, Hengliang Yuan, and Chih-Chieh Young	

Bay and Estuarine Circulation II

Parameterization of Estuarine Mixing Processes in the San Francisco Estuary Based on Analysis of Three-Dimensional Hydrodynamic Simulations	322
Edward S. Gross, Nicholas J. Nidzicko, Michael L. MacWilliams, and Mark T. Stacey	

Generation of Synoptic Water Level and Depth-Averaged Velocity Time Series on the Delaware Bay for Use in Model Coupling	339
Jesse C. Feyen and Zhizhang Yang	

Simulating Hydrodynamics in the Manatee and Braden Rivers Estuaries in Southwest Florida Using a Multi-Block Model.....	358
XinJian Chen	

Poster

New Developments in the ADCIRC Community Model.....	373
Cristina Forbes, Jason Fleming, Craig Mattocks, Crystal Fulcher, Rick Luettich, Joannes Westerink, and Shintaro Bunya	

Predicted Wave Climate for the UK: Towards an Integrated Model of Coastal Impacts for Climate Change	393
James Leake, Judith Wolf, Jason Lowe, Peter Stansby, George Jacob, Robert Nicholls, Mustafa Mokrech, Sophie Nicholson-Cole, Mike Walkden, Andrew Watkinson, and Susan Hanson	
Louisiana Chenier Plain Regional Hydrodynamic and Salinity Numerical Model.....	407
Robert L. Miller and Ehab A. Meselhe	
Integrating a Circulation Model and an Ecological Model to Simulate the Dynamics of Zooplankton	427
M. Rodrigues, A. Oliveira, H. Queiroga, Y. J. Zhang, A. B. Fortunato, and A. M. Baptista	
On the Use of Probabilistic Wind Fields for Forecasting Storm Surge and Inundation	447
Justin R. Davis, Vladimir A. Paramygin, and Y. Peter Sheng	
<i>Hurricane Storm Surge Modeling in Southern Louisiana</i>	
Hurricane Storm Surge and Wave Modeling in Southern Louisiana: A Brief Overview.....	467
J. Atkinson, J. Westerink, T. Wamsley, M. Cialone, C. Dietrich, K. Dresback, R. Kolar, D. Resio, C. Bender, B. Blanton, S. Buna, W. de Jong, B. Ebersole, A. Grzegorzewski, B. Jensen, H. Pourtaheri, J. Ratcliff, H. Roberts, J. Smith, and C. Szpilka	
<i>Water Quality Modeling I</i>	
An Integrated Model of Hydrodynamics and Water Quality Transport	507
Gour-Tsyh Yeh, Hua Shan, Gordon Hu, and Tien-Shuenn Wu	
Developing a Cost-Effective Methodology to Manage Fecal Coliform Loading in Shellfish Harvesting Areas of Upper Chesapeake Bay, Maryland	543
G. McAllister Sisson, Zhenghua Jin, Lee Currey, Jian Shen, and Jian-Jun Jia	
Hydrodynamic and Eutrophication Modeling for a Tidal Marsh Impacted Estuarine System Using EFDC	561
Rui Zou, Sen Bai, and Andrew Parker	
Effects of Benthic Microalgae on Eutrophication Processes—A Laboratory Experiment and the Model Simulation	590
Yuepeng Li, Mark J. Brush, Harry V. Wang, Iris C. Anderson, and G. McAllister Sisson	
Modeling the Effect of Flow Structures on Canal System Residence Time	607
N. P. Benfer, B. A. King, C. J. Lemckert, and S. Zigic	
<i>Water Quality Modeling II</i>	
Forensic Hydrodynamic Evaluation Following the Restoration of a Tidal Freshwater Wetlands	618
Stephen Breithaupt and Tarang Khangaonkar	

Using Turbulence Model Results to Quantify Oxygen Reaeration in an Estuary Dissolved Oxygen Model.....	633
Benoit R. Duclaud and James D. Bowen	
Numerical Analysis of the Impact of Morphodynamics on the Water Quality of a Coastal Lagoon.....	651
A. Oliveira, M. Rodrigues, A. B. Fortunato, and X. Bertin	
<i>Observing, Modeling, and Visualization Systems</i>	
Development and Evolution of Operational Forecast Systems for the Coastal and Estuarine Environment in NOAA's National Ocean Service.....	671
Frank Aikman III, Mark Vincent, and Rich Patchen	
Assimilating Surface Current Data into a Model of Estuarine and Coastal Ocean Circulation	685
Ganesh Gopalakrishnan, Alan Blumberg, and Richard Hires	
Towards the Development of the NOS Nowcast/Forecast System for Delaware River and Bay	704
Richard A. Schmalz, Jr.	
Numerical Modeling of the Delaware River and Bay during Spring-Fall of 1984 Using the Regional Ocean Modeling System (ROMS)	724
Lyon W. J. Lanerolle	
<i>Trajectory Modeling</i>	
Tracer Simulation to Analyze Channel Effect on Particle Transport in the Chesapeake Estuary	744
Ping Wang, Lewis Linker, Richard Batiuk, and Wu-Seng Lung	
<i>Model Evaluation</i>	
Evaluation of the SELFE/ELCIRC Models in the Delaware Bay Model Evaluation Environment.....	764
Edward P. Myers	
Establishment of a Delaware Bay Model Evaluation Environment	783
Richard Patchen	
<i>Sediment Transport I</i>	
Estimating Cohesive Sediment Erosion and Consolidation in a Muddy, Tidally-Dominated Environment: Model Behavior and Sensitivity	819
J. Paul Rinehimer, Courtney K. Harris, Christopher R. Sherwood, and Lawrence P. Sanford	
Application of a Hydrodynamic and Sediment Transport Model for the Restoration Feasibility Assessment at Cottonwood Island, Washington	839
Cheegwan Lee, Tarang Khangaonkar, and Zhaoqing Yang	
Development of a Numerical Model for Simulating Morphodynamic Processes Driven by Tides and Waves at Coastal Inlets	862
Yan Ding and Sam S. Y. Wang	

Storm Surge and Coastal Inundation I

Recent Enhancements and Applications of an Integrated Storm Surge Modeling System: CH3D-SSMS 879
Y. P. Sheng, V. A. Paramygin, Y. Zhang, and J. R. Davis

A Real Time Storm Surge Forecasting System Using ADCIRC..... 893
Jason G. Fleming, Crystal W. Fulcher, Richard A. Luettich, Brett D. Estrade, Gabrielle D. Allen, and Harley S. Winer

Simulating Waves and Water Levels in the Chesapeake Bay during Hurricane Isabel Using a Coupled Wave-Current Model..... 913
T. Kutay Celebioglu, Harry Wang, and Lorraine H. Brasseur

3D Numerical Modeling of Flows at the Confluence of the Columbia and Pend d'Oreille Rivers 928
David B. Fissel and Jianhua Jiang

Sediment Transport II

Numerical Modeling of Restoration Alternatives in an Erosional Estuary 942
M. L. Brennan, C. L. May, D. G. Danmeier, S. Crooks, and J. H. Haltiner

Storm Surge and Coastal Inundation II

Computational Simulations of Morphological Responses to Extreme Hydrological Conditions at an Estuary..... 961
Sam S. Y. Wang and Yan Ding

Modeling of Releases

Modeling of the Thermal Discharge from a Power Generating Facility into a Tidal-Like Hydropower Controlled Pool on the Connecticut River..... 978
Craig Swanson and Sankar Subbayya

Dispersive Characteristics of Ballast Water Exchanges off Newfoundland: A Model-Based Study..... 999
G. Han, C. McKenzie, and M. He

Sediment Plume and Deposition Modeling of Removal and Installation of Underwater Electrical Cables on Roberts Bank, Strait of Georgia, British Columbia, Canada..... 1019
Jianhua Jiang, David B. Fissel, and Keath Borg

A Dye, Current Meter, and Modeling Study in South Puget Sound—A Highly Refluxed Semi-Enclosed Estuary..... 1035
Skip Albertson, Bill Fox, Frank Meriwether, and Jan Newton
