London

Contents

KNIGHT, J. & HARRISON, S. Periglacial and paraglacial environments: a view from the past into the future	1
Periglacial processes and environments	
ANDRÉ, M.-F. From climatic to global change geomorphology: contemporary shifts in periglacial geomorphology	5
NICHOLSON, D. T. Holocene microweathering rates and processes on ice-eroded bedrock, Røldal area, Hardangervidda, southern Norway	29
SEPPÄLÄ, M. & KUJALA, K. The role of buoyancy in palsa formation	51
WALLER, R. I., MURTON, J. B. & KNIGHT, P. G. Basal glacier ice and massive ground ice: different scientists, same science?	57
SLAYMAKER, O. Proglacial, periglacial or paraglacial?	71
Paraglacial environments and processes in the British Isles	
WHALLEY, W. B. On the interpretation of discrete debris accumulations associated with glaciers with special reference to the British Isles	85
JARMAN, D. Paraglacial rock slope failure as an agent of glacial trough widening	103
WILSON, P. Rockfall talus slopes and associated talus-foot features in the glaciated uplands of Great Britain and Ireland: periglacial, paraglacial or composite landforms?	133
PASSMORE, D. G. & WADDINGTON, C. Paraglacial adjustment of the fluvial system to Late Pleistocene deglaciation: the Milfield Basin, northern England	145
KNIGHT, J. The limitations of Quaternary lithostratigraphy: an example from southern Ireland	165
Paraglacial processes, climate change and sediment supply	
CURRY, A. M., SANDS, T. B. & PORTER, P. R. Geotechnical controls on a steep lateral moraine undergoing paraglacial slope adjustment	181
WILKIE, K. & CLAGUE, J. J. Fluvial response to Holocene glacier fluctuations in the Nostetuko River valley, southern Coast Mountains, British Columbia	199
FRIELE, P. A. & CLAGUE, J. J. Paraglacial geomorphology of Quaternary volcanic landscapes in the southern Coast Mountains, British Columbia	219
HEWITT, K. Glacially conditioned rock-slope failures and disturbance-regime landscapes, Upper Indus Basin, northern Pakistan	235
HARRISON, S. Climate sensitivity: implications for the response of geomorphological systems to future climate change	257
