<i>About the authors</i>	<i>xi</i>
<i>Woodhead Publishing Series in Energy</i>	<i>xiii</i>
<i>Preface</i>	<i>xv</i>
1 Biodiesel as a renewable energy source	1
1.1 Introduction	1
1.2 Energy policy	2
1.3 Transformation of biomass	20
1.4 Global biodiesel development	26
1.5 Value chain of biodiesel	38
1.6 Bibliography	40
1.7 References	44
2 Development of non-food agricultural industries for biofuel applications	50
2.1 Introduction	50
2.2 Biofuels	51
2.3 Biomass potentials and limitations	52
2.4 Advanced agroenergy crops	56
2.5 Bibliography	59
2.6 References	60
3 Oleochemical sources: basic science, processing and applications of oils	62
3.1 Introduction	62
3.2 Biochemistry of lipid metabolism	64
3.3 Modification of vegetable oil quality	76
3.4 Industrial use of vegetable oils	80
3.5 Unusual fatty acids	85

vi	Contents	
3.6	Oil processing techniques	90
3.7	Bibliography	100
3.8	References	103
4	Vegetable oil formulations for utilisation as biofuels	114
4.1	Introduction	114
4.2	Fuel properties of oils and fats	116
4.3	Low-viscosity formulations	121
4.4	Bibliography	125
4.5	References	125
5	Feedstocks for biodiesel production	130
5.1	Introduction	130
5.2	Global oilseed and oil production	135
5.3	Resources for biodiesel production	137
5.4	Main biodiesel crops	143
5.5	Minor edible oil crops	159
5.6	Fish oils	163
5.7	Algae mass culture systems	168
5.8	Oleaginous microorganisms	187
5.9	Non-edible oilseeds	188
5.10	Low-quality feedstocks	197
5.11	Bibliography	206
5.12	References	208
6	Emerging new energy crops for biodiesel production	226
6.1	Introduction	226
6.2	Crop selection criteria for biodiesel application	227
6.3	Structure and quality parameters for evaluating alternative feedstocks	231
6.4	Agronomic potential of underexploited oil crops by region	244
6.5	Bibliography	273
6.6	References	274
7	Transesterification processes for biodiesel production from oils and fats	285
7.1	Introduction	285
7.2	Process variables	287
7.3	Transesterification kinetics	295
7.4	<i>In-situ</i> transesterification	308
7.5	Non-catalytic fatty acid alkyl ester production	310
7.6	References	314

8	Biodiesel catalysis	322
8.1	Introduction	322
8.2	Homogeneous alkaline catalysis in biodiesel synthesis	327
8.3	Liquid-phase acid catalysis	340
8.4	Heterogeneous catalysis in biodiesel synthesis	348
8.5	Bibliography	371
8.6	References	371
9	Processes for biodiesel production from unrefined oils and fats	386
9.1	Introduction	386
9.2	Fatty acid esterification	389
9.3	Transesterification of acidic feedstocks	394
9.4	Jatrodiesel	412
9.5	Algal biodiesel	414
9.6	Vegetable oil soapstocks for biodiesel application	420
9.7	Tall biodiesel	423
9.8	Bibliography	425
9.9	References	425
10	Biocatalytic production of biodiesel	434
10.1	Introduction	434
10.2	Enzymatic (trans)esterification	435
10.3	Bioplastic-to-biodiesel	454
10.4	Bibliography	454
10.5	References	455
11	Industrial process technology for biodiesel production	462
11.1	Introduction	462
11.2	Biodiesel plant design and engineering	467
11.3	Selected proprietary transesterification processing technologies	487
11.4	Selected biodiesel producers	497
11.5	Biodiesel blending techniques	505
11.6	Bibliography	508
11.7	References	509
12	Analytical methods and standards for quality assurance in biodiesel production	514
12.1	Introduction	514

12.2	Quality control of biodiesel feedstocks	515
12.3	Biodiesel standardisation	516
12.4	Biodiesel quality management	526
12.5	Biodiesel analytical methodology	540
12.6	Bibliography	562
12.7	References	563
13	Valorisation of the glycerol by-product from biodiesel production	571
13.1	Introduction	571
13.2	Industrial glycerol production	572
13.3	Glycerol purification	575
13.4	Industrial uses and markets	579
13.5	Innovative use of glycerol	584
13.6	Renewable diesel synthesis without glycerol co-production	611
13.7	Bibliography	615
13.8	References	615
14	Sustainability and use of biodiesel	625
14.1	Introduction	625
14.2	Energy balance	627
14.3	Life cycle assessment of biodiesel	630
14.4	Performance characteristics for biodiesel	637
14.5	Biodiesel cost structure	658
14.6	Biodiesel use and markets	677
14.7	Bibliography	701
14.8	References	703
15	Evolution of biodiesel and alternative diesel fuels	713
15.1	Introduction	713
15.2	Second-generation biofuels	719
15.3	Biodiesel: the next generations	724
15.4	Hydroprocessing technology	742
15.5	Perspectives of biomass-to-liquid fuels	756
15.6	Renewable energy and biomass	772
15.7	Bibliography	775
15.8	References	776
16	Epilogue: outlook for biodiesel science and technology	783
16.1	Introduction	783
16.2	State of the biodiesel industry	784

16.3	Challenges for the global biodiesel industry	789
	Appendix I Acronyms/abbreviations of techniques	799
	Appendix II (Bio)chemical nomenclature	801
	Appendix III Physical and mathematical symbols	810
	Appendix IV General abbreviations	814
	Appendix V Main websites	820
	<i>Index</i>	822
