A Practical Guide to Distributed Scrum
Contents

Foreword by Ken Schwaber xvii
Foreword by Scott Ambler xix
Foreword by Roman Pichler xxiii
Foreword by Matthew Wang xxv
Preface xxvii

Chapter 1 The Evolution of Scrum 1
Core Principles of Scrum 2
An Agile Project Management Framework 2
Scrum Roles 2
Scrum Artifacts 3
The Sprint 4
The Shift to Distributed Development Teams 5
Globally Distributed Teams to Reduce Costs 6
Reaching Market More Quickly with the "Follow the Sun" Model 6
Distributed Teams Expand Access to New Markets 6
Acquisitions 7
Expanding for Innovation and Thought Leadership 7
Telecommuting 7
Improvements in Distributed Collaboration Tools 7
Types of Distributed Teams That Have Emerged 8
Collocated 8
Collocated Part-Time 9
Distributed with Overlapping Work Hours 10
Distributed with No Overlapping Work Hours 11
Ways of Handling Distributed Teams 12
Isolated Scrums 12
Distributed Scrum of Scrums 12
Totally Integrated Scrums 13
IBM’s Experience in Distributed Scrum 14
History of Agile in IBM 15
Summary 17
Chapter 2  Challenges Faced by Distributed Teams  

Communicating with Distributed Team Members  

Time Zones and Working Hours  

Cultural Differences  

Language Differences  
  Keeping Language Simple  
  Giving Everyone a Chance to Speak  
  Using Group Chat During Meetings  
  Providing a Translator  
  Confirming What Team Members Understand  

Tools  

File Sharing  

Software Engineering Practices  

Schedule Differences  

Team Dynamics  

Telephone Dynamics  
  Providing Access to the Call  
  Working with Telephones in a Meeting Room  
  Identifying the Speaker  
  Handling Visual Cues  
  Encouraging Participation  
  Limiting Side Conversations  
  Muting the Lines  
  Checking for Agreement and Disagreement  
  Identifying an Advocate to Represent Remote Team Members  
  When Nothing Else Works, Everyone Dials In  

Reminders  

Impact of Communication Problems  

How Does Scrum Help?  

Summary  

Chapter 3  Starting a Scrum Project  

How to Identify the Problems Your Product Will Solve  
  Who Are Your Stakeholders?  
  What Problems Will the Project Address?  
  What Are Your Solutions to the Problems?  
  What Is the Return on Investment?  

Define the Vision  

Create the Product Roadmap  

Organize the Scrum Teams  

Create and Prioritize the Backlog  
  Estimating the Stories as a Team  
  Prioritizing the Backlog  
  Single Backlog for Multiple Scrum Teams
Chapter 4 Preparing for Sprint Planning 69

Sprint Preplanning Activities 70
- Clarification of the User Stories 71
- Breaking Down User Stories 72
- Estimating User Stories 72
- Dealing with Dependencies 75
- Cleanup of the Product Backlog 78

Approaches for the Sprint Preplanning Meeting 78
- The Full-Team Approach 80
- The Preplanning Team Approach 81
- The Balanced Team Approach 82
- Considerations for Distributed Teams 82

Summary 83

Chapter 5 Sprint Planning 85

Adequately Preparing for the Sprint Planning Meeting 87
Sprint Planning Meeting Logistics 87
- Sprint Planning Meeting Logistics for Scaled Teams 87
- Sprint Planning Meeting Logistics for Distributed Teams 88

The First Half of Sprint Planning: Deciding What to Do 88
- Reviewing Product Vision and Sprint Goal 89
- Reviewing the Product Backlog 89
- Engaging Stakeholders 91

The Second Half of Sprint Planning: Deciding How to Get the Work Done 91
- Creating the Sprint Backlog 92
- Gaining Commitment 94
- Updating the Release Plan 94

Summary 94
Chapter 6  Distributed Daily Scrum Meetings  97
Using the Three Questions Effectively  98
Answering the Three Questions  99
Coordinating the Team on a Daily Basis  99
Committing to the Team  100
Verifying Progress  100
Resolving Blockers  101
Daily Scrum Logistics  102
Ways of Communicating During the Daily Scrum  102
Face-to-Face Meeting  102
Teleconference Meeting  103
Videoconference Meeting  104
Group Instant Messaging Approach  105
Approaches to Handling Time Zone Issues  106
Daily Scrums Through Documentation  107
The Liaison Approach  108
Alternating Meeting Times  110
Sharing the Pain  112
Tips for Distributed Daily Scrums  114
Removing Side Conversations  114
Keeping the Team Engaged  114
Facilitating the Meeting  115
Taking Daily Scrum Notes  116
Dealing with Language Barriers  117
Tools to Help with Distributed Daily Scrum  117
Scrum of Scrums  118
Summary  118

Chapter 7  Effective Collaboration During a Sprint  121
Communicating During the Sprint  122
Documentation to Overcome Distance  123
Using the Right Tools  123
Valuing the Whole Team  124
Transparency  124
Handling New Requests in the Middle of a Sprint  125
Single Point of Entry  125
Value of the Well-Groomed Backlog  126
Shortening the Sprint  127
Dealing with Defects  127
Disruptions at the Team Member Level  128
Handling Stories the Team Cannot Complete During the Sprint  128
Handling Blockers During the Sprint  129
Responding to Questions During the Sprint  130
Contents

Sustainable Pace 131
  Sharing Time Zone Challenges 132
  Avoiding Double Workdays 132
Continuous Integration 133
  Reports Any Build Failures to the Team 133
  Reduces the Risk of Integrating Code 133
  Establishes Greater Confidence in the Product 135
  Reduces the Time to Find Integration Issues 135
  Improves the Efficiency of the Team 136
  Builds Can Run at Different Frequencies 136
Test Automation 137
  Dedicated Automation Teams 137
  Identify High-Value Automated Tests 138
  Automate What Is Stable 138
  Automated Tests Can Run at Any Time 139
  Automation Helps Improve Software Quality 139
Test-Driven Development 139
  Provides Documentation and Working Examples of Code 140
  Helps Reduce the Time to Fix Defects 140
  Helps Improve Code Quality and Provides a Safety Net for Changes 141
  Helps Team Members Work Together and Collaborate 141
  Helps Teams Move Away from Big Upfront Designs 142
  Unit Tests and Continuous Integration 142
Handling Infrastructure Projects 143
Summary 144

Chapter 8   End of Sprint Reviews 147

  Who Participates in the Reviews 148
    Enterprise Stakeholders 148
    Who Should Present 149
  Preparing Stakeholders 150
  Reviewing the Strategic Vision of the Product 151
  Approaches to Help Focus the Review 151
    Using Themes and a Script 152
    Having the Product Owner Introduce Each Presentation 152
  Scheduling for Teams with Overlapping Work Hours 153
  Scheduling for Teams with No Overlapping Work Hours 154
    Alternating Meeting Times 154
    Multiple Sprint Review Meetings 155
  Sharing the Pain 156
  Feeling the Pain 156
  Recording the Entire Sprint Review Meeting 157
  Challenges Teams Face 157
    Not Keeping Track of the Stakeholder Comments 157
    Demos May Provide a False Sense of Completion 158
    The Team Has Nothing to Present 158
Added Challenges of Distributed Teams 159
  Neglecting to Demo the Work of Part of the Team 159
  Coordinate with Teams on Different Sprint Lengths 160
Remote Demonstrations 160
  Network Delays and Poor Performance 160
  Services May Vary by Location 161
  Demos Outside of Office Hours 161
Summary 162

### Chapter 9  **Retrospectives**  163

- **Sprint Retrospectives** 163
- **What Should Come Out of a Retrospective?** 165

#### Retrospective Timing 166

- Hold Joint Retrospective as Needed 166
- Hold Regular Joint Retrospectives 166
- Joint Retrospectives for Teams on Different Sprint Lengths 167
- Retrospectives for Teams in the Same Product Family 167
- Conducting Retrospectives After Reviews 167
- Larger Retrospectives 168

- **Building Trust** 168
- **Effects of Distance** 169

#### Preparing for the Retrospective 169

- **Setting Expectations** 169
- **Understanding the Team Members’ Personalities** 170
- **Respecting Cultural Differences** 171
- **Offering Anonymity** 171
- **Asking for Comments Before the Retrospective Meeting** 171

#### Conducting the Retrospective 173

- **Discussing Reported Issues** 173
- **Giving Everyone a Chance to Engage** 174
- **Using Common Terminology** 175
- **State the Obvious** 175
- **Keep the Conversation on Track** 175
- **Managing Time Effectively** 175
- **Release Retrospectives** 176

Summary 177

### Chapter 10  **Closing Thoughts**  179

Index 181
