

Ingrid Stober · Kurt Bucher

# Geothermal Energy

From Theoretical Models to Exploration  
and Development

# Contents

<b>1 Thermal Structure of the Earth</b> . . . . .	1
1.1 Renewable Energies, Global Aspects . . . . .	2
1.2 Internal Structure of the Earth . . . . .	2
1.3 Energy Budget of the Planet . . . . .	7
1.4 Heat Transport and Thermal Parameters . . . . .	8
1.5 Brief Outline of Methods for Measuring Thermal Parameters . . . . .	13
<b>2 History of Geothermal Energy Use</b> . . . . .	15
2.1 Early Utilization of Geothermal Energy . . . . .	16
2.2 History of Utilization of Geothermal Energy in the Last 150 years . . . . .	21
<b>3 Geothermal Energy Resources</b> . . . . .	25
3.1 Energy . . . . .	26
3.2 Significance of “Renewable” Energies . . . . .	28
3.3 Status of Geothermal Energy Utilization . . . . .	29
3.4 Geothermal Energy Sources . . . . .	31
<b>4 Applications of Geothermal Energy</b> . . . . .	35
4.1 Near Surface Geothermal Systems . . . . .	37
4.2 Deep Geothermal Systems . . . . .	42
4.3 Efficiency of Geothermal Systems . . . . .	53
4.4 Major Geothermal Fields, High Enthalpy Fields . . . . .	55
<b>5 Potential Perspectives of Geothermal Energy Utilization</b> . . . . .	61
<b>6 Geothermal Probes</b> . . . . .	65
6.1 Planning Principles . . . . .	66
6.2 Construction of Ground Source Heat Exchangers . . . . .	66
6.3 Dimensioning and Design of Geothermal Probes . . . . .	72
6.3.1 Heat Pumps . . . . .	73
6.3.2 Thermal Parameters and Computer Programs for the System Design of Ground Source Heat Pump Systems . . . . .	77

6.4	Drilling Methods for Borehole Heat Exchangers . . . . .	84
6.4.1	Rotary Drilling . . . . .	87
6.4.2	Down-the-Hole Hammer Methods . . . . .	89
6.4.3	Concluding Remarks, Technical Drilling Risks . . . . .	90
6.5	Backfill and Grouting of Geothermal Probes . . . . .	94
6.6	Construction of Deep Geothermal Probes . . . . .	98
6.7	Operating Geothermal Probes: Potential Risks, Malfunctions and Damages . . . . .	99
6.8	Special Systems and Further Developments . . . . .	101
6.8.1	Geothermal Probe Fields . . . . .	102
6.8.2	Cooling with Geothermal Probes . . . . .	103
6.8.3	Combined Solar Thermal: Geothermal Systems . . . . .	104
6.8.4	Geothermal Probe: Performance and Quality Control . . . . .	105
6.8.5	Geothermal Probes Operating with Phase Changes . . . . .	110
<b>7</b>	<b>Geothermal Well Systems . . . . .</b>	<b>115</b>
7.1	Building Geothermal Well Systems . . . . .	116
7.2	Chemical Aspects of Two-Well Systems . . . . .	119
7.3	Thermal Range of Influence, Numerical Models . . . . .	120
<b>8</b>	<b>Hydrothermal Systems, Geothermal Doublets . . . . .</b>	<b>125</b>
8.1	Geologic and Tectonic Structure of the Underground . . . . .	126
8.2	Thermal and Hydraulic Properties of the Target Aquifer . . . . .	129
8.3	Hydraulic and Thermal Range of Hydrothermal Doublets . . . . .	137
8.4	Hydrochemistry of Hot Waters from Great Depth . . . . .	141
8.5	Reservoir-Improving Measures, Efficiency-Boosting Measures, Stimulation . . . . .	144
8.6	Productivity Risk, Exploration Risk, Economic Efficiency . . . . .	146
8.6.1	Exploration Risks . . . . .	148
8.7	Some Site Examples of Hydrothermal Systems . . . . .	153
8.7.1	High-Enthalpy Hydrothermal Systems . . . . .	153
8.7.2	Low-Enthalpy Hydrothermal Systems . . . . .	153
8.8	Project Planning of Hydrothermal Power Systems . . . . .	160
8.8.1	Phase 1: Preliminary Study . . . . .	161
8.8.2	Phase 2: Feasibility Study . . . . .	162
8.8.3	Phase 3: Exploration . . . . .	162
8.8.4	Phase 4: Development . . . . .	162
<b>9</b>	<b>Enhanced-Geothermal-Systems, Hot-Dry-Rock Systems, Deep-Heat-Mining . . . . .</b>	<b>165</b>
9.1	Techniques, Procedures, Strategies, Aims . . . . .	167
9.2	Historical Development of the Hydraulic Fracturing Technology, Early HDR Sites . . . . .	169
9.3	Stimulation Procedures . . . . .	170
9.4	Experience and Dealing with Micro-Seismicity . . . . .	176
9.5	Recommendations, Notes . . . . .	177

<b>10</b>	<b>Environmental Issues Related to Deep Geothermal Systems</b> . . . . .	183
10.1	Seismicity Related to EGS Projects . . . . .	185
10.1.1	Induced Earthquakes . . . . .	187
10.1.2	Quantifying Seismic Events . . . . .	189
10.1.3	The Basel Incident . . . . .	190
10.1.4	Observed Seismicity at Other EGS Projects . . . . .	193
10.1.5	Conclusions and Recommendations Regarding Seismicity Control in Hydrothermal and Petrothermal (EGS) Projects . . . . .	196
10.2	Interaction Between Geothermal System Operation and the Subsurface . . . . .	198
10.3	Environmental Issues Related to Surface Installations and Operation . . . . .	200
<b>11</b>	<b>Drilling Techniques for Deep Wellbores</b> . . . . .	203
<b>12</b>	<b>Geophysical Methods, Exploration and Analysis</b> . . . . .	221
12.1	Geophysical Pre-drilling Exploration, Seismic Investigations. . . . .	222
12.2	Geophysical Well Logging and Data Interpretation. . . . .	227
<b>13</b>	<b>Testing the Hydraulic Properties of the Drilled Formations</b> . . . . .	233
13.1	Principles of Hydraulic Testing . . . . .	234
13.2	Types of Tests, Planning and Implementation, Evaluation Procedures . . . . .	243
13.3	Tracer Experiments . . . . .	249
13.4	Temperature Evaluation Methods . . . . .	252
<b>14</b>	<b>The Chemical Composition of Deep Geothermal Waters and Its Consequences for Planning and Operating a Geothermal Power Plant</b> . . . . .	255
14.1	Sampling and Laboratory Analyses . . . . .	256
14.2	Deep Geothermal Waters, Data and Interpretation . . . . .	258
14.3	Mineral Scales and Materials Corrosion . . . . .	271
	<b>References</b> . . . . .	279
