

# CELLULAR MATERIALS

Proceedings  
of the International Conference  
on Cellular Materials

held in Dresden, Germany  
from October 27 until 29, 2010

Edited by  
Günter Stephani, Thomas Hipke,  
Matthias Scheffler and Jörg Adler

## Table of Contents

### Session A

#### **Cellular Metals – Manufacturing and Applications**

T. Hipke, R. Neugebauer, S. Rybandt, R. Vogel, C. Hannemann,  
C. Lies, F. Schneider ..... 3

#### **Improved Properties of Ceramic Foams by a Vacuum Infiltration Process**

U. Vogt, P. Colombo, M. Gorbar, P. Dimopoulos, G. Wagner, A. Broenstrup ..... 11

#### **Effect of Viscosity on the Formability and Surface Area of Porous Metallic Glass Foams**

M.H. Lee, J.S. Kim, J. Eckert ..... 12

#### **The New Ceramic Architectures Rising from the Cold...**

#### **Comprehension of Phenomena Acting during the Freezing of Alumina Suspensions Structured by Ice-Templating**

A. Lasalle, C. Guizard, S. Deville ..... 13

#### **Surface Modification of Nickel Foams**

N. Michailidis, H. Omar, N. Papanastasiou, P. Psyllaki, S.A. Tsipas,  
F. Stergioudi ..... 14

#### **A New Cellular Material Made with Ball Chains**

C. Davoine, F. Popoff, A. Götzfried, A. Rafray, J. Riquiez ..... 20

#### **Cellular Ceramics via Alkane Phase Emulsified Suspensions: Processing and Application Fields**

S. Barg, G. Grathwohl, C. Soltmann, D. Koch, ..... 26

#### **Consolidating of Metallic Hollow Spheres Structure by Electrical Heating**

R. Miyoshi, H. Yoshimura, Y. Mihara ..... 27

#### **Oscillation Assisted Metal Foaming**

N. Babcsan, S. Beke, H.P. Degischer ..... 33

#### **Sinterpaper - A New Type of Highly Porous Material**

G. Stephani, H.-D. Böhm, Ch. Sorg, A. Hofenauer ..... 34

#### **A Study on Processing of Aluminium Alloy Foaming via Hybrid Process**

Y.P. Kathuria, Y. Uchida ..... 42

#### **Aluminium Integral Foams with Microcellular Structure**

J. Hartmann, C. Körner ..... 48

#### **Hybridfoams - A New Approach for Special Applications**

M. Reinfried, G. Stephani, F. Luthardt, J. Adler, A. Krombholz ..... 49

<b>Parts Containing Metallic Sponges, Manufactured by the Foundry Route</b> J. Dairon, Y. Gaillard .....	55
<b>Open Cell Titanium Foams for Bone Replacement</b> R. Hauser, G. Standke, J. Heineck, G. Stephani, P. Quadbeck.....	61
<b>Continuous Slurry Foaming: A New Method for Manufacturing Ceramic Foams</b> F. Luthardt, J. Adler .....	62
<b>Preparation and Characterization of Foam Glass</b> J. Hubálková, C.G. Aneziris, J. Ulbricht .....	68
<b>Freeze-Foaming: A Promising Method for Synthesizing Cellular Ceramic Materials</b> M. Ahlhelm, T. Moritz .....	74
<b>Gas Injection in High Temperature Metal Melts</b> T. Mönch, S. Odenbach .....	78
<b>Injection Molding of Micro-Porous Titanium Alloy Parts</b> H. Özkan Gülsoy, G. Engin .....	79
<b>Foaming of a Silicone Resin with Supercritical CO<sub>2</sub> as Ceramic Precursors</b> F. Wolff, S. Betzold, F. Nachtrab, B. Ceron Nicolat, T. Fey, H. Münstedt .....	86
<b>Development of Porous Amorphous Compacts Using Electro-Discharge-Sintering</b> K.B. Kim, J.Y. Jo, G.A. Song, J.S. Shin, H.S. Lee, M.H. Lee .....	92
<b>Porous Titanium by Using Pressure-Control Casting Process</b> M.G. Kim, J.H. Kim, B.J. Choi, Y.J. Kim .....	93
<b>Synthesis of AlSi12 Aluminum Foams by Powder-Metallurgy Process</b> I. Paulin, B. Sustarsic, M. Jenko, C. Donik .....	99
<b>Experiences of Lead-Foam Production by Several Processing Routes</b> G. Costanza, M.E. Tata .....	100
<b>Investigation on Attrition Resistance on Highly Porous Diatomite and Gamma-Alumina Based Material Produced by Extrusion Process</b> F.J. Clemens, N. van Garderen, Th. Graule .....	106
<b>Highly Structured Porous Polymer Materials from Liquid Foam Templates</b> W. Drenckhan, A. Testouri, D. Langevin, A. van der Net, M. Ranft .....	107

<b>Production and Characterization of Highly Porous Ancorsteel 4300 Alloy</b> I. Mutlu, E. Oktay .....	113
<b>Foaming Behavior and Mechanical Property of Aluminum Alloy Foam Stabilized by Aluminum Slag</b> A. Moloodi .....	119
<b>Synthesis and Properties of Cellular Ceramic Materials Produced from Radiation Curable Colloidal Dispersions</b> J. Heinecke, Y. DeHazan, V. Märkl, C. Aneziris, T. Graule .....	120
<b>Functional Ceramic Coatings for Cellular Metal</b> R. Hauser, S. Prasse, G. Stephani .....	121
<b>Processing and Properties of Fe-1.5%Mo-C Foams</b> N. Bekoz, E. Oktay .....	127
<b>Hierachical Cellular Ceramic Foam Processing</b> T. Fey, B. Ceron-Nicolat, P. Greil .....	133
<b>Electrospinning of Nanofiber Web Structures</b> D. Haas, P. Greil .....	134
 <u>Session B</u>	
<b>Cellular Ceramics in Combustion Environments</b> J. Adler, A. Füssel, D. Böttge, F. Marschallek, M. Jahn, A. Michaelis .....	137
<b>Application of Lotus-type Porous Metals to Heat Sink for Air Cooling</b> H. Nakajima, H. Chiba, T. Ide, T. Ogushi .....	143
<b>Efficiency Study of Metal Foams for Heat Storage and Heat Exchange</b> A. August, B. Nestler, F. Wendler, M. Selzer, A. Kneer, E. Martens .....	148
<b>Development of a Metal Foam Based Latent Heat Cooling System in the Field of Solar Power Generation</b> A. Kneer, S. Engeda, D. Girlich, E. Martens, B. Nestler .....	152
<b>Processing of Ceramic Foams for High Temperature Applications: The Templating Approach</b> G. Falk, W. Da Silveira .....	160
<b>Si-SiC Reticulated Foams for High Temperature Applications</b> S. Gianella, A. Ortona .....	166
<b>Capillary Mass Transport in Open Cell Aluminium Foam</b> A.K. Gupta, S. Das, D.P. Mondal .....	167

<b>Heat Dissipation of Porous Aluminum in Different Systems</b> H.-S. Lee, H.J. Jeon .....	168
<b>Macro-Cellular SiC-Reactors for a Non-Stationary Combustion under Priston Engine Like Conditions</b> A.-K. Maier, L. Schlier, P. Greil, N. Travitzky .....	169
<b>Heat Transfer and Hydrodynamics during Selective Laser Sintering of Metal Powders for Rapid Manufacturing of Porous Microstructured Materials</b> R. Dayal, T. Gambaryan-Roisman, E. Abele .....	170
 <u>Session C</u>	
<b>Natural and Technical Cellular Glasses: Manufacturing, Structure, Applications</b> M. Scheffler .....	173
<b>Functionalized Porous Alumina Based Ceramics for Water Cleaning and Bioengineering Applications</b> T. Klein, L. Treccani, K. Rezwani .....	174
<b>Predicting the Specific Surface Area and Pressure Drop of Ceramic Foam Catalyst Supports</b> A. Inayat, H. Freund, T. Zeiser, W. Schwieger .....	175
<b>New Transparent Glass-Sponges Prepared from High Purity Silica</b> R. Oberacker, E.C. Bucharsky, K.G. Schell, M.J. Hoffmann .....	181
<b>Faujasite Zeolite Crystallization on Reactive Ceramic Foams</b> A. Schwab, A. Inayat, W. Schwieger .....	187
<b>Functionalization of Ceramic Foams for High Temperature Catalytic Applications Illustrated by the Development of a Lean Gas Reactor</b> D. Böttge, J. Adler .....	191
<b>A Catalytic Reaction's Intermediate Maximization by Zeolite Hollow Spheres</b> A. Gerds, N. Reger, E. Kondratenko .....	197
 <u>Session D</u>	
<b>Bone Regeneration with Foams</b> J. Luyten, S. Mullens, F. Snijders .....	205
<b>3D-Printing of Bioactive Glass</b> T. Fey, R. Meszaros, A. Vander, J.A. Roether, N. Travitzky, P. Greil, L. Wondraczek .....	206

<b>Ti Foams Processed by Spark Plasma Sintering and their Structure and Property Relationships</b>	
F. Zhang, A. Ibrahim, E. Osterstein, E. Burkel .....	207
<b>Response to Tensile Mechanical Loading of Bioglass<sup>®</sup> Scaffolds Coated by Biodegradable Polymer</b>	
L. Rehorek, Z. Chlup, A.R. Boccaccini, I. Dlouhy .....	212
<b>Novel High-Resolution Micro-CT Based Surface Roughness Measurement Protocol for Complex Porous Structures</b>	
G. Kerckhofs, G. Pyka, E. Valesco Martin, M. Moesen, J. Schrooten, M. Wevers .....	213
<b>Metal Foam - Biocement Composites: Mechanical and Biological Properties and Perspectives for Bone Implant Design</b>	
B. Nies, S. Glorius, J. Farack, A. Lode, P. Quadbeck, R. Hauser, G. Standke, M. Gelinsky, D. Scharnweber, S. Rößler, G. Stephani .....	219
<b>Characterisation of the Influence of Surface Modification on the Morphology and the Mechanical Behavior of Rapid Prototyped Porous Structures for Tissue Engineering Applications</b>	
G. Pyka, G. Kerckhofs, E. Valesco Martin, S. Van Bael, M. Moesen, Y. Chin Chai, J. Schrooten, M. Wevers .....	225
<b>Dynamic Properties of Titanium Foams Intended for Orthopedic Applications</b>	
L.-P. Lefebvre, M.N. Bureau, E. Baril .....	231
<b>Series Production of CE-Certified Implants with Integrated, Engineered Cellular Structures</b>	
U. Ljungblad .....	232
<b>Fabrication and Evaluation of Porous Titanium for Biomedical Applications</b>	
S.E. Kim, D.G. Lee, Y.T. Hyun, J.K. Hong .....	236
 <u>Session E</u>	
<b>Vibro-Acoustic Simulation of Aluminum Foam Parts Using Multi-Scale Technique</b>	
L. Karas, K. Jalics, H.-H. Priebsch .....	245
<b>Oxide-Based Cellular Ceramic Monolithic Honeycombs Used in Catalysis and Filtration Applications</b>	
J.-J. Theron .....	252
<b>Modification of Closed Cell Aluminum Foams for Automobile Noise Control</b>	
Z. Cao, L. Liang, G. Yao .....	258

<b>High Temperature Nickel and Iron-Based Alloy Metal Foams for Filtration Applications</b>	
R. Poss, B. Klöden, A.-S. Dreher, G. Walther .....	264
<b>Design Requirements for the Implementation of Cellular Metals as Crash-Absorbing Elements in Car Seats</b>	
S. Nestic, K. Unruh, T. Hipke, W. Michels, U. Krupp .....	269
<b>Basic Tests of Sintered Metal Sponge for Application in Car Exhaust Systems</b>	
H. Wieser, W. Hahnl .....	275
<b>Metal Cellular Structures</b>	
N. Reger .....	276
 <u>Session F</u>	
<b>Open Cell Metal Foams - Application-oriented Structure and Material Selection</b>	
P. Quadbeck, K. Kümmel, R. Hauser, G. Standke, J. Adler, G. Stephani .....	279
<b>Failure Mechanisms in Hybrid Nanocrystalline Cellular Materials</b>	
G.D. Hibbard .....	289
<b>Investigation of Stress Induced Phase Transformation in TRIP-Steel/Mg-PSZ Composites Using EBSD</b>	
H. Berek, C.G. Aneziris, H. Hasterok, H. Biermann, S. Wolf, L. Krüger .....	295
<b>Measurement of the Thermal Conductivity of Aluminium Foam-Polypropylene Interpenetrating Phase Composites</b>	
N. Dukhan, X. Li, N. Rayess .....	301
<b>Comparative Study of Compressive Characteristics of WBK and WBD</b>	
K.-J. Kang, G.D. Ko, K.-W. Lee .....	307
<b>Aluminium Foam/Steel Interface Formed during Foaming in Air or Argon Flow: a Micro Structural Comparison</b>	
D. Negri, V. Mussi, M. Monno .....	313
<b>Cellular Metals Based on Wire Structures</b>	
T. Studnitzky, E. Kieselstein, W. Hufenbach, D. Weck, R. Gottwald, G. Stephani, S. Kaina .....	320
<b>Structure of Bell-Type Metallic Hollow Spheres Made by High Precision Progressive Press from Thin Sheet</b>	
N. Uchida, Y. Mihara, K. Shinagawa, H. Yoshimura .....	327

<b>Lessons from Nature for the Construction of Ceramic Cellular Materials for Superior Energy Absorption</b> K.G. Nickel, V. Presser, C. Berthold, A. Vohrer, H. Finckh, T. Stegmaier .....	334
<b>Investigation of the Mechanical Behaviour of Particulate Aluminium-Epoxy Hybride Foams in Dependence upon the Metal and Polymer Content</b> J. Baumeister, J. Weise, D. Ruparella, M. Wichmann .....	340
<b>Application of Contactless and fast Speckle-Photometry Technique for Materials Characterization and Quality Control of Cellular Materials</b> J. Schreiber, B. Bendjus, U. Cikalova, N. Khilo .....	346
<b>Compressive Mechanical Properties of a New Porous Metal "Kushidango" Type MHS Structure</b> H. Yoshimura, K. Shiagawa, Y. Mihara .....	347
<b>Numerical Prediction of the Macroscopic Material Response for the Design of Solid Foams with Structural Hierarchy</b> J. Hohe, C. Beckmann, M. Reinfried, F. Luthardt .....	353
<b>Mechanical Behaviour of Truss Cores Fabricated of Composite Wires</b> K.-J. Kang, B.-C. Lee, K.-W. Lee, J.-H. Byun .....	359
<b>Compressive Deformation Behavior and Microstructure of Extruded Multi-Cell TRIP-Steel/Mg-PSZ Columns</b> D. Ehinger, C.G. Aneziris, U. Martin, L. Krüger, C. Weigelt, M. Herrmann .....	365
<b>Differences in Morphology of Single Crystalline Nickel-Based Membranes Using Creep Deformation or Stress-free Coarsening in the Production Process</b> B. Hinze, J. Rösler .....	371
<b>Effect of Alloying and Heat Treatment on the Mechanical Properties of Metal Matrix Syntactic Foams</b> I.N. Orbulov, Á. Németh, J. Ginzler .....	377
<b>Improvement of the Energy Absorption Capacity of Open-Cell Aluminium Foams by the Electrodeposition of Nanocrystalline Metals</b> A. Jung, H. Natter, S. Diebels, E. Lach, R. Hempelmann .....	383
<b>Toughening of Porous Hydroxyapatite Ceramics</b> M. Dressler, F. Dombrowski, U. Simon, J. Börnstein, V.D. Hodoroaba, M. Feigl, S. Granow, R. Gildenhaar, M. Neumann .....	387

<b>Development of Eco-Contact Materials Using Ag Alloy</b> H.-S. Lee, H.J. Jeon .....	388
<b>Deformation Behaviour of Syntactic Iron - Micro Glass Bubble Foams</b> J. Weise, G. Derner Silva, N. Salk, J. Baumeister, M.A. Bayoumi .....	389
<b>Modeling of Tensile Properties of a Polymer-Metal Foam Structural Hybrid Material</b> N. Dukhan, N. Rayess, A. Adenwala .....	395
<b>Creep Compression Behavior of Polyurethane Foam from Cryogenic Temperatures : Size Effect and Deformation Mechanisms</b> A.-G. Denay, S. Castagnet, A. Roy, G. Alise .....	401
<b>Quality Measurement of Open-Porous Foams and Fibrous Structures by Means of <math>\mu</math>CT</b> B. Fischer, P. Krüger .....	403
<b>Effects of Supercritical CO<sub>2</sub> on the Properties of PP/Clay/ Mg (OH)<sub>2</sub> Polymer Composites</b> M. Taşdemir, G.T. Caneba, B. Wang, J.-Y. Hwang .....	406
<b>On the Role of Filler Materials on Physical and Mechanical Properties of Aluminum Foam Produced by SDP</b> A. Babakhani, A. Moloodi .....	412
<b>High Speed Compression Test of Metallic Foams and Cellular Metals</b> N. Kanetake, K. Kitazono, M. Kobashi, H. Yoshimura, T. Miyoshi, H. Kanahashi, K. Tanaka, F. Ono .....	418
<b>Impact of Fluid Flow on Effective Thermal Conductivity in Sintered Metal Foams</b> S. Brendelberger, S. Schulze, T. Fend, R. Pitz-Paal .....	424
<b>Comparing Structure and Properties in Cellular Materials</b> M. Thomas, C. Davoine, A. Götzfried, F. Popoff, V. Marcadon, S. Mercier .....	425
<b>Hysteresis Characteristics of Wire-Woven Bulk Kagome under Cyclic Shear Loading Conditions</b> K.-J. Kang, G.D. Ko, J.H. Joo .....	431
<b>Age Hardening of 17-4 PH Stainless Steel Foam Produced Using Polyvinylalcohol (PVA) Binder</b> I. Mutlu, E. Oktay .....	432
<b>Comparative Analysis of Dynamic Coefficients for Structural Foams (EPP and PU) under Low-Velocity Impact</b> S. Sadough Vanini, S.J. Salami, M. Sadighi .....	438

<b>Mechanical Properties of Lightweight Fibrillar Ceramics</b> T. Fey, P. Greil .....	444
<b>Joining Technologies and Mechanical Properties for a New Kind of 3D Wire Structures</b> S. Kaina, B. Kieback, W. Hufenbach, R. Gottwald, D. Weck, E. Kieselstein, Studnitzky, T., Stephani, G. ....	445
<b>Microstructural Analysis and Modelling of Cellular Materials</b> A. Liebscher, C. Redenbach .....	453
<b>Steel Foam Mitigates Instability in Structural Members</b> M. Moradi, S. R. Arwade, B. W. Schafer .....	454
Author Index .....	461
