CONTENTS

| | |
|--|--------------|
| Contributors | xxiii |
| Preface | xxiv |
| SECTION I PROCESS EQUIPMENT OPERATION | |
| 1 Introduction | 3 |
| <i>Michael D. Holloway</i> | |
| 2 Valves | 9 |
| <i>Ali Ahammad Shoukat Choudhury, Chikezie Nwaoha, and Sharad Vishwasrao</i> | |
| 2.1 Types of Control Valves, 10 | |
| 2.1.1 Linear-Motion Control Valves, 10 | |
| 2.1.2 Rotary-Motion Control Valves, 11 | |
| 2.1.3 Nonreturn Valves, 12 | |
| 2.1.4 Relief Valves, 12 | |
| 2.2 Control Valve Actuators, 12 | |
| 2.2.1 Pneumatic Valve Actuators, 12 | |
| 2.2.2 Electric Valve Actuators, 13 | |
| 2.2.3 Hydraulic Valve Actuators, 13 | |
| 2.3 Control Valve Sizing and Selection, 13 | |
| 2.3.1 Selecting a Valve Type, 14 | |
| 2.3.2 Sizing and Selection: Letting the Computer Do It All, 15 | |
| 2.4 Common Problems of Control Valves, 15 | |
| 2.4.1 Control Valve Cavitation, 15 | |
| 2.4.2 Control Valve Leakage, 16 | |
| 2.4.3 Control Valve Nonlinearities, 17 | |
| 2.5 Diagnosing Control Valve Problems, 19 | |
| 2.6 Control Valve Reliability and Selection, 20 | |
| 2.7 Control Valve Maintenance, 22 | |
| 2.7.1 Detecting Control Valve Stiction, 23 | |

- 2.8 Control Valve Troubleshooting, 24
- References, 24

3 Pumps

27

Craig Redmond

- 3.1 Types of Pumps, 28
 - 3.1.1 Positive-Displacement Pumps, 28
 - 3.1.2 Dynamic Pumps, 30
- 3.2 Pump Applications, 34
 - 3.2.1 Flooded Suction Applications, 34
 - 3.2.2 Suction Lift Applications, 35
 - 3.2.3 Staged Pumping, 35
 - 3.2.4 Solids-Handling Applications, 36
- 3.3 Pump Sizing and Selection, 37
 - 3.3.1 System Head Curve, 37
 - 3.3.2 Pump Performance Curves, 38
 - 3.3.3 Actual Pump Sizing and Selection, 39
 - 3.3.4 Net Positive Suction Head, 40
 - 3.3.5 Net Positive Suction Head Available, 40
- 3.4 Pump Maintenance, 40
 - 3.4.1 Bearing Lubrication, 41
 - 3.4.2 Seal Maintenance, 41
 - 3.4.3 Maintaining Performance, 43
 - 3.4.4 Winterizing and Long-Term Storage, 43
 - 3.4.5 Cold Temperature Installations, 43
- 3.5 Pump Troubleshooting, 44

4 Pipes

45

Shaohui Jia

- 4.1 Types of Pipes, 45
 - 4.1.1 Seamless Pipe, 45
 - 4.1.2 Welded Pipe, 45
- 4.2 Pipe Selection, 46
 - 4.2.1 Pipe Strength, 46
 - 4.2.2 Pipe Toughness, 46
 - 4.2.3 Pipe Weldability, 48
 - 4.2.4 Piping Material, 48
- 4.3 Pipeline Network Design and Optimization, 48
- 4.4 Pipeline Failure, 50
 - 4.4.1 Pipe External Corrosion, 51
 - 4.4.2 Pipe Internal Corrosion, 52
 - 4.4.3 Stress Corrosion Cracking, 53
- 4.5 Pipeline Inspection and Leak Detection, 54
 - 4.5.1 Pipeline Inspection, 54
 - 4.5.2 Pipeline Inspection Tools, 55
 - 4.5.3 Pipeline Leak Detection, 56
- 4.6 Pipe Maintenance, 58
 - 4.6.1 Pipeline Coatings, 58
 - 4.6.2 Pipeline Repair, 59
- 4.7 Pipe Troubleshooting, 60
- References, 61

| | | |
|----------|--|-----------|
| 5 | Cooling Towers | 63 |
| | <i>Zaki Yamani Zakaria and Chikezie Nwaoha</i> | |
| 5.1 | Cooling Tower Operation, 63 | |
| 5.1.1 | Cooling Tower Psychrometrics, 63 | |
| 5.1.2 | Principles of Cooling, 65 | |
| 5.1.3 | Heat Exchange, 67 | |
| 5.1.4 | Components of Cooling Towers, 67 | |
| 5.2 | Types of Cooling Towers, 69 | |
| 5.2.1 | Natural-Draft Cooling Towers, 69 | |
| 5.2.2 | Mechanical-Draft Cooling Towers, 72 | |
| 5.3 | Common Problems of Cooling Towers, 74 | |
| 5.3.1 | Scale Deposits, 74 | |
| 5.3.2 | Delignification of Wood, 74 | |
| 5.3.3 | Poor Pump Performance, 75 | |
| 5.3.4 | Poor Airflow, 75 | |
| 5.3.5 | Makeup Water, 75 | |
| 5.3.6 | Clogging of Distribution Nozzles, 75 | |
| 5.4 | Measuring Cooling Tower Performance, 75 | |
| 5.4.1 | Performance Assessment, 76 | |
| 5.5 | Cooling Tower Maintenance, 77 | |
| | References, 79 | |
| 6 | Filters and Membranes | 81 |
| | <i>Flora Tong and Chikezie Nwaoha</i> | |
| 6.1 | Types of Filters, 81 | |
| 6.1.1 | Gas Filters, 82 | |
| 6.1.2 | Liquid Filters, 83 | |
| 6.2 | Mechanisms of Filtration, 87 | |
| 6.2.1 | Depth Straining, 87 | |
| 6.2.2 | Surface Straining, 87 | |
| 6.2.3 | Depth Filtration, 87 | |
| 6.2.4 | Cake Filtration, 87 | |
| 6.3 | Filter Selection, 87 | |
| 6.3.1 | Chemical Compatibility, 87 | |
| 6.3.2 | Accurate Pore Size, 87 | |
| 6.4 | Particle-Size Measurement Techniques, 88 | |
| 6.4.1 | Image Analysis, 88 | |
| 6.4.2 | Direct Mechanical Measurement, 88 | |
| 6.4.3 | Ultrasonics, 88 | |
| 6.4.4 | Laser Scattering Technology, 88 | |
| 6.5 | Filter Location, 89 | |
| 6.5.1 | Pressure Line Filters, 89 | |
| 6.5.2 | Suction Line Filters, 89 | |
| 6.5.3 | Return Line Filters, 89 | |
| 6.6 | Membrane Filtration, 89 | |
| 6.6.1 | Ultrafiltration, 90 | |
| 6.6.2 | Microfiltration, 94 | |
| 6.6.3 | Reverse Osmosis, 95 | |
| 6.6.4 | Nanofiltration, 102 | |
| 6.7 | Filter Maintenance, 103 | |
| 6.7.1 | Preparation for Maintenance, 104 | |
| | References, 104 | |

7 Sealing Devices**107***Matt Tones and Jim Drago*

- 7.1 Gaskets, 107
 - 7.1.1 Gasket Materials, 107
 - 7.1.2 Gasket and Seal Construction, 113
 - 7.1.3 Principles of Gasket Operation, 119
 - 7.1.4 Gasket and Metal Seal Applications, 120
 - 7.1.5 Gasket Selection, 123
- 7.2 Compression Packings, 125
 - 7.2.1 Packing Materials, 126
 - 7.2.2 Packing Construction, 128
 - 7.2.3 Packing Selection, 129
 - 7.2.4 Packing Installation, 130
- 7.3 Mechanical Seals, 131
 - 7.3.1 Considerations for Using Mechanical Seals, 132
 - 7.3.2 Types of Mechanical Seals, 134
 - 7.3.3 Mechanical Seal Applications, 137
 - 7.3.4 Environmental Controls, 140
 - 7.3.5 Failure Analysis, 142
 - 7.3.6 Troubleshooting Mechanical Seals, 144
- 7.4 Expansion Joints, 147
 - 7.4.1 Joint Construction, 148
 - 7.4.2 Principles of Joint Operation, 149
 - 7.4.3 Joint Selection, 149
 - 7.4.4 Industrial Use of Expansion Joints, 152
 - 7.4.5 Joint Installation, 155
 - 7.4.6 Joint Troubleshooting, 156
- 7.5 General Sealing Device Selection, 157
 - 7.5.1 Product Selection, 157
 - 7.5.2 Understanding the Forces, 157
 - 7.5.3 STAMPS Criteria, 158
- References, 161

8 Steam Traps**163***Jacob E. Uche and Chikezie Nwaoha*

- 8.1 Steam Trap Operation, 163
- 8.2 Types of Steam Traps, 164
 - 8.2.1 Thermodynamic Steam Traps, 164
 - 8.2.2 Mechanical Steam Traps, 166
 - 8.2.3 Thermostatic Steam Traps, 169
- 8.3 Steam Trap Installation, 172
 - 8.3.1 Outlets of Steam-Using Equipment, 172
 - 8.3.2 On Steam Lines, 172
- 8.4 Steam Trap Checking, 172
 - 8.4.1 Sight Method, 173
 - 8.4.2 Sound Method, 174
 - 8.4.3 Temperature Method, 174
 - 8.4.4 Fluid Conductivity Method, 174
- 8.5 Common Problems of Steam Traps, 175
 - 8.5.1 Air Binding, 175
 - 8.5.2 Dirt, 175
 - 8.5.3 Improper Sizing, 175

- 8.5.4 Steam Trap Leakage, 175
- 8.5.5 Steam Locking, 176
- 8.5.6 Water Hammer, 176
- 8.5.7 Erosion of Seat and Valve Sealing Faces, 176
- 8.5.8 Life Expectancy, 176
- 8.6 Steam Trap Selection, 176
- 8.7 Steam Trap Applications, 178
 - 8.7.1 Protection Service, 178
 - 8.7.2 Process Service, 178
 - 8.7.3 Other Applications, 178
- 8.8 Steam Trap Sizing, 178
 - 8.8.1 Basic Considerations, 179
- 8.9 Steam Trap Maintenance, 181
 - References, 181

9 Process Compressors 183

N. Sitaram and Chikezie Nwaoha

- 9.1 Types of Compressors, 183
- 9.2 Continuous Compression Compressors, 184
 - 9.2.1 Ejectors, 184
 - 9.2.2 Dynamic, Rotodynamic, or Turbocompressors, 185
- 9.3 Intermittent Compression Compressors, 186
 - 9.3.1 Positive-Displacement Compressors (Intermittent Flow), 186
 - 9.3.2 Rotary Compressors (Continuous Flow), 187
- 9.4 Centrifugal Compressors, 189
 - 9.4.1 Major Components of Centrifugal Compressors, 189
 - 9.4.2 Thermodynamics of Centrifugal Compressors, 195
 - 9.4.3 Energy Transfer in Centrifugal Compressors, 196
 - 9.4.4 Slip in Centrifugal Impellers, 197
 - 9.4.5 Losses and Efficiencies, 198
 - 9.4.6 Performance, Stall, and Surge, 199
 - 9.4.7 Drivers, 201
- 9.5 Reciprocating Piston Compressors, 202
 - 9.5.1 Compressor Operation, 202
 - 9.5.2 Thermodynamic Laws, 203
 - 9.5.3 Compression Cycles, 203
 - 9.5.4 Power Requirements, 204
 - 9.5.5 Multistage Compression, 204
 - 9.5.6 Cylinder Clearance and Volumetric Efficiency, 205
 - 9.5.7 Valve Losses, 206
 - 9.5.8 Major Components of Reciprocating Piston Compressors, 206
 - 9.5.9 Drivers, 207
- 9.6 Compressor Troubleshooting, 209
 - References, 210
 - Further Reading, 211

10 Conveyors 213

Okenna Obi-Njoku

- 10.1 Industrial Use of Conveyors, 213
- 10.2 Types of Conveyors, 214
 - 10.2.1 Belt Conveyors, 214
 - 10.2.2 Bucket Conveyors, 215

- 10.2.3 Cart-on-Track Conveyors, 215
- 10.2.4 Chute Conveyors, 216
- 10.2.5 Gravity Wheel Conveyors, 216
- 10.2.6 Monorails, 216
- 10.2.7 Chain Conveyors, 216
- 10.2.8 Pneumatic Conveyors, 217
- 10.2.9 Roller Conveyors, 217
- 10.2.10 Screw Conveyors, 218
- 10.2.11 Slat Conveyors, 218
- 10.2.12 Sortation Conveyors, 219
- 10.2.13 Vane-Type Throwing Machines, 219
- 10.2.14 Tow Conveyors, 219
- 10.2.15 Trolley Conveyors, 219
- 10.2.16 Vertical Conveyors, 220
- 10.2.17 Vibrating Conveyors, 220
- 10.2.18 Troughed Belt Conveyors, 220
- 10.2.19 Magnetic Belt Conveyors, 220
- 10.2.20 Power-and-Free Conveyors, 220
- 10.3 Conveyor Selection, 221
- 10.4 Conveyor Safety, 221
- 10.5 Conveyor Maintenance, 222
- 10.6 Summary, 222
- References, 223

11 Storage Tanks

225

Marcello Ferrara and Chikezie Nwaoha

- 11.1 Types of Storage Tanks, 225
 - 11.1.1 Aboveground Tanks, 225
 - 11.1.2 Underground Tanks, 226
- 11.2 Storage Tank Classification, 227
 - 11.2.1 Aboveground Tanks, 227
 - 11.2.2 Underground Tanks, 227
- 11.3 Construction Materials, 227
 - 11.3.1 Tank Materials, 227
 - 11.3.2 Protective Coatings, 228
 - 11.3.3 Insulation, 229
- 11.4 Common Problems of Storage Tanks, 229
 - 11.4.1 Corrosion, 229
 - 11.4.2 Vapor Losses, 230
 - 11.4.3 Storage Tank Fires, 231
- 11.5 Storage Tank Maintenance, 233
 - 11.5.1 Tank Blanketing, 233
 - 11.5.2 Holiday Detection, 233
 - 11.5.3 Tank Cleaning, 234
- 11.6 Tank Appurtenances, 241
 - 11.6.1 Mixers, 241
 - 11.6.2 Dikes, 241
 - 11.6.3 Insulators, 241
 - 11.6.4 Platforms and Ladders, 242
 - 11.6.5 Gauging Devices, 242
 - 11.6.6 Valves, 242
 - 11.6.7 Manways, 243
 - 11.6.8 Diffusers, 243

- 11.6.9 Water Cannons, 243
- 11.6.10 Vents, 243
- 11.6.11 Grounding, 243
- 11.6.12 Supporting Structures, 243
- 11.7 Storage Tank Maintenance, 243
- References, 244

12 Mixers**245***Jayesh Ramesh Tekchandaney*

- 12.1 Mixing Concepts: Theory and Practice, 246
 - 12.1.1 Batch and Continuous Mixing, 246
 - 12.1.2 Selection of Mixing Equipment, 247
 - 12.1.3 Design of Mixing Equipment, 247
 - 12.1.4 Scale-Up of Mixing Equipment, 247
- 12.2 Fluid Mixing, 248
 - 12.2.1 Fluid Mixing Applications, 248
 - 12.2.2 Mixing Regimes, 249
 - 12.2.3 Power Consumption in Agitated Vessels, 249
 - 12.2.4 Flow Characteristics, 251
 - 12.2.5 Liquid Agitation Equipment, 253
- 12.3 Solid Blending, 264
 - 12.3.1 Properties of Solids Affecting Blending, 264
 - 12.3.2 Types of Blend Structures, 265
 - 12.3.3 Mechanisms of Solid Blending, 265
 - 12.3.4 Segregation Mechanisms, 265
 - 12.3.5 Scale-Up of Solid Mixers, 266
 - 12.3.6 Solid Blending Equipment, 266
- 12.4 Mixing High-Viscosity Materials and Pastes, 274
 - 12.4.1 Dispersive, Distributive, and Convective Mixing, 275
 - 12.4.2 Power for Viscous Mixing, 275
 - 12.4.3 Scale-Up of High-Viscosity Mixers, 275
 - 12.4.4 Heat Transfer, 275
 - 12.4.5 Equipment for Mixing High-Viscosity Materials and Pastes, 275
- 12.5 Mechanical Components in Mixing Equipment, 284
 - 12.5.1 Motors, 284
 - 12.5.2 Mixer Speed Reducers, 285
 - 12.5.3 Couplings, 287
 - 12.5.4 Bearings, 288
 - 12.5.5 Shaft Seals, 289
 - 12.5.6 Variable-Speed Operation Devices, 291
 - 12.5.7 Mixer Installation, Startup, and Maintenance, 292
 - 12.5.8 Mixer Specifications, 295
- References, 295

13 Boilers**297***Celestine C. G. Nwankwo*

- 13.1 Types of Boilers, 298
 - 13.1.1 Water Tube Boilers, 299
 - 13.1.2 Fire Tube Boilers, 300
 - 13.1.3 Pot Boilers, 300
 - 13.1.4 Saddle Boilers, 301
 - 13.1.5 Packaged Boilers, 301

- 13.1.6 Fluidized-Bed Combustion Boilers, 301
- 13.1.7 Stoker-Fired Boilers, 302
- 13.1.8 Pulverized Fuel Boilers, 302
- 13.1.9 Waste Heat Boilers, 302
- 13.1.10 Thermic Fluid Heaters, 302
- 13.1.11 Superheated Steam Boilers, 302
- 13.2 Boiler Accessories, 303
 - 13.2.1 Fittings and Accessories at the Boiler Unit, 303
 - 13.2.2 Steam Accessories, 303
 - 13.2.3 Combustion Accessories, 304
- 13.3 Boiler Selection, 305
 - 13.3.1 Costs, 305
 - 13.3.2 Boiler Sizing, 305
 - 13.3.3 Heating and Heating Fuels, 306
- 13.4 Common Problems of Boilers, 306
 - 13.4.1 Scaling, 306
 - 13.4.2 Corrosion, 307
 - 13.4.3 Boiler Water Carryover, 308
- 13.5 Boiler Failure Analysis and Welding Defects, 308
 - 13.5.1 Boiler Failure Analysis, 308
 - 13.5.2 Welding Defects, 309
- 13.6 Boiler Maintenance, 313
 - 13.6.1 Boiler Upgrading and Retrofitting, 315
 - 13.6.2 Boiler Feed Water Treatment, 316
 - 13.6.3 Boiler Stack Economizer, 317
 - 13.6.4 Boiler Blowdown Control, 317
- 13.7 Boiler Troubleshooting, 319
 - 13.7.1 Combustion Problems, 319
 - 13.7.2 Draft Fan and Burner Problems, 320
 - 13.7.3 Fuel Pump and Fuel Pressure Problems, 320
- 13.8 Boiler Chemicals, 321
 - 13.8.1 Phosphates, 322
 - 13.8.2 Lime Softening and Sodium Trioxocarbonate, 322
 - 13.8.3 Chelates, 322
 - 13.8.4 Polymers, 323
 - 13.8.5 Oxygen Scavengers, 324
 - 13.8.6 Neutralizing Amines, 325
 - 13.8.7 Filming Amines, 325
- 13.9 Boiler Efficiency and Combustion, 325
 - 13.9.1 Heat Losses, 326
 - 13.9.2 Types of Burners, 326
 - 13.9.3 Burner Control Systems, 327
- References, 327
- Further Reading, 328

SECTION II PROCESS PLANT RELIABILITY

14 Engineering Economics for Chemical Processes

331

Alberto R. Betancourt-Torcat, L. A. Ricardez-Sandoval, and Ali Elkamel

- 14.1 Time Value of Money, 331
- 14.2 Cash Flow Analysis, 333
 - 14.2.1 Compound Interest Factors for Single Cash Flows, 333

- 14.2.2 Compound Interest Factors for Annuities, 334
- 14.2.3 Arithmetic and Geometric Gradient Series, 334
- 14.3 Profitability Analysis, 336
 - 14.3.1 Payback Period, 336
 - 14.3.2 Minimum Acceptable Rate of Return, 336
 - 14.3.3 Present and Annual Worth Analysis, 336
 - 14.3.4 Internal Rate of Return, 337
- 14.4 Cost Estimation and Project Evaluation, 340
 - 14.4.1 Capital Investment, 340
 - 14.4.2 Cost Indexes, 341
 - 14.4.3 Capital Cost Estimates, 342
 - 14.4.4 Production Costs and Estimations, 348
 - 14.4.5 Estimation of Revenues and Cash Flow, 352
- References, 353

15 Process Component Function and Performance Criteria 355

Robert Free

- 15.1 Material Classification, 355
- 15.2 General Physical Quantities and Considerations, 356
 - 15.2.1 Important Definitions, 356
 - 15.2.2 State Quantities, 357
 - 15.2.3 Phase, 357
 - 15.2.4 Isolation, 357
 - 15.2.5 Flammability, 359
 - 15.2.6 Viscosity, 359
 - 15.2.7 Volatility, 361
 - 15.2.8 Corrosive Substances, 361
 - 15.2.9 Conductivity, 361
 - 15.2.10 Composition, 362
 - 15.2.11 Morphology, 363
 - 15.2.12 Solid-Specific Considerations, 363
 - 15.2.13 Coefficient of Friction, 365
- 15.3 Material Transfer and Conveyance Equipment, 366
- 15.4 Conveyors, 367
 - 15.4.1 Conveyor Belts, 367
 - 15.4.2 Overhead Conveyors, 377
 - 15.4.3 Roller Conveyors, 382
 - 15.4.4 Chute Conveyors, 388
 - 15.4.5 Screw Conveyors, 389
 - 15.4.6 Other Conveyor Types, 392
- 15.5 Pumps, 394
 - 15.5.1 Head and Pressure: Fluid Flow Systems, 394
 - 15.5.2 Pump Construction and Operation, 395
 - 15.5.3 Selection by Application, 398
 - 15.5.4 Reliability, Maintenance, and Process Development, 399
 - 15.5.5 Additional Information, 400
- 15.6 Valves, 400
 - 15.6.1 Valve Construction and Function, 401
 - 15.6.2 Selection Specification, 404
 - 15.6.3 Additional Information, 405
- 15.7 Pipes, 405
 - 15.7.1 Pipe Standards, 406

- 15.7.2 Pipe Classification, 406
- 15.7.3 Common Pipe Materials, 408
- 15.7.4 Pipe Sizing, 410
- 15.7.5 Additional Information, 410
- 15.8 Conclusions, 410
- References, 410
- Corporation Web Sites, 411

16 Failure Analysis and Interpretation of Components 413

Michael D. Holloway

- 16.1 Assessing the Situation, 413
- 16.2 Failure Defined, 414
- 16.3 Taking Advantage of Failure, 415
- 16.4 Sources of Failure, 416
- 16.5 Failure of Materials and of Machines, 416
- 16.6 Types of Forces, 417
- 16.7 Strength, 418
 - 16.7.1 Stress and Strain, 418
 - 16.7.2 Yield, 419
- 16.8 Creep (Deformation), 419
- 16.9 Fatigue (Material), 420
 - 16.9.1 Rate of Fatigue, 421
 - 16.9.2 Fracture, 421
- 16.10 Wear, 422
- 16.11 Property Changes, 423
- 16.12 Temperature, 423
- 16.13 Oxidation: Molecular Transitions and Chemical Influences, 425
 - 16.13.1 Corrosion, 425
 - 16.13.2 Corrosion in Nonmetals, 425
 - 16.13.3 Galvanic Corrosion, 426
- 16.14 Deposit Formation, 426
- 16.15 Factors that Affect Deposit Formation, 428
 - 16.15.1 Concentration and Pressure, 428
 - 16.15.2 Particle Size and Contaminant Type, 428
 - 16.15.3 Adsorption, 429
- 16.16 Documenting Failure, 429
 - 16.16.1 Root Cause Investigation, 430
 - 16.16.2 Failure Examination, 432
- References, 432

17 Mechanical Integrity of Process Vessels and Piping 435

Oliver A. Onyewuenyi

- 17.1 Perspectives on Mechanical Integrity, Fitness for Service, and Condition Monitoring, 437
 - 17.1.1 Mechanical Integrity, 437
 - 17.1.2 Condition Monitoring, 438
 - 17.1.3 Fitness for Service, 438
- 17.2 Types of Flaws and Damage Mechanisms, 439
 - 17.2.1 Flaws or Discontinuities Versus Defects, 439
