<i>List of figures</i>	ix
<i>List of tables</i>	xxi
<i>Preface</i>	xxiii
<i>About the contributors</i>	xxv
<b>1 Turning</b>	<b>1</b>
<i>Viktor P. Astakhov, General Motors Business</i>	
<i>Unit of PSMi, USA</i>	
1.1 Introduction	1
1.2 Basic motions	3
1.3 The turning regime	7
1.4 Cutting force and power	11
1.5 Uncut (undeformed) chip thickness, equivalent cutting edge, chip flow direction, and true chip cross-section parameters	18
1.6 Design of a turning operation	24
1.7 Particularities of the geometry of cutting tool with indexable inserts	36
1.8 Cutting feed and surface finish in turning	51
1.9 Tool wear of SPTT	61
1.10 How to deal with vibrations in turning	67
1.11 References	76
<b>2 Drilling</b>	<b>79</b>
<i>Viktor P. Astakhov, General Motors Business</i>	
<i>Unit of PSMi, USA</i>	
2.1 Introduction	79

2.2	Drilling definition	80
2.3	Drill classification	83
2.4	Basic terms	91
2.5	Drilling regime	97
2.6	Drilling system	104
2.7	Tool layout as the starting point in the drilling system design	119
2.8	Drilling system – drill	133
2.9	References	211
<b>3</b>	<b>Milling</b>	<b>213</b>
	<i>L. Norberto López de Lacalle, Francisco J. Campa and Aitzol Lamikiz, University of the Basque Country, Spain</i>	
3.1	Milling and milling operations	213
3.2	Cutting parameters in the milling operations	221
3.3	Tool wear in milling	234
3.4	The current milling machines	236
3.5	Milling technology and machines for several sectors and applications	245
3.6	Milling forces modelling	267
3.7	Vibrations in milling	278
3.8	Conclusion	295
3.9	Acknowledgements	297
3.10	References	297
<b>4</b>	<b>Grinding and finishing processes</b>	<b>305</b>
	<i>Mark J. Jackson, Purdue University, USA</i>	
4.1	Introduction	305
4.2	High performance grinding using conventional abrasive wheels	307

---

4.3	High performance grinding using cBN grinding wheels	319
4.4	Superfinishing processes	331
4.5	Acknowledgements	332
4.6	References	332
<b>5</b>	<b>Thermal advanced machining processes</b>	<b>335</b>
	<i>Aitzol Lamikiz, Eneko Ukar, Ivan Tabernero and Silvia Martinez, University of the Basque Country, Spain</i>	
5.1.	Introduction to thermal machining processes	336
5.2.	Thermal sources	337
5.3.	Laser beam machining	347
5.4.	Case study: thermal enhanced cutting processes	361
5.5	References	371
	<i>Index</i>	<i>373</i>
