

PROCEEDINGS

of the

**34TH
NORTH
AMERICAN
POWER
SYMPOSIUM**

October 13 - 15, 2002

TABLE OF CONTENTS

Welcome to NAPS02	2
Arizona - The Grand Canyon State	2
Program Venues and Chairs of the MPS/NAPS	6

Technical Papers

M-AM3 Transmission and Distribution-I

- 017 F. Liang, B. Jeyasurya, "Performance Evaluation of Digital Filters for Transmission Line Distance Protection" Memorial University of Newfoundland 14
- 021 M. Elhribawy, L. Jennings, W. Keerthipala, "A Quantitative Study on the Feasibility of Electromagnetic Field Reduction by Phase Relocation in Three Phase Systems" University of Western Australia 21
- 041 C. Evrenosoglu, A. Abur, "Fault Location for Three Terminal Lines Using Traveling Waves" Texas A&M University 29
- 065 Q. Huang, G. Karady, D. Srinivasan, M. Tuominen, "Development of an On-line Monitoring System for the Leakage Current on ADSS Fiber Optic Cable" Arizona State University, Bonneville Power Administration 36
- 094 J. Gu, G. Karady, "Power System Transient Stability Analysis Using Switched Capacitor Circuits" Arizona State University 42

M-AM4 Power Systems- I

- 001 N. Logić, E. Kyriakides, G. T. Heydt, " L_p State Estimators for Power Systems" Arizona State University 48
- 004 U. Mhaskar, A. Kulkarni, "An Investigation into the Relationship Between Swing Mode Controllability using FACTS Devices and Observability in Locally Measured Signals" Indian Institute of Technology 53
- 012 M. Vélez-Reyes, L. Jáuregui-Rivera, "Conditioning Analysis of Parameter Estimation in a Synchronous Generator" University of Puerto Rico - Mayagüez 59
- 067 W. Qiu, M. Khammash, V. Vittal, "Power System Stabilizer Design Using LPV Approach" Iowa State University 67
- 066 A. Quintela, C. Castro, "Contingency Ranking for Voltage Stability Using Improved Branch-Based Voltage Collapse Proximity Indices" State University of Campinas 75

M-AM5 Energy Conversion

- 054 A. Méndez-Goyco, V. Oliveras-Martínez, E. O'Neill-Carrillo, J. García-Pérez, D. Rodríguez, "PV Systems in Electric Power Grids" University of Puerto Rico - Mayagüez 84
- 009 Y. Suzuki, I. Takano, Y. Sawada, "Reduction of PV Output Fluctuation by Modified Moving Average Data Processing with EDLC" Kogakuin University 91
- 045 B. Malinga, J. Sneckenberger, "Modeling and Control of a Wind Turbine as a Distributed Resource in an Electric Power System" West Virginia University 99
- 039 K. Sedghisigarchi, A. Feliachi, "Dynamic Model of a Grid - Connected Solid Oxide Fuel Cell (SOFC)" West Virginia University 107
- 063 K. Svendsen, C. Johnson, K. Putnam, J. Law, "Randall Creek Hydroelectric Production Site" University of Idaho 114

M-AM6 Energy Utilization and Power Electronics

- 027 C. Gross, E. Hicks, T. Burch, "Thermal Effects in Polyphase Induction Machines" Auburn University 121
- 050 H. Salehfar, K. Asirvatham, "Digital Signal Processor Based Vector Control of AC Motor Drives" University of North Dakota 125
- 052 O. Argueta, J. Naredo, J. Santana, "A Strategy for the Development of a DC / DC Converter for a DC Series Motor Speed Control" Universidad Autonoma de Guadalajara, CINVESTAV-Mexico, Mexican Center for Semiconductor Technology - Motorola 130
- 090 J. Agashe, V. Sastry, V. Ajarapu, S. S. Venkata, "A MODELICA-Based Object-Centric Virtual Power Electronics Laboratory" Iowa State University 136

M-AM7 Transmission System Hardware and Transformers

- 051 D. Tylavsky, Y. Liang, X. Mao, "Simulation of Top-oil Temperature for Transformers" Arizona State University 145
- 025 A. Rodrigues, M. Da Silva, "Reliability Enhancement of Power Transactions Using Phase Shifting Transformers" Federal University of Maranhão 152
- 061 M. Mousavi, K. Butler-Purry, "Study of Thermal Aging Effects on Distribution Transformer Solid Insulation" Texas A&M University 160
- 093 G. Karady, Y. Lei, D. Srinivasan, S. Ahmed, "Study on the Insulation Contamination Monitor Performance" Arizona State University, Southern California Edison 168

M-PM1 Transmission and Distribution-II

- 008 S. Chakka, S. Suryanarayanan, G. T. Heydt, "Analysis and Estimation of Loop (Parallel) Flow in Wide-Area Interconnected Power Systems" Arizona State University 176
- 031 M. Dávila, J. Naredo, P. Moreno, "Transient Analysis of Power Lines Including Non-Uniform and Frequency Dependent Effects" CINVESTAV - Mexico 181
- 079 Z. Miao, R. Klein, M. Choudhry, L. Fan, "A Fuel Cell Model From Data Fitting Method and its Impacts on a Power Distribution System with DGs" West Virginia University, Midwest ISO 187
- 081 Z. Ajjawi, N. Ngu, M. Etezadi-Amoli, "An Investigation of a VAR Flow Problem" University of Nevada - Reno 194

M-PM2 Power Systems -II

- 029 Y. Zhou, V. Ajarapu, "Optimal Margin Boundary Tracing with Continuation Optimal Power Flow" General Electric, Iowa State University 200
- 070 M. Andrade, A. Messina, "Application of the Hilbert Transform to the Analysis of Low Frequency Inter-Area Oscillations" CINVESTAV - Mexico 206
- 076 A. Quelhas, J. McCalley, "Modeling Energy System Information Flows" Iowa State University 212
- 084 W. Gatterbauer, M. Ilić, "Counterexamples to Commonly Held Assumptions on Unit Commitment and Market Power Assessment" Massachusetts Institute of Technology 219

M-PM3 Power Quality

- 024 R. Arseneau, "Power Quality and the Performance of Revenue Meters" National Research Council of Canada 227
- 053 J. García-Pérez, M. Mendoza-Sánchez, E. Olmeda, C. Ramos-Robles, E. O'Neill-Carrillo, "Monitoring, Modeling and Solving Power Quality Events" University of Puerto Rico - Mayagüez 232
- 087 K. Koellner, "SRP Voltage Sag Index Methods and Findings" SRP 239

M-PM4 Reliability / Restoration / Standby Power

- 056 S. Gupta, A. Pahwa, R. Brown, S. Das, "A Fuzzy Model for Overhead Distribution Feeders Failure Rates" Kansas State University, ABB 248
- 028 J. Mendes, O. Saavedra, J. Pessanha, "Power System Restoration with Priority Loads Using an Evolutionary Strategy Approach" Federal University of Maranhão 254

- 082 K. Mostafa, F. Ellermeier, "Operational Risk Analysis for Electricity Suppliers" Black and Veatch Corporation 261
- 086 J. Feng, R. Mascarenhas, J. Mitra "Integration of Standby Generators into Distributed Generation Systems" North Dakota State University 269

M-PM5 Specialized Power Systems

- 047 W. Gao, E. Solodovnik, R. Dougal, "Simulation and Visualization of a Shipboard DC Zonal Distribution Systems" University of South Carolina 275
- 046 L. Qi, K. Butler - Purry, "A New Modeling Strategy for Finite Inertia Power Systems Based on a Reformulated Reference Generator Model" Texas A&M University 279
- 064 A. Somani, B. Johnson, H. Hess, "Evaluation of Grounding and Protection Methods for a Shipboard Power System" University of Idaho 288
- 083 J. Momoh, S. Kaddah, Comparative Study between Two Voltage Stability Methods for Integrated Shipboard Power System with DC Zonal" National Science Foundation, Howard University 294

M-PM6 Neural and Agent Control Technologies

- 042 H. Xiao, K. Butler-Purry, "Developing Multi-Agents for Shipboard Electric Power System Automation" Texas A&M University 301
- 016 H-S. Ko, T. Niimura, "GMV Based Inverse Dynamic Neuro-Controller for Power System Stabilization" University of British Columbia 306
- 018 X. Wu, Z. Qu, "A New UPFC Control Strategy for Power System Working Under Stressed Conditions" University of Central Florida 312
- 033 D. Chaturvedi, O. Malik, P. Kalra, "Power System Stabilizer Using a Generalized Neural Network" Department of Science and Technology - Government of India, Dayalbagh Educational Institute, University of Calgary, Indian Institute of Technology - Kanpur 320

M-PM7 Transmission Engineering

- 085 N. Chaipanit, C. Rattanghovitput, A. Mohammed, J. Graves, R. Sundararajan "Field Aging of EPDM Transmission Line Insulator Surfaces" Arizona State University 329
- 036 P. Gómez, P. Moreno, J. Naredo, "Modeling Nonlinear Conditions in Transmission Network Transients Using the Numerical Laplace Transform" CINVSTAV - Mexico 335
- 077 S. Venkataraman R. Gorur, "Prediction of Polymer Insulating Material Degradation by Wavelet Transformation Technique" Arizona State University 341
- 020 R. Olsen, K. Edwards, "Safety Aspects of ADSS Cable Installations on High Voltage Transmission Lines" Washington State University, Bonneville Power Administration 345

M-PM8 Fuzzy and Predictive Control

- 015 G. Wang, K. E. Holbert, "Hybrid Classical-Fuzzy Controller for a Power Plant Water Supply System" Maxim Integrated Products, Arizona State University 352
- 059 F. Penha, C. Murari, "A New Fuzzy Reasoning Approach to Optimal Reactive Compensation for Unbalanced Primary Distribution in the Presence of Harmonic Distortion, Part I: the Solution Method" Federal University of Maranhão, State University of Campinas 360
- 060 F. Penha, C. Murari, "A New Fuzzy Reasoning Approach to Optimal Reactive Compensation for Unbalanced Primary Distribution in the Presence of Harmonic Distortion, Part II: the Numerical Results" Federal University of Maranhão, State University of Campinas 365
- 069 A. Hasanović, N. Atić, D. Rerkpreedapong, A. Feliachi, "Load Frequency Control Using Model Predictive Control" West Virginia University 370

M-PM9 Economic Operation / Dispatch and Distributed Generation

- 013 N. Kumarappan, M. Mohan, "Fuel Restricted Real Power Optimization Using Evolutionary Programming for Utility Systems" Anna University 376
- 058 D. Rodríguez, E. O'Neill-Carrillo, M. Concepción, J. García-Pérez, "Impact of Distributed Generation in Electric Power Systems" University of Puerto Rico - Mayagüez 381
- 062 W. Yang, G. Sheblé, Discrete Generation Decisions Simulation Including Market Dynamic Interactions" Iowa State University 387

- 071 P. Srinivasan, A. Feliachi, J. Sneckenberger, "Proton Exchange Membrane Fuel Cell Dynamic Model for Distributed Generation Control Purposes" West Virginia University 393

M-PM10 Issues of Modeling and Load Forecasting

- 010 E. Solodovnik, W. Gao, R. Dougal, "Automatic Model of Generation in VTB: Phase Domain Modeling of an Induction Machine" University of South Carolina 402
- 068 E. Bajrektarević, M. Choudhry, "Parameter Identification of Induction Motor Using a Genetic Algorithm and LabView Software" West Virginia University 408
- 074 M. Anderson, J. Pierre, R. Weis, "Confidence Interval Estimates for the Frequency and Damping Ratio of Electromechanical Modes using Ambient Data" University of Wyoming, University of Alaska 415
- 088 M. Poshtan, R. Ramanand "Web-Based Load Forecasting For Power Systems" Tulane University 421

T-AM1 Power Markets

- 030 V. Siriariyaporn, D. Gotham, R. Kramer, F. Sparrow, "Measuring the Cost of Providing the Regulation Ancillary 427
- 043 A. Botterud, A. Bhattacharyya, M. Ilić, "Futures and Spot Prices - An Analysis of the Scandinavian Electricity Market" Norwegian University of Science and Technology, Massachusetts Institute of Technology 435
- 026 M. Cain, T. Overbye, "Studies on the Impact of the Transmission System on Market Power in Electricity Markets" University of Illinois Urbana-Champaign 443

T-AM2 Power System Dynamics

- 022 J. Pessanha, O. Saavedra, J. Gomes de Matos, "Tracking Power System Voltage Stability Dynamics" Federal University of Maranhão 451
- 034 R. You, M. Nehrir, "The Effect of SVC on Damping Power System Oscillations" Montana State University 458
- 049 F. Dong, B. Chowdhury, M. Crow, L. Acar, "Fast Dynamic Simulations using the Quasi-Steady State Analysis Method" University of Missouri - Rolla 463
- 040 E. Scholtz, P. Sonthikorn, G. Verghese, B. Lesieutre, "Observers for Swing - State Estimation of Power Systems" Massachusetts Institute of Technology, Cornell University 470

T-AM3 Instrumentation and Control

- 019 K. E. Holbert, "Steady-State Ampacity Prediction Uncertainty Due to Input Error Propagation" Arizona State University 478
- 073 K. Choma, M. Etezadi - Amoli, "Performance Characteristics of Analog and Digital Excitation Systems" University of Nevada - Reno 485
- 078 E. Rahn, M. Seivert, M. Etezadi - Amoli, "Communication Scheme Analysis at a High Voltage Substation" University of Nevada - Reno 489
- 080 Z. Miao, M. Choudhry, R. Klein, "Control of Wind Turbine Generator in a Power Distribution System with Multiple Types of Distributed Generators (DG)" West Virginia University 494

T-AM4 Distribution Systems and Distribution Equipment

- 035 M. Mangapathirao, R. Nelson, R. Wall, B. Johnson, "Stochastic Approach for Modeling Arcing Faults in Cables From Experimental Data" University of Idaho 501
- 038 M. Masoum, M. Ladjevardi, E. Fuchs, W. Grady, "Application of Local Variations and Maximum Sensitivities Selection for Optimal Placement of Shunt Capacitor Banks Under Nonsinusoidal Operating Conditions" Iran University of Science and Technology, University of Colorado, University of Texas 507
- 014 H. Shaalan, "Using Simulations of Actual Power Distribution Systems as an Educational Tool" Georgia Southern University 516

T-AM5 Power Systems - III

- 003 M. Bakroun, A. İnan, G. T. Heydt, "Comparison of L_p State Estimators for Power Engineering Applications" Arizona State University, Yildiz Technical University 520

- 044 F. Mancilla-David, F. Alvarado, "Nomograms for Simultaneous Transfer Capability" University of Wisconsin - Madison 527
- 048 L. Zuluaga, F. Alvarado, "Voltage Constraints and Power Nomograms" University of Wisconsin 533
- 055 H. You, V. Vittal, "A Slow Coherency Identification Algorithm Considering Load Dynamics" Iowa State University 538
- 075 A. Velpuri, J. Law, H. Hess, E. Muljadi, "Analysis of Simultaneous Modulation of Two Voltage Components of a Single Converter Excited Induction Generator" University of Idaho, National Renewable Energy Laboratory 545

T-AM6 Energy and Voltage Control / Energy Storage

- 002 Y. Liu, Y. N. Chang, G. T. Heydt, "Single Phase Integral Cycle Controllers and Power Quality" Arizona State University, National Huwei Institute of Technology 553
- 037 A. Pandey, B. Singh, D. Kothari, "A Simple Fast Voltage Controller for Single-Phase Voltage Source PFC Converters" Indian Institute of Technology 559
- 072 N. Bhiwapurkar, M. Rathi, N. Mohan, "Power Factor Correction Circuit for Faster Dynamics and Zero Steady State Error Using Dual Voltage Controllers" University of Minnesota 563
- 091 P. Niu, L. Zhang, M. Crow, "A Cascaded Multilevel Converter Based SSSC / BESS" University of Missouri - Rolla 568
- 092 M. Crow, Y. Cheng, "Control Scheme for the STATCOM / BESS Using Diode-Clamped Multilevel Inverter" University of Missouri - Rolla 572
