Organization XVII

## VOLUME I

### Keynote presentations

Recent and landmark improvements in performance characterization of unbound aggregate bases and subbases and sublayers comprised of Chemically Stabilized Materials (CSMs) 3  
*D.N. Little*

The performance of rail track incorporating the effects of ballast breakage, confining pressure and geosynthetic reinforcement 5  
*B. Indraratna, S. Nimbalkar & D. Christie*

Airport pavement design for the 21st century 25  
*S.K. Agrawal*

### Subgrade soils

Improving subgrade strength and pavement performance by chemical treating subgrade soils 29  
*N. Bandara & M.J. Grazioli*

Study of dry sludge stabilization from Water Treatment Plant (WTP) in Taiaçupeba to use as compacted soil in earthwork ditches 37  

Alternatives to heavy test rolling for cohesive subgrade assessment 45  
*D.J. White, P.K.R. Vennapusa, H.H. Gieselman, L. Johanson & J. Siekmeier*

A comparative subgrade evaluation using CBR, vane shear, light weight deflectometer, and resilient modulus tests 57  
*N. Garg, A. Larkin & H. Brar*

Stabilization of clays using liquid enzymes 65  
*Y. Yilmaz, A.G. Gungor & C. Assar*

The effect of moisture hysteresis on resilient modulus of subgrade soils 71  
*C. Khoury & N. Khoury*

Dynamic properties of a full weathering granite subgrade and other pavement materials studied by model tests 79  
*J. Zou, Z. Li & X. Cao*
The use of geofiber and synthetic fluid for stabilizing marginal soils
K. Hazirbaba & B. Connor

Subgrade modification—practitioner’s experience
T. McCleary

“Baku Bayil Yard Site” soil improvement geotechnical works
E. Guler, A. Gure & E. Cetin

Resilient characteristics of bottom ash
H.H. Titi, A.R. Coenen & M.B. Elias

Precision triaxial equipment for the evaluation of the elastic behavior of soils
N. Araújo & A. Gomes Correia

Granular materials

A performance study of different curing materials applied to soil-Portland
cement base course cure
R.M. Fortes & J.V. Merighi

Pavement base unbound granular materials gradation optimization
J.P. Bilodeau, G. Doré & P. Pierre

Influence of the macroscopic cohesion on the 3D FE modeling of a flexible
pavement rut depth
F. Allou, C. Petit, C. Chazallon & P. Hornych

Effect of grading and moisture on the deformation properties of unbound
granular aggregates
L. U. Mathisen

IDOT test loop: Evaluating the field performance of various dense graded aggregates
G. Heckel

Analytical evaluation of unbound granular layers in regard to permanent deformation
L.A.T. Brito, A.R. Dawson & P.J. Kolisoja

Processed Portuguese steel slag—A new geomaterial
A. Gomes Correia, S.M. Reis Ferreira, A.J. Roque & A. Cavalheiro

Resilient modulus of hydraulically bound road base materials with high
volume waste dust
H. Al Nageim & P. Visulios

Characterizing natural and recycled granular materials for (sub)base layers
of roads by cyclic triaxial testing
C. Grégoire, B. Dethy, J. Detry & A. Gomes Correia

Resilient modulus of unbound base material containing extra waste
Stancombe limestone dust
B. Saghafi & H. Al Nageim

Characterizing aggregate permanent deformation behavior based on types
and amounts of fines
D. Mishra, E. Tutumluer, J. Kern & A. Butt

Asphalt mixtures

Use of polymer modified binders to reduce rutting in Nordic asphalt pavements
B.O. Lerfeld, J. Aurstad & N.S. Uthus
Contribution of asphalt mix components to permanent deformation resistance
P. M. Muraya, A. A. A. Molenaar & M. F. C. van de Ven

A new rutting evaluation indicator for asphalt mixtures
K. Su, L. Sun, Y. Hachiya & R. Maekawa

Evaluation of different predictive dynamic modulus models of asphalt mixtures used in Argentina
F. O. Martinez & S. M. Angelone

Development of wear resistant pavements using polymer modified binders
R. G. Saba, L. J. Baklokk, J. Aksnes & B. O. Lerfeld

Permanent deformation evaluation of Idaho Superpave mixes using the gyratory stability
F. Bayomy, A. Abu Abdo & M. J. Santi

Prediction of the dynamic modulus of Superpave mixes
A. Abu Abdo, F. Bayomy, R. Nielsen, T. Weaver, S. J. Jung & M. J. Santi

Laboratory evaluation of warm mix asphalt using Sasobit®
S. W. Goh, Y. Liu & Z. You

Dynamic modulus prediction of asphalt concrete using three tensile tests
S. Adhikari & Z. You

Assessing low temperature properties of asphalt materials by means of static testing techniques
M. Wistuba, K. Mollenhauer & K. Metzker

Ageing of stone mastic asphalt and evaluation of cracking resistance
S. Bächler, K. Mollenhauer, M. Wistuba & P. Renken

Fatigue resistance of hot mix asphalt at low temperatures—Is there a way to reduce the test efforts?
K. Mollenhauer & M. Wistuba

Hot mix asphalt produced from marble waste
C. Gurer, H. Akbulut & A. Yildiz

Discrete element analysis of aggregate variability, blending, and fracture in asphalt mixture
E. Masad, E. Mahmoud & S. Nazarian

Multidirectional behavior of bituminous mixture
P. Clec'h, C. Sauzéat & H. Di Benedetto

Design of pavements containing foamed bitumen recycled layers
M. Losa, R. Bacci, A. Terrosi Axerio & P. Leandri

Long-term study on asphalt mixture segregation in Connecticut: Preliminary results on use of MTV
D. J. Nener-Plante & A. Zofka

In-situ measurement techniques and developments

Development of the UK highways agency traffic speed deflectometer
B. Ferne, P. Langdale, N. Round & R. Fairclough

Implementation of a network-level falling weight deflectometer survey of Virginia's interstate system
B. K. Defenderfer, T. Chowdhury & R. A. Shekharan
Application of FBG strain sensors in the measurement of three-directional
strains within asphalt pavement
D. Zejiao, T. Yiqiu, C. Fengchen & L. Hao

3D visualization model of road surface
X. Li, S. Ma & X. Hou

Three years of high speed deflectograph measurements of the Danish state
road network
S. Baltzer

A method for benefiting pavement quality assurance measures related
to roughness condition surveys
C. Plati & A. Loizos

Structural roadway assessment with frequency response function
J.-M. Simonin, D. Lièvre & J.-C. Dargenton

Deflection measurement: The need of a continuous and full view approach

Modeling & methods of functional testing

Laboratory characterization of half-warm mix asphalts with high recycling rate
by means of the factorial experiment design approach
F. Olard, E. Beduneau, D. Bonneau, S. Dupriet & N. Seignez

Viability of the use of construction and demolition debris in hot mix asphalt
I. Pérez, M. Toledano & J. Gallego

Thermal stresses of asphalt pavement with temperature-dependent
modulus of elasticity
Y. Zhong & L. Geng

Rigid pavement reinforcement: Modeling of structural behavior
P. Domingos, M.L. Antunes & J.M.C. Neves

Development and testing of low noise pavements in Norway
J. Aksnes, R.G. Saba & T. Berge

Roughness progression models by regression and artificial neural
network techniques
E. Taddesse & H. Mork

Joint modeling for JCP: Successes and pending problems
E.H. Guo

Mechanistic modelling of potential interlayer slip at base sub-base level
E. Horak, J.W. Maina, S.E. Emery & B. Walker

PFC2D simulation research on vibrating compaction test of soil and rock
aggregate mixture
X. Jia, H. Chai, Z. Yan & Y. Zheng

Axi-symmetric analyses of vertically inhomogeneous elastic multilayered systems
J.W. Maina, Y. Ozawa & K. Matsui

Models to estimate k subgrade reaction modulus values based on deflection
basin parameters

VIII
Application of gray theory in settlement forecast of rock-fill
highway embankment
X. Wang, W. Qin, M.C. Wang & Z. Wang

FEM analysis of the bearing plate deflection tests on rubblized concrete pavement
Y. Liu, Y. Sheng & L. Wang

Data mining applied to compaction of geomaterials
R. Marques, A. Gomes Correia & P. Cortez

Finite element analyses of pavement materials at or near failure: A constant
bulk modulus approach
C. Gonzalez & S. Jersey

Use of 3-dimensional discrete element model to examine aggregate layer
particle movement due to load wander
P.R. Donovan, E. Tutumluer & H. Huang

Backcalculation analyses of deflection measurements

Backcalculation of the stiffnesses of cement treated base courses using
artificial intelligence
M. Miradi, A.A.A. Molenaar, M.F.C. van de Ven & S. Molenaar

Bearing capacity assessment of recycled asphalt pavements
V. Papavasiliou & A. Loizos

Dynamic analysis of non-destructive tests
W.T. van Bijsterveld & R.L. Álvarez Loranca

Automated pavement thickness evaluation for FWD backcalculation
K.R. Maser, L.A. McGrath, B.C. Miller, H. Ceylan & G. Santini

Analysis of FWD data and characterization of airfield pavement materials
in New Mexico
M.U. Ahmed, R. Bishu & R.A. Tarefder

SOFTSYS for backcalculation of full-depth asphalt pavement layer moduli
O. Pekcan, E. Tutumluer & J. Ghaboussi

Deterministic-empirical backcalculation of LWD deflection basins
R.N. Stubstad, H.C. Korsgaard, K. Olsen & J.P. Pedersen

New and/or innovative techniques in compaction & construction

Long-term in-situ measurements of concrete culverts with high fills
J. Vaslestad, G.Y. Yesuf & T.H. Johansen

Research and applications of new pavement structure based on large stone
porous asphalt mixture
B. Yufeng, W. Songgen & G. Huber

Fiber-reinforced concrete pavement design and material requirements
A. Bordelon & J.R. Roesler

Using falling weight deflectometer data for new construction interactive design
C.A. Lenngren

Appraisal of density-based field compaction control test validity
J. Sadrekarimi & S. Seyyedi

IX
