

Woodhead Publishing Series in Energy: Number 46

Biolubricants

Science and technology

Jan C. J. Bart, Emanuele Gucciardi
and Stefano Cavallaro

Oxford Cambridge Philadelphia New Delhi

Contents

	<i>Author contact details</i>	<i>xi</i>
	<i>About the authors</i>	<i>xiii</i>
	<i>Woodhead Publishing Series in Energy</i>	<i>xv</i>
	<i>Preface</i>	<i>xxi</i>
1	Renewable lubricants	1
1.1	Introduction	1
1.2	Scope	5
1.3	Chapter overview	6
1.4	Sources of further information and advice	7
1.5	References	8
2	Principles of lubrication	10
2.1	Introduction	10
2.2	Purpose of lubrication	11
2.3	Friction and lubrication conditions	13
2.4	Sources of further information and advice	21
2.5	References	22
3	Lubricants: properties and characteristics	24
3.1	Introduction	24
3.2	Lubricant base stocks	26
3.3	Classifications for oils and lubricating greases	35
3.4	Eco designations for lubricants	46
3.5	Environmentally acceptable lubricants	52
3.6	Physicochemical properties of lubricants	59
3.7	Sources of further information and advice	67
3.8	References	68
4	The transition from reliance on fossil resources to biomass valorisation	74
4.1	Introduction	74
4.2	Biomass	80

4.3	Transformation of biomass to bioproducts	86
4.4	Biomass potentials and limitations	107
4.5	Sources of further information and advice	112
4.6	References	114
5	Renewable feedstocks for lubricant production	121
5.1	Introduction	121
5.2	Natural vegetable oils and animal fats in lubrication	122
5.3	Industrial oil-crop engineering	174
5.4	Bio-based wax esters	192
5.5	Plant polymeric carbohydrates	205
5.6	Sources of further information and advice	221
5.7	References	226
6	Chemical transformations of renewable lubricant feedstocks	249
6.1	Introduction	249
6.2	Chemically modified fatty compounds in lubrication	251
6.3	Branched-chain fatty acids (BCFAs) in lubrication	322
6.4	Modified starch-based lubricants	324
6.5	Sources of further information and advice	327
6.6	References	329
7	Formulating lubricating oils	351
7.1	Introduction	351
7.2	Lubricant additive technology	358
7.3	Additive design for renewable lubricants	376
7.4	Biolubricant formulations	382
7.5	Sources of further information and advice	387
7.6	References	388
8	Quality assurance of biolubricants	396
8.1	Introduction	396
8.2	Biolubricant quality requirements	397
8.3	Biolubricant quality management	409
8.4	Quality control of biolubricant feedstocks	411
8.5	Standardised methods for testing lubricating fluids and greases	412
8.6	Biolubricant process and product quality control	417
8.7	Biolubricant analytical methodology	420
8.8	Quality of in-service lubricants	432
8.9	Sources of further information and advice	438
8.10	References	440

9	Legislation of relevance to lubricants	451
9.1	Introduction	451
9.2	Chemicals policy initiatives	454
9.3	(Bio)lubricant regulations	458
9.4	Ecolabels and international standards	465
9.5	Sources of further information and advice	468
9.6	References	469
10	Biolubricant product development	473
10.1	Introduction	473
10.2	Original equipment manufacturer (OEM) specifications for lubricants	475
10.3	Biolubricant standardisation	475
10.4	Performance tests for lubricants and lubricating greases	477
10.5	Biolubricant research and technology development (RTD)	480
10.6	Sources of further information and advice	519
10.7	References	520
11	Environmental life-cycle assessment (LCA) of lubricants	527
11.1	Introduction	527
11.2	Life-cycle assessment (LCA)	529
11.3	Sustainable product design	547
11.4	Sources of further information and advice	556
11.5	References	557
12	Biolubricant product groups and technological applications	565
12.1	Introduction	565
12.2	Automotive lubricants	576
12.3	Hydraulic oils	597
12.4	Biodegradable loss lubricants	617
12.5	Marine lubricants	625
12.6	Gear lubrication oils	627
12.7	Compressor oils	634
12.8	Turbine oils	644
12.9	Metalworking fluids (MWFs) and metal-forming lubricants	653
12.10	Lubricants in the food-processing industry	668
12.11	Biodegradable lubricating greases	673
12.12	Specialty lubricants	683

viii	Contents	
12.13	Solid biodegradable lubricants	685
12.14	Process oils	687
12.15	Sources of further information and advice	690
12.16	References	692
13	Markets for biolubricants	712
13.1	Introduction	712
13.2	European biolubricant markets	718
13.3	Biolubricant markets in the United States	726
13.4	Market opportunities for bio-based lubricants	740
13.5	Sources of further information and advice	749
13.6	References	750
14	Lubricant use and disposal	755
14.1	Introduction	755
14.2	Selection of (renewable) oil lubricants and greases	757
14.3	Lubricant consolidation	765
14.4	Degradation of lubricating oils and hydraulic fluids	769
14.5	Operational maintenance	773
14.6	Essential properties of used oil	800
14.7	Disposal of spent lubricants	802
14.8	Sources of further information and advice	816
14.9	References	817
15	Advanced lubricant fluids	824
15.1	Introduction	824
15.2	Ionic liquids (ILs)	825
15.3	Sources of further information and advice	841
15.4	References	842
16	Epilogue: the outlook for biolubricant science and technology	847
16.1	Introduction	847
16.2	Biodegradable lubricants for a sustainable life	850
16.3	Technology advances	855
16.4	Biolubricants: drivers and barriers	861
16.5	Current and future potential for biolubricants	865
16.6	Sources of further information and advice	869
16.7	References	869
	Appendix	872
A.1	(Bio)chemical and physical nomenclature	872
A.2	Physicochemical and mathematical symbols	882

A.3	General abbreviations	885
A.4	Main Internet sources of further information and advice	896
	<i>Index</i>	<i>901</i>
