

The Novarupta-Katmai Eruption of 1912—Largest Eruption of the Twentieth Century: Centennial Perspectives

Wes Hildreth and Judy Fierstein

Professional Paper 1791

**U.S. Department of the Interior
U.S. Geological Survey**

Contents

Foreword	iii
Abstract	1
Chapter 1. The 1912 Eruption and its Importance	3
Overview of the Eruption	3
Volcanological Significance of the 1912 Eruption	3
Chapter 2. The Context of the 1912 Eruption	13
Geographic Setting	13
Cultural Setting: Katmai Before 1912	13
Cultural Setting: The World in 1912	14
Scientific Context of the Early Katmai Investigations	15
Geologic Setting of the Katmai Volcano Cluster	17
Chapter 3. 1912 Eruption Narrative: What Was Actually Recorded in 1912	19
Chronology of Observations in 1912	19
Environmental Impact of the Eruption	22
Recovery of Flora and Fauna	22
Chapter 4. History of Investigations and Interpretations	25
Chronology of Geologic Investigations at Katmai	25
Principal Contributors to the Early Geologic Investigations at Katmai	42
Chapter 5. Products of the 1912 Eruption	45
Eruptive Episode I	48
Layer A	49
All-Rhyolite Ignimbrite	51
Layer B	56
Compositionally Heterogeneous (Main) Valley-Filling Ignimbrite (VFI)	57
Compositionally Heterogeneous High-Energy Proximal Ignimbrite (HEPI)	62
Time Constraints for Episode I	66
Eruptive Episodes II and III	68
Layer C	70
Layer D	71
Layer E	71
Layer F	73
Layer G	74
Layer H	76
Proximal Pyroclastic Density Currents	77
Proximal Fall Deposits: Contrasting Facies	77
Eruptive Episode IV: Dacitic Phantom Dome and Block Bed	78
Eruptive Episode V: Novarupta Rhyolite Dome	80
Chapter 6. Volcanological Aspects of the Primary Eruption Products	87
Volumes Erupted	87
Coignimbrite Ash and Coplinian Ash	87

Atmospheric and Climatic Effects	88
Changes in Compositional Proportions During the Eruptive Sequence.....	91
Banded Pumice	94
Contemporaneity of Falls and Flows	96
Characteristics of the Eruption Columns.....	97
Column Collapse and Emplacement of Pyroclastic Density Currents.....	98
Episode I Eruptive Sequence	98
Concurrent Deposition of HEPI and VFI.....	102
Particle Concentration Gradient.....	105
Densification of Flow Units.....	105
Episodes II and III: Small Density Currents from Column Margins.....	111
Physical Features of VTTS Ignimbrite Sheet.....	112
Aspect Ratio	112
Flow Units and Progressive Aggradation.....	112
Remobilized Flow Units	113
Diffusely Plane Laminated Ignimbrite.....	114
“High Sand Mark”	114
Valley Margin Runups	116
Induration and Welding.....	119
Degassing pipes	122
Emplacement Over and Against Ice.....	123
Chapter 7. Vent Structure at Novarupta	129
Asymmetry of the Proximal Ejecta Ring: The Turtle	132
Chapter 8. Caldera Collapse and Seismicity	135
Seismicity Accompanying the 1912 Eruption.....	135
Comparison with Other Seismically Recorded Caldera Collapses	139
Hydrothermal Explosion Breccia and Phreatically Ejected Mud Layers.....	141
Chapter 9. The Ten Thousand Smokes.....	143
Fumarolic Deposits	147
Fumaroles in Novarupta Basin.....	153
Chapter 10. Secondary Deposits.....	155
Syneruptive Runoff and Remobilization.....	155
Syneruptive Landslides	157
Lakes Impounded	158
Phreatic Craters and Deposits.....	165
Chapter 11. Posteruptive Evolution of the Landscape	167
Rapid Incision of Gorges.....	167
Alluvial Plains, Channels, and Veneers	168
Aeolian Deposits	170
Behavior of Ash-Covered Glaciers.....	171
Katmai Caldera Lake and Intracaldera Glacier Development.....	173
Photographic Comparisons: Then and Now	177
Chapter 12. The Katmai Volcano Cluster	179
Alagogshak Volcano.....	179
Mount Martin	179

Mount Mageik.....	181
Trident Volcano and its Domes	182
Southwest Trident (Eruption of 1953-74).....	184
Mount Katmai.....	186
Snowy Mountain	188
Mount Griggs.....	188
Other Volcanoes Behind the Volcanic Front.....	190
Present-day Magma Distribution?	190
Typically Small Magma Batches.....	191
Chapter 13. 1912 Magma Compositions and Preeruptive Storage	193
1912 Bulk Compositions.....	193
Major Elements.....	193
Trace Elements	196
Affinities to Nearby Volcanoes	196
Volatile Compositions	203
Mineralogy of 1912 Products.....	203
Isotope Ratios	205
Experimental Petrology	210
Preeruptive Magma Storage and Syneruptive Transport.....	211
Plausible Storage Sites of 1912 Magmas	212
No Preeruptive Magma Storage Beneath Novarupta	213
Data Bearing Upon Models of the 1912 Plumbing System.....	214
Origin of the Rhyolite Magma.....	216
Alternatives to a Zoned Reservoir?	217
Two Chambers?.....	217
A New Magma Batch from Depth?.....	218
Roof-Zone Remelting?.....	218
1912 Magma Storage Model	219
Chapter 14. Comparisons with Other Historic Eruptions	221
Chapter 15. Retrospective: Evolution of Ideas about the 1912 Eruption	225
Advances in Volcanology and Progress in Understanding the 1912 Eruption	227
Acknowledgments	231
