# Contents

1	Theory of ferrocenyl compounds <b>Etienne Derat, Karine Costuas, and François Volatron</b>	1
2	The thermochemistry and energetics of organoiron compounds <b>Joel F. Liebman and Suzanne W. Slayden</b>	45
3	Gas-phase ion stereochemistry of iron complexes probed by mass spectrometric techniques <b>Sergiu P. Paliu</b>	65
4	The coordination and catalytic chemistry of phosphinoferrocene ligands — A concise introduction and update <b>Petr Štěpnička</b>	103
5	The chemistry of diene–iron and dienyl–iron complexes <b>Ingmar Bauer and Hans-Joachim Knölker</b>	155
6	Ferrocenes in frustrated Lewis pair chemistry <b>Gerald Kehr and Gerhard Erker</b>	233
7	The chemistry of iron–alkyl complexes <b>Eduardo Alberch, Joseph S. Ulicki, MD. Sharif Asad and M. Mahmum Hossain</b>	249
8	Iron acyl complexes <b>Diana Liebmann, Marc Zastrow and Karola Rück-Braun</b>	299
9	Iron-promoted reduction reactions <b>Hideo Nagashima, Yusuke Sunada, Takashi Nishikata, and Arada Chaiyanurakkul</b>	325
10	Iron-mediated asymmetric synthesis <b>Aleš Korotvička and Martin Kotora</b>	379
11	Organic transformations promoted by Lewis acid iron catalysts <b>Emmanuel Vrancken and Jean-Marc Campagne</b>	419

12	Iron-catalyzed C–C bond formation with C–H bond activation <b>Naohiko Yoshikai</b>	499
13	Iron-catalyzed cross-coupling reactions <b>Laurean Ilies and Eiichi Nakamura</b>	539
	Author index	569
	Subject index	621
