**Evaluation of informal sector
activities in Germany under
consideration of electrical and
electronic waste management
systems**

TABLE OF CONTENTS

List of figures	V
List of tables	IX
List of abbreviations.....	XI
1 Introduction	1
1.1 Aim and scope of the thesis	2
1.2 Conceptual outline of the thesis	3
2 State of scientific knowledge	6
2.1 Characterisation of informal sector in waste management	6
2.1.1 Legal background	7
2.1.1.1 German Closed Substance Cycle Act.....	7
2.1.1.2 Electrical and Electronic Equipment Act	8
2.1.1.3 Legislation of transboundary shipments of waste	11
2.1.2 Classification and informal sector activity fields	13
2.1.2.1 Types of informal collectors	13
2.1.2.2 Sources of extracted materials from informal sector activities	14
2.1.3 Handling of informal sector activities.....	15
2.1.3.1 Countermeasures	15
2.1.3.2 Integration measures	16
2.2 Informal transhipped amounts	17
2.2.1 Informal collected amounts	17
2.2.2 Collected fractions and density of transhipped material.....	20
2.3 Economic and environmental impacts of the informal sector.....	20
2.3.1 Environmental impacts of informal sector activities.....	21
2.3.1.1 Positive environmental impacts	21
2.3.1.2 Negative environmental impacts.....	22

2.3.2	Economic impacts of informal sector activities.....	23
2.3.2.1	Positive economic impacts.....	24
2.3.2.2	Negative economic impacts.....	24
2.3.2.3	Economic drivers and incentives	26
2.3.3	Evaluation of informal sector activities.....	28
2.3.3.1	Life cycle costing (LCC).....	28
2.3.3.2	LCC regarding evaluation of reuse and informal sector activities.....	30
2.3.3.3	Eco-efficiency	31
3	Methodology of Investigations.....	33
3.1	Approach I - Survey of affected stakeholders.....	33
3.2	Approach II - Investigation of informally transhipped WEEE	36
3.2.1	Background of Investigations.....	36
3.2.2	Transhipped WEEE amounts across the eastern border of Germany ..	38
3.2.2.1	Scenarios of loading factor	38
3.2.2.2	Classification of border crossings	38
3.2.2.3	Calculation of total transhipped amounts.....	39
3.2.2.4	Determination of proportion of WEEE.....	40
3.2.2.5	Modelling of informal collection scenarios	41
3.2.2.6	Determination of transhipped material fractions.....	42
3.3	Approach III – Economic and environmental effects.....	42
3.3.1	Analysis of costs and revenues from the producer perspective	43
3.3.2	Analysis from a household, WMA and informal collector perspective ...	47
3.4	Approach IV - Eco-efficiency of informal sector activities.....	50
4	Results of Investigations.....	53
4.1	Approach I - Results of the survey.....	53
4.1.1	Official collection system.....	53
4.1.2	Appearance of informal collectors.....	54
4.1.3	Nationalities of informal collectors.....	56
4.1.4	Specialisation on fractions and collected amounts.....	57
4.1.5	Littering and economic impacts.....	58
4.1.6	Integration and countermeasures	60

4.2 Approach II - Results of transhipped amounts of WEEE	61
4.2.1 Total transhipped amounts per year	61
4.2.2 Transhipped amounts of WEEE per year	61
4.2.3 Quotas of transhipped amounts of WEEE	63
4.2.4 Transhipped material fractions of WEEE	65
4.3 Approach III - Results of economic and environmental impacts	68
4.3.1 Producer perspective	68
4.3.1.1 Base case	68
4.3.1.2 Impacts of informal sector activities according to modelled scenarios	71
4.3.1.3 Assessment of the modelled scenarios of all producers	74
4.3.2 Private household perspective	77
4.3.2.1 German private household	77
4.3.2.2 Polish private household	80
4.3.3 WMA perspective	85
4.3.4 Informal collector perspective	88
4.4 Approach IV - Eco – efficiency of informal sector activities	89
4.4.1 New production, further use and reuse: Washing machine	89
4.4.2 New production, further use and reuse: Television	93
4.4.3 Sensitivity analysis	96
5 Conclusion and outlook	100
References	103
Appendix	A-1
